Quality Service

Courtesy in Business

Fittingly framed and hanging in the Offices of one of the most important Public Service Corporations on this North American Continent is the following

'Did you say Please and Thank you?'

Broad minded men direct the destiny of that Corporation, men who know that public or private enterprises to be lastingly successful must operate for the public good.

Quality and Service are the two important factors in our business life today, but Courtesy is the door through which they must enter.

We are large producers of Hamilton Pig Iron and our output of Open Hearth Steel Blooms and Billets, Iron and Steel Bars of all shapes and size runs into enormous tonnage.

The products of our mills include practically everything that can be manufactured from Iron and Steel and these we distribute to thousands of satisfied customers.

Our business is an extensive one and a successful one. The World is our market: but our prosperity and success in the future, as in the past, depend upon the continued confidence, co-operation and good-will of the people we serve.

CHANNELL CHEMICAL CO., LTD., TORONTO, CANADA

A garage equipped with Stanley Garage Hardware.

DURING 1917, Stanley Garage Hardware will be more productive of prosperity to the dealers who sell it than ever before. The Stanley advertising will be increased and an enlarged Service Department will be ready to co-operate with you most effectively.

Write to-day for suggestions and advertising literature, and—if you do not already carry Stanley Garage Hardware—ask for Garage Catalog R11.

What a Well-Known Boston Architect Said:

"It has been my experience that swinging doors for the garage give far better satisfaction than sliding doors. They are easier to operate, never get out of order, can be made absolutely weather-tight, have no tracks to become clogged with snow or dirt, and take up no inside space."

Stanley Garage Hardware

is yet another reason why you should advise your customers to use swinging doors for the garages they build. It is strong and substantial and gives a handsome, distinctive finish to any garage. Stanley Garage Hinges hold the doors firm and prevent sagging or warping. And each sale returns to you a liberal profit.

Vol. 29 TORONTO, JANUARY 6, 1917 No. 1

Proposed Increase of Cartage Tariff

Increased Cartage Charges Apply to All Part Car Lot Shipments—Will Affect Retailers Everywhere—Must Stand as an Increased Charge Against Goods, Says Wholesaler—Many New Articles Added to List of Exceptions to Tariff—Some Wholesalers' Opinions.

THE proposition of the railway cartage agents to revise their cartage rates by increasing the rate on all less than car lot shipments, has been placed before the Boards of Trade in the municipalities where such companies exist in all centres east of Port Arthur.

Any such change will in all probability ultimately be added to the cost of goods sold and consequently the matter is one of the greatest interest to all merchants over all the territory effected by this proposed new arrangement.

Increase Only in Part Car Lots

The new proposition is substantially as follows: The rates on all straight car load shipments shall remain at the present figures, the change coming in the less than car load rate which up to the present has been the same as for the straight car. The rate changes are as follows: In Toronto car rate 3¼ cents per hundred pounds, less than car lot 4 cents per hundred. In Montreal the car load rate is fixed at 4 cents a hundred, the less than car load at 4½ cents. In all other sections the increase is from 3 cents a hundred the car lot to 3½ cents for the part car. In small lots or individual packages it is proposed to increase the rate from 20 cents per hundred, the present rate, to 23 cents.

New Exceptions to the New Tariff

The new proposals also add materially to the exceptions to which this established rate shall not apply. The added exceptions are as follows:—

"Acids in carboys or demijohns, agricultural implements, bananas not crated, iron and steel products exceeding sixteen feet in length, joiner's work, loose lumber and ladders, loose leather, potatoes and apples in less than carload lots for private house delivery, rags, bones, scrap metal, scrap paper, scrap rubber in bags or uncompressed bales, sewing machines and billiard tables, motor cycles, bicycles and bicycle parts, and all empty packages, new or old, except knocked down flat, and caskets and coffins."

The contention of the railway companies is that on these particular lines the difficulty of handling and in many cases the long haulage of small lots does not make the outlined rate sufficient to repay them for the labor and time occupied in the delivery.

It is proposed that these new charges should become effective on March 1. Of course, these changes are subject to the approval of the different boards of trade in the centres where such cartage companies operate, it being beyond the power of such companies to make any arbitrary changes from and established tariff without the consent of the Board of Trade. Just what action the Board may take on the matter is not yet known, as the proposed changes have only recently been brought to the attention of the traffic department, and no discussion of the matter has taken place.

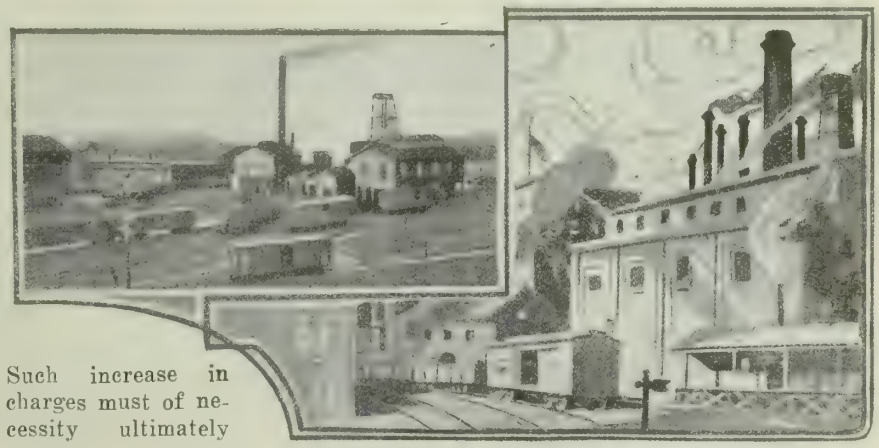
Extra Charges Will be Borne by Retailer

What effect will this have on the merchant? It will increase the cost of his goods, such at least is the opinion of a prominent wholeale hardware merchant of Toronto.

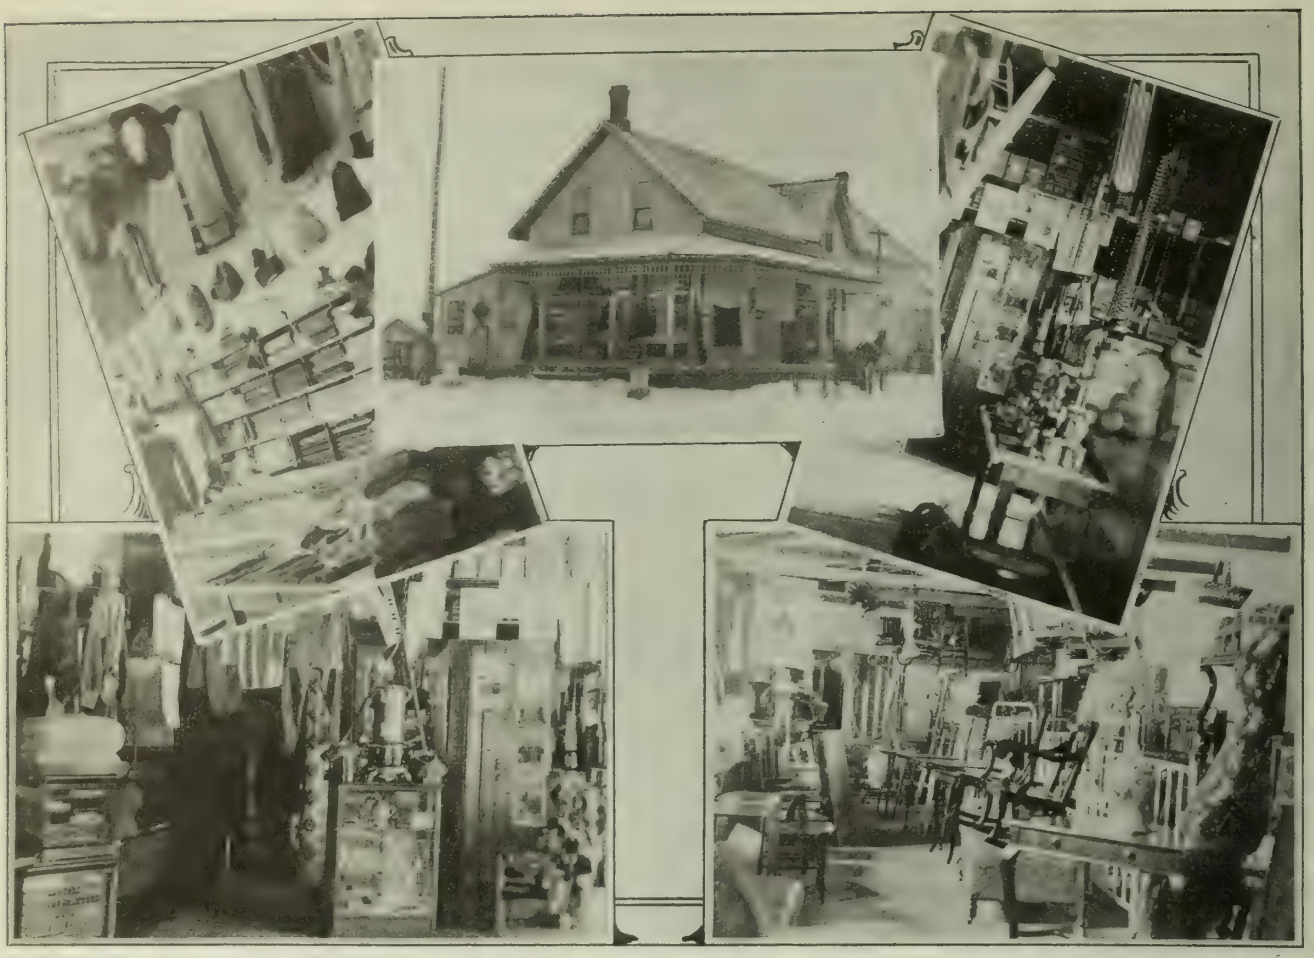
be borne by the consumer. Jobbers have been assuming so many small increases in the past that the cost of doing business has immeasurably increased. It has in fact gone as far as it can go, and any further increase must of necessity be an extra charge against the goods. Their own charges for doing business have increased in the past few years from about 12½ per cent. to 20 per cent."

"Would the increased rate mean any considerable item?" was asked. "I think it would be quite an item," was the reply. "In the hardware jobbing business there is comparatively few lines of goods handled in car lots. Some lines, of course, are stocked early in the season in quantities, but being near the manufacturing centre it is our principle to carry a comparatively small stock and turn it over frequently. I would judge that only 10 per cent. of our business is done in car lots, consequently the new tariff if it should come into effect would be operative against approximately 90 per cent of our business. Of course, the consignee already pays the cartage charges on goods shipped to him, but he would have this extra charge of ¾ of a cent in our case added to that amount,

(Continued on page 25.)



Such increase in charges must of necessity ultimately



Some views of the exterior and interior of P. C. Hanna's store at Campbellcroft, Ont.

Charging Interest on Accounts

A General Store's Accounts Collected on a Thirty-Day Basis — Outstanding Accounts Carried in Notes Bearing Interest—Putting the Country Account System on a Business Basis—Successfully Accomplished by Campbellcroft Merchant.

IS a cash business to be desired? This is a much discussed point, some people claiming that it is and others favoring a well regulated credit business, as much the more stable form of trade.

The farming communities however offer many conditions that complicate the discussion. For instance the farmers' business is a year business. He receives payment for his goods largely at one particular period of the year. At other times while perfectly solvent he may be short of actual cash. This has led to extended credits that have proved a very great hardship for the general merchant. A city merchant grumbles if his accounts slip over into the second month. A general store's open accounts may often run a year and when the season is bad sometimes slip over into the second or third year. These accounts too at the end of this period often amount up into the hundreds. This places the general merchant in a position of great difficulty. If he has not a very large cash reserve, he may find it very difficult indeed to finance.

Is the Cash General Store a Possibility

Is it possible for the general store to adopt any other system? The chorus of answering "No's" is almost unanimous. But there is at least one dissenting voice. It is possible to remedy the situation. It is possible to put a general store business on something like a cash business, without in any way antagonizing the patrons of the store. It is possible. This can be stated with conviction, because one man at least has done it.

Says Farewell to Mildewed Accounts

The store referred to is that of P. C. Hanna of Campbellcroft, Ont. Up to May 1915, Mr. Hanna had followed the general precedent, and he had the usual fine display of accounts that were almost mildewed with age. Some of them were good in as far as they were ultimately collectable, some of them were unquestionably bad. As Mr. Hanna pondered the situation, he came to the conclusion that from a strictly business standpoint they were all bad. Here were goods sold three years ago, still not paid for that had doubled or tripled in value. When the account was ultimately paid the goods would have been sold at about a third their value at the time of payment. Was this good business? If it was, Mr. Hanna could not see it in that light. He began to figure the proposition out.

Farmer a Good Financial Risk

The farmers weren't actually poor. Therefore having money their credit should be good, even if their money was tied up in a prospective crop. Why then thought Mr. Hanna should he display all the confidence. If this crop prospect were a real asset. Why should

not the farmer be content to finance with it as a backing. From this idea grew the General Cash store as an actual experiment in business. It is not a cash store as the retail trade accepts that term, but rather in the way the wholesaler considers it, counting 30 days as a cash basis. In May 1916 this new system was inaugurated. A notice was sent out to all Mr. Hannas customers, pointing out how the war had changed all conditions of business and had made the financing of a large stock a much more difficult task than it had been in the past; and outlining his proposition, for making the store from that date a cash store allowing only thirty days credit. A good many of Mr. Hanna's friends predicted a sudden and complete demise of the business he had built up with such care. A cash store, even that kind of a cash store wasn't a possibility in the country, they said. Mr. Hanna believed otherwise and went ahead. With what success?

The Proof of Success

Well, Mr. Hanna keeps a monthly balance on all his business. That ought to show whether business was falling off or not. The first month of the business under the new system, showed very little change over the same month of the preceding year, if anything it had a little better than held it's own, the following month however when the scheme had a real chance to show itself the business showed an increase over the preceding year of a cool $1200. And mark you that wasn't in the doubtful asset of a statement but in good coin of the realm, or else in notes that were discountable at any bank and that in the interval paid their way.

Taking a Farmer's Note for Credit

Under the new system a surprisingly large number of accounts are actually paid on maturity. When a man however is not in a position at the moment to meet this liability Mr. Hanna takes a note for six months. In all instances this has been readily given. This note bears interest at 7 per cent. before and after maturity. Now seven per cent. may not be a very gilt edged profit, but it's a long way better than nothing, and it's a still longer way better than having to borrow money at seven per cent. to help carry these long overdue accounts on the books. These notes are negotiable. But Mr. Hanna does not discount them. If it is of advantage to the bank to discount these notes it is also of advantage to the merchant to hold them himself. Even seven per cent. is an item worth considering. Mr. Hanna does not however forego all the advantages that the possession of this negotiable paper gives him with the bank. He deposits these notes as an evident and available asset, and they are recognized as such by the Bank.

The Three Request System in Buying New Goods

It is not safe to draw conclusions from one case as to what might be feasible in another, but in Mr. Hanna's case, at least, this has been a shining and outstanding succes. Of course there may be a good deal in Mr. Hanna's method of doing business. He is a man of many ideas, and possibly some of these have also had a good deal to do with his success. For instance, how many men have any system in ordering new goods? Well, Mr. Hanna has. He keeps what he calls a "Want Book," when a new article is asked for he does not at once order it. He used to, only to find that the one demand was possibly the only one he had. Now he enters the demand in the Want Book, if there is another request for the same article is received he makes an additional entry in the book if it is asked for a third time, he considers that there is a real demand, and the article is at once stocked. All new goods have to meet this test of three calls before they are stocked. In this way he has been able to avoid dead stock to a most extraordinary degree.

Working With the Drummer to Beat the Mail Order House

What about the mail order business Mr. Hanna was asked. Does it curtail your trade to any extent? Not much, he thought. A good many merchants do the mail order house's advertising for them by talking against them all the time. A little opposition he thought didn't do any harm anyay. The hardest opposition any man could have, was none, at all, this was his situation. It gives the people nothing on which to base a comparison of prices and consequently they often thought that they were being overcharged when there was no justification for such a suspicion. In this way the mail order house has done him some good. Not that he lets them have their own way. He has his own methods of meeting the competition. And "the head and the hoof" of these, as Kipling would say, is to keep posted on his customers' wants. With that end in view he spends a good deal of time out in the country. He does a large produce business, of which mention will be made later, and while engaged in this he keeps posted on what is going on. If a farmer is building a new barn, there is roofing, lightning rods or a windmill to be thought of. If he doubts his own ability to sell this man he gets in touch with the wholesaler. The tip is worth something to them and they will send an expert salesman. Mr. Hanna instanced one little trip with a salesman when they had sold 145 squares of roofing, in a couple of hours, his profit on this little transaction netted him $58.00. This matter of keeping abreast of the farmers' needs and suggesting them almost before they have entered the farmer's own mind has helped him greatly in his business. For instance Mr. Hanna says: "There is a lot of information that may be gained in studying outgoing and especially incoming freight. It lets you know who is buying and where; valuable hints may often be gleaned this way."

Letting the Farmer Weigh and Count His Own Goods

The handling of produce is one of the big ends of Mr. Hanna's business and here too he has some ideas of his own. "For one thing," said he when asked what methods he adopted, "When poultry of any description is brought in I always let the farmer weigh his own. I examine the weight afterwards of course to make sure, but more as a matter of curiosity, as it were, not in a way to make them think that I doubted that it had been correctly weighed. That saves a lot of suspicion on the part of the farmer." He follows the same system in buying eggs, the farmer counts them himself. "If the farmer claims to have 15½ dozen and my count shows only 15 I never dispute the point with him. I may have made a mistake, and anyway if I check him up I will probably offend him and the loss doesn't amount to much. Of course if it happened regularly, that would be a different matter. Mr. Hanna does a big business in this line. For instance, during the egg season he often ships over 800 dozen a week. Butter 800 to 1,000 lbs., while weekly shipments of poultry often run as high as 3,000 lbs. and around the Christmas season often more.

Cash Price or Trade Price for Produce

Since his new cash business system went into effect Mr. Hanna has adopted a new method of handling produce too. For instance, he has two prices. One a cash price, the other a trade price. The trade price was one cent higher than the cash price, and whenever a customer took his payments in trade instead of cash they get the advantage of this increased price. The result of this is to reduce the people asking for actual cash to an almost negligible quantity. Prior to the introduction of the cash system, Mr. Hanna used to give due bills for this produce that were redeemable at any time. The difficulty with this was that the farmers were apt to hoard these due bills for months. These were always an overhead charge on the business and might be pre-

HARDWARE & METAL
CANADA'S ONLY WEEKLY HARDWARE PAPER
Vol. XXIX. TORONTO, JANUARY 6, 1917 No. 1

A NEW kind of food is on the market in the form of rabbit sausage. Cost of living may take another jump.

* * *

WITH stock-taking over, most hardwaremen can now settle down to a vigorous campaign on winter lines.

* * *

THE KRUPPS have declared a 12 per cent. dividend. This doesn't seem big in view of their output. But it may be the last they will ever get.

* * *

STOCK markets are peculiar institutions. The declaration of war closed them up; now hints of peace cause the bottom to fall completely out of stocks.

* * *

SOME MEN, usually well-informed, are convinced that war cannot last much longer, owing to internal conditions in Germany. Business men should consider this possibility.

* * *

AN AMERICAN newspaper referring to the new Order-in-Council, speaks of it as Canada's New Sherman Law, and describes it as: "The extreme of public prejudice visited upon the most convenient goat." Well that's about the way it looks apparently to a lot of the folks over here.

* * *

BRADSTREETS report of failures in the United States for the week of Dec. 16 shows 322 failures for the week as against 297 for the same week of the preceding year. It is interesting to note that 92 per cent. of the failures had less than $5,000 capital and 6 per cent. had from $5,000 to $20,000. An interesting commentary on these bankruptcy proceedings is the case of one of the failures, liabilities $13,000 assets $12,000 of which $10,200 was represented by open accounts.

DANGER OF CUTLERY STOPPAGE

ALTHOUGH an effort has been made to devote as much attention as possible to the promotion of the export cutlery trade, there is great danger of the Sheffield cutlery industry being brought to a standstill for want of raw materials. The English *Ironmonger* referring to the situation points out that the cheapest grades of table cutlery, scissors, spring knives, butchers' knives, matchets, and other large cutting instruments are made of open-hearth steel, the distribution of which is now strictly controlled to conserve supplies for the manufacture of munitions. No such steel may be sold or rolled unless the order is accompanied by a Ministry of Munitions certificate setting forth the purpose for which it is ultimately to be used. Most of the cutlery makers get their cheaper class blades from what are known in Sheffield as cutlery forges, and the mills are not allowed to roll steel sent by these forges without the above-mentioned authorization, nor are the forge-owners able to replenish their dwindling stocks of steel unless they can guarantee that the material will be wholly used in the execution of Governments contracts. The cutlery makers use the blades for war, export, or domestic orders as circumstances may require, and do not appear to have troubled about certificates. As the consumption of steel for cutlery purposes is a bagatelle in relation to the aggregate output of steel, it was thought that the Government, without incurring any risk of injury to national interests, might allot to the cutlery industry a specified tonnage sufficient to cover its needs for a given period, leaving the distribution of the material to a body representing the firms interested. The Government was urged to adopt this plan or some other form of relief, but the official attitude is that the public can do without cutlery and that men and women engaged in its manufacture can be employed in some occupation more useful to the country in its prosecution of the war.

The Government, however, realizes the importance of promoting export trade and has made some concessions in this connection. The scheme, however, it is said, is unsuitable to the needs of the industry, and is so burdened with details and restrictions, that if adhered to will suspend business to a great extent.

STOVES ADVANCE IN U. S.

UNITED STATES manufacturers of stoves, ranges and heaters, will, it is said, have to advance prices on stoves owing to new conditions. U.S. stove manufacturers were recently called upon to confer with the representatives of 14,000 moulders who demanded among other things a wage increase of 26 per cent. A meeting was held at Atlantic City and the stove manufacturers were forced to sign an agreement with the Moulders' Union, whereby the latter will receive an increase of 18½ per cent. in wages, and the working day will be cut by ½ hour. With pig iron double its former price, and sheets, bolts, plating supplies, etc., all costing more than ever before higher prices are inevitable. The new scale of wages went into effect on January 1. The stove men were represented by the Conference Committee of the Stove Founders National Defense Association. The original demands of the Moulders' Union were declared to be prohibitive. A compromise was reached after several days' discussion. For a time it was feared that there would be a general tie-up of the industry. It is stated that the advance in wages is the largest single advance in the history of the trade.

How Matt Horton, Hardware Dealer, Built Up His Business

Matt Lives in a Canadian Town of 3,000, Like Many Other Hardware Dealers — His Mailing List—His Maps—Matt is a Good Mixer, and Makes it Pay.

By John C. Kirkwood.

WE'LL call him Matt Horton, because that isn't his real name, and the fictitious name will disguise him sufficiently.

Matt is a hardware dealer, and a good one. By good I mean that he sells lots of goods in a year, and makes a profit most of the time; and he does this by trying all the time. Matt's backbone works, and is the real stuff; it is not just gelatine.

Matt's so-called "opposition" is no older than Matt in years, perhaps no older in sin; but in fashions and in ginger he is a decrepit. His chief worry in life is Matt Horton, and his chief customers old fogies whom Energy and Initiative and Sunniness hate as they themselves are hated. These desiccated and drab old codgers with penny wants listen to Dried-up Sloth analyze Matt and forecast his early downfall; and Sloth listens to their 'ay-'ay's, and takes comfort in their nodding heads.

But we'll forget Old Dried-up and his brethren, and keep company with Matt, for Matt smiles and does things and has no grouch.

Ask Matt to tell you his story, and he won't do it. Listen to him much and you'll learn from parentheses in his conversations how he wins as a merchant.

We're going to put words into Matt's mouth—his own words, though not all spoken at once; and put together in a way that might lead him to deny having ever said them; but he can't—and won't—deny that they tell the story of his success and progress, and of his ways and ideas, and perhaps Matt's story will cause some reader of HARDWARE AND METAL to say "By jinks, I'm just as good a man as Matt Horton. I can do what he has done. And, by jinks, I am going to try."

Matt Starts Business in Hurston

"You know, boys, how I came to be one of you. I bought this business after Dick Riley had run it into bankruptcy, and there was nothing to buy but a pretty poor lot of ancient stock. But the business was a good one when Dick's father was alive, and yours is a pretty good town, boys, and you've got a mighty good country all about; and I figured that things were not so bad when all was said and done, and that I had as good a chance in Hurston as I would find anywhere, and so, boys, I set up here.

The story of Matt Horton makes good reading—good because it is suggestive and meaty; and has to do with Salesmanship—the hardware dealer's and the World's greatest business.

The methods that Horton used, and his ideas, can be used by others—and some of them should be used by all retailers.

This is the first installment of Matt Horton's story. The second will appear in an early issue of HARDWARE AND METAL.

"The Riley location was first-class, and was known as a hardware store for forty years; and the old store had possibilities in it for improvements. But it was at the beginning a good deal too big for my stock and my business. However, I found ways of overcoming that situation.

"When I came to Hurston I was a stranger; and that was something I didn't mean to remain long. Of course the churches were after me, but I wasn't minded to get caught up too early in any net of that kind. Also, because I was unmarried, I had a welcome in certain quarters, but I wasn't matrimonially inclined in those days. A bride I had—my business; and my business was not just my stock; it was also the consumers of my stock—the good people of Hurston and of the country round about.

Getting Acquainted

"I have said that my first objective was to get acquainted — to get myself known, and to get others to know me.

"Your two weeklies gave me one means of introduction — a sort of short-cut route; but, as you know, I didn't rely on them altogether. Newspapers are pretty good; and the more you use them the right way, the better they get; but they weren't quite personal enough for me.

"Perhaps I did put pretty live 'copy' into my ads., and perhaps they did make everybody pay attention—some attention—to me; but they didn't get me a whale of a lot of business at the beginning. You people who live about here are a canny lot, and you don't answer back any too quickly to the courtings of strangers. I've seen others who have come to Hurston since I came try to 'rush' Hurstonians and the farmers shopping here; and use page ads., and offer big bargains; and I've seen their failures.

"No, rush and noisy ways don't win me, and I concluded they wouldn't win others, especially those more conservative than I am. Also. I wasn't out to sell at bargain prices. I had to get a profit in order to pay my way; and besides, I didn't want to get the people I meant to serve thinking I was a cut-price chap.

A Mailing List

"Now, if there is one idea I have deep-rooted it is that the way to get acquainted is to know people's names and faces and as much about them as a merchant should know. I don't just want to know that Hurston's population is 3,000; and that the county contains 17,000 people. I want to know the names, addresses and businesses and probable requirements of these 17,000 or 20,000 people for whom Hurston should be a shopping centre.

"You know that you hear or have heard from me through the mails; that you've had personal letters—addressed to you personally, and signed by me personally—probably a score of them; and you know that now we have a rural telephone system in our county, I take trouble to 'phone you sometimes — when I have something worth your hearing about.

"And so I set about the very first month I lived in Hurston to build up a list of customers and should-be customers—in Hurston and outside of Hurston. I had given some attention to mailing lists and knew how to compile them and use them.

"Now I am not a good penman so I do not write out my own cards. I have a young girl who does that for me.

"The first girl I employed I found by offering a prize for the best handwriting, and the competition was open only to Hurstonians, and open only to those aged 16 or over. This little competition, I may say, didn't do me any harm as a form of advertising.

"I am not going to tell you about my card index system, though I'd like to say much about it; except this: I use two

colors of cards, white and buff. The white ones represent non-customers; the buff, customers. When I began I had mostly white cards in my drawers. Now the white cards are fewer than the buff-color cards. These white cards worry me and tell me where to point my guns.

"The first girl I had came to me for an hour or so each week, and sometimes took work home with her. Anything I have paid her she certainly earned. She's married now, but I have a good successor. This mailing list of mine, and my use of it, have earned me literally thousands of dollars. It is one of my chief assets, from my point of view, and it interests me as much to-day as the first day I installed it. I know that it has given me tremendous advantages over others—even over the department stores.

Matt a Good Mixer

"I make it a point to know everybody I can—children and grown ups. I ask who that is and who this is—man, woman and child; and I jot down the information. I take particular pains to get names right—initials and spelling. I ask questions right and left. And in the case of men, I talk with them whenever and wherever possible.

"They say I'm a pretty good mixer. Perhaps I am, but it pays me; and, besides, I enjoy it. I've something more to say to a man than, 'How's the missus?' and guff of that sort. I want him to talk to me—to give me information, his views and opinions; and so I try to get him started on subjects that he can speak on.

"People say of me, 'Matt's a wonder! He knows everybody and he can talk about anything.' But if this is true, it is because I have cultivated this quality of being a good mixer.

Matt Uses Maps

"You ought to see my maps! Come in some time and see them. I have maps of Hurston and all the townships tributary to it. I've had the school-children draw these maps for me—another competition. I got the inspector interested and the school teachers interested, and the rest was easy. I have the names of every family in the county and know exactly where each lives; and I mark with colored pins the homes and farms to which I supply goods.

"These maps furnish me with a vast amount of information. I know, for example, the farms which have gasoline engines—and this tells me those which have not. Those with gasoline engines need gasoline; those farms with no gasoline engine are prospects for one—and I sell gasoline engines and gasoline.

"I know the farms which have feed and litter carrier systems, and steel stanchions and stalls; and those that have not. The information is useful to me—pays me most handsomely.

"I know the farmers that have motor cars—they need gasoline and accessories; and I make a good deal of money out of this definite knowledge of mine.

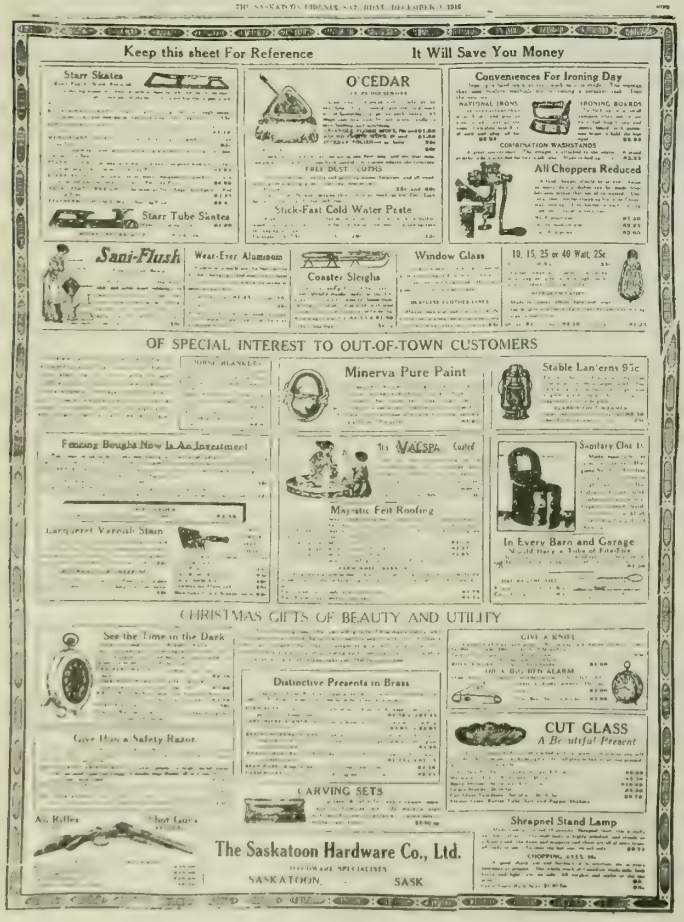
"I know the farmers that go in strong for dairying and stock-breeding—for I have quite a number of things to sell them.

"But I don't need to say more about my maps. All I want you to know now is how my maps come to be real salesmen for me.

Matt Doesn't Do It All Himself

"There is one thing I want to say: I use the brains, time and services of others to help me run my business. I think my time can earn me more money when spent in constructive and selling work than when spent straightening up shelves, dusting and doing such common work. I think I have the selling sense in good measure and pretty well developed.

(Continued on page 25.)



This 2 page advertisement in a Saskatoon paper is meritorious both as an example of good treatment and copy, and as an example of faith in the future and value of publicity. The advertisement is that of the Saskatoon Hardware Company, of which J. L. S. Hutchinson is president and manager, and was prepared by Wilfrid R. Kell, who is manager of the Publicity Department of the Retail Merchants' Association of Canada. Mr. Kell writes that in spite of inclement weather and war conditions, good business was done and the cost of the advertisement warranted by results. The sale featured is an annual Red Tag Sale to dispose of all surplus stock—a good idea.

Cardwriting Made Easy

by R. T. D. Edwards

LESSON NO. 24

USES OF THE INDEX HAND

IT has been emphasized many times in this series of cardwriting lessons, that it is, not at all necessary to be an artist to become a proficient cardwriter. Nevertheless, it is necessary to be able to draw, to a certain extent, in order to fulfill all the requirements of a cardwriter.

Among the many little bits of art work a cardwriter is called upon to do is the index hand. This is something a cardwriter in a large store may have to draw many times during a week's work. A cardwriter of a smaller store does not have the same call for this kind of work but should be able to do it as well as his more experienced brother.

Speed and effect are the two main points to be obtained. The cardwriter should be able to make the directory or index hand very rapidly, as this style of card should be turned out just as quickly as the other style of cards.

There may be many cardwriters who cannot work quickly because of non-practice. For the benefit of these, the following quick method of obtaining a drawing of the index hand is suggested. Draw very carefully and lightly an index hand on tough drawing paper. Have it well proportioned and full of life. When it is satisfactory trace heavily. This will be a pattern that is always ready for instant use. To use, place a piece of carbon paper under the drawing and trace. This will give a faint outline in the desired position on the card. This should then be retraced with pen or brush as the case may be. About three different sizes should be made and kept ready for instant use. These patterns may be reversed by simply using the carbon paper with the black side up and under the drawing already on. This will give a drawing of a hand pointing in the opposite direction.

One thing essential is to have the drawing beyond reproach, even by an artist. That is, have the proportions correct and make it appear full of life and snap. This must be done entirely by outline. Shading of the drawing should not be attempted. Another thing to be avoided is the tendency to reproduce the human hand in its natural state. It should only be made as an outline drawing that will give at a glance the desired result of acting as a directory.

Some cardwriting courses on the market to-day use a method for hand formation which should be commented upon. This style is the using of angles, etc., in order to get the hand in the proper proportions. It is a very slow process and all one can say about it is that it is not "modern cardwriting." It is more of a draughtsman's or designer's method and too slow for rapid cardwriting.

It is well to have various styles of index hands that can be used for variety's sake. If one keeps their eyes opened, these may be found from time to time in magazine advertisements.

Note carefully the collection of cards illustrated in Fig. 1. Here we have a few styles of index hands in actual use on show cards. These only represent a few of the various ways in which the hand can be used.

Card No. 1 is 11 x 14 inches in size and shows a brush stroke outline index

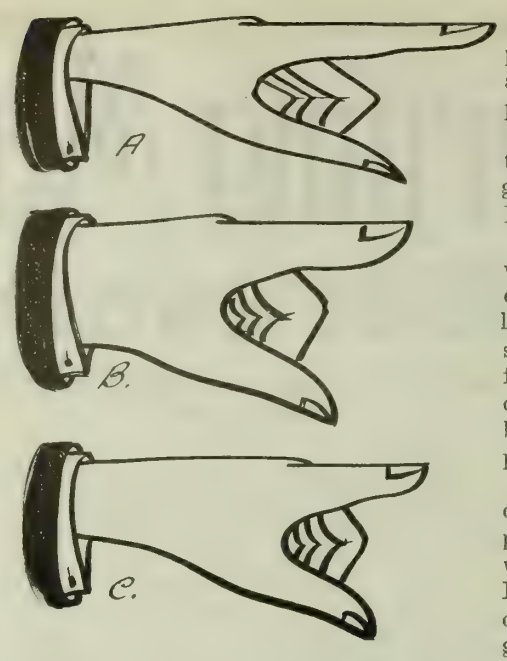
hand in use together with the upper case lettering shown in this month's chart.

The pointer shown is a style which is favored by many cardwriters, both on account of its being an easy one to execute and being snappy in appearance.

Card No. 2 is 14 x 22 inches in size and written portrait style. A card after this nature can be used to attract the attention of the customer. It should be hung near the stairway so that the hand would be pointing down in the right direction. If suspended from the ceiling, it should be similar on both sides. It will be noticed the hand is not the same shade as the card. Mix a flesh shade of opaque show card colors (red, yellow and white) and paint all the interior. This is not shading and only takes a couple of minutes to do. This makes a very effective contrast to the white background. The hand is first outlined in black with a small brush. The lettering on this card follows out this month's lesson chart with the exception of the words "in the basement," which are brush stroke work. The underlining is flesh color, the same as the hand, and the outline border of the card is black.

Card 3, the "Children's Section" card, shows the use of a silhouette pointer. This makes a very effective card and readily attracts the attention of the customer. This drawing is very similar to that on card 1, except that this one is made silhouette by painting in with black. Note how the narrow white lines bring out the lines of the fingers and nails. Note how the cuff is treated. The lettering is of the lower case type and shows this month's lesson put into use.

In card No. 4 we have the arrow used on the card as a pointer in place of the hand. This is not so popular as the latter, but is quite as effective. It is very easily drawn and serves as a variety. Note how the grey shade is used behind the arrow. This makes it stand out in relief. The word "stoves" illustrates how a work with the letters receding is made. It starts at the left, about 2½ inches in height and slopes to about 1½ inches. The top of the work is kept parallel with the top of the card. The bottom of the word slants up to the right.



Card No. 5 shows the pen-drawn index hand in use. A drawing like this should be used on a card that is to be seen at "close up." The fine lines are too light for a card that is to be seen at a distance. This card also shows this month's lesson in use.

It will be noticed by viewing all these cards the importance of proper spacing to allow for the index hand. Note how the lettering is curved and sloped to make the pointer prominent. This is a very important part of the work and special attention should be paid to it.

Errors in Drawing

In Fig. No. 2 we have an object lesson. These are a few of the many errors made by beginners who will not take the time to make these drawings correct.

"A" Here is a hand that is too narrow. Note how narrow the wrist is. This mistake is often made and should be avoided.

"B." This is just the opposite to the preceding one. It is too short and thick at the wrist. Note how clumsy it appears.

"C." This is another common mistake. The wrist is too long and the fingers and thumb are too short and stubby It is important that this be avoided.

During this entire series of "Cardwriting Made Easy" lessons, many varieties of alphabets, both of heavy and light formation, have been taken up, some suitable for large show cards and others for the the finer kind of show cards. All of these are important to the cardwriter because each and every one has an important place in the show card world.

The alphabet this month shows yet another style. This one is called by sign painters "thick and thin." Some cardwriters call it a single and double stroke. It is a bold faced letter which is used on large signs and show cards alike with good effect.

For the finer show card work it is not advisable because a small bold faced letter has not the appearance that a finely spurred pen or brush stroke Roman letter has. So it is well to keep this letter to the larger cards and posters. For any card or sign that is to be read at a distance this type is excellent.

For reference sake we will call this a thick and thin type. It gets this name because one stroke of the letter is thicker than the other. On show cards, when this type is used, always use a brush that makes a stroke the same width as the narrow stroke of the letter. That means the narrow strokes are all to be made with one stroke of the brush. The wider strokes being twice as broad or two strokes wide. This type when executed properly does not need any filling in because the outline strokes will completely cover the centre of the letter.

It will be noticed that the stroke of each letter has not been numbered on this chart as on previous charts. This is more difficult to illustrate on account of the more numerous strokes than the brush stroke letters have. However, with

the previous lessons in mind one should experience no difficulty in working out this formation. The numerous overlapping of strokes also makes it impossible to number them correctly.

The first thing is to have the brush working properly. It must have a good chisel point and without a ragged edge. As the width of the fine stroke is a brush stroke use the size of brush that will make this stroke properly. Have the color working smoothly and work the brush to a good point on a piece of waste card before attempting this work. An individual explanation of this alphabet is not necessary, as the same method applies all the way through. Some of the curved letters are marked when the strokes join or overlap. The arrows indicate the direction in which to draw the brush. Notice that the ends of all strokes are finished with a stroke across the end.

PROPOSED INCREASE OF CARTAGE TARIFF

(Continued from page 17.)

while another ¾ of a cent a hundred, as I said before, would perforce have to be marked against the selling price of the goods. Though I have a good deal of sympathy with the cartage companies and their difficulties, we would register a protest against such an increase as a matter of principle until it was proved that the advance was necessary."

Considers the Increase Justified

A promient wholesale paint jobber of Adeltide Street West, Toronto, was of the opinion that the increase was quite justifiable, and was of the opinion that the wholesale trade as a rule would consider it so. He admitted that the extra cost would have to go against the charges of the goods, but thought the item was a negligible quantity as far as the individual buyer was concerned, though the aggregate would probably be a big item for the cartage companies.

The matter is now in the hands of the different Boards of Trade awaiting their action on the matter.

CHARGING INTEREST ON ACCOUNTS

(Continued from page 19.)

sented at awkward times. Now everything is paid for in cash, that is to say, by one or other of the methods noted above.

This incoming business as is readily seen is a big item, but not more so than the outgoing. Mr. Hanna carries a stock valued around $15,000 and practically every cent of that is good, live saleable stock. He doesn't let dead stock accumulate, nor does he leave it on the shelves to get shop worn and until the customers' eyes have grown tired of it. When he once definitely decides that the commodity is not moving, he withdraws it for some time, bringing it back again later and featuring it in a prominent place at a reduced figure. Often indeed he finds some place to dispose of it even without reintroducing it into the store stock.

A Comprehensive Stock

Mr. Hanna handles groceries, dry goods, hardware, boots and shoes, in which he carries a stock valued at $22,000, which is ample evidence of its completeness. He has also a very complete furniture department that occupies a long room opening off the store proper. The fact that he can turn this stock over three times a year is an ample proof that this is a paying line. Heavy hardware is handled in a department back of the store. Here too is a store room of flour of which a heavy supply is carried, Mr. Hanna using it as a leading line and selling it at a small profit. Upstairs he keeps standard remedies, hats and caps, a tinware department, and also here he carries superfluous stock that has not yet been required. Upstairs too he has a store room for seasonal goods. For instance, summer dress goods that are carried over are securely stored here, protected from light and dust and moths. This little idea alone has saved Mr. Hanna much needless loss.

Mixing Brains With Work

Here is a general store run by a man who has put brains into his work. It is not advantageously situated to any extent, yet Mr. Hanna assures HARDWARE AND METAL that he would not give up his location in Campbellcroft, that only claims a population of about 200 persons, and at that apparently exaggerated, for a store of like proportions in the best business town known. Probably he is right, though still in the very early thirties Mr. Hanna has built up a successful business and has proved to a conclusion that the general store is a perfectly sound commercial proposition, with limitless opportunities for growth and expansion.

HOW MATT HORTON BUILT UP HIS BUSINESS

(Continued from page 22.)

"I'm something more than just a storekeeper—a man who keeps a store open for the convenience of those who want or need the merchandise he sells.

"The I-am-here-when-you-want-me type of dealer is a pretty dead sort of individual, and gets little fun out of life. As for myself I find supreme delight in making the good people of Hurston and vicinity actually want what I want them to want.

"When I came here there was no snow-shoeing done, no ski-ing. So I used silent yet effective methods to start some of the young people snow-shoeing and skiing. It sells for me every year some pairs of snow-shoes and skis, and has helped to make my store first for sporting goods.

"I just mention this one instance to give you a better understanding of my ideas and ways. My business is to make more business, to sell more than the public are likely to buy if left to themselves. I think I do them good by rousing them out of their dull content, and I know I make money out of their awakened desires, and I get a pile of fun out of my activity."

(To be continued.)

TRADE INQUIRIES

1791. **Iron and steel.**—An East London firm asks for correspondence from Canadian manufacturers of regular bar and steel iron.

1792. **Woodenware.**—An East London firm asks for samples when possible, catalogues and price lists of woodenware of all kinds, including stepladders and handles.

1796. **Hardware.**—A Queenstown firm make demand for supply from Canada of hardware, household and building. Special cheap lines of goods suitable for native trade. They request samples when possible, also catalogues and price lists of lanterns, cutlery, household tools, farm tools, shovels, enamelware, household utensils, stoves and other lines.

1797. **Binder twine.**—A Queenstown firm asks for samples and prices of Canadian-made binder twine.

1800. **Wire.**—A Queenstown firm asks for sample, prices and particulars of packing on such lines as fencing wire, baling wire and wire netting.

1801. **Hardware.**—A Port Elizabeth firm make demand for supply from Canada of hardware, household and building. Special lines of cheap goods suitable for native trade. They request samples, when possible, also catalogues and price lists of lanterns, cutlery, household tools, farm tools, shovels, enamelware, household utensils, stoves and other lines.

1804. **Hardware.**—A Port Elizabeth firm make demand for supply from Canada of hardware, household and building. Special lines of cheap goods suitable for native trade. They request samples, when possible, also catalogues and price lists of lanterns, cutlery, household tools, farm tools, shovels, enamelware, household utensils, stoves and other lines.

1812. **Sheet-shearing and cutting appliances.**—A West of England firm manufacturing sheet-shearing and cutting appliances wishes to get into communication with a Canadian engineering firm willing to take up their Canadian patent rights.

1816. **Hardware.**—A Port Elizabeth firm make demand for supply from Canada of hardware, household and building. Special lines of cheap goods suitable for native trade. They request samples, when possible, also catalogues and price list of lanterns, cutlery, household tools, farm tools, shovels, enamelware, household utensils, stoves and other lines.

1820. **Paints and varnish.**—A Port Elizabeth firm is prepared to consider a Canadian line of paints and varnishes. They request samples, color cards and other details.

1821. **Wire.**—A Port Elizabeth firm asks for samples, prices and particulars of packing on such lines as fencing wire, baling wire, and wire netting.

1822. **Iron and steel.**—A Port Elizabeth firm asks for correspondence from Canadian firms able to ship regularly bar and steel iron suitable for country blacksmith and cart and carriage ware.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

The year just closed has been a prosperous one for the Canadian hardware trade, despite the great difficulties experienced in securing supplies. The outlook for 1917 is exceptionally bright, and retailers are buying freely, but cautiously. Deliveries of many spring booking orders will be made earlier this year than in previous years. The demand for iron and steel is as insistent as ever. Deliveries of sheets are hard to obtain and jobbers stocks are being rapidly reduced. Higher prices than the high prices now in effect will become inevitable before long. Owing to high costs of raw materials and production, many stove manufacturers have found it necessary to advance prices. A large number of other important price changes have gone into effect this week, and include advances on black and galvanized iron pipe, sisal products, pipe couplings and nipples, machine screws, screw and strap hinges, revolvers, lath yarn, vises, sisal clothes lines, halters, plow lines, horseshoe nails, coal oil, axes, snow shovels, hay baling wire, conductor pipe, stoves, picks, grindstones. Many travelers are again out on the road, following the usual Xmas holiday period.

MONTREAL MARKETS

MONTREAL, Jan. 4.—Price increases are still the order of the day, as will be seen by this week's report. Stoves are up; iron pipe is up; axes and picks are up; ship spikes are up; lumbering tools are up, crowbars are up; and a great many other lines will be found influenced by the extremely firm condition of the iron and steel market. Great scarcity of certain machinists' tools is felt. Just at the time of writing business in seasonable lines was confined to a few sorting-up orders in sporting goods and winter hardware. The gift season trade is about over. Travellers are on the road again for the New Year. Stock-taking is over with most large wholesalers, and no doubt some retailers also. The business of the year 1917 begins slowly to settle into its swing. The outlook is believed to be on the whole toward good business.

Iron and Steel are Still Firm in Price

IRON AND STEEL. The arrival of 1917 brings not a single sign of alleviation of the iron and steel industrial situation. Deliveries are still six months behind in hundreds of lines. It will take the steel mills a twelvemonth perhaps to catch up the accumulation of orders which seem still to seek some form of mill acceptance, in spite of all efforts to discourage their march in search of fulfilment. It is this surplus of orders overpowers to produce the goods which inclines merchants to believe that even a sudden peace can hardly do more than flutter the market for a time, much as the outbreak of the war did. The resumption to active industrial conditions and trade at the scale of prices produced by those intensely active conditions is naturally also anticipated even following the arrival of peace—after the markets get accustomed to the stillness instead of the roar in which at present they are operating.

Iron Pipe Lapweld and Buttweld Up

IRON PIPE.—Once again iron pipe, both lapweld and buttweld, both black and galvanized, has advanced in price. This is an advance which has been predicted in HARDWARE AND METAL and which is, of course, the natural outcome of the stupendously difficult conditions affecting the iron and steel manufacturing industries. Incidental to the difficulties well known to all readers of HARDWARE AND METAL, or in evidence of them, comes the announcement that it is now practically impossible to obtain two-inch lapweld iron pipe, either black or galvanized. Fortunately for business interested this size is not in great demand. The new prices for pipe will be found in separate panel elsewhere in the market section.

Nipples and Couplings Up

New discounts showing increases in wrought nipples and couplings are out this week. Wrought nipples up to 4 in. are 60 off; over 4 inch, 55 off. Wrought couplings up to 4 in. are 50 off; and over 4 in., 30 off.

Fittings Increased

Fittings are increased also. Pound goods are now 10 off; cast bushings are 47½ off, and malleable bushings also 47½ off. Flanges are 50 off; plugs, 45 off; flange unions, 37½ off, and malleable unions, 52½ off.

Stoves Have Advanced With the New Year

STOVES.—As predicted by HARDWARE AND METAL within the last weeks of 1916, stoves have again advanced in price. The conditions in the iron and steel industry have necessitated the advance, and may even necessitate further advances yet. The manufacturers have for a long time helped the situation by having large stocks of the necessary metals on hand, but even large stocks cannot last for ever, and the hope expressed some time ago that stove prices might maintain at the levels ruling last fall is completely overruled by new firmness developing in every department of the business. The increase, which was to come into effect at the end of the week of writing (Jan. 1 to 6), is from 5 to 10 per cent. Stove pipes and elbows are still in ever-increasing market firmness, the shortage of plates to make these being almost a famine.

Axes, Picks, Peevies, Crow-Bars, Etc., Up

AXES AND PICKS.—In obvious sympathy with the iron and steel market, all lines of axes have been advanced 50c per dozen this week. This is about the second or third advance in the past few months, and it need not be regarded as by any manner of means the last while iron and steel keep so firm. Picks have also advanced at least 15 per cent., and there is some hint that snow shovels will be up also shortly. Crowbars are now $5.75 per 100 lbs., another advance due to iron and steel market conditions. Lumbering tools are also up, quoted at 15 per cent. off list. Presto ship spikes, another offspring of the iron and steel industry, are up to $4.60 base.

Washing Machine Advance

Amongst special lines which have advanced early in the first week of the New Year is the Ideal power washing matchine, altered upwards from $26 to $30.

Canadian Netting Discount Altered

Canadian poultry netting is now quoted at 30 and 10, and American netting at 30 off.

Bessemer Steel Bright Cokes Up

BESSEMER COKES. — Bessemer steel bright cokes have increased considerably in price, and are very, very hard to get at all. The I.C. 14 x 20 base price is now $9.25 instead of $7.75, and the I.C. 20 x 28 double box are quoted at $18.50 instead of the former $15.50.

Grindstones Go Up In Price This Week

GRINDSTONES.—It is going to cost the world more to "keep its nose to the grindstone" in 1917 however, unpleasant the process may be. Grindstones are up in price. For sizes 40 lbs. and up they are now $1.60 per 100 lbs. For sizes less than 40 lbs. they are $2.00 per 100 lbs. Wear and tear of iron and steel tools used in the manufacture, and increased cost to replace the plant so worn is one reason for laying the blame for the advance at the door of iron and steel market firmness again.

Well-Known Lubricant Oil is Increased

MACHINE OIL.—An increase in the price of oil for lubricating purposes, was predicted in the Toronto report in HARDWARE AND METAL last week. In Montreal this week the price of the three in one oil is increased as follows: Small size ped dozen, 85 cents; large size, per dozen, $1.87; handy can, per dozen, $2.08; household size, per dozen, $4.10.

Winchester Rifle List to be Revised

RIFLES.—Not the weapons of warfare, but sporting goods, the Winchester Rifles are having their list prices adjusted this week, but the adjustment is not to be in the nature of any further increase just at present. The idea is to simplify the list for the benefit of the retailer in the Dominion, but in the opinion of experienced men in the business the simplification proposed as far as can be judged requires some mental effort to appreciate. It is hard for U.S. manufacturers sometimes to adopt the viewpoint of the Canadian side of the border in making revisions of lists even with the best of intentions.

New Net Prices on Black and Galvanized Standard Iron Pipe

	Per 100 ft. Blk.	Per 100 ft. Glvd.
Buttweld		
1/8 in.	$ 4.25	$ 5.75
1/4 in.	3.54	5.67
3/8 in.	3.54	5.67

10 in.	247.20	323.40

Terms 2%. 30 days approved credit.

Prices for Ontario, Quebec and Maritime Province.

Ropes Are Again Advanced in Price

ROPES.—Plentifully predicted by HARDWARE AND METAL rope has advanced this week. Sisal basis rope is now 20 cents (one firm's quotations showed a reversion to the 19 cent figure following the advance). Best Manila is 25½ cents basis, and British Manila 21 cents. Lathyarn is 20 cents basis instead of the former 19 cents.

Solders Recover Market Strength

SOLDERS.—Although the solders were a little weaker at the end of the year, the market for these recovered strength early in 1917, and the prices rose two cents a pound for both tinsmiths' and wiping solder. Tinsmiths' solder is quoted at 0.32 cents lb., and wiping at 0.30 cents lb.

Lead Shows Decline For the New Year

LEAD.—From the weakness noted in HARDWARE AND METAL'S report on this material last week, lead has not recovered in the New Year's first days. In fact the price has dropped from the $10.50 to $10.75 range quoted last week, to a range of $10.25- $10.50 this week.

Lead Pipe Declines a Cent.

One of the first declines in manufactured metal products for many a long week will be noted in the decline of lead pipe this week by one cent a pound. Lead pipe is now 0.13 cents lb. (formerly 0.14 cents,) and lead waste pipe is now 0.14 cents per lb. formerly 0.15 cents lb.

Copper Prices Are Reduced This Week

COPPER.—Copper shows a marked decline this week from the figures quoted last week. Copper is now from $35.00 to $35.50 per hundred pounds, as compared with figures fully three dollars per hundred pounds higher quoted last week.

Zinc, Tin and Spelter Are Quiet

ZINC AND TIN.—Spelter is in unchanged market condition from last week when quotations were $15.00 to $15.25 per 100 lbs. Tin is a little weaker at $49.00 to $49.50 per 100 lbs. Sheet zinc is firm at 25 to 25½ cents per lb.

TORONTO MARKETS

TORONTO, Jan. 5.—Business for the New Year has started well, and gives promise of continuation of the splendid trade which characterized the closing weeks of the old year. Many price changes have been recorded during the week, all of which are in an upward direction. There is one exception, however, in the case of certain gauges of black sheets. A readjustment of prices has resulted in advancing some sizes and causing slight declines in others. In the paints and oils there has been a steadiness in the market during the week, with the quotations of last week prevailing in most instances. Linseed oil held steady. Gasoline is in firm market and with another advance in crude oil recorded an advance in the refined product would not come as a surprise. Coal oil is also in firm market, together with all lubricating oils. Advances are due on the latter, and will in all probability be put into effect in the near future. Wholesale paint houses have started their travellers on the road again after a short vacation during the holiday season. There are no indications as yet that the peace proposal has caused a noticeable weakening in hard-

ware lines. In certain quarters, however, there is a disposition to be careful in buying.

Sisal Rope and Lath Yarn Advance 1c

ROPE AND TWINE.—As predicted in the leading article in HARDWARE AND METAL last week that there was strong probability that sisal products would advance in conformity with the greatly increased price of sisal fibre, an advance has been recorded during the week of 1c per pound on the base size of sisal rope. Sisal rope of 5/8-inch diameter and larger is now selling at 20c per pound, with the usual extras for smaller sizes. Lathyarn has also increased to a basis of 20c per pound for the tarred or untarred strand, with the usual extras for double lathyarn, single yarn, and fine yarn. Recently the Regulating Commission of Yucatan announced their prices for sisal fibre at 14½c per pound after being out of the market for some weeks so far as quotations go. Their previous price was 10⅜c per pound. This higher price for sisal fibre will undoubtedly presage record prices for binder twine when they are announced for delivery on this year's twine.

Sisal Clothes Lines Make Advance of 25%

CLOTHES LINES.—The recent big advance of 4⅝c per pound in the price of the sisal fibre has operated to send the price of sisal clothes lines upward approximately 25 per cent. The last advance on these took place on November 28, and the advance now recorded took place on December 29. Following is a comparative list of prices per dozen for the three-thread lines as they were before the recent advance and at the present time:

	Price of Nov. 28	Price of Dec. 29
30-foot	$0.60	$0.75
40-foot	0.80	1.00
48-foot	0.96	1.20
60-foot	1.20	1.50
72-foot	1.44	1.80
100-foot	2.00	2.50

On the six-thread sisal clothes there has been an even greater increase than on the three-thread, the advance amounting to 33 1-3 per cent. Following are the former prices and the prices that now prevail on the six-thread:

	Price of Nov. 28	Price of Dec. 29
40-foot	$1.20	$1.60
48-foot	1.44	1.92
72-foot	1.80	2.40
72-foot	2.16	2.88
100-foot	3.00	4.00

These prices are f.o.b. Montreal, Toronto, Hamilton, Welland and London, with freights equalized to other points.

Sisal Halters and Plow Lines Go Up

HALTERS, PLOW LINES.—A big advance has been recorded in the price of sisal, snap halters and ring, the advance amounting to approximately 25 per cent. On the 3/8-inch size the new price is $15 per gross, as compared with $12.25 formerly; for the 7-16-inch the new price is $18 per gross, as compared with the former price of $14.40. On the ½-inch halters the quotation is now $22.50, the previous price being $18. For the 9-16-inch the new list price is $27 gross, the former price being $21.60. The new price on the 5/8-inch is now $31.20, as compared with $25.20 on the previous price.

Jute halters have also advanced, but not in the same degree as the sisal halters. By the selling list of November 28 of last year both sisal and jute halters in the various sizes were quoted at the same prices. For the 3/8-inch size the price is now $13.80; for the 7-16-inch, $16.50; for the ½-inch, $21; for the 9-16-inch, $25.20, and for the 5/8-inch, $30. Russian snap plow lines have made an advance of about 10 per cent. They are now selling at $54 per gross, as compared with $50 formerly.

Iron Pipe Advances Still Further

Black and galvanized iron pipe have advanced again. New net prices on standard buttweld and lapweld pipe, both black and galvanized, are shown in a special panel elsewhere in the market reports. Wrought nipples and standard couplings have also advanced. Wrought nipples are now quoted as follows:—4-in. and under, 60 per cent.; 4-in. and under, running thread, 40 per cent.; 4½-in. and larger, 55 per cent. Standard couplings are quoted: 4-in. and under, 50 per cent.; 4½-in. and larger, 30 per cent. Terms on pipe are 2 per cent. 30 days approved credit.

Brass Machine Screws Advance in Price

An advance has been made in the price of flat, round head, oval, and fillister head brass machine screws. Iron machine screws are unchanged. New discounts on brass are as follows:

Flat and round head brass—Add 20 per cent. to list.

Oval and fillister head brass—Add 25 per cent. to list.

The unchanged discounts on iron are as follows:

Flat and round head iron, 27½ per cent. off list.

Oval and fillister head iron, 10 per cent. off list.

Present discounts on ordinary wood screws follow:

Wood, F.H., bright, 75% off list.
Wood, R.H., bright, 70% off list.
Wood, O.H., bright, 70% off list.
Wood, F. H., brass, 42½% off list.
Wood, R. H., brass, 40% off list.
Wood, O. H., brass, 40% off list.
Wood, F. H., bronze, 35% off list.
Wood, R. H., bronze, 32½% off list.
Wood, O. H., bronze, 32½ off list.

Higher Prices Coming on Sheets

Black and galvanized sheets, tin plates, etc., are no doubt going to be much higher in price. Despite present high prices, there is a heavy demand and few complaints are heard. The question is more one of securing deliveries than one regarding price. Owing to the freight embargoes, jobbers' stocks have to be relied upon to a great extent. The freight situation is becoming worse, and more complicated.

Stock-taking is now in order in many manufacturing plants and wholesale houses. The demand for ingot metals has slackened off somewhat, due to the holiday quietness.

COPPER.—Stocks of copper are light. Quotations range from 37c to 38½c lb.

LEAD.—The lead market holds firm at the high level reached a few weeks ago. Lead being a war metal, is in good demand. The high price of pig lead has been reflected in the prices of many manufactured products into which lead enters. Quotations locally range from 9½c to 9¾c.

SPELTER.—The market for spelter has shown signs of weakness, with the result that prices have declined locally. Prices now quoted range from 13c to 14c lb.

ANTIMONY.—There is no change in antimony. Ruling price is 18c lb.

ALUMINUM.—The ruling quotation on aluminum is still 68c. This price is high when compared with pre-war prices, which were around 22c lb.

PIG IRON.—The pig iron market is quieter, and no further price changes have been made. Prices on domestic brands of pig iron are still withdrawn, and no intimation has been made as to when new prices are likely to be issued. The pig iron market in the States is quieter, buying being lighter owing to limited amounts of iron available and congested freight conditions. There have been no price changes in the U. S. on pig irons.

SCRAP METALS.—The scrap market for ingot metals is weak and unsettled, and indications point to lower prices. Business is inclined towards dullness.

Scrap steel, heavy melting, old rails, etc., are steady and firm, but other lines are weak. Old cast iron has advanced in price, due mostly to the continued firmness and high prices of pig iron. Prices are shown in current quotations.

MACHINE TOOLS.—There is a sea-

sonable quietness in the machine tool market, the transactions this week having been comparatively light. Renewed activity is, however, looked for this month, principally in equipment for munition plants. Prices of machine tools continue to advance, affecting particularly lathes, drilling machines and power presses. A firm in the U. S. has advanced prices 12½ per cent. on 12-in. to 30-in. lathes, making quotations now 65 per cent. higher than two years ago. Drilling machines, including radial and upright drills, have advanced 10 per cent. recently, making prices about 60 per cent. higher than two years ago. On power presses the advances range from 5 to 10 per cent., making quotations about 50 per cent. higher than two years ago.

Vises Go Upward 10 to 20 Per Cent.

VISES.—An advance went into effect during the week on the Holland & Parker make of vises, which provides for a price approximately from 10 to 20 per cent. in advance of recent quotations. This is an American make, and is used quite extensively in the trade. As an instance of the actual advance that has taken place, one of the grades which formerly sold for $8.70 each, is now quoted at $10.65 each. The advance on this particular grade is $1.95. This market is another of the many numerous lines that reflects the acute situation in iron and steel.

Revolvers Marked at Advance of 10 Per Cent.

REVOLVERS.—Approximately 10 per cent. has been added to the price of the Iver-Johnson revolvers by the new quotations that have gone into effect. There are numerous sizes and models in these small arms, and under the new price list Nos. 645 to 660 are now quoted at $7.55 each. The enormous demand for gun materials of all kinds has had its effect on the line of arms carried by many hardware stores. If the war is long-continued there will in all probability be still higher prices for such articles as revolvers.

Firmness in Market For Horseshoe Lines

HORSESHOES.—There is a firmness in the market for horseshoes, which would seem to indicate higher prices in Canada. In the United States there has been a considerable advance. The Canadian market invariably follows the trend of this market in the United States from the fact that the raw material is obtained largely from the same source. Dealers in Canada look forward to higher prices in this commodity in the near future.

Horseshoe Nails Advance 1c Per Pound

HORSESHOE NAILS.—An advance of 1c per pound on the list prices of Capewell horseshoe nails has gone into effect during the week. Discounts formerly used by wholesalers of 10 and 5 per cent. off list remain unchanged. Following is the new list prices of the various sizes:

	Per lb.
No. 3, 1⅝-inch	$0.77
No. 4, 1¾-inch	0.37
No. 4, ½-inch	0.32
No. 5, 1 15-16-inch	0.17
No. 6, 2½-inch	0.16
No. 7, 2 5-16-inch	0.15
No. 8, 2½-inch	0.15
No. 9, 2 11-16-inch	0.14
No. 10, 2⅞-inch	0.14
No. 11, 3 1-16-inch	0.14

New Prices on Oil Heaters Not Out Yet

STOVES AND HEATERS.—The new price on Perfection oil stoves and heaters has not yet been announced. It was expected they would be given out this week ,but the dealers have not yet made the announcement. In the meantime no new orders are being booked at the old prices, although previous bookings are being filled at recent prices. Bookings of these stoves and heaters are already reported heavy, more than half the amount being already booked for delivery this year that was sold in the entire year 1916. Other stoves and ranges are in a firm market, although advances have not been recorded. There is a continued shortage of supplies, and the condition of the raw material market gives little promise of easier prices in any of these lines in the near future.

Coal Oil Makes Advance of 1c Gallon

OILS.—Coal oil in the better grade carried by the Imperial Oil Company has advanced 1c per gallon during the week, and is now quoted at 14½c, as compared with 13½c formerly. The increase has been due to the firmness in the crude oil market, which has recorded another advance of 10c per barrel during the week, and now makes the selling price at the wells in the Mid-Continent field $1.40 per barrel. This represents a total advance of 50c per barrel within a period of a month or six weeks. In consequence there is a great firmness in gasoline and all other grades of coal oil and lubricating oils. An advance in lubricating oils is scheduled to take place in the near future; the new prices will in all probability be announced within a week or two. The falling production in the oil fields is responsible for the increased price in the crude oil.

Axes Register an Advance of 50 Cents

AXES.—An advance of 50c per dozen has taken place in the price of axes during the week. Single bit are now quoted at $8.50 to $11, as compared with the former price of $8 to $10.50. Double bit axes remain unchanged at previous prices of $12 to $14. Boys' axes are now quoted at $7 and $8, as compared with $6.25 to $7.50 formerly. Hunters' axes are now $5.75 to $7.25, as compared with $5.50 to $7. This advance in this latter instance is, therefore, 25c per dozen. Bench axes remain unchanged at previous prices.

Snow Shovels Are Up $1.23 Per Dozen

SNOW SHOVELS.—An advance of $1.23 per dozen has been put into effect on the long-handled japanned snow shovels. The new price is now $3.88, as compared with $2.65 previously. There has been a heavy advance in these goods since the opening of the season, when they were quoted at $2.15. The demand has been excellent, and there is a shortage of supplies, with wholesalers unable to get from the manufacturers sufficient to meet their needs.

Readjustment in Black Sheet Prices

BLACK SHEETS.—A readjustment in the price of black sheets provides for lower prices on some of the larger sizes, and higher prices on some of the thinner sheets. No. 10 and 12-gauges are now quoted at $6. Formerly No. 12-gauge was quoted at $6.10. No. 14-gauge is now quoted at $5.40, which represents a shading downward of 45c. No. 16-gauge is quoted at $5:60, which is 30c down. Nos. 18 to 20-gauge are quoted at $5.55, which represents an advance of 35c. Gauges 22 to 24 are quoted at $5.60, an advance of 35c. No. 26-gauge is now selling at $5.65, which is also a 35c advance. On No. 28-gauge there has been an advance of 40c, the selling price now being $5.75. There is a heavy demand for the thinner black sheets at the present time.

Cut Hay Baling Wire Moves Up Again

WIRE.—A considerable advance has been recorded in cut hay baling wire through new list prices that have been made effective during the week. Following are the list prices now being quoted on this commodity:—No. 9, $5.25; No. 10, $5.30; No. 11, $5.40; No. 12, $5.50; No. 13, $5.60; No. 13½, $5.60; No. 14, $5.75; No. 15, $6.

Conductor Pipe Advances in Price

The discount on conductor pipe has been changed from 45 per cent. to 35 per

cent. This means an advance of almost 20 per cent. Eavetrough conductor elbows are quoted at 35 per cent. off the following list prices: 2 in., $1.90; 3 in., $2.20; 4 in., $3.60; 5 in., $9; 6 in., $10.50. Trade in the foregoing lines has been fairly good, with an improvement quite noticeable of late.

O.G. eavetrough is quoted at 35 per cent. off the following list prices; 8 in., $6.90; 10 in., $7.70; 12 in., $9.10; 15 in., $12.50.

All galvanized goods are decidedly firm in price owing to the increased costs of galvanized sheets. Although spelter has declined to some extent, there have been heavy advances in the costs of black sheets.

Hot air furnaces have advanced about 33 1-3 per cent. since the first of 1916. The last advance of 10 per cent. has taken place within the past two weeks.

Lead Pipe and Waste Pipe Show Decline

LEAD PIPE.—One of the few exceptions to the generally upward trend in prices in hardware lines during the week has been in lead pipe and lead waste pipe. Lead pipe is now quoted at 13c per pound, which represents a decline of 1c. Lead waste pipe is quoted at 14c as compared with 15c previously. Lead wool is holding steady in price at 12c per pound and lead sheets have also maintained previous prices.

LONDON MARKETS

LONDON, ONT., Jan. 5.—The trade is greeted on the first of the New Year with another heavy list of price changes, mostly upwards. Business continues good. Most retailers are busily engaged in stock-taking. Merchants are buying freely but carefully. Spring booking orders will in many cases be delivered earlier than usual this year. Among the prices changes are higher prices on iron pipe, both black and galvanized, nipples, screw and strap hinges, sisal rope and lath yarn.

Iron Pipe and Nipples Higher

Black galvanized iron pipe has advanced again. New net prices on standard buttweld and lapweld pipe, both black and galvanized, are shown in a special panel elsewhere in the market reports. Wrought nipples and standard couplings have also advanced. Wrought nipples are now quoted as follows: 4 in and under, 60%; 4 in. and under, running thread, 40%; 4½ in. and larger, 55%. Standard couplings are quoted, 4 in and under, 50%; 4½ in. and larger, 30%. Terms on pipe are 2% 30 days approved credit.

Brass Machine Screws Advance in Price

An advance has been made in the price of flat, round head, oval and fillister head brass machine screws. Iron machine screws are unchanged. New discounts on brass are as follows:

Flat and round head brass, add 20% to list. Oval and fillister, brass, add 25% to list. The unchanged discounts on iron are as follows: Flat and round head, iron, 27½% off list; oval and fillister head, iron, 10% off list. Present discounts on ordinary wood screws follows:

Screw and Strap Hinges Higher

An advance of 10% has gone into effect on screw and strap hinges, making the new price as follows: 6 in. to 12 in., $7 per 100 lbs.; 14 in. and longer, $6.50 per 100 lbs.

Fence Wire Prices

The following prices are being quoted on fence wire:—

Per 100 lbs., Barb, $4.50; No. 9, plain galvd., $4.25; No. 12, plain galvd., $4.40; No. 13, plain galvd., $4.50; No. 9, coil spring, $4.30; No 10, oiled and annealed, $5.16; No. 11, $5.22; No. 12, $530

The discount generally quoted on poultry netting is 30-10%.

Paint Products Firm

White lead in oil is firm at $14.45 per 100 lbs. in ton lots and $14.75 per 100 lbs. in less than ton lots. The high price is undoubtedly curtailing the sale of this product.

Turpentine is unchanged at 81c. per Imp. gallon in single barrel lots; 80c. per Imp. gallon in 2 to 4 barrel lots; 88c. per Imp. gallon in 5-gal. lots.

Linseed oil remains steady and unchanged at the following prices:

	Raw.	Boiled.
1-2 bbls.	$1.15	$1.18
3-5 bbls.	1.14	1.17
6-9 bbls.	1.12	1.15

Wire Nails Firm

There is a scarcity here in certain sizes of wire nails. The market is firm at 4.70 base. Cut nails are quoted at 4.25 base.

Painted screen cloth is selling at $2.75 per 100 ft. in 100 ft. rolls and $2.80 per 100 square ft. in 50 ft. rolls.

Sisal Rope Advances 1 Cent

Sisal rope has advanced 1c. lb. in accordance with predictions made in recent issue of HARDWARE AND METAL. Lathe yarn has also advanced. Prices on rope are as folows:—

Pure Manila	25½c.	lb. bases
British Manila	21c.	lb. bases
Sisal	20c.	lb. bases
African Hemp ...	21c.	lb. bases

Other prices are shown in the current quotations.

WINNIPEG MARKETS

WINNIPEG, Jan. 4.—The year just passed has been full of what might almost be termed thrills in the various wire, steel and metal markets and the rapid advances recorded in so many lines has been rather hard for the average retailer to follow. That the end is by no means in sight is the opinion freely expressed amongst jobbers and manufacturers but as long as prosperity rules in such measure as it has during the past two years in this Western country. there seems little to fear from a sudden slump in business. However, the opinion is freely expressed that this year will see a greater shortage of merchandise in all lines than heretofore and no remedy to combat this growing tendency is available.

Many Price Revisions Coming

During the week which has seen the majority of stocks taken and the business of costing well under way, few changes in prices have gone into effect, jobbers being busy coupling the year's figures and leaving the business of price changes over for a few days. However, with the rush of new stock which is always noticeable during the first month of the year, all indications point to revisions in practically all lines—some of which have not been touched for perhaps six months or more. During the past three months or more, various manufacturers have indicated revisions in their selling prices, effective January 1st, and this will become evident during the next few weeks as new goods continue to arrive.

Evidence as to the general tendency will be seen in the new prices available on pipe cutters, sandpaper, Yankee tools, awning pulleys, whiffletree hooks, etc. The prices just issued record advances in every case as will be shown in the report which follows:

Rope, Tools, Pulleys Advance in Price

Another important change is that issued on the price of cotton rope, the advance being 3c per lb., practically 10 per cent. This will be further carried out undoubtedly in revised prices for cotton clothes lines, sash cord, etc., though these lines have not yet been affected. Prices now quoted

for cotton rope are as follows:—3-16 in. 44c per lb.; ¼ in. and larger 43c per lb.

The new prices on the various lines of tools are about 10 per cent. higher than those previously quoted. This will be seen in the quotations below now being made:

Pipe cutters Barnes, No. 1, $2.35 each,; No. 2, $3.15 each; No. 3, $5.25 each; Sunders, No. 1, $1.80 each; No. 2, $2.70 each.

Following new prices have been issued on Yankee tools:—

Yankee screw drivers dozen, No. 10-2, $5.00; No. 4, $6.60; No. 6, $8.60; No. 15 x 2, $5.25; No. 3, $5.75; No. 4, $6.25. Yankee screw drivers spiral hatchet per dozen, No. 30, $24.00; No. 130, $27.50. Yankee automatic drills, per doz., No. 41, $23.00; No. 44, $25.00. Yankee breast drills, No.555, $7.60 each.

New Prices on Cant Hooks, Peavies, etc.

The recent change in cant hooks, peavies, etc. reveals the following new prices: Cant hooks, $17.55 doz.; peavies $21.25 doz. Cant hook hdles., Maple, 2½ in. x 4 ft., $3.50 doz.; Peavie hdles. Maple, 2½ in. x 4½ ft., $3.95 doz.

The following are the latest quotations on awning pulleys, etc., and carry out the general tendency of the upward markets:

Awning Pulleys—		Doz.
No. 74 x	1	$0 53
	1¼	0 64
	1½	0 80
	2	1 45
No. 174 x	1½	1 45

	2½	1 04
Side Pulleys—		
No. 25 x	1½	0 72
	2	1 05
	2½	1 60

Carriage and Wagon Hardware Higher

New prices have been issued on various lines of carriage hardware including whiffletree hooks, end irons, couplings, cockeyes, etc. as follows:—

Whiffletree Hooks, doz., No. 3550 C, $1.14; D, $1.35; E, $1.54; F, $1.65; No. 3555 C, $1.32; D, $1.58; E, $1.80; F, $2.15. Whiffletree hooks, No. 107 and 207, 11c lb. Neckyoke end irons, doz., No. 3605 B, 97c; D, $1.21; F, $1.43. Whiffletree cockeyes, No. 67 and 75, 15c. lb. Whiffletree couplings, No. 700 B and 700 C, 15c.

Sand Paper Goes To Higher Level

New and higher prices have been issued on sand paper as follows:—

Sand Paper, "Star"—	Quires	Reams
00½	$0 33	$ 6 00
1	0 34	6 25
1½	0 37	6 75
2	0 39	7 25
2½	0 42	7 75
3	0 49	....
"B. & A."—		
0½	0 38	6 75
1	0 40	7 25
1½	0 44	8 00
2	0 47	8 50
2½	0 50	9 00
3	0 58	10 50

Curry Combs Higher

Curry combs have advanced and are quoted as follows:—No. 121, $1.65 doz.; No. 127, $2.15 doz.; No. 141, $4.00 doz.; Eclipse, $2.40 doz.

Prices Hold Firm On Paints and Oils

Prices still hold firm for linseed oil paints, and turpentine, quotations for flax on the exchange varying only slightly over the New Year. Prices remain as follows:—Linseed oil raw, $1.40 per gal. 1 bbl. lots; boiled, $1.43 per gal. 1 bbl. lots; Turpentine 85c per gal. 1 bbl. lots; 88c per gal., ½ bbl. lots; 90c per gal. 5 gal. and 1 gal. lots.

Wire Nails

Wire nails remain firm at the price of $4.70. Ft. William. $5.10 keg, Winnipeg. Wire staples are quoted at $4.70 keg, Ft. William and $5.10 Winnipeg.

Window Contest Announcement

Announcement of the winners in the window display contest conducted by HARDWARE AND METAL will be made in the issue of January 20. This contest closed on December 30, 1916.

Sporting Goods and Ammunition Higher

Another important change is that affecting metallic ammunition on which the increase is approximately 10%. The lines of 22 calibre—most familiar to our readers—affected are shown here.

	Per M. Dominion or U.M.C.	Winch
Rim Fire "Smokeless"—		
B.B. caps. Rd.	$3 00	$3 00
22 short	3 94	4 69
22 long	5 40	6 30
22 long rifle	6 25	7 50
Rim Fire "Lesmok"—		
22 short	3 60	4 25
22 long	4 32	5 10
22 long rifle	5 00	6 00

In the sporting sizes, Winchester and U.M.C. make, the following prices prevail. It will be seen the tendency is ever upward: 30-30 Smo. S. 8, $66.50 per M. 303 British Smo. S. 8, $87.50 per M. 38-55 Smo. S. 8, $70.00 per M.; 40-70, Smo. S. 8, $75.25 per M.

Coming under the sporting goods department, express wagons now take the following high prices: per doz. No. 0, $22.80; No. 1, $27.00; No. 2, $30.00; No. 3, $33.00.

Fishing tackle has also been affected and these changes have gone into effect: Kidney baits, No 1 to 4, $1.10 doz.; No. 5 to 6, $1.25 doz.; Fluted baits, No. 1 to 4½, $1.10 doz.; No. 5 to 6, $1.50. Coburg baits, No. 2, $1.50; No. 3 to 4, $2.00 doz.; No. 5 to 6, $2.25 doz.

One Lone Reduction

A reduction is noted in the price of tank pump leathers, the new price being $3.80 dozen.

Prices on Wire Products

The following prices are in effect on bale ties, annealed wire, bright tinners wire and stove pipe wire:—

	Per 100 lbs. F. William	Winnipeg
Bale ties, 14 ga.	$5 75	$6 15

Annealed Wire	Per 100 lbs. Winnipeg
9	$5 20
10	5 25
12	5 40
14	5 55
15	5 70
16	5 85
Brt. Tinners' Wire -	
0-9	5 40

13	5 70
14	5 80
15	5 95
16	6 10
Stove Pipe Wire—	
19 ga.	8 00

PROGRESS OF TEN YEARS

From *Highway Magazine*

Ten years ago there were only 48,000 registered motor cars of all sorts in the United States; last year there were 2,445,664. This was an increase of 5,000 per cent. In 1904, approximately $79,000,000 was expended by all the states, counties, districts and townships in the United States for road purposes; ten years later the expenditures by the same units for the same purposes amounted to nearly $225,000,000, and in the year 1914 alone $43,000,000 was expended. In the present year it is estimated that $300,000,000 will be expended. The United States Office of Public Roads and Rural Engineering has recently assembled some very valuable information showing by groups of states the great increase that has been made in the expenditures upon the public roads and bridges during the 1904-1914 period.

THE TERRORS OF PEACE

From *Wall St. Journal*

War may have its terrors, but they are nothing to those of peace—in Wall Street.

Everybody had been talking of what would happen when the classic lady with the olive branch appeared on the horizon, but it is safe to say that not one in ten thousand among those who frequent brokerage houses greeted her or followed their convictions of what they thought would happen when she came.

Fortunes have been swept away. The profits gained in a two years' bull carnival have been sacrificed in two weeks of a bears' gambol. Many of the superstitious are shaking their heads and saying that they knew that money made out of war could come to no good end, but these are men and women who have not known the excitement of chasing prices up and down on the stock ticker.

One denizen of the Street, who probably should have known how to protect his profits, having been there for 15 years, acknowledged that his nest egg of $150,000 collected on the long side of the market since the Exchange reopened has been swept away in the last six days. Another gentleman who had made $320,000 admits that he has lost that and $60,000 besides, and so the tale goes on.

Wall Street's Christmas will not be as pleasant as was anticipated. Many a jewelry house has had many big orders canceled, but the market will be here next week, and Wall Street quickly forgets.

EVENTS IN THE TRADE

Business Changes

Fergus, Ont. John Mennie, hardware, has sold out to J. F. Imlah.

Galahad, Alta.—Fred Ansell, hardware merchant, is commencing business.

Truax, Sask. — Fanny Moscovitch is commencing the hardware business.

Galahad, Alta.—T. Walton & Co. have sold their hardware stock to F. C. Ansell.

Okotoks, Alta. — Gaskill Bros., hardware merchants, have commenced business.

Hearne, Sask.—J. A. Anderson, hardware merchant, has been succeeded by O. W. Dixon.

Dilke, Sask.—H. S. Belcher, hardware merchant, has sold his business to J. A. Macintyre.

Shaunavon, Sask.—Roycroft & McGregor, hardware merchants, have dissolved partnership.

Rosebud Creek, Alta.—O. R. Hatton, Hardware and Mercantile Co. have been succeeded by H. H. Sultin.

Scotsguard, Sask. — A. H. Jackson, hardware merchant, has sold his business to J. G. H. McCrea & Co.

Didsbury, Alta.—Rumball & Hyndman, dealers in hardware, etc., have sold to W. M. Craig & Co., Olds.

Semans, Sask.—A. E. Olson, hardware merchant, has been succeeded by Semans Grain Growers Co-operative Association.

Incorporations

The Lyons Lumber and Hardware Co., Saskatoon, Sask., has been incorporated.

The Northern Bolt, Screw & Wire Co., capitalized at $500,000; head office, Owen Sound, Ont.; to manufacture and deal in nails, bolts, nuts, screws, rivets, taps, dies, etc.

The St. Louis Auto Machinery Co. has been incorporated at Ottawa, with a capital of $40,000, to manufacture automobiles, bicycles, and engines, etc., at Windsor, Ont. The incorporators are: Joseph B. St. Louis, Joseph F. Knight and Henry C. Cage, all of Windsor, Ont.

Personal

Fred G. Mitchell, of the London Engine Supplies Co., London, Ont., headed the poll in the election for Utilities Commissioners.

V. E. Hunt, who for the past five years has represented the E. T. Wright Co., from Port Arthur to the Coast, has discontinued his connection with the firm and will in future conduct a manufacturers' agency at Winnipeg, with offices at 147 Bannantyne ave. east.

Col. Thomas Cantley, president and general manager of the Nova Scotia Steel & Coal Co., has returned from a trip to England and France. He was away about seven weeks, a considerable part of the time being spent in France, his company having large contracts with the French Government.

FRED. W. EVANS,

Manager Toronto house of Canadian Fairbanks-Morse Co. Announcement of Mr. Evans' appointment appeared in the Dec. 23rd issue of Hardware and Metal.

Building an Extension

Toronto, Ont.—The Gutta Percha & Rubber Co. will build an extension to their power house.

Mr. Anderson Better

T. A. Anderson, president of the Merrick-Anderson Co., Winnipeg, has recovered from his illness sufficiently to enable him to take a trip to California in a short time.

Officers to Meet at Toronto

A meeting of the executive of the Ontario Retail Hardware & Stove Dealers' Association will be held in Toronto on Monday, Jan. 8. It is expected that convention dates will be definitely settled, and that arrangements will be completed for the convention to be held in Toronto next month.

News From St. John, N.B.

It has been announced, unofficially, that Lieut.-Colonel J. L. McAvity, president of McLean, Holt & Co., Ltd., who came home to recuperate after serving as O. C. of the 26th Battlion at the front, will be given authority to raise another battalion as a reserve for the 26th.

W. H. Thorne & Co., Ltd., wholesale and retail hardware, St. John, celebrated the anniversary of the fire which destroyed a large part of their establishment last year, by turning on the water in a new and complete sprinkler protection system which has just been installed in their reconstructed building.

The contract for erecting the warehouse on the new deep water pier at West St. John has been awarded by the Dominion Government to D. C. Clark, of St. John. The contract is for $70,000, and additional work in connection with the erection of the building will bring the total amount involved up to about $100,000.

H. P. Timmerman, industrial commissioner of the C.P.R., who was in St. John this week, commented favorably on business conditions in the city. "I have seen a good many of the larger Canadian cities within the last few months, but none of them can compare with St. John in the matter of business and prosperity," he said. "The prosperity you are enjoying is genuine and stable. There is nothing fevered or imaginary about your activities."

Capt. D. S. Fisher, son of W. S. Fisher, of Emerson & Fisher, Ltd., and the Enterprise Foundry, has returned to St. John from the front. He went overseas with the first contingent. He did good and continuous work at the front until he was wounded at Festubert in the summer of 1915. He returned to the trenches in January and served until August, when he was taken ill. For a time his recovery was not expected, but he pulled through and is now home to recuperate.

Catalogues Wanted

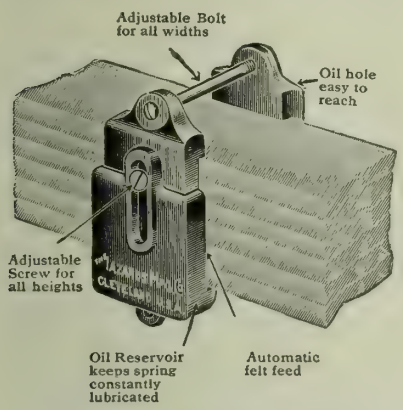
Carnegie Bros., hardware, furnaces, plumbing, Port Perry, Ont., have had their store and stock practically all destroyed by fire. Catalogues were all destroyed. Manufacturers and jobbers are requested to send new catalogues and price lists.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

ADJUSTABLE SPRING LUBRICATORS

A new adjustable spring lubricator is offered to the trade by the Lazarus Manufacturing Co., 750-800 Prospect avenue, Cleveland, Ohio. The makers claim that their latest improved device is adjustable for all widths and heights, and will fit all cars from Fords to large trucks, thus, it is claimed, eliminating the necessity of stocking several sizes. Two other improvements are also announced by the manufacturers. One is the recess in the casting which holds the clamping



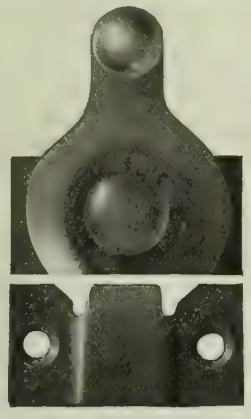
New Lazco Spring Lubricators.

nut firmly in place, preventing the bolts from working loose and the lubricator from becoming lost. The other is an air chamber at the top, by which a vacuum is formed with the capillary action of the spring, drawing the lubricant between the leaves. The makers announce the retail price at 50 cents, which is one-half the price of the company's old style oiler. Fords, it is said, require four, and most other makes ten.

NEW STANLEY PRODUCTS

The accompanying illustrations show three products recently produced by the Stanley Works, New Britain, Conn. The cam action catch for cellar windows, storm sash, etc., is made of wrought steel.

No. 1763 Catch is held in any position by a tension spring washer which prevents it from rattling and working loose. Windows stuck to their sill are forced open by the lever or cam action of the slanted edge. Because of its wide dia-



No. 1763 Cam Action Catch.

meter, this catch works with as much as a 3-16-inch crack between the sash and the sill. The catch is made of heavy

No. 1763½ Cam Action Catch.

wrought steel. Note the strong, thick rivet and comfortable knob.

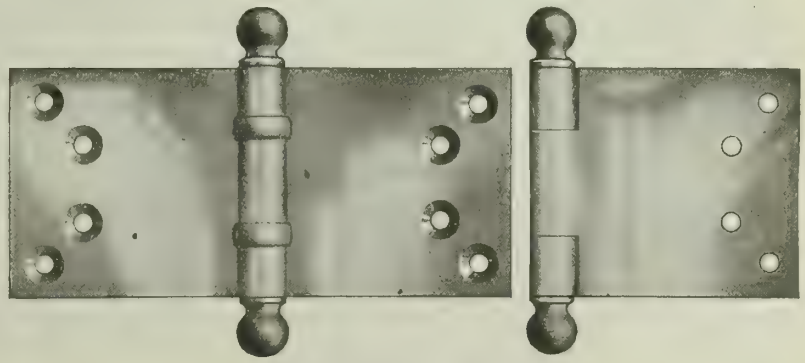
The strike plate for 1763 is shaped hollow in order that it will not become clogged with dust or dirt. It is strong, simple and durable.

No. 1763½ is for use on storm windows, cellar windows, and as a screen or sash fastener. The strike for 1763½ is screwed on to the sill. There are two spikes or prongs at the bottom of the strike which grip into the wood and hold the catch firmly in position even though it is fastened with but one screw.

The accordion door butts, also illustrated, were designed for accordion doors or wherever a large offset is desirable. BB-243 and 243 are the same except that the joints of BB-243 are fitted with ball bearing washers and the barrel equipped with the Stanley patented non-rising pins. When open they have sufficient clearance to receive the combined thickness of doors between the anchor door and the wall.

THE HOOKLESS TOW LINE

G. S. Brady, 764 Jackson Boulevard, Chicago, Ill., offers to the trade the Hookless auto tow line, which the maker states is a very light, yet strong line. It is made in three sizes, 1½ in. x 28 ft., breaking strain 2,400 lbs.; ⅝ in. x 28 ft., breaking strain, 4,000 lbs.; ¾ in. x 28 ft., breaking strain 4,700 lbs. The line has no hooks to shake loose, or other metal parts to scratch or mar the car. It is easy to attach and remove. All parts are hand spliced, and there are no knots to tie or untie. This manufacturer also makes a spring shock absorbing tow line, equipped with a coil compression spring, made from 5-16 dia. round steel, is 2 in. diameter and 10 inches long. Illustrated literature, with prices, etc., will be mailed on request.



Accordion Door Butt.

WHAT OTHER PAPERS SAY

CO-OPERATIVE STORES NOT A SUCCESS

From the *American Artisan*

If there is any one fact that stands out in the report which has recently been published by the office of Markets and Rural Organization of the Federal Department of Agriculture, under the title of "Survey of Typical Co-operative Stores in the United States," it is that as a whole the co-operative store movement in this country has been so far from a success that it may almost be rightly classed as a failure.

It was found, for instance, that in the matter of annual loss due to granting of credit the typical co-operative store showed a loss of 1.17 per cent. against less than one-half of one per cent. for stores under private management.

Again, only eleven out of sixty stores investigated showed a net profit of over five per cent. on the sales.

A very small percentage of these co-operative stores kept their accounts in any but the most primitive way, and the investigators state that in many cases it would be difficult to secure a trial balance from the records.

It was also found that although apparently the statements of stock on hand, sales and assets showed up well, when investigation was made of the details, many items were entered at full value, when as a matter of fact they should have been "written off" in the profit and loss account, as of "no value."

This, it is concluded, is due in a very large degree to the inefficiency of the managers and other employees; one of the reasons for the lower expense percentage of co-operative stores is found in the low salaries paid to those in charge. *The salaries paid are not sufficiently large to secure efficient managers and bookkeepers.*

SERVICE THE DRAWING CARD

By Wm. T. Gormley in *American Artisan*

While waiting at a counter in one of the State Street stores for a package, my attention was directed to a woman who was in a very excited frame of mind and who demanded a refund on purchases which she had recently made in that same store.

The reason for her demand was that when she had requested to have a number of parcels wrapped together, the person in charge of the wrapping desk told her that it was against the rules of the store to wrap parcels which were not bought there, and as she had a number of such parcels, he could not do that for her.

The salesman at the counter fortunately had brains enough to realize that some mistake had been made and that instructions given to the wrapping clerk had been misunderstood, and he explained this as pleasantly as he knew how, but the woman was persistent in her demand that a refund be made on her purchases and left the store vowing that she would never buy any more goods there.

I made it my business to ascertain from the superintendent of the store what the actual rule was for the conduct of the wrapping clerks in such a case and found that during rush periods, such clerks had instructions to ask the customer either to wait a little while or to call later.

When I suggested to him that while he might be saving a little time and perhaps a considerable quantity of wrapping paper, by having such a rule, he was more than likely to ruffle a good many customers of the store and in at least one case had actually lost a customer, he admitted that the rule was not one that in its analysis could be classed as an efficient service measure.

I have cited that instance to call to mind the penurious narrowness of some retailers—retail hardware dealers among them—who because they hold the penny so close before their eyes cannot see the dollar only a few inches away.

I have always found that the store which is extremely liberal in its offers and performances of service always grows and prospers faster than the one which while otherwise conducted along just as efficient lines holds back in the matter of service.

LABOR TROUBLES AHEAD

From *Industrial Canada*

What position will labor find itself in when the war is over? Can the present high standard of wages be maintained, or will there have to be a cut, and if so, how much?

Even the most cursory consideration of these questions soon brings the employer round to the point where he makes up his mind he must be on the lookout for trouble. It may be easy to delay an advance in wages, but it's an altogether different proposition to hasten a reduction. When the war is over there will have to be reductions in those lines of manufacture where outside competition has to be met; if labor refuses to stand for it the manufacturers will have to go out of business.

The situation ahead is more serious than most of us appear to realize. The requirements of the belligerents, in the way of munitions and military equipment, have been so extensive and so urgent that the determining factor in the placing of orders has frequently been date of delivery rather than price. The alluring profits held out to manufacturers engaged in war business have induced a spirit almost of recklessness, and in order to secure those profits they have abandoned their customary caution, and bid against one another for the skilled labor necessary for the fulfilment of their contracts. At the same time the withdrawal of millions of men all over the world from producing occupations to engage in military service has enormously accentuated the shortage of labor, and made it easy for the workman to enforce his demand for a higher wage. The curtailment of agricultural production, meanwhile, has so advanced his cost of living that he regards himself as little better than he was before. Still, realizing the strategic advantages of his position, he does not hesitate to press for what he calls "better conditions," in which term may be included a closed shop, a shorter working day, and restriction of output. In the face of this campaign to obtain more money for less work, the employer has had to avail himself of inexperienced help, with the result that the efficiency of his working forces has depreciated on the average probably 33 per cent.

The question for us now to ask ourselves in all seriousness is, "Where is it all going to end?" It is quite obvious that this sort of thing cannot go on indefinitely; somehow, somewhere, a halt must be called. It may be impracticable to deal with the situation so long as the war hangs on, but the moment it is over there is bound to be a shock from the impact of labor on capital, just like the shock that is felt when the emergency brake is applied to an express train traveling at a high rate of speed.

Now capital and labor both know that there is danger ahead, that the brakes must be applied sometime, so why don't they get together, instead of rushing right on to their common danger and trusting to the emergency brake to save them from disaster? If capitalists were to organize themselves as employers and prepare for a general lockout, instead of drifting with the tide, they might bring the leaders of the labor movement to their sober senses, and pave the way for some such solution as profit-sharing But, meanwhile, the Unions are entrenching themselves behind the eight-hour day, the closed shop, and other forms of defence, apparently for the express purpose of withstanding a siege.

What are employers going to do about it? Clearly the time has passed for playing lone hands. Organization is the watchword of today, in civic as well as military life. Team-play will bring results, where individual action is doomed to miserable failure. Canada's industrial future is too important a stake to warrant our manufacturers in leaving everything to chance. Something should be done, and done now; The question is, who will start the ball rolling?

TALE OF A GERMAN INVENTION

From the *Ironmonger*

No sooner have the Tanks made their appearance on the Somme, than the German papers assured the world that they were really a German invention, which we had basely, and badly, copied. They did not, however, give us the name of the German inventor, nor supply any other particulars by which their claims could be tested. Now, however, the information has been forthcoming in the course of a public lecture given at Cologne by a gentleman called Wilhelm Hall, described as an author, whose subject was "Friedrich Wilhelm Goebel, the German Inventor of the Armoured Land Cruiser." According to Herr Hall, "The English Tank was a swindle"; in fact, the alleged new English invention was an old German one, which the English had cleverly adapted to their purposes. Several years ago, he said, Goebel gave demonstrations in Berlin of a "grooveless railway, constructed on the principle of a walking wagon." Furthermore, pamphlets bearing the date September, 1914, in the first month of the war, proved that at that time Goebel had completed his designs for a giant battle-car. "Unfortunately," continued the lecturer. "Goebel shared the fate of the majority of German inventors, we need only recall Zeppelin—and up to the present he has been unable to procure the smallest support that would have enabled him to lay before the authorities the working model of his invention upon which they insist." The ostensible object of Herr Hall's lecture was to make it clear that in the matter of giant battle-cars, as in all other technical matters, Germany was in advance of the rest of the world. He assured his audience that the introduction of armoured land cruisers would shorten the war "because no means of defence against these monsters existed." Pictures of Goebel's workshop, and of several of his models, were shown on the screen. The attendance, says the *"Kolnische Zeitung,"* which reports the lecture, was small. This, however, may have been due to an intimation that the hat would be sent round, for the unfortunate inventor, it seems, "has fallen into the hands of usurers" and a National collection has been started to free him from their claws and supply him with the means of completing his invention "so that it may be used in the service of the Fatherland."

WEEKLY PAINT DEPARTMENT

Annual Convention of Martin-Senour Co.

Salesmen From All Parts of Canada Gathered at Head Office—Purses of Gold Presented to Salesmen

SALESMEN of The Martin-Senour Co., gathered in Montreal on Dec. 18-21 and held what was unanimously agreed by those in attendance, the best Convention in the Company's history. A programme full of interest was carried out on schedule time and the keenest interest displayed throughout.

Convention Headquarters were established at the Place Viger Hotel. The Sessions for the opening day were held in one of the spacious rooms of the hotel set aside for the purpose. After the roll call, the new members of the sales organization were introduced. In the Ontario Division T. Houghton was welcomed into the family and in the Quebec Division, J. E. Naud and L. J. Papineau were given a glad hand.

The opening address of the general manager, A. T. Black, contained much of interest and plans that were outlined for future expansion were heartily received. Territorial reports were of a most encouraging nature and showed that the dealer-agency expansion during recent months was in excess of any previous like period. Keen rivalry had existed in establishing the Martin-Senour Flag on new ground and in this it was pointed out, every section of the territory covered had yielded gains.

J. H. CONOVER,
Ontario Branch Manager, The Martin-Senour Company, Limited.

The second day sessions were of an outstanding nature in point of interest and were held at the new factories of the company which are situated at Beaumont St. and Greenshields Ave.

A tour of inspection to all departments of the paint and varnish plants followed, and here the salesmen were shown how the entire facilities of the manufacturing departments were being utilized and worked to capacity to adequately serve the best interests of the company's dealer-agents.

Under the supervision of J. H. Conover, Ontario manager, assisted by R. S. Daly, general superintendent and W. J. Smith, Chemist, demonstrations of the company's products and comparisons of qualities were extensively carried out. These were of a most convincing nature.

A pleasing noon-day function took place on Tuesday, when every employee of the company from all departments joined the salesmen and sat down to a real family luncheon. A spirit of fine co-operative relationship was in evidence. Advantage was taken of this occasion to present to W. H. Gerke, the retiring vice-president and managing director, a handsome cabinet of flat silver and cutlery and to Mrs. Gerke a beautiful bouquet of roses. Mr. Gerke

Salesmen of Martin-Senour Co., in session at Montreal.

feelingly thanked his late co-workers for this mark of their esteem and the loyalty they had shown him in the past and predicted even greater things for the company in the future under the leadership of his successor, Mr. Black.

The advertising and sales promotion sessions aroused great interest and the salesmen were gratified and enthused when plans were unfolded and new display and advertising features were shown which had been arranged to make the selling of Martin-Senour products still easier and more profitable. The consumer's mailing campaign, the new window trims, the newspaper campaign in a new dress, were among the outstanding feature.

W. P. WALSH,

Halifax Branch Manager, The Martin-Senour Company, Limited.

Tuesday evening a theatre party was held at the Orpheum Theatre where a section had been reserved for the salesmen and their guests.

Wednesday's sessions were presided over by W. P. Welsh, Halifax, manager. The entire day was devoted to discussion on various questions and problems as effecting the success of the company and the dealer-agent. The different subjects were handled in splendid form by salesmen to whom they were allotted and a general discussion followed each. The fullest and freest exchange of ideas and opinions was indulged in and every encouragement was offered for suggestions of a helpful nature which could be successfully put into effect.

The annual family dinner was tendered the salesmen and guests at the Canada Club on Wednesday Evening, and as usual this proved to be an event to be remembered. The Z. E. Martin Trophy donated by the founder of the Martin-Senour business in Canada was awarded to the salesman showing the largest year's increase and Quebec had the satisfaction of seeing one of its representatives, in the person of J. Brault, win the handsome trophy. Together with the trophy went a substantial purse of gold. The runner-up in this event was E. J. Cookson of the Ontario force who was also the recipient of a purse of gold.

Other prize winners in the various competitions and efficiency contests were C. F. Kendall, C. D. Cookson, R. Bernier, W. L. Magee, H. M. Borland, G. Tasse, T. L. Sheppard. The prizes in each instance were purses of gold.

The topical songs of the convention were heartily sung. Optimistic predictions were made for the future and the good spirit which prevaded this closing event is a pretty good indication that these predictions will be fully realized.

McArthur-Irwin Hold Conference

Banquet at Place Viger Hotel, Montreal, Marks Opening of Annual Convention.

ABOUT one hundred employees were present at the annual dinner of the McArthur-Irwin and affiliated companies, which took place at the Place Viger Hotel, Montreal, last Thursday. The chair was occupied by George Y. Chown, president, and a most enjoyable time was spent.

Following the toast of "The King," a song by Mr. Bengough was heartily applauded. The toast of "Our President" was proposed by John Irwin, vice-president, and responded to in a fitting manner by Mr. Chown. Mr. Hood then entertained the company with a piano solo, after which Mr. Mooney, who has just returned from Europe after an absence of over eighteen months in the interests of the firm, proposed the toast "Our Company," which was responded to in a very able and witty manner by Mr. Irwin.

Mr. Bengough then proposed the toast, "Our Traveling Salesmen," receiving much applause, especially to his remarks pertaining to credits. This toast was responded to in turn by each of the salesmen. The toast, "The Ontario Division," was proposed by Mr. Wilson, who made a few well-chosen remarks on the subject of co-operation, Mr. Reynolds responding. Then followed a song by Mr. Shepley, after which the president proposed the toast, "Our Affiliated Companies," giving a brief description of the aims and objects of each. This toast was responded to by Messrs. Burrill, Parker, Davies and Stewart. Mr. Parker then entertained the company with a piano solo, following which Mr. Bremner proposed the toast, "Our New Color Works," Mr. Munro responding. A whistling solo by Mr. Wilson followed, and after the toast of "The Press" had been proposed by Mr. Poole, and responded to, Wilson's Crown Diamond Minstrels made their appearance.

This was a real minstrel show, composed of employees of the McArthur-Irwin, Limited, and rounds of applause greeted their very able performance. Mr. Mould acted as interlocutor, Messrs. Anderson and Soden as endmen, Messrs. Bengough, Roche, Parker, Hood, Rocheford, Organ, Wilson, Mallette, Taylor, Shipton, Lacoste, Shepherd, Munro and Reynolds assisting.

A feature of the evening was a very new and enterprising surprise devised by Mr. Poole. Immediately after the last speaker had finished, newsboys rushed in, shouting, "Extra Convention Herald," and distributed copies of a special edition of this newspaper, gotten up expressly for this purpose, the whole front page featuring the banquet, speeches, etc., illustrated with cartoons, and gotten up in a most creditable manner.

The proceeding came to a close with the singing of "God Save the King," after a most enjoyable evening had been spent.

The regular sessions of the convention were held on Friday and Saturday. Tuesday and Wednesday of this week the Ontario men completed their deliberations in Toronto and the eastern men in Montreal.

STARKE-SEYBOLD DINNER

An informal dinner was served to the travelers and managers of departments of Starke-Seybold, Limited, in the Blue Room of the Windsor Hotel, on Thursday evening. Robert Starke, vice-president of the firm, presided. After a repast, speeches were delivered, which showed the good feeling between employers and employees. All joined in regretting the absence of the president, William Starke, who has been confined to his house for some time through illness. There were present Messrs. H. B. Seybold, sales manager; D. M. McDougall, Ottawa; J. E. Laporte, W. McEwen, H. Nolty, A. Gingras, H. Rowe, L. Daviault, J. W. Ranger, J. A. Paquette, A. L. Allan, F. B. Miller, H. St. Georges, H. G. Guenet, F. Demers, A. Hancock, V. Gougeon, A. Latremouille, and E. Sennat.

Jamieson's Pure Prepared Paints

Wishing will never increase your paint sales but *Jamieson's Pure Prepared Paints* will most assuredly do so.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, January 4. — The opening week of the New Year finds the paint markets actively inclined to firmness, and manufacturers and wholesalers as well as retailers looking with interest to the developments of the coming Spring. There is a likelihood of greater firmness than ever in linseed oil, though the market conditions at present are not at all free from complicating circumstances. Some crushers were holding off the market at the time of writing and opinions expressed were all towards firmness. There was even a hint that mixed paints may see another rise in price rather than a reduction. Varnishes also are very firm. Although the market for crude oil is very firm, and indeed rising, gasoline, at time of writing was still quoted at 28½ cents ex-tank car, the same price as last week.

Mixed Paints Might Advance Again

MIXED PAINTS.—While conditions for the opening of the year 1917 were tinged with the dull tone due to the holiday inactivity of all markets, there is still present a firmness in regard to the mixed paint market. Prices have recently risen, but apparently there has been no decrease in demand for paints, since orders have been coming along in undiminished flow even after the increase. Prices have risen, but, in the opinion of some manufacturers, they have not risen in accurate proportion to the increase in cost of raw materials. There is, however, a variance of opinion as to the future of paint prices. One manufacturer goes so far as to state that unless raw material costs advance still further higher prices on paint would hardly be warranted.

White Lead in Oil Keeps Firm

WHITE LEAD IN OIL.—Linseed oil is firmer, but lead is a little less strong on the market at present. No appreciable diminution in demand, it is claimed, has been noted in the trade here following the advance to present record figures, some manufacturers on the contrary expecting even increased demand. Prices are as at last week, that is, $14.30 per 100 lbs. for orders of one ton or over, and $14.60 per 100 lbs. for less than one ton orders.

Rise in Spirit is Influencing Shellac

SHELLAC, ETC.—Owing to the rapid rise in price of methylated spirit during the past week shellacs are all in exceedingly firm market, and varnishes which increased in price recently when paints were advanced are firm to the last degree of market standards of firmness. If raw materials increase further there might be increases again in varnish prices. Meantime the manufacturers are meeting conditions on the price basis of the recent rise.

Linseed Oil Opens New Year Firmer

LINSEED OIL.—With conditions exceedingly uncertain as regards supplies of the flax seed, but everything pointing to greater and greater difficulty, and shortage for the opening months of the New Year, linseed oil begins 1917 in very firm markets. Some firms are still quoting at the prices published in this column last week, but most firms doing business in linseed oil are quoting higher figures than last week's low quotation, which was $1.12 for the raw, and $1.15 for the boiled. Firms still quoting as low as that are not accepting orders for future delivery, however, and will no doubt revise prices upwards a shade unless linseed oil takes a sudden and unexpected downward trend. The outlook is all for greater rather than less firmness.

Linseed Oil	Raw.	Boiled
1 to 4 barrels	$1.15-1.20	$1.18-1.25
5 to 9 barrels	1.14-1.19	1.17-1.24
10 to 25 barrels ..	1.13-1.18	1.16-1.23

Turpentine Tendency Towards Firmness

TURPENTINE.—Conditions as regards turpentine are this week reported to be much as last week, with if anything a tendency towards firmness. Prices have not been altered from the quotations of last week which, as will be remembered, were as follows:—

Turpentine.	Per Imp. Gal.
1 barrel lots	80 cents
2 to 4 barrels	70 cents
5 to 10 barrels	78 cents

TORONTO

TORONTO, Jan. 5.—Travelers for the various wholesale paint houses have again started on the road after having a short vacation during the holiday season. For the most part the paint markets have been featureless during the week, a steadiness characterizing the situation. Linseed oil held at last week's quotations and turpentine remains firm in the primary market with no advances recorded locally. Gasoline is in very firm market due to another advance in the crude oil product of 10c per barrel. Advances in gasoline would not come as a surprise if the present firmness in the market continues. Glass held steady during the week. The inclination is strong to advance among the local dealers but in the face of fairly heavy stocks there has been no disposition to take the lead by any of the dealers as yet. White lead held steady although there was a slight weakening in the primary market for pig lead. Whether this movement in the primary situation will continue to be sustained is not yet apparent. Glue is becoming scarcer and harder to obtain. There is practically no glue of any kind in the market that can be obtained for less than 25c per pound.

Linseed Oil Held Steady During Week

LINSEED OIL.—There has been a steadiness in the linseed oil market during the week. There have been considerable fluctuations in the price of flaxseed during the week but the price on Wednesday closed very near the figure of the close on the previous Wednesday. Cash flax seed at Winnipeg on Wednesday of last week closed at $2.60 per bushel. The following day it declined almost 10c to $2.50¼. On Friday it climbed back to $2.56 and on Saturday went to $2.58¼ per bushel. Tuesday of the present week the closing price was $2.60¼ and on Wednesday it was down to $2.59½. These prices are sufficient to show the trend of the seed market, which during the week at least could be characterized as somewhat flighty. Receipts of flaxseed at Winnipeg on certain days of the week rolled up fairly heavy again, on Wednesday of the

Can You Handle The Cream of the Paint Business?

Certainly you can,—you would not admit the contrary even to yourself. But are you getting the *cream* of the paint business? Are you constantly selling your paints for the biggest jobs with the best profit and therefore the least worry to yourself? If you are not,

You Are The Dealer

that should get in touch with Brandram-Henderson now. Make ready for the approach of the indoor season by putting in a line of B-H. paints and varnishes. Their appeal to the homekeeper for interior decoration is instantaneous and their quality attracts the best business.

Make arrangements for a B-H. agency now and this cream of your community's paint business will come to you as surely as water flows down-hill.

If we are not already represented in your district, write to

BRANDRAM-HENDERSON LIMITED

Montreal, Halifax, St. John, Toronto, Winnipeg

If interested, tear out this page and keep with letters to be answered.

present week, for instance the inspections were 51 cars, which would seem to indicate that there is considerable seed in the Northwest still. Locally there has been a very light demand for linseed oil. Prices are holding firm and in the face of the present condition in the seed market there is little indication of the probable trend in the near future.

1 to 2 barrels..	$1.08-1.15	$1.10½-1.18
3 to 5 barrels..	1.07-1.14	1.09½-1.17
6 to 9 barrels..	1.06-1.13	1.08½-1.16

Gasoline in Firm Market; Crude Up

GASOLINE.—There is a firmness in gasoline prices due to a further advance of 10c per barrel on the price of crude oil in the Mid-Continent field. This now makes the selling price of crude $1.40 per barrel, which represents an advance of 50c per barrel within the past six weeks. There is a fairly good demand for gasoline in the winter season but it is not as heavy as in the summer and fall. With a greater demand gasoline would in all probability have climbed higher much more rapidly than it has. At the present time it is still quoted at 27½c to 28c with benzine 1c under these prices. Coal oil has advanced 1c per gallon during the week in some of the better grades and all lubricating oils are expected to be marked up in the near future.

Turpentine Again Firm in Primary

TURPENTINE.—There is a firmness again evident in turpentine in the primary market, as indicated by an advance of 1¼c per gallon during the week. Authorities on the turpentine situation in the Southern United States have expressed the opinion that the first three months of the present year will be the smallest in receipts in the history of the trade since the crops have reached their present proportions. One of the heads of a naval stores company who is president of the Savannah Board of Trade has expressed the opinion that the receipts of turpentine during the first three months will not be over 40 per cent. of what they were in the same months last year and that they would probably be nearer 30 per cent. Locally the demand has not been heavy. Stocks are light at present and dealers anticipate higher prices in the near future. Quotations remain the same as last week.

	Per Imp. Gal.
1-barrel lots	$0.75-$0.82
2 to 5 barrels	0.74 0.81
6 to barrels	0.73 0.80
5 gallon	0.80- 0.89

White Lead Maintains Steadiness in Tone

WHITE LEAD.—Prices have held steady in white lead during the week, quotations being still at $14.75 per 100 pounds in less than ton lots and $14.45 in ton lots. There is a slightly easier feeling, however, in the pig lead market and declines have been registered in that commodity during the week. In the primary market in New York it is quoted from $7.40 to $7.50 for spot. This represents a decline from $7.50 to $7.62½ per hundred pounds. Demand for the commodity locally has been somewhat quiet owing to the holiday season. Declines in the pig lead market would indicate an easier tone in the market for white lead in oil, although dealers state the recent advance was not commensurate with the advance warranted by the price of pig lead at the time the advance was made.

Glass Prices Have Been Maintained

GLASS.—There is still a disposition apparent for dealers to clean out present stocks before making advances warranted by the condition in the primary market. "Something will have to be done soon," declared the manager of one wholesale house. "Glass is now being sold for less than we can import it at the present cost figures in the United States. Stocks, however, are being depleted and it is only a question of time until the inevitable will take place." At present prices are holding steady.

Glue Situation Does Not Show Improvement

GLUE.—There is no indication of any improvement in the glue situation. There has been a big demand for the article and supplies have been short with no indication of better supplies. With each advancing week there is increasing difficulty to obtain the article. There is practically no glue on the market that is being quoted under 25c per pound. Hide glues are selling at 25c and pigsfoot is firmly held at 38c per pound, with probability of even higher prices.

Death of W. W. Bennett

The death occured at Gananoque, Ont., of Walter W. Bennett, of I. W. Bennet & Son, Gananoque. Mr. Bennett was ill for only a few days with pneumonia. He was the only surviving member of the Bennett family, and was widely and favorably known in the Canadian hardware trade. The late Mr. Bennett took a great interest in association work and was a member of the Executive Committee of the Ontario Retail Hardware Store Dealeds' Association. Mr. Bennett was a comparatively young man, and will be greatly missed in hardware circles. He is survived by his wife and one daughter.

Personal

Frederick J. Brule has resigned from the staff of the Anaconda Copper Co., to accept the position of chief engineer of the British American Nickel Corporation with headquarters in Toronto.

John I. Reid has been made superintendent of the Longue Pointe plant of the Canadian Steel Foundries, Ltd., Montreal. He assumes his duties at once. He was formerly works manager of the American Steel Foundries' plant at Chester, Pa., and recently sales agent for the company at 30 Church Street, New York City.

Lightning Did Not Cause Fire

In a recent article in HARDWARE AND METAL of December 23, 1916, on the durability of metal roofing it was stated that a building in Weston, Ont., had been struck by lightning and was burned. Major J. O. Thorn, general manager of the Metallic Roofing Company of Canada, has drawn our attention to the fact that the building was not burned at the time the lightning struck. The building was struck by lightning but was not burned. Some months afterwards, however, it was burned through the upsetting of a lamp on the inside of the building. Metal sheets taken from this building after the fire were in some instances restamped and used again.

Obituary

Hagersville, Ont.—The death occurred here of Jas. Sheldrick, hardware merchant.

The S-W agency is identified by this trade-mark

and it is recognized by paint users the world over as being the identifying mark of the best prepared paint and other finishes that can be produced.

S-W Agents are profiting

by our Extensive International Advertising Campaign to Consumers because they are the merchants who sell the **most** of the **most satisfactory** paint products.

If you are interested in **a better selling** line of paints and finishes let us tell you about our Exclusive Agency proposition.

Our distributing points

from coast to coast enable us to fill your orders quickly and eliminate part of the cost of transportation and all the delays of long distance shipments.

Send us a postal card to-day with your name and a question mark on it.

THE SHERWIN-WILLIAMS CO.

Three-quarters of a Century

It is our pleasant duty to announce that the present year is the **seventy-fifth** *our firm has been in existence, and during this long vista of time the business has been successively controlled by* **three generations,** *whose efforts have ever been directed towards the advancement of manufacturing, and to whose zeal and energy we are indebted for the distinguished position the firm holds to-day in the field of commerce.*

In acquainting you with the fact of our long and successful business career, we at the same time thank you for the share you have had in its development, and assure you our efforts in your interest will not relax in the future.

Re Gauges and Prices of Sheets.

Prices which follow on black and galvanized sheets are purely nominal. The market has reached a state where prices are quoted only on application and for immediate acceptance.

On account of it being practically impossible to secure galvanized sheets from England, owing to the war, American mills have decided that they will no longer roll the English gauges to meet this competition. However, they will continue to roll at 10¾ oz., which will be known as such or a 30 gauge, and will take the place of the former English 28 gauge.

SHEETS (BLACK)

Lowe Brothers' Paints turn random buyers into loyal, steady customers

Good-will is the biggest asset any store can have. It is usually built on trifles and probably costs nothing. Yet the store that has the people's good-will is "like the house founded on a rock."

You can secure the good-will of your paint customers by selling them something just a little better than they thought they'd get—Lowe Bros. High Standard Paints.

People who buy Lowe Bros.' High Standard Paints from you will always say: "Well, they're certainly nice people to deal with." Good impressions linger. They mean "good-will."

At that, we do two-thirds of the selling. You only one-third. Ask us.

Lowe Brothers LIMITED TORONTO

Lyon Paint & Glass Company, Limited, Winnipeg, Man.

Back in 1842

the old firm of McArthur, Corneille (now McArthur, Irwin, Limited) began making paint, and shortly after received the Royal Patents from the Crown to manufacture

CROWN DIAMOND PAINTS

All these years efforts have been concentrated to producing a paint that would meet the most exacting requirements of the Canadian trade.

The success attained is evidenced by the continued demand and increasing sales of CROWN DIAMOND PAINTS.

From the small beginning 75 years ago, the business has expanded until plants are now operated at Yorktown, Virginia, and Millerton, N.B., as well as five factories at Montreal and a Toronto Branch.

The oldest Canadian household paint—an honest product that has withstood the severest and only true paint tests of Time and Wear.

An old firm—A tried and proven product.

McARTHUR, IRWIN, LIMITED

THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

$469.20 a Year for National Advertising

A half-page advertisement in **MacLean's Magazine**, every issue for a year (12 times), costs $469.20.

Figured out proportionately, it means:

$164.22	**to influence**		**Ontarians**
$102.00	"	"	Quebecers
$ 23.46	"	"	New Brunswickers
$ 28.15	"	"	Nova Scotians
$ 4.69	"	"	P.E. Islanders
$ 32.84	"	"	Manitobans
$ 37.54	"	"	Saskatchewans
$ 28.15	"	"	Albertans
$ 28 15	"	"	British Columbians

(This division on the basis of provincial populations.)

Really, when you break it up this way, the amount per province for a whole year's powerful influence is ridiculously small. Honestly, can you say "I can't afford $469.20 a year for national advertising?"

MACLEAN'S MAGAZINE

Can perform a service for you, at a price, which you cannot have rendered by any other single medium, or at so low a cost.

N.B.—Objectionable advertising not accepted. Both editorial and advertising columns are closely censored to keep them clean and decent.

of

PAINT USERS.

A CONTINUOUS DRIVE

A steady, irresistible drive has carried the Martin-Senour Co into the very forefront in the Canadian Paint and Varnish field.

This drive has established the thousands of Martin-Senour Dealer-Agents in a position where they are enabled to procure and control the larger share of the paint and varnish trade of their districts.

The successful methods pursued in this drive will be continued by even more aggressive means.

"Quality the best," has always been the Martin-Senour keystone.

Every product carrying our label absolutely guaranteed to best serve the purpose for which it is made.

Advertising and sales help the strongest we can plan and carry into effect

The whole-hearted effort of an experienced personnel in Administrative, Manufacturing, and Sales Departments, devoting their entire energies to serving well our customers.

A combination of Quality and Service which establishes beyond all doubt that MARTIN-SENOUR Paints and Varnishes are the easiest and most profitable to sell.

Let us present for your consideration our exclusive Agency Plan.

WANTED — HARDWARE SALESMAN TO handle the jobbing trade for a Canadian factory. Best of references must be furnished and experience stated. Box 150, Hardware and Metal, Toronto.

It is a good test of a hardware salesman's capacity to find out whether he regularly reads Hardware and Metal. The live ones always do, because they realize that there is no other way of keeping right up to the minute on everything connected with the Canadian hardware trade.

The manufacturer who inserted the above advertisement knew that the 12 men who answered it were men who would be likely to study their proposition.

Use the Want Ad. Page.

"I don't know why I ever stopped subscribing to HARDWARE AND METAL," says an ex-hardwareman who has been in the real estate business for the past six years.

"I am thinking of getting back into hardware again, so you may enter my subscription.

"I have always had a warm spot in my heart for HARDWARE AND METAL, because I made a lot of money through it.

"The best deal I ever made was the result of a prediction in HARDWARE AND METAL, that the price of pig-iron would advance shortly.

"I immediately placed a big order for stoves with one of HARDWARE AND METAL'S advertisers, just in time to take advantage of a heavy increase in the price of stoves.

"I could tell you of many other profitable deals that HARDWARE AND METAL helped me to make, but this was the best one."

If interested, tear out this page and keep with letters to be answered.

PRIEST'S HORSE and TOILET CLIPPERS

Made by American Shearer Mfg. Co.

present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.

Some styles of hand Horse Clippers are illustrated below. All handles are heavy malleables, with threaded shanks, to keep the wood handles from pulling off. Spring tension on the adjusting nuts insures perfect contact at both ends of the cutting plates. Plates are perfectly ground and designed to cut hair, not break it off by main force.

MR. CLERK

YOUR SPARE TIME

WHAT do you do with it? By that we mean, is it bringing you any returns in the ways that go to assure your future success?

How would you like to know of a plan that will bring you in as much (if not more of an income) than your regular occupation. **Would you be interested?**

We have a plan by which hundreds of **clerks** throughout Canada are greatly increasing their weekly incomes. This plan interferes in no way with their regular duties. It helps them to become of more value to their employers as well. Besides it supplies them with extra funds.

Write, and we'll give full particulars concerning it. This places you under no **obligation**, we'll be glad to tell you all about it. Drop us a line **To-Day**.

JENKINS BROS.' PUMP VALVES

proved best and cheapest because of their long leakless service.

They are scientifically compounded from pure rubber and other ingredients to meet the imposed conditions exactly.

Whether your pumps are operating against a low or an extreme head in handling cold, warm or hot water, brine, naphtha, acids, ammonia, gritty water or other fluids, we can furnish the right Jenkins Bros.' Pump Valves to give the most economical duty possible.

Thousands upon thousands are daily proving their ability to stand up under all demands in the leading power and pumping plants in the country.

When ordering state diameter, thickness and size of hole in addition to head pumped against, the kind and maximum temperature of the fluid to be handled.

Write for No. 8 Jenkins Bros.' Catalog.

JENKINS BROS.

LIMITED

103 St. Remi Street, Montreal

The Past Year

has been an important one in the annals of MacLean's Magazine. It has witnessed the addition to the list of contributors of MacLean's of practically all the best Canadian authors — Sir Gilbert Parker, Stephen Leacock, Arthur Stringer, Robt. W. Service, Agnes C. Laut, Arthur E. McFarlane, Nellie L. McClung, Peter McArthur, Alan Sullivan, L. M. Montgomery and many others.

The year 1916 has witnessed the building up of MacLean's to standards of excellence which previously had seemed unattainable for a Canadian periodical. This has been in every sense of the word a remarkable achievement.

Bright Prospects for the Future

But, the coming year will see even greater strides forward. Plans are under way for securing bigger and better features than ever before. The support of Canadian-born star writers will be even more in evidence than during the past year

As an evidence of the big things that are coming, glance over the contents of the January issue. The main feature will be the start of a new serial story by Sir Gilbert Parker, "Jordan is a Hard Road." This is a Canadian story, and will have an especial appeal for every magazine reader in the Dominion.

An outstanding feature also will be "In Dry Toronto," by Stephen Leacock. It is unquestionably one of the funniest sketches that the famous Professor-Humorist has ever turned out. It tells what a Montreal man found on his arrival in the Ontario capital shortly after prohibition had gone into effect. It is one long and hearty laugh from start to finish. Then there is an article on the suddenly revived shipbuilding history of Canada, by W. A. Craick—the story of an industrial romance. B. D. Thornley presents a wonderfully graphic picture of a part of Canada that few Canadians know anything about. This article is illustrated by especially fine photographs. Agnes C. Laut contributes a powerful article on "Paying for Present Prosperity." Main Johnson tells the story of his trip to the Western Front with the party headed with N. W. Rowell, leader of the opposition in Ontario. And then there are short stories by Alan Sullivan, A. C. Allenson, H. M. Tandy and Peter McArthur.

It is the avowed intention of the editors of MacLean's to make each issue this year better than the one that preceded it. It may seem difficult to surpass the unusual array of features presented next month, but nevertheless the editorial plans call for new features that will make this ambition possible.

A Feature of 1917

will be the publication complete in one issue of short length novelettes of Canadian life by well-known Canadian writers. The first of these will be a war story, "Danton of the Fleet," by A. C. Allenson.

Who is Your Customer?

THE finding, holding and multiplying of customers is your great business—probably your great problem. There's no royal road—no priceless route—to them. The plain way to find, interest and persuade them is the well-traveled way, the way of Public Advertising.

But the ideal medium—what is it?

If you are seeking a single medium of potency, of prestige, of sufficient circulation, you will find it in

MACLEAN'S MAGAZINE

You know of this magazine, but do you know it through use?

It can't do everything, but it can do much. It can make your product, commodity or service known nationally—and this at small cost per annum.

N.B.—Objectionable advertising not accepted. Both editorial and advertising columns are closely censored to keep them clean and decent.

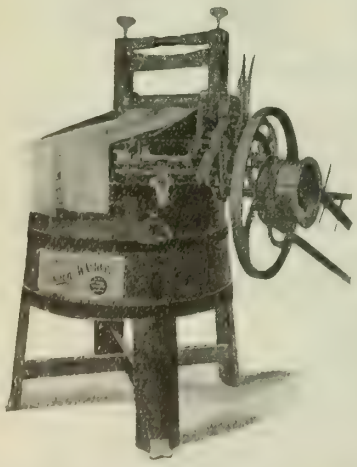
The "LONDON" No. 4 Family Power Washer



The London No. 4 Family Power Washing Machine, operates by Gasoline Engine. Built like the "London" No. 3 Electric. Instead of motor wire, belting, etc., it has a driving and loose pulley on the fly-wheel, a handy belt shift for leading the belt from one pulley to the other.

This machine is a marvel for convenience and efficiency and its price is *low.*

Investigate now.

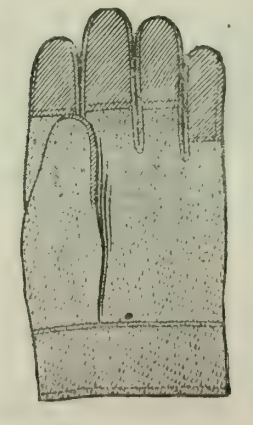
The London Foundry Co., Ltd.

London, Ontario

They sell from January to December

It amazes many a dealer the way these Cotton Gloves of ours sell. Never any trouble to sell them—the gloves are their own salesman. And the repeat orders are so constant, so sure, that the aggregate profit, **without effort,** in a year is entirely pleasing.

TAPATCO REGISTERED BRAND TRADE MARK **COTTON GLOVES**



are utility Gloves—made for business—yet made attractively.

TAPATCO Cotton Gloves are made in Band Top, Knit Wrist and Gauntlet Styles, light, medium and heavy weights. Jersey Gloves and Mitts in Oxford, Tan and Slate.

We also make a leatherette faced glove that is a winner. Get a sample of it.

You probably know these gloves well but give them a good show!

Order from your jobber.

THOMAS C. IRVING, General Manager Western Canada

TORONTO

A want ad. in this paper will bring replies from all parts of Canada.

When their lives depend upon their rifle, men use the Ross .280 High Velocity

The Ross .280 is the natural successor to the finest European imported rifles. Its low trajectory, great destructive power and remarkable accuracy make it a necessary adjunct to a successful hunt.

The Ross .303 Sporting Models are also most popular. They are made with the same action and take the same cartridge as the military weapon. They are very accurate and well finished rifles.

In ordering do not forget the Ross .22 Cadet Rifle. It is the easiest seller of them all, and each sale of a Ross Rifle means a satisfied customer.

Vernier Height Gage

To provide a height gage of widest utility and superlative finish was our goal — and we achieved it.

It is not possible by any known process to produce a more perfect jewel of the toolmaker's art than this new height gage. The graduations are clean, fine and dainty, and permit close accuracy with vernier readings. The finish is a delight both to the expert and the novice. With the attachment for special jig work this gage has the widest range of usefulness.

Every toolroom should have it — every toolmaker needs one—no school shop is complete without it.

Let us send you our new catalog No. 21-MA, describing it in detail.

ANY wind is an "ill wind" if the garage doors are not held securely open while the car goes in or out. The Stanley Garage Door Holder 1774 **locks** the doors in place when they are thrown open, making it impossible for them to slam against the automobile.

Stanley Garage Hardware

insures doors that close snugly, leaving no cracks for wintry winds and dampness to penetrate.

A GOOD many garages will soon be built to accommodate the cars bought this winter by your customers, and you should overlook no opportunity to supply Stanley Garage Hardware. The profits on a few orders from garage builders would be a splendid start for your 1917 business. Better look over your stock to-day and order at once.

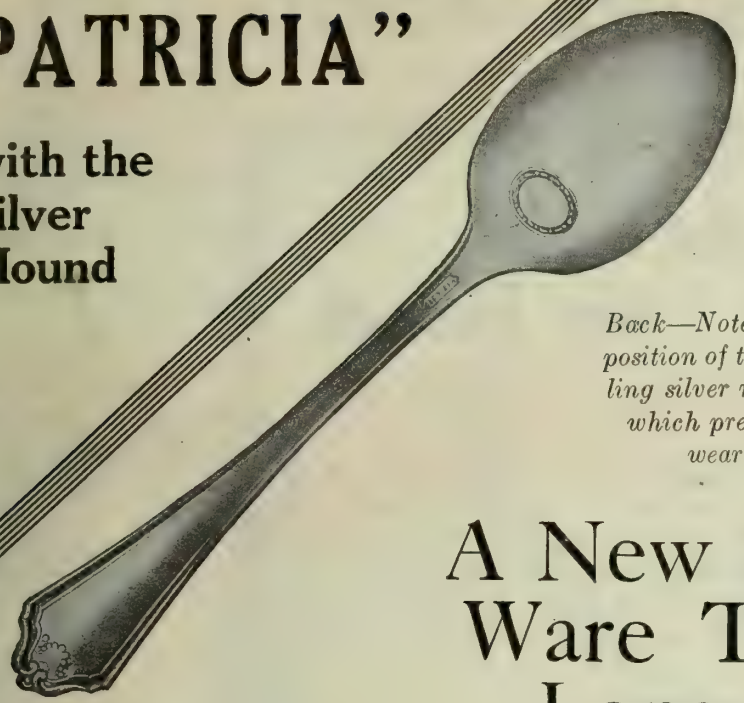
A request addressed to the Service Department of the Stanley Works will bring you the Stanley Garage Hardware Book "R12," also information about the sales helps that will be furnished you.

The Stanley Works, New Britain, Conn., U.S.A.

Canadian Representatives: A. Macfarlane & Co., Corristine Building, Montreal

The "PATRICIA"

with the Silver Mound



Back—Note the position of the sterling silver mound, which prevents wear.

A New Low-Priced Ware That Gives Long Service

Perhaps you are still hesitating about our latest production. Here is our assurance once more that the "Patricia" line offers a really saleable ware at a moderate price. The service value of the sterling silver mound on back of all spoons and forks is indisputable.

The design is beyond question pleasing. Permanent quality and durability are obtained from the heavy deposit of silver on an 18% nickel base. It remains for you to convince yourself, by writing for discounts on the following:

1 Doz. Tea Spoons	$4.75
1 Doz. Dessert Spoons	8.50
1 Doz. Table Spoons	9.50
1 Doz. Dessert Forks	8.50
1 Doz. Medium Forks	9.50
1 only Sugar Shell	.75
1 only Butter Knife	.90
1 only Berry Spoon	2.00
1 only Meat Fork	1.25
1 Doz. Dessert Knives	7.50
1 Doz. Medium Knives	8.00

Front—Note sterling character imparted by combination of Colonial and Bead design.

UNIVERSAL HOME NEEDS

The Hours for Housework are Long Enough

Without adding to their drudgery by doing the work in an old-fashioned and inconvenient way.

Women nowadays are seeking every possible means to release themselves from the long hours and unnecessary toil of other years. They realize it need not necessarily be that "a woman's work is never done," for with proper utensils such as should appear in every home kitchen, that which was formerly work becomes a pleasure and much valuable time is saved for other pursuits.

UNIVERSAL

The service performed by the Universal bread maker, food chopper, or coffee percolator requires no stretch of the imagination for the housewife to grasp. Their superior action and patented features are points she is fully able to appreciate.

The Universal Churn has many other uses besides that of making butter.

Universal Vacuum products have everywhere been welcomed with a full appreciation of their many uses.

Universal Casseroles and other nickelware have an unusually artistic as well as practical appeal.

Universal Electric Home Needs are especially noted for their exceptional convenience and economy in operation.

Be sure that every woman realizes the importance of the Universal trade-mark stamped on every utensil.

Prices in force in 1916 look very cheap compared to what they are to-day.

From
HARDWARE AND METAL

Ready Roofing.—A general advance in all lines of ready roofing is expected shortly, one manufacturer having already raised prices. The situation in the trade is abnormal owing to conditions prevailing in the rag markets. In normal times large quantities of rags are imported into Canada from Europe for making ready roofing. On account of the war this source of supply has been cut off, resulting in a serious shortage of rags, and consequently high prices. This shortage is unprecedented, and is seriously affecting the roofing business.

March 11, 1916.

The weight of Lewisite Roofing is 40, 50 and 60 lbs. per square for 1, 2, 3 ply respectively.

This is 5 lbs. heavier than any other brand of prepared roofing sold in Canada.

LEWISITE

is made from pure Wool, Felt and Trinidad Asphalt and this is all you pay for.

Many brands sell at much higher prices.

None are better and all are lighter in weight.

Wool Felt from which this Roofing is made has advanced 200%. Our prices are low by comparison. Correspondence solicited.

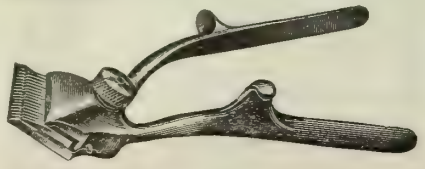
PRIEST'S HORSE and TOILET CLIPPERS

Made by American Shearer Mfg. Co.

present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.
Some styles of Toilet Clippers are illustrated below. All are heavily copper plated and polished before nickeling, thus giving a higher finish, which lasts much longer than ordinary plating. The utmost care is used in grinding and tempering the cutting plates, giving cutting qualities whose superiority may be readily demonstrated by comparison. No. 00 and No. 000 Shaver for beard and neck trimming, are clippers of the utmost lightness and refinement, not paralleled by any other American manufacturer.



STANDARD No. 0, No. 1 and No. 2.
Retailing at about $2.50. High-class barber's clipper.

No. 00 SHAVER
A light and elegant Clipper for beard and neck trimming. Retailing at about $2.25

Quality Service

Courtesy in Business

* * *

Fittingly framed and hanging in the Offices of one of the most important Public Service Corporations on this North American Continent is the following

'Did you say Please and Thank you?'

Broad minded men direct the destiny of that Corporation, men who know that public or private enterprises to be lastingly successful must operate for the public good.

Quality and Service are the two important factors in our business life today, but Courtesy is the door through which they must enter.

We are large producers of Hamilton Pig Iron and our output of Open Hearth Steel Blooms and Billets, Iron and Steel Bars of all shapes and size runs into enormous tonnage.

The products of our mills include practically everything that can be manufactured from Iron and Steel and these we distribute to thousands of satisfied customers.

Our business is an extensive one and a successful one. The World is our market: but our prosperity and success in the future, as in the past, depend upon the continued confidence, co-operation and good-will of the people we serve.

WANTED — RELIABLE, ENERGETIC hardware clerk, 8 to 12 years' experience. Capable of taking charge. Apply, stating salary and giving full particulars, to Box 170, Hardware and Metal, Toronto.

The firm who inserted the above advertisement in HARDWARE AND METAL showed good judgment.

Naturally, replies would only come from clerks who were in the habit of reading HARDWARE AND METAL—and every hardware merchant realizes that a clerk who reads HARDWARE AND METAL is the kind of clerk he wants, because he will be thoroughly informed on market conditions, new selling plans and the best methods of window display and advertising. The above advertisement brought in 23 replies. It cost only 67 cents.

USE THE WANT AD. PAGE.

Said the Superintendent to the Purchasing Agent:

The "Famous Five" files, Fred, are sharp and hard and do lots of work, and if we discard them as soon as they cease to be efficient, as the maker suggests, we will get the best results. The firm that is manufacturing and selling 60,000,000 files a year must know how to use them to the best advantage.

Good advice that, to buyer and to retailer. So specify "Famous Five" when next you order.

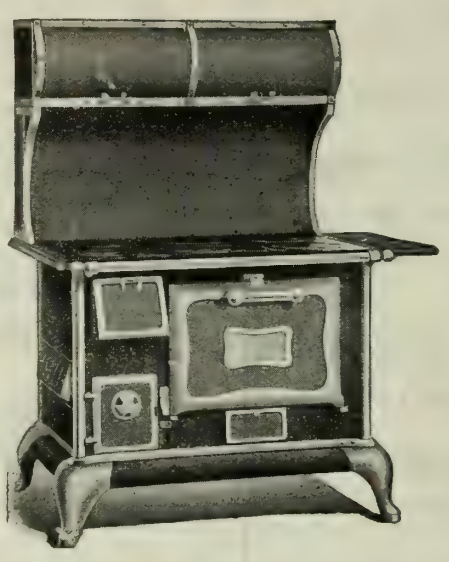
Progressive Manufacturers

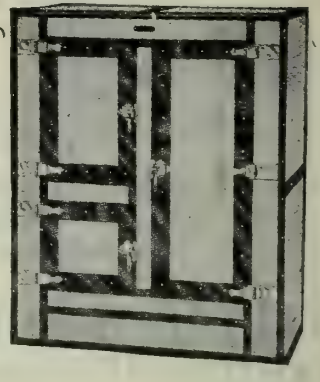
of products in which sheet plate or plate metal is employed are increasing their profits and laying foundations for future prosperity by adopting

ARMCO IRON

ENAMELED TABLE TOP

Sanitary, smooth, convenient, made to fit over top of ordinary wooden table. Manufactured by Enamel Products Co. of Cleveland, Ohio. Perfect and lasting enamel on an Armco Iron base.





THE LEONARD CLEANABLE REFRIGERATOR, made by The Grand Rapids Refrigerator Co. of Grand Rapids, Mich. Armco Iron used exclusively for enamel base. A handsome and successful product made possible by the employment of the best of materials.

Over seventy-five leading stove manufacturers use Armco Iron. By many it is employed in all the sheet metal portions of their products because of its established superiority in Rust-Resistance. Others have been led to its adoption for exterior surfaces by its beautiful tint and finish in the form of polished iron. Very many avail themselves of the advantages it offers as a base for enamel.

Armco Iron's superiority for enameling arises from its remarkable purity. Imperfections in enameled surfaces come from impurities in the metal beneath. Chief of these are tiny pockets of gas. This gas expands rapidly and irresistibly in the heat required to bake the enamel. As the gas expands it forces through the surrounding metal and enamel coating. Some manufacturers have found that the use of Armco Iron almost entirely does away with enameling culls.

The American Rolling Mill Company

Middletown, Ohio

AMERICAN ARMCO INGOT IRON

The trade mark ARMCO carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

The Lectroflater

An Electrically Operated Automobile Tire Pump

Here is a line that can be profitably sold by the hardware trade. These pumps are built for hard service. They are neat in appearance and with the extension cord attachment can be operated from a lamp socket at 110 volt service. The Lectroflater appeals to the man who looks after his own car. It removes the drudgery of pumping by hand and it costs only about one-tenth of one cent to inflate the largest tire from flat to full pressure.

The Lectroflater is light in weight, everything being enclosed in an aluminum case fitted with polished nickel trimmings. Tires can be pumped at the last minute without soiling or burning the hands.

There are three types manufactured and each is guaranteed to develop 125 lbs. pressure without overheating and be free from imperfections of workmanship or material.

Each of our distributing houses carries a complete line of automobile accessories and is in a position to ship stocks at short notice.

The following are a few of the automobile accessory lines for which we are exclusive Canadian Agents:

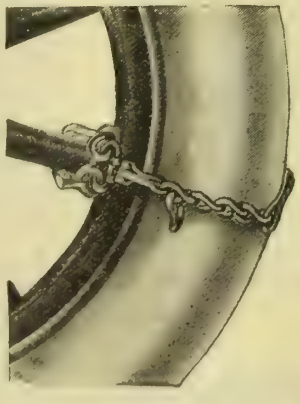
"EASYON" MEANS EASY TO PUT ON

Easyon Tire Chains can be put on—and taken off—easily; really with extraordinary ease. For this reason they become immediate favorites of car owners; they save time and tempers.

But "EASYON" TIRE CHAINS Have Other Advantages:



they wear longer than other chains—they cost less and the cross Chains can be renewed at less expense and put on with greater ease than other Cross Chains.

Easyon Tire Chains are in demand right now, and the sale will be active all winter—when skidding is imminent.

It is necessary to carry only three sizes; these fit all tires.

EASYON CHAINS are packed a set of eight in a bag, four for each rear wheel, enough to give a good grip on any road.

Size 3½ fits 3" or 3½ tires. Retails at $2.40 per set.
Size 4½ fits 4" or 4½ tires. Retails at $3.20 per set.
Size 5½ fits 5" or 5½ tires. Retails at $4.00 per set.

Easyon chains are also made for solid tires.

Write for full particulars.

VITAGAS
TRADE MARK

—"a wonder in the Automobile World"

ONCE TRIED—ALWAYS USED. 50% MORE POWER

Gives a big increase in mileage from gasoline and removes carbon troubles and the wear and tear in the operation of having carbon removed.

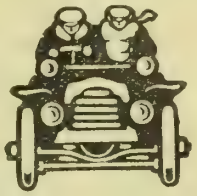
Vitagas has been endorsed by the most critical, so much so that one of Pittsburg's automobile experts has pronounced it to be "a wonder in the automobile world."

A Gasoline Tonic.

Just as a tonic will build up and strengthen the blood of man, so Vitagas purifies and strengthens the elements of gasoline, giving it 25% to 75% MORE EFFICIENCY.

Add this live seller to your auto accessory department. The profit is big, and satisfaction doublesure.

Drop us a card for full particulars.



THE HOWARD-VAUGHAN CO., Niagara Falls, Ont.

Mr. Merchant

See that your clerks and department heads read this paper regularly, it will increase their efficiency. Watch closely advertisements for new selling arguments, it will help increase sales. There is always room for the man who knows.

FORGETTING

One of the things we all do well is to **forget.**

Names that were household words yesterday are gone to-day.

Because people knew your Name and your Line a year ago it is no sign they do to-day. They forget easily.

Keep yourself in the public mind by advertising. It is just as important to make old friends remember as it is to win new friends. Advertising does both.

Elgin Wrenches

Stand for Convenience and Service.

Excel in appearance, finish, durability. The convenient wrench for inconvenient places. Convenient to use, easy to carry, effective in results.

Convention to be Held at Hamilton

Retail Hardware Merchants to Meet on Feb. 20-21-22—Will Arrange to Have Exhibits —Canadian Hardware Manufacturers Exhibitors Will Not Hold Exhibition

THE thirteenth annual convention of the Ontario Retail Hardware and Stove Dealers' Association will be held at Hamilton,. Ont., on Feb. 20-21-22. The place of meeting and the Convention dates were decided upon at a meeting of the Advisory Committee of the Association, held at Toronto this week. With convention dates less than 6 weeks distant, an active campaign will be inaugurated at once, to secure a large attendance.

The headquarters of the Convention will be the Royal Connaught, Hamilton's new hotel. Special rates have been obtained for delegates and will be announced in the Association notices to members.

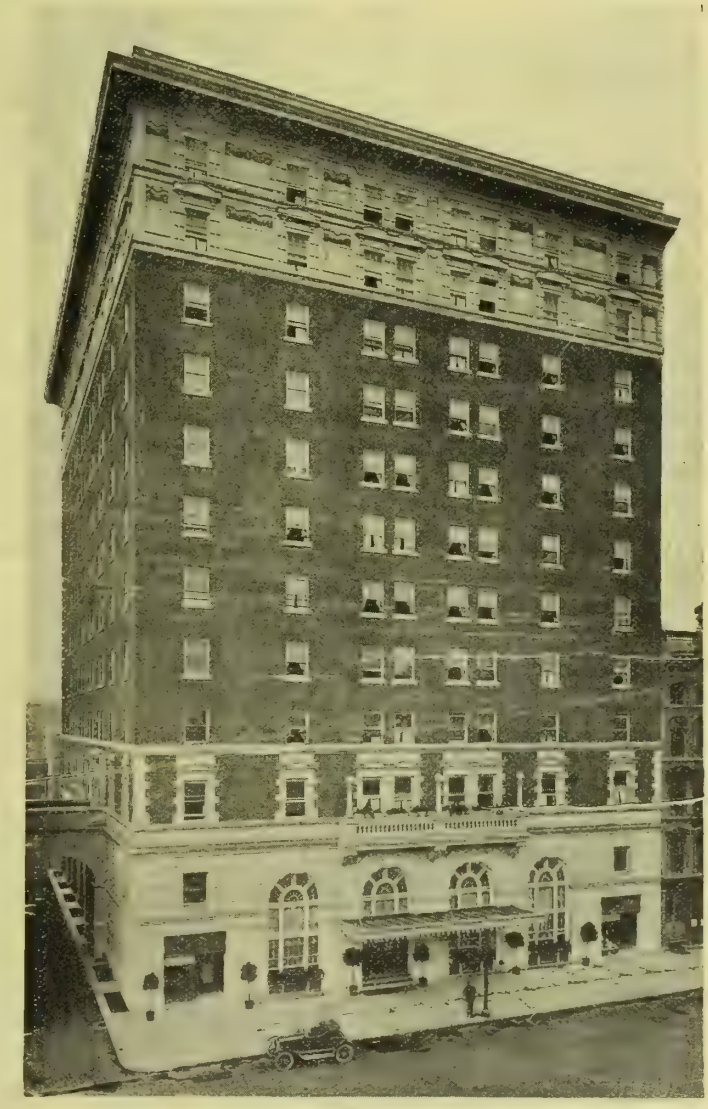
C. H. M. E. A Exhibition Again Postponed.

A letter was read from F. M. Tobin, Secretary Canadian Hardware Manufacturer's Exhibitors Association, advising the retailers that the manufacturers would be unable to hold an exhibition in conjunction with the convention. Some dissatisfaction was expressed by the retailers, at the delay, on the part of the Exhibitor's Association, in notifying the retailers that an exhibition would not be held.

Retailers Will Endorse Exhibit

The Retailers' Association will invite manufacturers and jobbers to hold exhibits during the convention, and for this privilege a nominal fee will be charged. A number of manufacturers, it is said, have expressed a desire to have displays of their products on exhibition during the convention and the retailers will endeavor to accommodate them.

The convention program is now being prepared and will be announced in the near future. An arrangement is being made for special rates on the railways. A suggestion was made at the meeting of the advisory Committee, that the convention be held in March instead of February. This, however did not meet with the favor of the members present. It was pointed out that the retailers can more easily arrange to get away during February, than would be possible in March.



Royal Connaught Hotel, which will be headquarters for Retail Hardware and Stove Dealers' Association Convention.

Membership Increasing.

Secretary Macpherson announced that there had been a steady increase in the membership of the Association during

(Continued on page 47.)

Matt Horton, Hardware Dealer, and His Selling Ways

Matt Has Ambitions to Sell by Mail—He Has a Conscience — Using the Services of Others—His Ideas on Dealer Co-operation

By John C. Kirkwood.

I HAVE said that I used the brain, time and services of others in running my business. I should like to say something more in this connection.

I use a bookkeeper-accountant. He comes in at his convenience—an Englishman, well-trained in this class of work He's getting on in years, nearing sixty. He represents several insurance companies in Hurston, and his time is his own.

It pays me to use this man's time. He keeps my books always written up, and provides me with monthly statements that tell me exactly how I stand. As I said before, I think I can, and do use my time more profitably as a salesman than when I use it doing executive or chore work.

I pay a young lady for keeping me informed about marriages to take place or that have taken place. She is eyes and ears for me in this matter. I pay her so much a name—a price that looks big to her, but which I can afford to pay, because I recover it many times over, as a general thing, from the sales of gifts I make in connection with the weddings and the furnishings I sell to the young couple when they are married. The service this young woman performs for me is a secret between her and me, for it would not do to have it known that she makes money out of her social calls and her gossiping. This same young woman serves me in other directions: She moves about a good deal in a social way, is mixed up with church work and patriotic and benevolent work and so meets many people. In the course of her calls and conversation she gathers a good deal of news of value to me. For example, she reported to me that Mrs. Charlie Burke was thinking of getting a vacuum cleaner—this as the result of a visit to her sister's home in the city where she made the acquaintance at first hand with vacuum cleaners, and acquired a desire for one. You know I have the agency for the Right-O Cleaner, and it really was not a difficult matter to place one in the Burke home; and that sale has resulted in at least a dozen other sales directly traceable to the one I sold to Mrs. Burke.

Turning Hearsay Into Money

In the same way I learned that the McVicars were likely to put in a hot water heating system in their home, and with this knowledge I was able to get the contract for this work; and there was a very tidy profit in the job for me.

One of my very best helpers is Fred Roden, publisher of the *Hurston Star*, and job printer. I use space in the *Star* regularly, but I pay Fred a good deal more a year for printed matter than I do for my advertisement in his paper.

I believe in printed matter—this because I have a first-class mailing list. If I didn't have a mailing list—or, rather, a dozen mailing lists—I wouldn't have much use for printed matter; but with a good gun, so to speak, and a good target, and with good ammunition, I get a very good score every time I try out my marksmanship.

Let me tell you more about how I use printed matter.

I have Fred Roden print me a special catalogue each year.

This is the second installment of the story of Matt Horton, Hardware Dealer, and how he built up his business.

Horton, it will be seen has both energy and original ideas, and these he translates into salesmanship. Horton has a wealth of patience. Life is a long time when taken slowly and when directed by Purpose, and Horton the Hustler is a deliberate sort of chap, more concerned to get foundations broad and firm than to build flimsy superstructures.

A third installment of Matt Horton's story will appear in an early issue of HARDWARE AND METAL.

Using Printing As a Salesman

Each spring I publish a list of things likely to be needed about house-cleaning time, planting time, and so on. I get this ready in the winter. The manufacturers I buy from supply me with all the "cuts" I require, and I study their advertising matter pretty closely. I have my own ideas about arranging the material, to make it easy for the reader to find and understand. I admit quite frankly that I get real help in preparing this work from the catalogues of the big Canadian and American Mail Order houses; they know their business, and I can and do go to school to them.

As you know, I put a cover on this little catalogue of mine; and generally through favor of manufacturers and their co-operation, I am able to get a little color inside my catalogue.

Just here I may say that some manufacturers pay me real money to have a special advertisement in my catalogue,

and this money helps to cut down the cost to me.

Working Up a Mail Order Business

This catalogue I send to many homes far away from Hurston; and some day I look forward very confidently to doing business all over Ontario—perhaps over all Canada. At any rate, I am aiming in that direction. Heavy goods, on sale everywhere, I cannot, of course, expect to sell outside my own territory; but there are some things light enough to be sent through the mail. For example, there is an English line I sell: a metal edging for framing pictures and photographs. It is a fine thing, and the pictures and particulars in my little catalogue tell the story.

I mention just this one line by way of illustration, but there are many other lines. I find them by reading publications like HARDWARE AND METAL. and the magazines. I find them in department store catalogues and in the 5, 10 and 15-cent stores. By keeping my eyes open, I discover many, many lines easy and profitable to sell.

Making Money Out of Horsemen, Stockmen and Others

Then I have Fred Roden print me a special catalogue for owners of horses and cattle, swine and poultry. This catalogue is the same page size as all my other printed matter. I purposely have my publications uniform in size.

This horsemen's and stockmen's catalogue gets me good business. It gives farmers, teamsters, owners of pedigreed stock, dairymen, poultrymen, swine and sheep breeders real assistance. I don't know another dealer's similar catalogue that equals it. I advertise this catalogue in farm papers, and I send it to special lists which I have compiled for me.

Engaging a Writer

The "copy" for this catalogue I edit, but do not prepare. There's a man in Hurston that does much writing work for me—a salesman in a dry goods store; a man old enough to be a grandfather. He has a wonderful versatility, and a writing gift quite exceptional. Also he has a good idea of selling and advertising. The work I give him is a sort of pastime for him, and it earns him two hundred dollars or so extra a year.

Horton's Gift Book

I get out other catalogues, if such they should be called, from time to time; and one of them I call "Horton's Gift Book." In this I gather together everything in my stock, and some things I do not stock, suitable as gifts—for Christmas, anniversaries, and special occasions. This Gift Book is revised every year—in October, and I suppose a copy of it is in 5,000 homes in Hurston and elsewhere. Every copy goes out with a twine-loop in the upper left-hand corner—an invitation to hang it up and keep it in view at all times. The cost of issuing this Gift Book, as in the case of my other publications, is brought down to a very small sum by the advertisements I get from firms whose goods are listed and described, and who are willing to pay money for having their own lines brought boldly to the attention of my customers.

So you see what I mean when I say that I use the brain and time and services of others in carrying on my business.

Horton Studies Advertisements

I have already given you a hint as to my use of HARDWARE AND METAL and similar publications. I study them closely, for they are full of inspiration and special information. I recall the advertisements of a firm of brush makers. They spoke of brushes that I was not familiar with. I had their catalogue but hadn't paid much attention to it. But the advertisements led me to look up their catalogue, and I saw brushes illustrated and advertised there that, frankly, I knew nothing about. There was a special brush for butchers, brushes for radiators and cornices and bannisters, brushes for furnaces, and so on, almost endlessly. Well, I went to the butchers in Hurston with the catalogue, and got orders from two of them. I sent for a radiator and cornice brush, for samples, and solicited orders with them as demonstrating brushes. Orders were easy to get.

And so I could keep on telling you how I found in the advertisements in my trade newspapers many suggestions that led to new business. It is my practice to write to manufacturers, putting it up to them to tell me how I can sell their goods, and I find most of them exceedingly ready to respond helpfully to my overtures. Indeed, many are ready to go to much trouble and real expense to co-operate with me.

Horton's Views on Canvassing Customers

But I am cautious, and will not let my customers be worried and annoyed by importunities of mine or of others. My attitude is: In soliciting my customers and others to buy this thing or that, am I rendering them a real service? If I can answer this question honestly with "Yes," then I am ready to have them canvassed in my name, through me, and according to my ways; but I will not let them be approached and canvassed in my name by manufacturers direct; and I do not supply to any my mailing list.

You see, these customers, or desired customers of mine, are my chief asset. They have the money I want. And I want their favor and confidence — this through the principle of Service. I am not out to milk them of every dollar I can get out of them; or to overload them with merchandize they ought not to have. Yet, on the other hand, I have no reluctance in trying to have them buy what I think they ought to have.

Continued on page 37.

I will not let my customers be worried and annoyed by the importunities of salesmen.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXIX. TORONTO, JANUARY 13, 1917 No. 2

ORDERS in the hundred millions spell prosperity.

* * *

ONE OLD time ruler has gone by the boards as a result of the war—King Rum.

* * *

NO MERCHANT can afford not to read the article on charging interest on overdue accounts which is to appear next week. Watch for it.

* * *

AN AMERICAN newspaper thinks President Wilson's peace note sounds a good deal like "Tut! Tut!" What does the Allies' reply remind them of?

* * *

IT IS rather superfluous to ask a man how business has been the past year. Any business man who hasn't been able to do pretty well doesn't know opportunity by sight even. But as to the future—that is another story.

DO YOU CHARGE INTEREST ON ACCOUNTS?

DO you charge interest on overdue accounts? Some merchants do; others would like to, but are afraid to try it. They hesitate because of the offence it might give to customers and also because they are not sure what their legal rights are in the matter.

The legal side of this intensely interesting subject will be dealt with in the next issue of HARDWARE AND METAL. Walter E. Lear, perhaps the best authority in Canada on the subject, takes the question up from every angle and tells exactly what the merchant can do and what he can't do. He can charge interest on overdue accounts, no question about that, but he can only do so under certain restrictions. It is important to know what these restrictions are. Mr. Lear tells all about them.

This article will be the first of a new series of legal discussions, each of which will deal with a specific subject of special interest to merchants.

NEW SHELL ORDERS FOR CANADA

THE most significant development in regard to the munition situation probably since the war began is the cancellation of extensive orders placed in the States and the announcement that the work will be handled in Great Britain and Canada. It is said that one Canadian company has received a larger order for shells than any placed in the United States. The Bethlehem Steel Corporation received an order last year that ran to $150,000,000. If the contract placed with the Canadian firm exceeds this figure, it will mark an epoch in the industrial affairs of the Dominion.

The facilities in Canada for handling war orders have been very largely increased and it seems assured that the British War Office is prepared to utilize our shell-making capacity to the utmost.

This can have but one result. The industrial situation during the coming year will be marked by still more feverish activity than ever and the general prosperity of the country will be even greater.

PREPARING FOR PEACE

A CHANGE has come about in the attitude of business men generally toward the future. Though the longing for peace has been heartfelt and intense it has nevertheless been with a vaguely defined sense of dread that most men have looked forward to the period following the cessation of hostilities. They have felt that it must certainly be a time of grave uncertainty, perhaps, even of black panic and class turmoil. A drop simultaneously in wages and prices has seemed among the probabilities, linked up with a falling off in demand and a general slackening of industrial activity. Opposed to this calamity picture has appeared the prospect of good prosperity in Canada as a result of heavy immigration and of a big export trade with all Europe in the throes of reconstruction; but the blacker side of the picture has been predominant.

Such has been the feeling until recently. But of late there has been a much more optimistic feeling apparent. Business men are beginning to feel that there is more to hope for than to fear. The utterances of Lord Shaughnessy on this point are typical of the feeling that has been evident in well-informed circles. Industry, knowing that peace is coming surely, if slowly, has been preparing for it. The new conditions are being anticipated and, on closer inspection, they do not seem so menacing after all.

At the same time, we can be too optimistic. An excess of confidence now would lead to exactly the conditions later that were once feared. Prosperity can be maintained only by far-seeing, rigid preparedness. This necessity is not incumbent on the leaders of industry only; it must be recognized and followed from the top to the bottom of the industrial fabric. Every man playing a part in the business of the country from the president of the C.P.R. to the proprietor of a small cigar store, must prepare now for the new conditions.

Opinions differ as to the probable length of the war. Many very well-informed men, however, feel that it may come suddenly. They believe that the economic conditions in Germany have reached the stage where peace is imperative. It may be that they are mistaken and that the Germans can keep their armies longer in the field. But the belief is held by men who are not visionaries or mere blind optimists. And so, in preparing for peace, the business man should not lose sight of the fact that peace may be closer than we at present think.

Increasing Sales of Automobiles

The Use of Motor Cars is Seriously Affecting Railroad Receipts—Some Figures Which Demonstrate the Great Opportunity That Lies Before the Hardwareman.

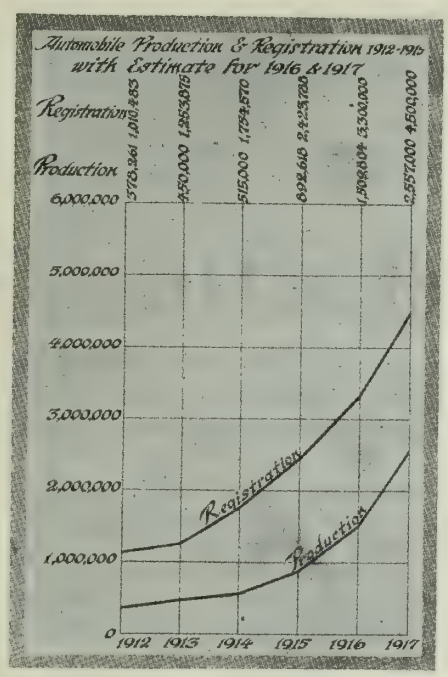
THE most significant factor for the hardwareman to consider at the present time is the increase in the use of motor cars. It is no exaggeration to say that the time is now in sight when every man will own his car. The increases in earning capacity, linked up with the rapid lowering of the price of cars and the reduction in upkeep costs, has brought the car within the reach of everyone.

From the standpoint of the hardwareman this means an ever increasing sale of motor supplies and accessories. The huge demand now felt, in which foresighted hardwaremen are sharing, is merely a forerunner of the business which future years will bring.

In dealing with the growth of the automobile industry one meets with figures that are absolutely astounding. To say that 700,000 cars were sold in the United States in 1915 does not bring full realization of the gigantic industry behind the figures. One begins to realize, however, what it means when a little reckoning produces the result that the sale of these 700,000 cars represents an expenditure of $700,000,000 or more. Figure what the upkeep of those cars must cost—the annual expenditure for accessories. Truly, this is the greatest opportunity that has ever presented itself to the hardwareman.

Perhaps one of the most striking evidences of the growth of the automobile industry is found in the losses sustained by railway companies. In this connection it is interesting to quote from The Financial Post:

"Canadian railroad passenger officials have disclosed some interesting facts in connection with the inroads the increasing use of automobiles have made on passenger traffic receipts in the course of interviews with The Financial Post. It is said by high officials that, although there is undoubtedly a serious loss in railroad earnings on this account, the general situation is in so elastic a state that no hard-and-fast conclusion can be drawn. In addition, any investigation of what is termed one of the most important problems of the day in connection with railroad earnings is hampered at the outset by the lack of available statistics in regard to the Canadian situation. Fortunately, however, this does not apply to the States, so that by studying the available figures on the situation over the line, in conjunction with what is known of the situation here, it is possible to form a fairly accurate opinion on a development that is still in progress of forming.



The increase in motor car production during the past five years has been at the rate of about sixty-five per cent. per annum. The production figures for 1917 in the above chart were arrived at by carrying the curve of past production to its indicated position on this basis.

"The following table illustrates the connection between the increase in autos used and the decrease in passenger earnings in the United States. In contrast to the comparatively small yearly increases in passenger earnings are noted the more satisfactory increases in the freight department:

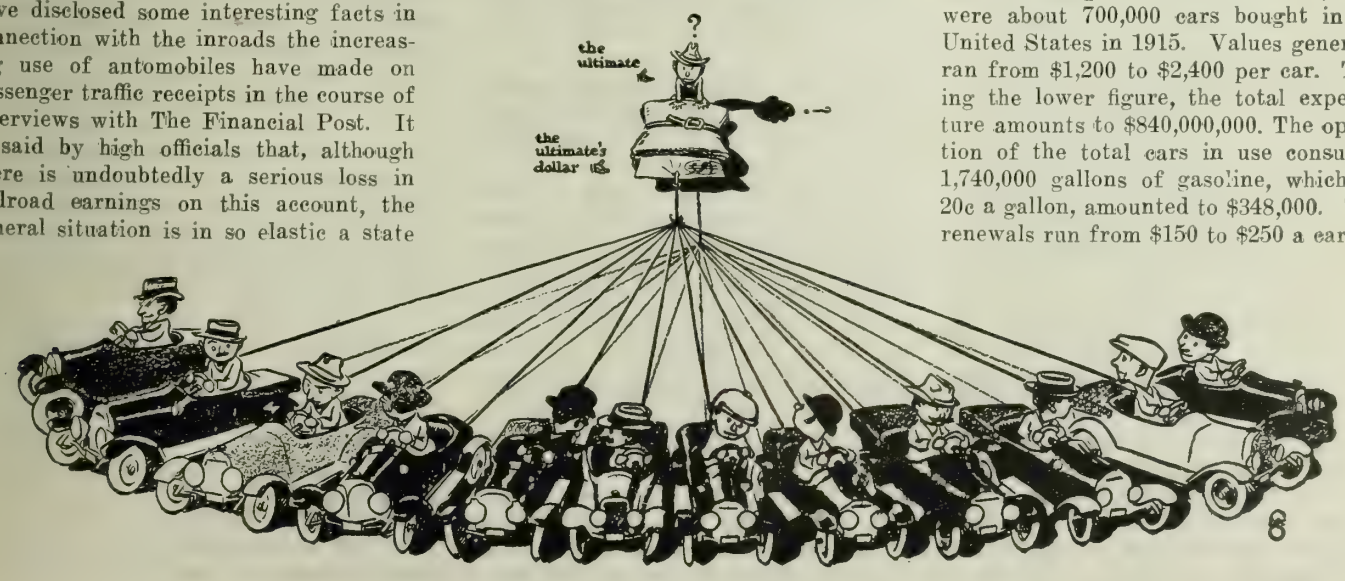
	Passenger Revenue		Freight Revenue	
	Yearly gain	Ratio of gain in 1916 over other years	Yearly gain	Ratio of gain in 1916 over other years
1916	*8.5	....	21.2	....
1915	9.2	8.5	*3.4	21.2
1914	0.8	*1.5	*3.8	16.9
1913	6.1	*0.7	12.8	12.6
1912	*1.1	5.3	0.8	26.9
1911	4.3	4.2	10.5	28.0
1910	12.1	8.7	15.1	27.6
1909	*0.5	21.9	1.3	47.0
1908	....	21.3	....	48.7

*Decrease.

"An interesting fact in connection with the decline in passenger earnings is that it is first noted in 1910, as the sale of autos began to gather headway, although large scale production did not begin until 1911. Confirming this is the fact that, although from 1901 to 1909 the gain in passenger revenue was 60 per cent., against 51 per cent. for freight, the gain from 1908 to 1916 was only 21 per cent. for passenger revenue, against 48 per cent. for freight.

$1,500,000 in 1915

"According to a recent estimate, there were about 700,000 cars bought in the United States in 1915. Values generally ran from $1,200 to $2,400 per car. Taking the lower figure, the total expenditure amounts to $840,000,000. The operation of the total cars in use consumed 1,740,000 gallons of gasoline, which, at 20c a gallon, amounted to $348,000. Tire renewals run from $150 to $250 a car per



—From Collier's Weekly.

annum. The 2,075,000 cars in use in 1915 at only $100 a car would absorb $207,500,000 per year. Wages for chauffeurs and garage expense would make up the difference necessary to establish $1,500,000,000 as the total money absorbed by the automobile industry of the United States in 1915.

Diversion Affects Travel

"It is impossible to divert such a large sum of money from normal use without affecting travel. But too many other factors affect railroad travel for it to be said that this diversion alone is responsible for the falling off which has occurred.

Four-fifths of Visitors Use Cars

"An important summer resort centre in Maine estimates that during last season 81 per cent. of the summer visitors arrived and departed by auto, and the remaining 19 per cent. by train. This, of course, is exceptional, as it applies only to a certain section and class, and which it might be added is largely swollen by additions from Canada. It is, however, indicative of the general situation. In California, where the roads are better and the weather suitable for all-the-year-round use, it is probable that this condition prevails generally. It is noted that 575 cars recently left Los Angeles in one day for San Francisco as part of the normal daily travel.

Canadian Climate a Factor

"The Canadian climate tends to prevent as general a growth of the movement here. They are less generally used in winter. None the less, the tendency follows that of the United States. The extensive use of cars in the prairie sections of the country is especially noted."

Burning Street Car Helps Sell Hardware

A Prompt-Action Personality, and the Peril Abolishing Powers of a Pretty Little Brass Pump Produce Appreciable Persuasion Upon the Purchasing Powers of the Public and of a Considerable Corporation in the City of Montreal

EMERGENCIES test men, and bring to the top their dominant characteristics. Personality impresses itself on all its surroundings, whether in the hardware store or on the street, and personality counts in the hardware trade as in every other business that is built on the support and satisfaction of the purchasing public. Have you ever imagined a street car on fire as an active business building opportunity? There is a hardware salesman and retail manager in Montreal who in the very crucial instant of a street car fire, while the frightened women were piling off pursued by the smoke into the street, saw an opportunity to do some valuable business building, and what is more, did it. In extinguishing that destructive blaze, this enterprising personality incidentally started a constructive fire of enthusiasm for a line of stock in his firm's store, which has led to increased business, and is daily leading to more. Here is how it happened.

One day late in November, 1916, John A. Fraser, retail manager of the firm of James Walker Hardware Co., Ltd., Montreal, went out to lunch just across the street. On his way back to the store he saw at the street railway intersection of Notre Dame and McGill Streets an excited crowd about a Montreal Street Railway Co.'s street car. There was smoke, men were shouting and women screaming as they hurried headlong out of the car. The car driver and conductor were struggling to beat the fire out with brooms and iron rods. The blaze was in the motor box, thoroughly drenched in thick inflammable grease, and the fire was rapidly getting a grip of the combustibles around and above it.

In this exciting state of affairs Mr. Fraser saw an opportunity. He wasted no time watching the fire; he wasted no breath on giving advice or telling people what he was doing. He simply made a bee-line for the back entrance of the James Walker Hardware Co.'s premises, and there in its proper place handily ready to seize found what he wanted. It was a fire extinguisher.

In ten seconds he was directing its jet upon the heart of the fire. In ten more seconds the flames were subdued, the smoke was fading into a blue film of vapor, and the danger was over. Condutor and car driver, amazed and grateful for the timely aid rendered, were congratulating Mr. Frazer, and the crowd was pressing closer to see by what wizardry the expected conflagration had been so swiftly averted. In their curiosity Mr. Fraser saw his business-building opportunity and seized it.

A tall man, he could command attention and be seen by all as he turned round, held the bright brass extinguisher high, and remarked in off-hand, but convincing tones:

"You see, ladies and gentlemen, what did it. The —— extinguisher! It always does. Price $7.50, at the James Walker Hardware Store right here."

That was all; a few words, but very much to the point; an advertisement viva-voce addressed to a visible circle of interest, but with a far further reaching "pull" on the public, as developments proved. The James Walker Hardware Co. is still getting business, which originated with that incident of the street car fire, and the end of the business so directed towards this firm is by no means yet in sight.

But Mr. Fraser's business instincts were not satisfied into cosy complacence by the contemplation of immediate results in general inquiry for the fire extinguisher so effectively demonstrated in public. A street car had caught fire, passengers had been in peril, and the conductor and driver had been compelled to resort to brooms and iron bars as the best implements at their disposal for such an emergency. To suggest that the Montreal Street Railway Co. equip their cars with extinguishers seemed but the natural business course, and this Mr. Fraser promptly did. His manner of bringing the company's attention to the matter follows.

He made out an invoice charging the Montreal Tramways Co. with the sum of $1.50 for the complete re-charging of the extinguisher partly used to extinguish the street car fire.

He mailed this with the accompanying covering letter:

The Montreal Tramways Co., Ltd.,
Montreal, Que.

Gentlemen:

Enclosed we hand you an invoice which speaks for itself, and request that you issue an official order covering same.

Don't you think this
a very low price for
saving one of your cars?

A "——" extinguisher did the trick in just a few seconds—as they always do.

Will you give our representative an opportunity of discussing with you the question of equipping all of your cars with one of them?

Yours truly,
The Jas. Walker Hdwe. Co., Ltd.

"You see," he explained to HARDWARE AND METAL the other day, "I figure that the quickest and the surest way to command the active and interested attention of a large company is to hit them on the pocket-book. (It's effective with others besides big companies.) And the result of that letter was that

the morning after it was delivered I had a visit from the Fire Warden of the Montreal Tramways Company. He came to talk about the bill. He stayed to talk about fire extinguishers and the James Walker Hardware Co. I told him I'd be happy to give him the invoice receipted, together with the invoice for the company's first order for extinguishers from us. He told me that the company used '—— extinguishers' in their premises, and promised us a share of their business. I frankly explained to him that the invoice had already done its work in bringing him into business touch with our firm, and he left with a good impression of our store, which has resulted in many direct orders for our lines of goods from the Montreal Tramways Co."

As Mr. Fraser was talking, a gentleman came into the store and made some purchases at the auto accessory counter. Here was ocular demonstration of the truth of Mr. Fraser's words. The purchaser of auto accessories was none other than E. A. Roberts, president of the Montreal Tramways Co. HARDWARE AND METAL recognizing him, made a note of the fact, and Mr. Fraser went on to tell of an adventure of his in the store when he first learned the value of the fire extinguisher and became a dyed-in-the-wool advocate for it at every opportunity.

"I was priming a small oil stove with wood alcohol," he said, "and pouring the stuff direct from the bottle on the flame—a foolish thing to do, I admit. Well, the flame leaped back into the bottle. The bottle burned my hand, and I dropped it. Papers and light truck back of the counter caught fire. One of our men jumped to the fire alarm we have on the premises. 'Hold on!' I said, 'Give me a chance at this,' and I caught at the extinguisher there in its auto-carrier on the wall —"

"Well?" enquired HARDWARE AND METAL, as Mr. Fraser paused.

"Well, he didn't need to turn in the fire alarm, that's all," said Mr. Fraser. "The fire went out so quick that I've been a booster for this extinguisher ever since."

On another occasion Mr. Fraser used the extinguisher effectively in extinguishing a fire which had started dangerously smouldering along the dust which accumulates above furnace pipes. The furnace was in the basement of the firm's premises. These incipient outbreaks were caught and extinguished in the all-important "first five minutes."

"That is what this particular extinguisher is for," explained Mr. Fraser.

In further conversation with Mr. Fraser, HARDWARE AND METAL learned his ideas of the value of this particular agency as a reputation builder for any hardware store. Fire extinguisher purchasers, he pointed out, are usually the very people any good hardware store waits to attract into its precincts. They are the careful people who are willing to spend money well for a known economical result—safety and the reduction of insurance rates. They are the sort of people whose hardware needs have to be supplied with the first-class goods which it is a pleasure to sell. They have furnishings of value in their homes or they own automobiles, or in some such way they have property worth considering to protect from fire,, and people who have good things, and the habit of having good things, are the people who buy good things whether in hardware or any other lines when their goods require to be replaced. Thus, in Mr. Fraser's opinion, the subject matter of this article is something well worth the attention of the hardware retailer everywhere. His automobile accessory department cannot do without it, for since the British War Office ordered that a fire extinguisher be placed on every motor-propelled vehicle used by the War Department, and since Canadian insurance companies allow 15 per cent. reduction on insurance for cars equipped with fire extinguishers, the automobilist is a pretty certain prospect for a sale. Besides, the whole business of handling this line is dignifying to a hardware store and adds to its prestige, as well as awakening interest infallibly amongst customers of the inquiring turn of mind, who when informed on any subject frequently become purchasers. Farmers are especially interested in this line, for it promises security to them in lantern season when a spark may mean a devastating fire, if not instantly checked. To demonstrate the appliance is easy and interesting, one remarkable feature of the fire-quenching fluid being that it can be squirted over anything at all without doing the least damage. It does not stain the finest fabrics. It will not even cause ink to run on written pages. It is the only fire extinguishing fluid which does not short circuit electrical machinery, and the proof of this is found in the fact that the street car which was so promptly saved from fire in the motor box by Mr. Fraser, as told at the outset of this article, was able to continue on its trips unaffected by the trouble, though the extinguishing fluid came in direct contact with working parts threatened by the flames.

MATT HORTON AND HIS SELLING WAYS

(Continued from page 33.)

Horton Sells Customers Electric Fans

For example, I do my level best to sell all my cutsomers with electric current in their homes an electric fan at from $7.50 to $15; for an electric fan is a fine thing for every home, and especially in homes where there is sickness, and when the hot, breezeless, stifling days of summer are very trying to the one stricken. Most people will spend in a summer the price of an electric fan for ice cream and on outings; and so I need have no compunction about urging them to buy an article that will give comfort in the home for all and that will supply its blessing year after year at no cost but that of the current consumed. But I am not so ready to urge all my customers to buy high-priced or elaborate electric lamps—for the sake of making a profit out of them. I have regard for the circumstances of my customers and for the fitness of things; and not by my will or endeavor will some lamps I carry find their way into homes where they will be out of place by reason of their size or richness.

I hope you get this point I am making, because I count it one of the reasons for any success I have achieved. Some dealers are out to sell all they can to all the people they can, for profit's sake. My attitude is—Am I rendering my customers a **service?** If and when I am, then I am earnest in selling; but when I find myself or my staff selling for our advantage and the disadvantage of the customer, I put the brakes on.

(To be continued).

BEATTY BROS. TO BUILD FOUNDRY AT LONDON

Beatty Bros., of Fergus, who already have a downtown plant at London, Ont., are to establish a foundry at Chelsea Green, a London Suburb. The company will employ between 75 and 100 men in the foundry on the start, and plans to ultimately employ between 300 and 400. Between 50 and 60 of the first employees will be molders. The building to be erected will cost about $30,000, and 250 outgoing and incoming cars will be handled yearly for the company over the London & Port Stanley Railways. The company will manufacture iron pumps, barrel churns, grain grinders, and hand and power washing machines. Beatty Bros. have hitherto bought their castings.

TO ADD AUTO ACCESSORIES

H. W. Petrie, Limited, of Montreal, Que., are opening a large department for the sale of wholesale and retail automobile supplies and accessories, in addition to their regular line of iron and woodworking machinery. A. Carriere, formerly with John Millen & Sons, Ltd., Montreal, is in charge of this department.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

WHOLESALE and retail hardware firms are exercising great care in buying, but are nevertheless buying freely, in anticipation of a good spring demand. The trend of prices is still upwards. Stove manufacturers have advanced prices on stoves, ranges and heaters from 10 to 15%. With an advance of 15% this week the prices of one leading stove manufacturer are now 30% on steel and, 25% on cast ranges, over the prices in effect one year ago. Higher prices have been made inevitable owing to the heavy increases in the costs of pig-iron and other materials. Prices were this week withdrawn on iron and steel. Pig-iron prices were withdrawn several weeks ago. Owing to the serious shortage of coke one of the largest companies in Canada has been forced to close down one furnace. The demand for iron and steel is as insistent as ever. The serious freight congestion has caused a great deal of inconvenience in all branches of the trade. There is almost a famine in some sizes of iron pipe. Advances have been made this week in the prices of heavy hammers, putty, shellac, galvanized sheets, stoves and ranges, horseshoe nails, jack-screws, high-speed drills, ship augers, meat choppers, padlocks, braces, bits, rifles, guns, shoe thread, cow and trace chains. The scarcity and high price of leather has caused a further advance in the price of leather belting. Coal oil has advanced 1 cent per gallon, and lubricating oils are up from 1 to 2c gal. The reduction in passenger train service will have a tendency to disorganize the routes of travelers, and calls on the retail trade in small towns may not be made as frequently as formerly.

MONTREAL MARKETS

MONTREAL, Jan. 11.—With the year now well into its first month, and the holidays for the most part over, the hardware trade is showing every symptom of continuing in the course of last year's business. Seasonable trade adjustments are over. The retailers in the country are already beginning to look towards spring orders, and the next heavy run of orders may be expected to do with sap spouts, cans, can covers, maple tree drills and bits, etc. That all these lines will cost a little more this year goes without saying. But in all other directions business has opened briskly. The big wholesalers of Montreal found on their desks every day this week abundant shoals of mail orders from the retail trade, and indications are towards busy times this spring. Transportation conditions and iron and steel difficulties of delivery are fully as serious as ever at present.

Iron and Steel in Limitless Strength

IRON AND STEEL.—There is not the slightest "let-up" in the seriously difficult conditions besetting the iron and steel markets. Never were mills in more glutted condition as to orders for futures and work in hand. Absolutely adamantine independence is an attitude they sometimes assume as regards orders for article made of iron and steel. So serious is the shortage of many lines of heavy products that people urgently needing such things are prepared, it seems, to pay almost any prices for them and to accept delivery almost any time suggested that is at all within reason, provided they can only get a contract for the production of the goods signed But the mills are in no mood to gobble contracts, and orders for work wait patiently in long procession like the bread lines of days before the war.

Great Shortage of Wrouhgt Iron Pipe

WROUGHT IRON PIPE.—Something approaching to a famine condition begins to exist in the markets as regards wrought iron pipe in several important sizes. There is a marked and most inconvenient shortage noted in the 2-inch, 3-inch, 4-inch, 5-inch and 6-inch sizes. These pipes are all made in Canada, but to get more made is a serious problem with the mills so overloaded with orders, and the "skelp" from which the pipe is made, very hard to obtain in any sufficient quantities from the United States, from where it is imported.

Heavy Hammers Have Advanced Fifty Cts.

HEAVY HAMMERS.—Quite to be expected, considering the state of the steel and iron market, is the advance recorded this week in all lines of heavy hammers. Blacksmiths' sledges, the heavy hammers used in rock drilling, and all masons' heavier hammers are up in price by at least 50c per hundred pounds this week.

Galvanized Sheets Likely To Go Up

GALVANIZED SHEETS.—There is also a marked and most keenly noticed shortage in galvanized sheets at present, and before very long there may be found an advance in price in these over all previous advances, and not perhaps the last advance at that. The market is growing increasingly firm for these and all similar lines, and, as indicated in the mention made of iron and steel, there is no "let-up" anywhere in sight.

Charcoal Tinplates Exceedingly Scarce

TINPLATES.—Gradually the market has become almost totally barren of charcoal tinplates. Prices quoted for these in current quotations have for some time threatened to become merely nominal, and it is a great question now whether any large order for these could be filled in Montreal. It is, of course, impossible now to import any of these plates from Great Britain. It is impossible to import even hairpins from Great Britain now, let alone heavier materials of metal that might be useful in munitions making.

Stove Business Good: Prices Firm

STOVES.—Following last week's advance on stoves by some makers, the market remains exceedingly firm, with outlook for further firmness, due to the conditions in the iron and steel trade, also in relation to almost all materials

used in the manufacture of stoves and heaters. Plates for the manufacture of stove pipe and elbows are lamentably scarce in Montreal, but under these circumstances business is still reported progressing well for the season of stoves. Some manufacturers who did not advance last week have announced advances of from 10 to 15 per cent. this week.

Horseshoe Nails Higher in Price

HORSESHOE NAILS.—As indicated by the Toronto markets report last week, Capewell horseshoe nails are up in price also in Montreal. The prices quoted in Montreal this week are—No. 5, $4.25 per 25-lb. box; No. 6, $4; Nos. 7 and 8, $3.75; Nos. 9, 10, 11 and 12, $3.50. The discount is 10 per cent. off list.

Jackscrews Advance

An advance is recorded in jackscrews this week. The prices now quoted are 1¼ inches, $24 a dozen; 1½ inches, $32.40 per dozen; 1¾ inches, $46.80 dozen; 2 inches, $61.80; 2¼ inches, $90.50; 2½ inches, $108 per dozen.

High Speed Drills Up

High speed drills have advanced also this week, the advance taking the form of an altered discount from the former 80 per cent. to 90 per cent. on list.

Ship Augers Advance

Another advance is noted in ship augers, these being priced about 10 per cent. higher this week by the principa' firms handling them.

Shelf Goods Show A Few Price Changes

SHELF GOODS.—Not a great many changes have been made in prices of general lines of shelf goods for the present week, but there are still a few just to keep the ball a-rolling.

Universal Meat Choppers Change

An alteration upwards in price was made in Universal meat choppers, the advance running to 10 per cent. on previous prices.

Yale Padlocks Up Ten per Cent.

Yale padlocks also came in for a further increase of 10 per cent. on previously quoted prices. Night latches are included in this advance.

Miller Falls Goods Up Also

A 10 per cent. advance is recorded also in all Miller Falls goods, including the various braces and bitts manufactured by this firm.

Rifles and Guns New List: Old Prices

GUNS AND RIFLES.—Any retailer having one or two Ithaca guns on his sporting goods shelves or racks may safely advance the price of these by about 10 to 15 per cent. The Ithaca gun firm has issued notice of advanced prices to that extent on their goods. The Winchester Co. have brought out their new list showing one straight discount throughout of 5 per cent. on the arms and 2½ per cent. on the ammunition. This new list does not imply advanced prices, but is worth the attention of dealers interested.

Shoe Thread Shows Advances in Cost

SHOE THREAD.—A leading Montreal firm quotes prices on two lines of shoe thread as follows this week:—

Barbour's (lb.)—One oz. balls, No. 8, $1.64; No. 10, $1.72; No. 12, $1.75; No. 15, $1.82; No. 20, $1.87.

Imperial (lb.)—No. 8, $1.57; No. 10, $1.64; No. 12, $1.77; No. 15, $2; No. 20, $1.82.

Tin Shows Slight Stronger Tone

TIN.—A similar tendency to that affecting lead this week is noticeable also as regards tin. The indications are towards slightly more marked firmness in tin, though the prices are not altered this week as compared with prices quoted last week. Following are the prices at present:—$49 to $49.50 per 100 lbs.

LEAD.—From a condition rather weaker at time of last report, lead has this week emerged into greater strength. The variation is more in tone than in price quotations, for the quotations given last week still hold good, but the market for this metal seems to be recovering from the off-spell of the holidays. Prices are $10.25 to $10.50 per 100 lbs.

Sheet Zinc, Spelter and Solders Unchanged

ZINC AND SPELTER.—No change is recorded as regards zinc and spelter during the present week. Sheet zinc keeps very firm at 0.25c to 0.25½c per lb., and spelter $15 to $15.25 per 100 lbs. The market for these metals is steady, and demand and supply fairly well balanced for the time being.

Solders Unchanged

Tinsmiths' and wiping solder are unchanged as compared with last week's quotations, being quoted at 0.32c lb. and 0.30c lb. respectively.

Welding Compound Up

Prices for welding compound, Climax brand, are quoted this week at 9c a pound, and if taken in 100 lb. lots, 8c a pound. Cherry brand quotes straight 9c a pound.

TORONTO MARKETS

TORONTO, Jan. 11.—Most manufacturers are now entering the stage where they are working on high-priced materials and many lines of shelf hardware can be expected to go higher when these reach trade channels. Labor is also high-priced and this is an additional factor that will operate to send prices higher. Staple lines such as wire and nails have followed pretty closely the primary markets in the raw materials. But high prices in many articles have been slow in following the upward trend. Wholesalers assert that with these manufactured lines higher prices can be expected. Business during the opening days of the New Year has opened up excellent. January is usually considered a fairly good business month, but indications now point to a heavy trade. Wholesalers anticipate that February will be busy in proportion, although it is one of the quiet months in the hardware trade. Indications would seem to point to the fact that stocks are low in retailers' hands. The trade on a hand to mouth basis is excellent and bills are being met promptly. Wholesale houses are more careful in their buying, especially respecting future commitments. No contracts for an extended time are being made except in cases where it is clearly to their advantage so to do. Manufacturers, on the other hand, are not anxious to enter into contracts for the most part.

Stoves and Gas Ranges Advanced 10 to 15%

STOVES, RANGES.—There has been an advance on all stove lines from 10 to 15 per cent. With certain manufacturers the advance has been approximately 10 per cent., while with other manufacturers the increase has been 15 per cent. These latter changes are to take effect on Friday. All lines of heaters and ranges share in the advance. Gas ranges also are marked up in price from 10 to 15 per cent. The condition of the pig iron and raw material market has occasioned these advances. The advance on stoves market has been intimated in HARDWARE AND METAL as being a strong possibility for several weeks past. In the case of furnaces some of the manufacturers advanced their lines during December, which was recorded in these columns at the time. Other manufacturers will in all probability advance their prices in the near future.

Discount on Cow Chains is Now 25%

COW TIES.—By the changing of the discount on cow chains to 25 per cent. off

list a considerable advance has been recorded in these goods. The former discount was 32½ per cent. There is a firmness in all chain materials. Electric weld coil chain has also advanced, but the new net prices have as yet not been worked out by jobbers. The advance in cow ties follows one made effective within recent weeks.

New List on Firearms and Ammunition Lines

FIREARMS, AMMUNITION. — The Winchester Repeating Arms Company has announced that they will sell their firearms and ammunition from a new list. The ammunition list has been changed in order to allow a uniform discount to be made on all the various lines, the discount being fixed at 2½ per cent. for Canada. On the firearms sales are made net from the new list. The changes do not necessarily mean an advance either in the firearms or ammunition as the prices with the new list figure out practically the same as heretofore. The Winchester Company felt that because of the many discounts which had previously applied on their catalogue it was in the interest of efficiency to make a new list, giving a uniform discount. In the United States the discount off the new list is 40 per cent. When the 37½ per cent. duty is paid it makes it necessary to make the discount 2½ per cent. in Canada on the ammunition. It is understood the jobbers are selling the Remington-Arms-U. M.C. ammunition from the same list as the Winchester.

Paint Prices in Odd Lines Have Been Revised

PAINTS.—A revision in the prices of odd paint lines carried by some of the wholesale hardware houses provides for an increase in these articles. Among the articles in which this revision has taken place is aluminum bronze, bath enamel, enamel leather dressing, bronzing liquid, drier. The advance in certain instances on list prices is from 25 to 30 per cent. These advances follow as a result of the recent advance in paint lines by the manufacturers. The regular weekly report on paints will be found in the paint section.

Brass Snare Wire Up 5c to 8c Per Pound

SNARE WIRE.—An advance of 5c to 8c per pound has gone into effect on brass snare wire. In the No. 22 where the selling price was formerly 67c the new price is now 72c per pound in the 1-oz coils. For the No. 24 where the selling price was formerly 67c. the new price is now 75c. per pound.

Trace Chains Have Registered Advance

TRACE CHAINS.—An advance in the neighborhood of 10 per cent. has gone into effect by the changing of the discount for trace chains. Where formerly the discount was 35 per cent. off list price it is now 25 and 2½ per cent. This follows the general firmness in the market for all steel materials. Elsewhere an advance in cow chains and electric weld coil chain is recorded.

Very Firm Market in Manila Products

CORDAGE. — There is an increased firmness in the market for manila hemp products owing to an increase in the price of the fibre. In the United States the manila fibre is selling all the way from 15c. to 15½c. for fair current, 21c. for good current and 25c. for superior good current grades. This follows a firmness and an advance in the sisal fibre. Furthermore business in the United States in cordage lines at the present time is brisk. Ordinarily at this season of the year manufacturers are able to pile up a surplus of stock for the heavier demand in the spring. With the heavy demand at the present time practically all of the rope in that country is going into consumption. It is anticipated there will be a scramble for rope products there in the spring when so much outfitting on lake and river is done and for which large quantities of rope are required. To some of the cordage men the present situation would seem to indicate higher prices for manila rope.

Three-in-One Oil Advances 5 Per Cent.

OIL.—An advance of approximately 5 per cent. has been made in the price of Three-in-One oil. In the small 10-cent size the price is now 85c. per dozen as compared with 80c. formerly. In the large or 25-cent size the new price is $1.87 and in the handy can the price is now $2.08. The advance in this commodity follows a general firming in all oil products due to the higher prices not only for the crude oil but for the price of cans.

Belting Discounts Have Been Changed

BELTING.—An advance of approximately 5 per cent. has been made in the price of belting material by the change of the discounts. Extra quality belting is now quoted at 30 and 5 per cent. off list as compared with 30 and 10 per cent. formerly. For the standard quality the discount now is 40 per cent. off list. The discount in this latter grade was 30, 10 and 10 per cent. Scarcity of leather and firmness in all leather products is given as the reason for the advance. Leather tap soles and top lifts are holding steady in price and are selling at the same prices as provided in the lists of November 6.

Waste Products Will Probably Make Advance

WASTE.—There is a firmness in the market for waste and advances in this commodity are highly probable in the near future. There has been a heavy demand for this article owing to the good industrial condition brought about by the manufacturing of munitions and the increased activity in all lines of industry. Advances were recorded in the various brands of waste within recent weeeks of from c. to 1½c. per pound.

Market for Lead, Zinc and Solder Steady

LEAD, ZINC, SOLDER.—There was a steadiness in the market for all lead, zinc and solder products during the week. A decline of 1 c. per pound was recorded in lead pipe and lead waste pipe last week, but this has been the only ruffle to disturb the equilibrium of these products within recent weeks. Lead traps and bends are still quoted at net list. Wire solder is quoted at 27c. to 35c. per pound according to the grade. Zinc sheets are quoted at 25c. per pound, spelter at 13c. per pound and pig lead at 9¼c. to 9½c. In the primary market in New York pig lead held steady during the week and is quoted there at 7.40 to 07.50 per hundred pounds. Following are the quotations:—

Spelter, lb.	$0.13	....
Pig lead, per lb.	0.09¼	$0.09½
Lead pipe, lb.	0.13	....
Lead waste pipe, lb.	0.14	....
Lead traps and bends	Net list	
Lead wool, lb.	0.12	....
Lead sheets, 3 lbs. sq. ft.	0.12¼	....
Lead sheets, 3½ lbs. sq. ft.	0.12¼	....
Lead sheets, 4 to 6 lbs. sq. ft.	0.12	....
Cut sheets, ¾c lb. extra and cut sheets to size 1c lb. extra.		
Solder, guaranteed, lb.	0.28½	....
Solder, strictly, lb.	0.26	0.28
Solder, commercial, lb.	0.24½	....
Solder, wiping, lb.	0.23	0.26
Solder, wire, lb.	0.27	0.35
Zinc sheets, per lb.	0.25	....

The metal markets are still being influenced by peace talk and the situation is consequently somewhat unsettled. Copper has declined, otherwise prices are unchanged locally. Business which was quiet over the holidays is improving, and a renewal of former activity is anticipated.

COPPER. — Although coper has declined on account of peace talk, the position of this metal is still very strong, and a recovery is more than likely. The consumption of copper will be very heavy even after the war, which will have a tendency to keep prices up. Locally copper has declined ½c. and quotations are entirely nominal at 36½c to 37c lb.

TIN.—The market is steadier with a

fair volume of business. Quotations are unchanged and nominal at 48c. per pound.

SPELTER.—The situation is unchanged and the market has a quiet tone. Local quotations steady at 13 to 14c. per pound.

LEAD.—The market is characterized by a general tone of dullness. The leading interest maintains its price at 7.50c. New York, but the outside interests are understood to be selling below that figure. Local price 9½ to 9¾c. per pound.

ANTIMONY.—The market generally is featureless, with quotations unchanged at 18c. per pound.

ALUMINUM. — Quotations are firm but nominal at 68c. per pound.

PIG IRON.—There is no change in the pig iron situation, the general tone of the market being strong, though quiet. Prices of domestic pig irons are still withdrawn. In the U.S. the pig iron market is quiet. Buyers continue to wait for developments in international affairs before proceeding with the covering of requirements over the second half of the year. Prices continue firm, but unchanged.

IRON AND STEEL.—Prices on iron and steel bars were this week withdrawn. The market is decidedly firm and the demand is as insistent as ever.

Premier Sheets Have Advanced 80c Per 100 Lbs.

GALVANIZED SHEETS.—New prices have been announced for Premier galvanized sheets which provide for an increase of 80c. per hundred pounds on all the various grades. For the 10¾ oz. the price is now $8.30, on the U.S. 28 gauge $8, U.S. 26 gauge $7.70, Nos. 22 to 24 gauge $7.55, Nos. 18 to 20 gauge $7.40 and Nos. 14 to 16 gauge $7.25 per hundred pounds. The market for all galvanized sheets is very firm. There is strong probability that the Opollo brand may advance in the near future.

Coal Oil Has Been Advanced 1c Gallon

OILS.—Coal oil has been advanced 1c. per gallon on the grades of the Imperial Oil Company. Canadian prime white is now quoted at 12c. per gallon on a bulk basis. Royalite is also quoted at 12c. and Palacine is quoted at 15c. per gallon. There has also been an advance of 1c. to 2c. per gallon on lubricating oils. Black oil in the summer grade is quoted at 12c. per gallon and in the winter grade at 12½c. Cylinder green oil is selling at 36½c., paraffine at 19½c. and XXX machine oil at 22c. per gallon. These lubricating oils have been changed from a barrel-included basis to a bulk basis with an extra charge made for the barrel. These changes have been intimated in HARDWARE AND METAL as being strongly probable for some weeks past.

LONDON MARKETS

LONDON, Ont., Jan. 11.—Several further advances in prices have gone into effect this week. Business continues good, and is even better than usual for this season of the year. Most local retailers will complete stock-taking this week, and will start to take in spring goods as soon as possible. Collections are good.

Putty Advances 35c per 100 lbs.

Standard putty has advanced 35c per 100 lbs. This advance will not come as a surprise to those who have been following HARDWARE AND METAL'S paint market reports. It has been pointed out repeatedly that owing to the high price of whiting and linseed oil and the increased cost of containers, prices were bound to advance. The new prices are as follows:—

	Per 100 lbs.
Standard 100-lb. drums	$3.55
„ 25-lb. drums	3.65
Pure 100-lb. drums	4.35
„ 25-lb. drums	4.45

Differential Changed On White Lead

The differential on white lead in oil between Montreal and London has been changed from 15c to 20c, which makes the local price 5c per 100 lbs. higher than formerly. Pure white lead in oil is now quoted at $14.50 per 100 lbs. in ton lots, and $14.80 per 100 lbs. in less than ton lots.

Varnishes Advanced

A number of the lines manufactured by the International Varnish Co. have advanced 10 per cent. New lists are now being issued.

Horse Clippers Have Advanced

Hand horse clippers have advanced about 15 per cent. The Newmarket clippers are now quoted at $2 pair. Handicap clippers are $1.50 pair.

Stove Makers Advance Prices

Stove manufacturers generally have advanced their prices on stoves, ranges, heaters and gas ranges. One large local company has advanced prices 10 per cent. The advances on stoves will not come as a surprise. HARDWARE AND METAL has on several occasions stated that higher prices were inevitable owing to the increased costs of pig iron and other material, labor, etc.

Jenkins' Valves Again Advanced

Genuine Jenkins' valves have advanced in price. Globe, angle and check valves are now quoted at 10 per cent. off, and gate valves at 20 per cent. off list.

Horseshoe Nails Advance 1c Pound

Capewell horse nails have advanced 1c lb., and the new list per 25-lb. box is as follows (box):—No. 3, $19.25; No. 4, $9.25; No. 5, 4.25; No. 6, $4; No. 7, $3.75 No. 8, 3.75; No. 9, $3.50; No. 10, $3.50; No. 11, $3.50; No. 12, $3.50.

Discount from above is 10 per cent. in small quantities.

Wire Nails Changes

Wire nails remain firm at $4.70 base. Cut nails are quoted at $4.25 base.

Rope Remains Firm, Unchanged

All Manila and sisal products are firm in price. Quotations on rope follow:

	Lb. base.
Pure Manila	25½c
British Manila	21c
African hemp	21c
Sisal	20c
Cotton, 3-16 (per lb.)	41c
Cotton, ¼ and larger (lb.)	39½c

Spring Booking Has Been Good

Retailers have booked freely but cautiously for spring. Deliveries will be made earlier than usual this year. Some quotations on spring goods follow:—

Poultry netting, 30-10 per cent.
Screen cloth, 100 ft., $2.75.
Screen cloth, 50 ft., $2.80.
Bronze screen cloth, $14.
Harvest tools, 40 per cent.
No. 20 hinges, gross, $11.
Spades, shovels, 1sts, 35-10 per cent.; 2nds, 35 per cent.; 4ths, 20 per cent.
T. F. mowers, 50 per cent.
Eureka sap spouts, $7.50 M.

Oil, Turps and Glass Unchanged

The demand for linseed oil is very light. Prices are unchanged as follows:

	Raw.	Boiled.
1-2 bbls.	$1.15	$1.18
3-5 bbls.	1.14	1.17
6-9 bbls.	1.12	1.15

Turpentine is unchanged at 81c per Imp. gallon in single barrel lots; 80c per Imp. gallon in 2 to 4-barrel lots; 88c per Imp. gallon in 5-gal. lots.

Glass remains as follows:—Single dia., 20 per cent.; double dia., 20 per cent.; cut lights, 50-5 per cent.

WINNIPEG MARKETS

WINNIPEG, Jan. 10.—Winnipeg jobbers report stocks all taken and business for the New Year is in full swing. Already jobbers advise that their warehouses are commencing to hum with business and prospects point to a record month's business. This is encouraging indeed and the volume of orders on hand would indicate that the present rush will continue throughout the next few months. During the past few months retailers have shown a decided willingness to book their orders ahead and those who have done so will certainly be in the best position to receive their goods .

Already indications point to a shortage in many lines and when jobbers are willing to take orders for future shipment, they are practically certain of having their goods.

Many Prices Revised Upwards

During the past week, some price changes have gone into effect and the tendency in all lines is upward—the most important change for the week being in all makes of shovels, scoops and spades. Sisal rope and lath yarn, lanterns and leather belting are also included in the items, which take higher quotations.

The revision in the prices on shovels, scoops and spades provides for the following quotations:

Bull Dog and Jones Shovels: D. H. rd. pt. shovels, $11.10 doz.; L. H. rd. pt. shovels, $11.10 doz.; D. H. sqr. pt. shovels $11.10 doz.; L. H. sqr., pt., shovels, $11.10 doz.; D. H. spades, $11.10 doz.; L. H. spades, $11.10 doz.

Fox and Olds shovels: D. H. rd. pt. shovels, $10.10 doz.; L. H. rd. pt. shovels, $10.10 doz.; D. H. sqr. pt. shovels, $10.10 doz.; L. H. sqr. pt. shovels, $10.10 doz.; D. H. spades, $10.10 doz.; L. H. spades, $10.10 doz.

Above prices are for black finish. Full polished take a net extra of 50c per doz.; half polished, a net extra of 25c per doz.

Black cat and crescent scoops: No. 4, $10.65 doz.; No. 6, $11.40 doz.; No. 8, $12.10 doz.; No. 10, $12.80 doz.

Moose and Jones scoops: No. 4, $11.85 doz.; No. 6, $12.50 doz.; No. 8, $13.15 doz.; No. 10, $13.85 doz.

The price on Manitoba grain scoops for next season has been set at $8.40 per doz. and orders are now being solicited on this basis.

Lantern Prices Advance in West

The latest advance in lanterns, which amounts to 50c per dozen throughout the different styles brings this commodity to a point where one dollar will hardly buy a lantern retail. The cheap tin lantern which has regularly sold in the past for about 75c will have to go to at least $1.00 and a sudden jump of this amount figured on a percentage basis, is almost enough to frighten the retailer. The new prices are as follows:

Short globe, plain, $8.75 doz.; cold blast Japanned long globe $9.25 doz. Cold blast long globe 02, $8.00 doz.; cold blast long globe 4, $8.75 doz.; dash-round reflector, $12.50 doz.

Indications point to an increase in the price of cow ties, etc., and new discounts may go into effect within the next couple of weeks. It is also expected that a big advance in the price of axes will be made very shortly. Jobbers advise these are merely the forerunners to many lines which will be revised when new stocks, which are beginning to arrive in large quantities, are opened up and invoices checked.

Belting and Rope Have Advanced

Another revision in the discounts on leather belting confirm the opinions we have expressed repeatedly in HARDWARE AND METAL that all leather goods are due for decided advances and it is more than likely still further changes may take place in the near future. This advance in leather belting follows a similar one made a short time ago. New discounts are as follows:

Agricultural or No. 1, 47½ per cent.; standard, 30-10-5 per cent.; extra, 30-5 per cent.

The advance in sisal rope and lath yarn of 1c per lb., is undoubtedly in sympathy with address reports from New Zealand as reviewed in HARDWARE AND METAL two weeks ago. The outlook would seem to be that the high water mark has by no means been reached as yet and that Manilas will follow the lead of sisal is altogether likely. To-days prices on sisal rope and lath yarn are figured on the basis of 21c per lb.

Activity in the metal market has not been such as to affect quotations on galvanized and black sheets during the past two or three weeks and prices remain firm as follows:

Galvanized Sheets.

	Per 100 lbs.
Premier, Apollo or Fleur-de-Lis—	
10¾ oz.	$7 75
28	7 40
26	7 15
24	6 95
22	6 95
18 and 20	6 75
Black Sheets—	**Per 100 lbs.**
10 ga.	$5 70
12 ga.	5 75
14 ga.	5 65
16 ga.	5 75
18-20 ga.	5 90
22-24 ga.	5 95
26 ga.	6 00
28 ga.	6 10

Nearly every day sees excitement enough on the grain exchange floor but it is not all due to flax, and quotations remain fairly firm, with the result that no change is noticeable in the quotations being made on boiled and raw linseed oil. No change has been recorded in turpentine, either, and prices for these commodities remain as follows:

Linsed oil, boiler, $1.43 per gal. bbl. lots; raw, $1.40 per gal., bbl. lots; turpentine 85c per gal. bbl. lots; 88c per gal. ½ bbl. lots; 90c per gal. 5 and 1 gal. lots.

BLACK AND SPECIAL SHEETS

Under the above title the American Sheet and Tin Plate Company has recently issued an attractive and interesting booklet of 28 pages, 8½ by 11 inches, which deals instructively with the various classes of sheets produced by this company. In addition to reference made to the different classes of furniture and automobile sheets, stove and range stock, roofing, siding, etc., are several special tables and diagrams of a useful and interesting nature. There is also a diagrom depicting the course of material as it progresses from the ground, through the blast furnaces, steel and rolling mills and thence to the finishing departments and finally to the various products ready for use. These booklets are being distributed to the Canadian trade through their agents, B. and S. H. Thompson & Co., of Montreal.

CHARGING INTEREST ON ACCOUNTS

Probably no question of a legal nature is of more vital interest to the retailer than that involved in the matter of adding interest to overdue accounts. The question has been discussed a number of times, but it is doubtful if any merchant yet feels absolutely certain on all points arising out of the problem.

The most complete and authoritative statement ever made on this subject has been prepared by Walter E. Lear, for HARDWARE AND METAL. *It covers every point and shows the merchant absolutely what he can do and what he cannot do.*

The article will appear in next week's issue.

WHAT OTHER PAPERS SAY

HOW TO BECOME EFFICIENT

From *Dupont Magazine*

First. Ask your superior for a clear, comprehensive outline of the work he expects you to do and how he wants it done.

Second. Ask him further to suggest possible expansion of your activities along lines of value to him and calculated to increase your value to the concern.

Third. Lay out a written schedule of your expected and possible activities and record daily each completed performance, each omission, and, in your opinion, what percentage of efficiency you attained in any attempt to do a thing in which you did not wholly succeed.

Fourth. Strive daily to improve your performance, and to broaden your abilities and their application, crediting yourself with all sure progress and debiting yourself with all failures or partial failures.

Fifth. Make a monthly summary of your efficiency for your own study and comparison with past and future months.

Sixth. If the record fails to improve as a whole or in detail, go to your superior and ask his advice on how to overcome the obstacles that seem to block your progress.

The system here suggested is an automatic one based on the principle that every earnest man is the best judge of his own efficiency.

He knows when he is tardy.

He knows when he is on time, yet wastes time before getting into action.

He knows when his mental or physical motor is running and consuming energy without being in gear.

This system makes every man his own handicapper and his own undodgeable censor.

The suggestion that appeal for advice be made to his superior is based on the fact that any intelligent employer thinks far more of the earnest striver for success who recognizes his own shortcomings and sincerely seeks help than the vain-glorious braggart who assures himself and everyone else he is a world-beater in his line.

Try this system for six months and prepare for a surprise in the shape of promotion and increased pay.

WHO SELLS ACCESSORIES IN YOUR TOWN?

From *American Artizan*

According to reliable estimates, three hundred thousand new automobiles will be sold by manufacturers during the year 1917 and according to the same source of information, there will be in actual use during the year, one automobile for every eight families in the entire country.

This very general use of automobiles—both for pleasure and business purposes—of necessity carries with it an immense demand for repairs, tools and other articles grouped under the broad classification of Automobile Accessories, a large proportion of which yields a very liberal rate of profit to the retail distributor.

When the automobile was regarded as a mere luxury, this class of merchandise was usually obtained by the automobile owner from the garage operator or else direct from the manufacturer, but with the rapid growth of the industry and the general adoption by business enterprises and private persons of the automobile, it soon was found necessary to secure better means of distribution, and it is a significant fact that the most successful manufacturers of Automobile Accessories—those whose products are in most general use—have found the retail hardware store the most efficient means of retail distribution.

We have upon many occasions called attention to the progressive attitude taken by live retail hardware dealers with regard to this comparatively new line of merchandise. Upon many occasions, we have described and shown illustrations of well organized Automobile Accessory departments in retail hardware stores and have related how such stores conduct this department with profit to themselves and satisfaction to their customers as well as to those whose products they handle.

The day of the direct-from-manufacturer sale of Automobile Accessories is past and gone. The successful manufacturer of such articles recognizes to-day that his retail outlet—the one that insures him the safest and most profitable means of distribution—is that of the retail hardware store.

The automobile owner to-day looks to the progressive retail hardware store as his source of supply for the hundreds of various articles classed as Automobile Accessories.

This is, of course, as it should be, for in a very large measure the items classed as Automobile Accessories are "kindred" to hardware and they "belong " in the retail hardware store.

STEEL EXPORT PRODUCTS.

From *American Metal Market*

Some time ago, when there was discussion as to whether the demand for steel in the United States would fall off on account of the high levels the market had attained—and prices are now still higher—it was asserted that the market could readily stand a material diminution in the domestic demand, as foreign buyers stood ready to take a much large tonnage than had hitherto been allotted them, the mills having had to limit their sales on account of being so well sold up.

If anyone still entertains this view it had better be dismissed, for the shipping situation shows clearly that steel exports cannot be increased, no matter what the desire is on the other side for American steel. The losses in vessels have been heavier of late than formerly, and a careful review made in shipping circles leads to the conclusion that according to present conditions and prospects it will not be possible to ship iron and steel abroad this year at the full rate that obtained in August, September and October, when the exports were heaviest. In the three months the shipments of all iron and steel commodities that are returned by weight represented a rate of nearly 7,500,000 gross tons a year, this including pig iron, scrap, castings, etc., in addition to regular rolled steel products.

This is on the basis of shipping conditions as they are seen at present. As to the peace talk, it may lead to peace, in which case there will hardly be as great pressure to export, while if the talk comes to a dead end there is a possibility of a fresh and worse era of frightfulness on the part of the German submarines.

So, whatever the course of the steel market in 1917 it will be a course influenced almost wholly by domestic conditions.

MENACE TO THE CUTLERY TRADE.

From *The Ironmonger*

The position of the cutlery trade due to the threatened curtailment of supplies of steel, to which we referred last week (p. 43), has undergone no change. There have been deputations to the steel branch of Ministry of Munitions, and the grave consequences which will ensue to thousands of people in Sheffield if no arrangements are made to enable cutlery makers to obtain open-hearth steel have been forcibly explained to the heads of the Departments concerned with this matter, but these and other efforts in the same direction appear to have had no effect so far. The authorities state that all the steel that is being produced is wanted for the purposes of the war, compared with which the stoppage of any private trade cannot be considered. The trade, however, is not disposed to be snuffed out without a further struggle, and the matter has now been taken up by the Lord Mayor of Sheffield and the Master Cutler, who are arranging for an influential deputation, including the M.P.s for the city and leading manufacturers, to wait upon the Ministry of Munitions.

The trade has a concrete proposal to submit to the Ministry—namely, that sufficient steel to meet the needs of the cutlery makers for, say, six months should be released for the purpose and distributed among the individual users through some existing organization, preferably the Sheffield Cutlery Manufacturers' Association. The quantity involved is trifling in relation to the aggregate output of steel; indeed, it is doubtful whether more than sixty tons per week is consumed in making cutlery apart from war and export orders, and to cut off that small quantity would involve a vast amount of loss, inconvenience, and industrial disturbance which would not be limited to the Sheffield area. The Government has reminded the trade that it is entitled to buy and use shell-discard steel without restriction of any kind and that there blades, and they are experimenting with the is plenty of it on the market; but the makers have no experience to enable them to judge whether such material is suitable for knife-object of satisfying themselves on the point.

In the matter of celluloid supplies, the cutlery trade has succeeded in obtaining the full concession asked for, the authorities having agreed to remove the material from the list of prohibited imports, although it is intimated that the privilege may be withdrawn should such a step be called for by the exigencies of shipping. No celluloid sheets can be obtained anywhere except in the United States, so that if the prohibition had stood, the manufacture of table-knives must have ceased except as regards a very small proportion of the trade, as there is no substitute for the material available.

PAY WHILE WE CAN

From *The Financial Post*

There is no royal road to the land of high living and low prices. The reason there is so much complaint about high prices is that we want to live well—as well as before the war, and even better. Those with fixed incomes, including the salaried classes, are of course unable to maintain previous standards in the face of rising prices. Other classes are- however, despite rising prices, actually improving their standards by reason of disproportionately increased incomes. Wages and prices will not fall until the soldier man-power returns to productive effort, or until those who remain at the bench and on the farm, or in the office, conserve what supplies are produced. The only effective normal method of checking prices at the present time is to check the consumption of those who have increased incomes, and the only way to do that consciously and effectively seems to be by means of taxation. As long as the Government borrows abroad to get the funds to buy war supplies, leaving to the citizen his wartime profits, or increase of income, to bid against the Government for the same supplies, prices will continue to soar. If the Government deprives the extravagant spenders of their squandering power, it will finance the war at once at less cost, for supplies, and incidentally save the dependents of the overseas men and others who have fixed incomes from the injustice of an ascending scale of prices. It is sound Government finance and justice to the dependents of soldiers that are the fundamental problems involved in the so-called high cost of living problem. It is the Minister of Finance who should deal with the price problem. In this there is room for a New Year's Resolution.

Completion of Fifty Years in Business

A. C. Leslie & Co., Montreal, Hold Re-Union—History of the Company—Founded by A. C. Leslie in 1866

A PLEASANT re-union was recently held by the staff of A. C. Leslie & Co., Ltd., Montreal, on the completion of the company's fiftieth year in business. A luncheon was held at the Canada Club. About thirty were present, including the wives of some of the staff. A splendid programme was provided by members of the staff.

Interesting reminiscences of the old times were given by officers of the company.

In the latter part of 1866 the late Alexander C. Leslie, who had been manager for the wholesale hardware firm of R. Juson & Company, of Hamilton, Ont., moved to Montreal and started for himself as a manufacturer's agent. Mr. Leslie, who was a Scotchman by birth, but brought to Canada in early childhood, had gained a thorough knowledge of the hardware business, first with the retail firm of Benson & Company, St. Catharines, Ont., and later with R. Juson & Company. He soon secured agencies for a number of British and other manufacturers of all kinds of iron, steel, hardware and cutlery, and by dint of hard work and close attention to the interests of his customers, built up a very successful business. As years went by the development of manufacturing in Canada, and other causes, led to many changes in the nature of his business, general hardware lines being gradually dropped, with the exception of cutlery and silverware and more exclusive attention devoted to heavy goods, especially to black and galvanized sheets, tinplates and kindred lines.

In 1896 Mr. Leslie, who was then in failing health, admitted as a partner his son, William S. Leslie, who had been connected with the firm since 1885, and had for about eight years been in charge of their Toronto office. Mr. Leslie, Sr., died in November of that year, and a new partnership was formed under the old style of A. C. Leslie & Company, composed of William S. Leslie and Albert H. Campbell, for many years with Frothingham & Workman. With the new growth in Canada, the business rapidly developed and travelers were sent to parts of the country which had been rather neglected, and greatly increased connection established from the Atlantic to the Pacific.

W. S. LESLIE,
President A. C. Leslie & Co., Ltd.

The old premises at 445 and 447 St. Paul street, were occupied for over thirty years, and were known to many of the older members of the Canadian hardware trade. They were abandoned for offices in the Board of Trade Building, and later in the Merchants' Bank Building. Later the firm moved into the new warehouse at 560 St. Paul street, and as this was soon overcrowded they added in 1915 a new warehouse for some of their heavier stock with a large yard on St. Thomas street.

Early in 1916 the late E. H. Copland, sole partner of Copland & Company, importers of metals, fire bricks and chemicals, died, and this business was bought out by A. C. Leslie & Company, who continued the fire brick and chemical business as a separate department.

The growth of the business, which has steadily continued, and the desire to give employees an interest, led to the incorporation of A. C. Leslie & Company, Limited, in January, 1907. A few months later, Mr. Campbell, who was the vice-president of the company, passed away in the prime of life, leaving a record of which any man might be proud. He was succeeded as vice-president by Thomas H. Jordan, while E. H. Copland, the secretary of the company, was elected a director, W. S. Leslie being president, and the business has continued to the present time under the management of these directors.

The company's Toronto office had for some years been in charge of George B. Ball, and at the beginning of 1912, W. Thos. Cox was sent to Winnipeg to open an office, and under his management the western trade has largely developed.

Four of their staff have enlisted for active service with the colors. The first of these was Mr. Ball, of Toronto, who although considerably over military age, joined the 43rd Battery, raised in his old home town of Guelph, Ontario, and is Quartermaster's Sergeant of that Battery at the front. Fred G. Smith, who qualified first as a cavalry officer and then as an infantry officer, has gone overseas with the 183rd Battalion from Winnipeg, and transferred to the 52nd Battalion from Port Arthur, as a Platoon Officer. Angus MacNish enlisted as a gunner in the 66th Battery, and is now in camp in England, while the last of the four, J. N. McCuaig, is Quartermaster-Sergeant in the 245th Battalion now recruiting in Montreal, under Lieut.-Col. C. C. Ballantyne. Another former member of the staff, Russell Taylor, who enlisted with the 13th Battalion of Highlanders, was taken prisoner in the Battle of St. Julien, and is confined in Germany.

THOS. H. JORDAN,
Vice-President A. C. Leslie & Co., Ltd.

EDWARD H. COPLAND,
Director and Secretary A. C. Leslie & Co., Ltd.

Beatty Bros. Limited Hold Convention

Third Annual Convention Held at Head Office, Fergus, Ont.—Banquet to Staff—Practical Discussions on the Firm's Products.

BEATTY BROS., Limited, held their third annual sales convention on December 27 to December 29, the Eastern sales force meeting at the head office of the firm at Fergus, Ont., and the Western sales force meeting at Winnipeg, Man.

The salesmen from the Maritime Provinces travelled to Montreal, where they were entertained by the Montreal branch. A special car conveyed them with the Quebec salesmen from Montreal to Fergus, where on their arrival they were met with a hearty reception at the station by the sales managers and sales force of Ontario, with the following yell:

Yell! Yell! Yell!
For Old Ontario, yell.
You bet your bottom dollar
We've got a right to holler.
We set the pace
Around this place
When we go out to sell.

Quebec men, however, replied right lustily with—

Watch us zip!
Records rip!
We'll make the others hop,
Quebec will be on top.
There's nothing that will check
Q-U-E-B-E-C Quebec!

Then, with banners floating in the breeze, they marched into the town to their various billets.

The first session commenced at 1.30 p.m. on Wednesday afternoon, Dec. 27, with an address of welcome by the president. The following is the programme as followed:

Wednesday—Welcome by the president, Geo. Beatty; Review of Past Year and Outlook, J. B. Brown; Our Industry, M. J. Beatty; B.T. Cow Stalls, T. A. Farnell; Installing B.T. Stalls, J. C. Colthart; the Manufacturing Situation, W. L. Ham; Relation of Study to Results, D. R. Potter.

Thursday—Manure Carrier, W. A. Fitzsimmons; Horse Stable Fittings, W. D. Mitchell; Installing B.T. Cow Stalls, J. C. Colthart; Ready to Ship Pumps, R. B. Stewart; Cylinders, W. G. Beatty; Ladders, John Tweddle. Banquet (sales and office force and factory heads); concert, G. Beatty in chair.

Friday—Hay Tools, H. A. Rutherford; Hay Tools, M. J. Beatty; Tanns, Hog Troughs and Churns, N. J. Dick; Water Bowls, D. G. Harrison; Cow Stalls, T. A. Farnell; Helping the Factory, F. Deacon; Helping the Office, H. Ham; Answering Questions, M. J. Beatty.

On Thursday evening 120 persons sat down to the banquet and partook of the many good things provided.

Professor Dean, of the Ontario Agricultural College, Guelph, and T. E. Bissell, of Elora, were the speakers of the evening.

Amongst those present were three late members of the force now in khaki Lieut. O. B. Brown, Sergt. H. Robertson, and Pte. L. R. Boys.

A good programme was provided by the members of the office staff, and was thoroughly enjoyed by all present.

There were also presentations made to the different salesmen as winners in the various competitions, percentage increases over last year's sales and highest standings at head office, Montreal Branch and St. John Branch.

The decorative scheme was well carried out. Above the door and across the whole office front was the greeting "Welcome Home." At the entrance two large posters were displayed bearing the inscriptions of "Good-bye, 1916. You've been a good year;" and "Welcome, 1917. You'll be the best year yet." Down the hall and at each side was draped with Union Jacks and bunting. At one end and facing the door was a photogravure of the King; at the opposite end a photograph of the president, Geo. Beatty. On the left a large card, well designed and executed, displayed the names of the 104 men who have enlisted from the firm as an honor roll. The convention room also was decorated with patriotic bunting. Around the walls and pillars were displayed cut-outs of milk products. Large cards told of the food values of milk. On the centre of each table was a huge dummy milk bottle.

The work of the convention, as outlined by the programme, was principally practical demonstrations of the company's goods. Messrs. Rolph, Tweddle and Coleman were amongst the salesmen heading the lists.

Group photograph taken at Beatty Bros. Convention.

EVENTS IN THE TRADE

Fire Losses

Winnipeg, Man.—Winnipeg Hardware and Jobbing Co. suffered loss by fire.

Business Changes

Travers, Sask.—John M. Taylor has purchased the hardware business, property, and building of C. W. Gray, Fifth Street, Lethbridge.

Death of T. Pinch

Thomas Pinch, for many years a leading hardware dealer, at Paisley, Ont., died at his home in Victoria, where he has lived for the last eight years.

$15,000 Bonus

At the beginning of the year, J. H. Ashdown Co., Winnipeg, distributed $15,000 among their 500 employees as an expression of appreciation of their services during the past year. The bonus amounted to 5 per cent. of the employes' salary, and went to all who had been in the company's services for over a year.

$500,000 Blaze at Vancouver

At 11 o'clock on Friday night, Jan. 5, fire destroyed a Vancouver warehouse of Wood, Vallance & Leggett, with a loss of over $500,000. The building contained $700,000 worth of stock, but it is expected that all except $300,000 of it will be salved. The loss on the five-storey building is above $200,000.

Industrial Notes

Victoria, B.C.—The Aetna Iron and Steel Co. is applying for a site on the terminal area on which to erect a plant.

Cobourg, Ont.—The Federal Steel and Foundry Co. are having plans prepared for a steel plant and rolling mill, to cost about $250,000.

Montreal, Que.—Samuel Osborn, Canada, Ltd., will shortly establish a plant here for the purpose of manufacturing high-speed tools for machine shops and special uses. They will also have a hardening plant in charge of a Sheffield expert for treatment of steels. This arrangement will enable the company to make quicker delivery and give better service generally to their customers.

Memorial to Capt. Warren

Toronto, Ont.—As a fitting memorial to their late president, Capt. Trumbull Warren, a member of the 15th Battalion, 48th Highlanders, who gave his life at Ypres, Belgium, on April 20, 1915, the employees of the Gutta Percha & Rubber Manufacturing Co., through their president, C. N. Candee, have presented the superintendent of the Toronto General Hospital with $5,000, for the purpose of endowing a bed.

The bed, which has been placed in one of the men's surgical wards, bears a brass plate inscribed as follows:—

"A memorial to Capt. Trumbull Warren, of the 15th Battalian, 48th Highlanders, killed at Ypres, Belgium, April 20, 1915. Endowed by the employees of the Gutta Percha & Rubber Manufacturing Co."

The bed will be used as far as it is possible for soldiers only.

Obituary

Mattawa, Ont.—The death occurred here of J. Loughrin, dealer in hardware, etc.

Campbellford, Ont.—The death occurred here of Bertram Dawson, president Dickson Bridge Works, Ltd.

Stouffville, Ont.—The death occurred here of James O'Brien, who conducted a hardware and furniture store. Mr. O'Brien was 82 years of age, and was the oldest continuous resident of this town.

Galt, Ont.—The death occurred here this week of Hugh McCulloch, aged 61 years. He was president of the Goldie & McCulloch Co., Ltd., vice-president of the Galt Malleable Iron Co., Ltd., and of the Galt Art Metal Co., Ltd., and a director of the Gore Mutual Fire Insurance Co. A native of Galt, he was closely identified with the industrial progress of the city. He is survived by one brother, R. O., of Galt, and one sister, Mrs. Charles A. Shearson, Toronto. The funeral was held Wednesday afternoon.

Kingston, Ont.—The death occurred here of Robert John McKelvey, aged 52 years. Mr. McKelvey was a partner in McKelvey & Sons, and had been in business here for many years. He took an active interest in many branches of public life and was a member of the A.F. & A.M., I.O.O.F., and also an active member of the Y.M.C.A., the Curling and Bowling Clubs, and of the Board of Trade. For a number of years Mr. McKelvey was a member of the Board of Education, and became its chairman for a year. He showed an interest in military matters, being at one time a captain in the 14th Regiment, P.W.O.R. In the Northwest Rebellion he went on active service, and was stationed in Fort Henry.

Personal

Mr. F. L. Hopkins, of the Stevens Arms Company, was in Montreal this week.

Wm. M. Crawford, sales manager of Sheet Metal Products, Winnipeg, has been east on a business trip.

E. A. Rudin, of Toronto, called on business acquaintances in Montreal during the early part of the month.

J. C. De Wolf, of Middleton, Conn., U.S.A., visited business friends in hardware circles in Montreal this week.

R. C. Stevens, of Wallingford, Conn., U.S.A., was in Montreal this week calling on friends in the hardware trade.

Friends of W. G. Beatty, manager Beatty Bros., Ltd., Fergus, Ont., are congratulating him on arrival of a son.

S. L. Lowther, well known in leather trade and hardware circles in Montreal, paid that city a visit this week from Toronto.

F. W. Whelpley, vice-president of the Bicknell Thomas Co., Greenfield, Mass., U.S.A., was in Montreal during the present week, and called on friends in hardware circles.

A. E. Donovan, manager of the Cushman Motor Works, Winnipeg, has returned from a visit to headquarters of his firm in the United States.

J. St. Mars, western manager for J. Millen & Son, Ltd., auto accessory jobbers, is leaving for Chicago at the end of this month, where he will meet Mr. Millen.

A. J. Wright hardware merchant of Glencoe, Ont. has been elected as Reeve. Prior to his election as Reeve Mr. Wright served for four years in the Council.

John McClary, President McClary Mfg. Co., last week celebrated his 88th birthday. Mr. McClary visits his office regularly each day. He also takes a keen interest in civic affairs.

E. A. Ritch, of the staff of the Weyburn Hardware Co., Weyburn, Sask., was married on Christmas Day to Miss Mildred Wise, of Hamilton, Ont., the ceremony taking place in the latter city.

D. E. Dalzell has joined the travelling staff of the Merrick Anderson Co., Winnipeg, and will represent them in Southern Saskatchewan. He was formerly with the Winnipeg Paint and Glass Co.

Miles Vokes, President Vokes Hardware Co., Toronto, was unanimously appointed Chairman of the Board of Education. Mr. Vokes has served three years on the board ten years as chairman of the property committee.

H. B. Seybold, of the firm of Starke, Seybold & Co., spent the end of last week and early part of the present week in Buffalo, U.S.A., attending an interesting convention of the Beaver Board Co.

R. H. Rucker, of the firm of Henry Rogers, Sons & Co., cutlers, Sheffield, England, has been appointed to the committee to advise the Ministry of Munitions on metal interests. Mr. Rucker is chairman of the Metal Exchange, London.

D. M. Kagay has joined the S. F. Bowser Co., Inc., Fort Wayne, Ind., and Toronto, as manager of the publication department. Mr. Kagay leaves the Richards-Wilcox Mfg. Co., Aurora, Ill., where he has for the past three years held the position of advertising manager and editor of the two house organs published by that firm.

St. John, N.B., News

The retail hardware stores of St. John have decided to close on Saturday evenings during January, February and March.

The annual dinner and reunion of the executive staff and salesmen of the Maritime Nail Co., Ltd., and the Canada Nail & Wire Company, Ltd., St. John, was held this week at the Manor House. Among those present were: S. E. Elkin, president Maritime Nail Co.; Leslie Smith, Ontario territory; G. V. Flower, Nova Scotia territory; B. Y. Elkin, sales manager Quebec and Ontario; E. Presscault, Quebec territory; W. G. C. Simpson, Montreal manager; L. Marshall, assistant superintendent Maritime Co.; A. Martineau, manager Quebec branch; W. A. Pattison, P.E.I., and N.B. territory; Frank Scott, secretary-treasurer, Canada Nail Co.; Wm. Boucher, Quebec territory; H. A. Marvin, assistant general manager, Maritime Nail Co.; George S. Blizzard, superintendent, Maritime Nail Co.; C. N. Labelle, Quebec territory; Major G. M. Johnson, former sales manager; Wm. Cameron, Ontario territory; S. S. Elliott, director, Maritime Nail Co There were also a few invited guests present.

Hardware men in St. John report good business for 1916, with steady demand for most staple lines and remarkably good business in holiday goods at Christmas time. Increased cost of doing business has been an adverse feature, bearing particularly on the retail trade.

C. B. Allan, formerly a leading hardware merchant of St. John, who has devoted his entire time to the duties of treasurer of the patriotic fund since the beginning of the war, has tendered his resignation, and it has been accepted with expressions of great regret. During his tenure of office the proportionate cost of administering the fund has been lower than in any other province in Canada.

CONVENTION TO BE HELD AT HAMILTON

(Continued from page 31.)

the past two years. An effort will be made to boost the membership to 500. It was pointed out that the cost of membership is very small when compared with other associations of a similar character. The present fee ($3) covers membership in the association, convention privileges, members' price book, and the various services such as account collecting etc., which the association has to offer.

Resolution of Condolence

Several members of the committee referred to high esteem in which the late W. W. Bennett, Gananoque, Ont., was held by the members of the Association. At the time of his death Mr. Bennett was an Executive member of the Association. The following resolution was adopted, and will be forwarded to Mrs. Bennett by the Secretary:

"It was moved by W. F. Macpherson seconded by C. W. Conn that the Advisory Committee of the Ontario Retail Hardware and Stove Dealer's Association, on behalf of the Executive tender to Mrs. W. W. Bennett, and daughter, our sincere sympathy in the loss they have sustained through the death of our late Executive member, Walter W. Bennett. His hearty cooperation and interest in the welfare of our Association made him a valuable member of our Executive, and his assistance and counsel will be missed by those who were associated with him.

His consistent and blameless life, we feel, has well fitted him for entrance into that larger life beyond, the attainment of which dwarfs all material interests. We believe that your personal knowledge of this, will temper your grief in your bereavement in which you have our heart felt sympathy."

Unfair Competition

Many of the retailers feel that they have some real grievances regarding certain manufacturers selling their products at prices which enable the department stores and mail order houses to sell the goods retail, at lower prices than the retailers can buy for at wholesale. It is said that there is much unfair competition in selling kitchenware, garbage cans, wash boilers, tea kettles, roasters, tubs, oil stoves and other articles. Certain members state that they are going to the convention largely to take part in the discussion of this subject. They claim to have some interesting evidence to offer. It is expected that some definite action will be taken. Several members of the Association, not on the committees, state that this question has been dealt with in a half-hearted way at previous conventions, but it is now time for the Association to get busy and do something. Not a few complaints have been heard recently, about the association's lack of aggressiveness when certain important matters have come up, and which have required definite action. It is felt in some quarters that if the Association took a decided stand and helped to eliminate some of the objectionable problems now confronting the retail hardware trade, that the membership could be increased at a rapid rate.

The coming convention will be a strictly business one in every sense and it is felt that trade problems will receive more attention at the coming convention that at any previous meeting in the history of the Association.

The members' price book and services which have been developed so successfully by Secretary Macpherson, will also be discussed at the convention, and it is possible that the service may be further enlarged.

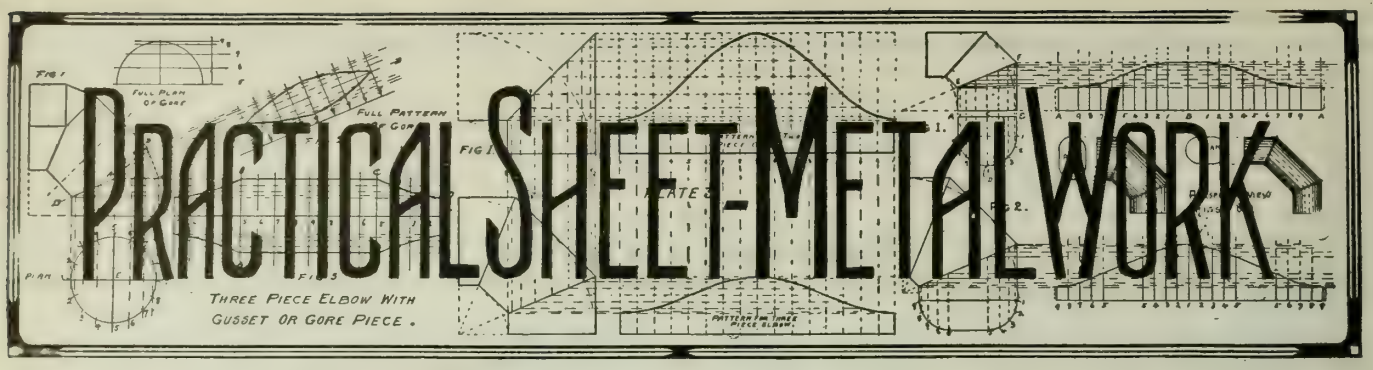
"Delivery problems" is the title of a subject which will in all probability come up for discussion. In many towns co-operative delivery systems are working successfully. Delivery costs have advanced by leaps and bounds during the past few years. Several members have suggestions to offer as to how delivery costs can be reduced.

Part of one session will be devoted to a discussion of tinshop problems and costs, etc.

Secretary Macpherson suggested that the "Inventory" be discussed at the coming convention. Mr. Conn pointed out that HARDWARE AND METAL had recently published some good articles on the subject. Secretary Macpherson stated that he had read the articles in HARDWARE AND METAL. He felt that the subject was a very important one this year owing to the rapid change in the costs of goods and he felt that the members would be interested in a discussion on the subject.

The "Question Box" discussion will be one of the most important features of the Convention. In past years it has always been one of the most interesting discussions and has brought forth many real practical ideas.

There promises to be a lively discussion on the disparity of prices now being quoted by retailers on various lines of goods. In many cases retailers are selling goods at prices below the present wholesale cost.



BY THOMAS STANFIELD

IN this is shown a round pipe resting on a roof of one pitch or slope, with flange for pipe at roof line. In Fig. 1, or the side view, let A-B represent the slope of the roof, and C-D-E-F the elevation of pipe joining same. To develop pattern for pipe with cut to fit the roof proceed as if cutting a section of an elbow, on C-D or on a line parallel to it as G-H, draw a half section of the pipe as shown by semicircle, and divide into a number of equal parts as shown by 1, 2, 3, 4, etc., from these points draw lines parallel with D-F, extending them until they join the lines C-D and E-F, our next step is to draw two parallel stretchout lines as K-K and L-L, now erect lines at right angles to L-L joining to K-K as shown line on either end at K-L. From this point set off with the compasses or dividers the spaces 1, 2, 3, 4, etc., on section on line G-H, repeating to make the circumference complete. With compasses measure distance from line C-D, to the point on line E-F which is intersected by the lines drawn from points in section on line G-H, commencing at C, measure the distance C to E, and set off from line L-L on line K-L. Measure the next line 8, to its intersection at E-F, and set off from L-L on second line, which can be numbered 8 to correspond to line on C-D. Measure the next line 7 to its intersection with E-F and set off from L-L on line 7. Proceed in same manner with remaining lines 6, 5, 4, 3, 2, 1, which will form one-half the pattern, to complete full diameter repeat as shown on lines 2, 3, 4, 5, 6, 7 in the same manner. A line drawn through the points obtained will give outline of pattern required.

To obtain pattern of flange with opening for pipe, draw the outline of flange as shown in Fig. 2, by A-B-C-D, draw a line through the centre of flange, parallel with A-B, as E-F, on this line set off the spaces between E and F, found by the lines drawn from section G-H in Fig. 1. With compasses measure, from line G-H to the points of circumference as marked by divisions 1, 2, 3, etc., and set off on both sides of line E-F, on flange, Fig. 2. Setting distances obtained on lines numbered to correspond, as shown at point 1 on line 1, 2 on line 2, 3 on line 3, etc. A line drawn through points obtained will give outline of opening in flange to receive pipe.

(To be continued.)

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 11. — Settling down to its stride in the field of the paint trade the year 1917 shows every intention of maintaining the pace of the past year. Linseed oil is increasingly firm in tone, though prices show no very marked alterations from last week. Turpentine is firm. The metals used in paint making are not fluctuating much from the firm tendencies of former days, and there is little likelihood that any marked price relieving factors will appear soon on the horizon. Shellacs are higher by fifteen cents a gallon than they were last week, and the furiously firm iron market has even affected putty by raising the cost of containers made of iron and steel so that prices are shaded up this week for putty in certain packages. Gasoline is unchanged in price at 28½ cents per gallon this week.

Linseed Oil Firm and Uncertain

LINSEED OIL.—Market conditions for linseed oil are very uncertain at present as regards deliveries in large quantities, but every indication is for great and perhaps still greater firmness in the future. Paint manufacturers are finding it difficult to book orders at present prices for future delivery of linseed oil, and stocks are not any too heavy in Montreal. It is possible to do business by taking immediate delivery of oil from the crushers at ruling prices which are well over the dollar mark, but future deliveries are not promised till February, and then at market price. The outlook is for firmness. Flax seed is selling at $2.60 per bushel, and transportation trouble is tremendous, so serious that unless the seed can find railroom to come along to Montreal in better supply considerable difficulty may be experienced before long. Prices from the wholesale to retail trade for linseed oil show a considerable range, one firm quoting as low as $1.10 for raw, and $1.12½ for boiled in 1 to 4 barrel lots while others adhered to quotations as last week's which were:

Linseed Oil.	Raw.	Boiled.
1 to 4 barrels ..	$1.15-1.20	$1.18-1.25
5 to 9 barels ..	1.14-1.19	1.17-1.24
10 to 25 barrels..	1.13-1.18	1.16-1.23

Turpentine Still Very Firmly Priced

TURPENTINE.—Firmer market conditions prevail and are predicted for turpentine in trade circles. Prices at present prevailing to the retail trade vary from 75 cents per gallon up to 80 cents, and in some cases where stocks are light over 80 cents is being asked more to conserve stocks no doubt than to realize profits. The outlook is very strong for turpentine according to all opinions, and may be found still stronger for reports from Savannah indicate a disposition on the part of holders to retain their stocks rather than part with them readily. Prices in Montreal are as under:

Turpentine per Imp. gallon: 1 barrel lots, 75-80 cents; 2 to 4 barrels, 74-79 cents; 5 to 10 barrels, 73-78 cents.

Oil Prices May be the Deciding Factor

MIXED PAINTS.—Interviewed by HARDWARE AND METAL on the question as to whether ready mixed paints have attained the top notch of price quotations, or whether there is room for further advances, also whether the recent price advances were thoroughly considered and fully warranted, leading paint merchants of Montreal seemed entirely agreed on one point. That point is that there will be no reduction at any rate in prices of mixed paints for some little time come. Furthermore these manufacturers were more or less agreed on another point, namely that if linseed oil goes much higher mixed paints may again advance. Much depends on linseed oil and turpentine in the matter of paint prices just at present according to the consensus of opinion consulted. The other ingredients of paint, the metals, lead and zinc appear to be in less fluctuating market at present, and though tremendously high priced as compared with former times are not exerting any immediate influence on the situation. The oils on the other hand are causing anxiety, especially the tendencies of linseed oil. It is impossible to predict much with any certainty at present as to paints, but the manufactures of Montreal are in the main inclined to feel that they are taking rather less profit, in some lines a good deal less profit, than under pre-war conditions, and they hold emphatically that the recent price advances were fully justified by conditions and cost of supply of raw materials for paint making. As regards the matter of linsed oil most manufacturers are now looking for a permanently high market for this. Some feel that mixed paint prices are at present just about where they ought to be without affecting a reduction of demand, and unless raw materials go higher it is really unlikely that mixed paints will advance any more.

White Lead in Oil Is Firm Still

WHITE LEAD IN OIL.—With the market for lead showing no specially disconcerting tendencies, and linseed oil still at figures quoted last week there is no indication that the prices of white lead in oil are in for any movement meantime. Much depends on linseed oil though there is room for a little firmness in that direction without any immediate resulting rise in this product. The price of white lead in oil is now at its record height for Canada $14.30 per 100 lbs. for ton lots and over, and $14.60 per 100 lbs. for orders of less than one ton at a time.

Shellacs Show a Sharp Little Advance

SHELLAC.—An increase of fifteen cents per gallon was noted since last report in all lines of shellac, owing to the rapid rise in methylated spirits and firmness in the market for the gum shellac. There might possibly be a still further advance in shellac before next week as the market is very strong. Pure white, and pure orange shellacs were equally affected by the advance.

Cost of Packing Advances Putty

PUTTY.—There are slightly higher prices for putty to be recorded this week, but they are not increases in the putty itself, they are increases in the packing. Iron drums for holding putty are away up in price, the cheapest available contract price for them being advanced in excess of the advance noted as under. Putty in bulk in barrels remains at the same price as quoted last

Can You Handle The Cream of the Paint Business?

Certainly you can,—you would not admit the contrary even to yourself. But are you getting the *cream* of the paint business? Are you constantly selling your paints for the biggest jobs with the best profit and therefore the least worry to yourself? If you are not,

You Are The Dealer

that should get in touch with Brandram-Henderson now. Make ready for the approach of the indoor season by putting in a line of B-H. paints and varnishes. Their appeal to the homekeeper for interior decoration is instantaneous and their quality attracts the best business.

Make arrangements for a B-H. agency now and this cream of your community's paint business will come to you as surely as water flows down-hill.

BRANDRAM-HENDERSON LIMITED

Montreal, Halifax, St. John, Toronto, Winnipeg

If interested, tear out this page and keep with letters to be answered.

week that is $2.90 per hundred pounds. In one hundred pound drums putty costs 45 cents more than in barrels that is $3.35 per 100 lbs. In twenty-five pound drums it costs 55 cents more per hundred pounds, that is $3.45 per 100 lbs. A ten cent advance due to packing cost—is recorded for putty in bladders in barrels. In this packing putty now costs $3.60 per 100 lbs. Owing to the advance in freight charges putty prices in Toronto are now 20 cents in advance of Montreal quotations instead of only 15 cents.

TORONTO

TORONTO, Jan. 12.—Prospects for the paint trade have started encouragingly during the first few days of the year. Some of the large concerns whose travelers were sending in very gratifying orders during the closing weeks of the year report a continuation of good trade.

Linseed Oil Prices Have Been Advanced

LINSEED OIL.—There has been a grading upward in the price of linseed oil from the lower levels quoted last week to the extent of 4c per gallon. The difference in the range is now only 3c per gallon, the range being from $1.12 to $1.15 for raw oil. Demand for linseed oil has been fairly good from certain quarters. Flaxseed at Winnipeg held fairly steady during the week, being only 1c down at the close on Wednesday of this week from the close of the flax market on Wednesday of the previous week. On Wednesday of last week it closed at $2.59½ and Wednesday of this week it was $2.58½. The highest point reached during the week in review was $2.60⅛ for the cash product. Receipts of cars at Winnipeg have been quite light during the week, running nine on Monday, eighteen on Tuesday and eight on Wednesday of the present week. Crushers in some instances have difficulty in getting shipments of flaxseed through from the West owing to the freight situation. This is putting linseed oil in a very tight position for delivery by spring. Oil cake is in demand and selling at good prices. Some export is going on and prices for local consumption range around $56 per ton. In certain instances the crushers have withdrawn quotations on oil cake owing to the difficulty of getting suppplies of seed from the West.

1 to 2 barrels..	$1.12-1.15	$1.14½-1.18
3 to 5 barrels..	1.11-1.14	1.13½-1.17
6 to 9 barrels..	1.10-1.13	1.12½-1.16

Gasoline Continues Firm With Higher Crude

GASOLINE.—Crude oil is again near the record price that prevailed last summer when gasoline also reached a record price. Last summer it sold at the wells at $1.55 for the Mid-Continent product while at the present time it is quoted at $1.50 per barrel. This represents an advance of 60c per barrel within a period of six weeks. During that time gasoline has advanced in Canada 1c per gallon. Some of the advance in the raw material has been absorbed through the increase in the price of coal oil and lubricating oils, an advance in these latter products being recorded this week. Gasoline is accordingly in a strong market, and is quoted at 27½c to 28c per gallon. Benzine is at the usual differential of 1c per gallon under these prices. Consumption of gasoline at this time of the year is reported heavier than ever before in the winter season. This is partly accounted for by the fact that more automobiles are now driven throughout the winter and also partly because there are larger numbers of machines in use. Consumption of gasoline is greatly in advance of production at present.

DIFFERENTIALS ON WHITE LEAD

Since writing the market reports on white lead in oil information has been received that the differential for Toronto and Hamilton is 20c higher than Montreal. London and Windsor are 25c higher than Montreal and Port Arthur and Fort William are 30c higher than Montreal. The Montreal price on white lead in oil at the present time is $14.30 per hundred pounds in ton lots, and $14.60 in less than ton lots.

Differential Price on White Lead Increased

WHITE LEAD IN OIL.—During the week the differential price between those prevailing at Montreal and Toronto has been increased from 15c to 20c per hundred pounds. This will increase the price at Toronto, Hamilton and London by 5c per hundred and makes the selling price now $14.50 in ton lots and $14.80 in small lots. It is stated this advance has been occasioned by a recent advance in freight rates. White lead is holding in a firm market as the price of pig lead has been stationary during the week. There is a fair demand for the commodity.

Turpentine Steady; Increasing Firmness

TURPENTINE.—There is a firmness in the primary market that seems to indicate a continued firmness in the local market with a probability of advancing prices. Receipts in Southern producing centres are everywhere falling off which indicates that there will be a period of three months with gradually falling supplies. During the week in the primary market there was an advance of 1¼c per gallon with firmness apparent at the high price. Sales have even been made for delivery as far ahead as May to August at prices but 1½c under present prevailing prices. From May to August will be the period of the new season's production. Locally the demand has been quiet with prices unchanged.

	Per Imp. Gal.
1-barrel lots	$0.75-$0.81
2 to 5 barrels	0.74- 0.80
6 to 9 barrels	0.73- 0.79
5-gallon	0.80- 0.78

Putty Advances 35c Per Hundred Pounds

PUTTY.—There has been an advance of 35c per hundred pounds in the price of putty during the week, which now makes the selling price $3.55 in 100-lb. drums in less than ton lots. In ton lots the price is 20c below this figure and is sold at $3.35. In five-ton lots the price is $3.20 or 15c under the ton-lot price. Bulk putty in casks is now selling at $3.10 in less than ton lots. Barrels of bladder putty are quoted at $3.80 in less than ton lots, while case bladder putty or standard putty is quoted at $3.90 per hundred pounds. Pure putty is sold at 80c in advance of these figures. The reason for the advance has been attributed largely to the increased cost of the containers. There is also a shortage in whiting and it is hard to get. Linseed oil is also high in price. Folowing are the prices now prevailing:

	Less than tons Per 100 lbs.
100-lb. drums	$3.55
50-lb. drums	3.60
25-lb. drums	3.65
12½-lb. irons	3.55
Bulk in casks	3.10
Bladders in barrels	3.80
Bladers in cases (standard)	3.90

Pure putty 80c in advance. In ton lots the price is 20c less than the above and in five-ton lots 35c less than above figures.

Wood Alcohol Goes Up 10c Per Gallon

WOOD ALCOHOL.—There has been an advance of 10c per gallon in the price of wood alcohol during the week. In barrels it is now selling from $1 to $1.05 per gallon and in five-gallon lots at $1.20. The firmnes in price has been caused through the scarcity of raw materials coupled with a good demand. Methylated spirits of alcohol are also firm in price and will probably advance. This commodity is used for cutting down the shellac gum. There is a continued firmness also in the market for shellac.

All Territories Are Alike For "1900" Washers

"1900" Washers sell themselves. Their undoubted superiority—their ability to do a spotless wash in six minutes, without wear, together with the extensive advertising they have had for years — make them the easiest and best line of washers to sell.

There are no "poor" territories. Every class of home needs some kind of a Washing Machine. There is a "1900" Washer in our complete line at a price any household can afford to pay. Your market is limited only by the number of houses in your town.

The "1900" Line

includes 3 styles of Hand Power Washers; 2 styles of Water Power Washers; 2 styles in 2 sizes each of complete Motor Washer and Wringer Machines to operate by Electric Motor or Gasolene Engine—and a full assortment of sizes and grades of superior, beautifully finished hand and power wringers.

The Dealer Gets the Inquiries

Every dealer who proves his worth is given all inquiries from his territory resulting from our extensive twice-a-year advertising campaigns.

This is a highly profitable line for any hardware merchant to handle.

If there is not a live "1900" dealer in your town, perhaps there's a chance for you. Write wholesale department.

The "1900" Washer Company

357 Yonge Street : : : Toronto

Quality First

IN the long run quality is the deciding factor in marketing varnish.

Discriminating buyers have learned by experience that the price per gallon is less inportant than quality and uniformity.

Berry Brothers' made-in-Canada varnishes and enamels need no selling arguments because the label is accepted by even the smallest buyers as a guarantee that all products sold under it are right and true to description.

You can increase the volume of your varnish business by featuring Berry Brothers' brands.

Stock Up With a Live Line of Paints and Finishes

The brand you should sell is Canada Paint.

It is the livest, fastest moving brand on the market and enables you to make bigger profits than ever, because you can turn your stock oftener.

Canada Paint

is the easiest of all brands to sell, for we are educating every possible consumer in Canada to demand C.P. Finishes—we are teaching them just what to order for each particular purpose—how it should be used and when.

You certainly must be interested in a line of finishes you don't have to "talk up"—Canada Paint products fairly jump from your shelves, for they are more than half-sold when the customer reaches your store.

The day that you tell us to put a "C.P. Full Line Agency" sign on your store is the day that you will begin to get a bigger portion of the paint and varnish trade in your district.

The Canada Paint Co., Limited

572 William Street, Montreal

Ramsay's Tire Paint Preserves and Beautifies

A. RAMSAY & SON CO. - *Established 1842* - MONTREAL

Big Market for Brushes

Will you let us say to you that there is a much larger market in every community than is generally perceived. We make a hundred or more different kinds of brushes. For example, there are **Meakins Brushes** for horse stables and carriage cleaning, for garages and automobile needs, for butchers, barmen, stove-makers; for walls, radiators, floors, bannisters, cornices; for kitchens, parlors, schools; for cream separators, gun barrels, bottles.

We do not suggest that you carry stocks or even a sample of every variety of brush, but we do suggest that you have our catalogue and familiarize yourself with our various brushes in order to be able to suggest the right brush to the right person for the right need.

Sell from our Catalogue—Just a last word: Meakins Brushes are good brushes—and our catalogue will tell you why. Our catalogue is valuable. Have you a copy.

Re Gauges and Prices of Sheets.

Prices which follow on black and galvanized sheets are purely nominal. The market has reached a state where prices are quoted only on application and for immediate acceptance.

On account of it being practically impossible to secure galvanized sheets from England, owing to the war, American mills have decided that they will no longer roll the English gauges to meet this competition. However, they will continue to roll at 10¾ oz., which will be known as such or a 30 gauge, and will take the place of the former English 28 gauge.

SHEETS (BLACK)

	Montreal 100 lbs.	Toronto 100 lbs.
10 gauge	6 00	6 00
12 gauge	6 10	6 00

SOLDERING COPPERS.

Base, per lb., 61c cents.

LET US TELL YOU HOW TO SELL MORE PAINT

The hardest job any prosperous dealer has is to keep out of the rut.

The paint you are now selling and the service you are now getting from the maker may seem all right for your trade and maybe they are, but—

Just remember and heed what Ruskin said:

"To rest is to rust."

Until you have heard the Lowe Brothers' proposition, you can't say you KNOW there is nothing better than what you have.

Over 50 years of quality paint-making—over 50 years of brainy, aggressive paint selling, advertising and co-operation with the dealer are bound up in the Lowe Brothers' proposition. Can you afford to ignore it?

Write us to-day.

An Appeal to Men of High Calibre

HAVE you thought of this?—that any advance in a Nation's Commerce, or Civilization or Spirit is due solely to advances in these directions by many *individuals;* or to put it more definitely, by the *Common people.* The spirit or impulses of *leaders* must pass downward—to the *Common people.*

This truth is of importance to us in Canada. We make progress in this or that direction only as the *multitude* is bent in this or that direction.

YOU—perhaps your name is John Brown—must deliberately seek to advance yourself in the direction of ideals. Then you will fire another to do likewise, and he in turn will start another going forward; and so on and so on, until a mass is energized and is moving ahead towards higher achievements.

This means that a heavy burden of obligation rests on every single one of us, if Canada is to advance in high and good ways.

HERE is a practical application—you, as a business man, must consciously and deliberately seek to be a bigger business man, if you would see our good country as a whole advance.

As a business man engaged in the manufacture or distribution of merchandise, you must be well informed with a vision of Canada's business world wider than the bounds of the business which provides you a livelihood; and a fuller knowledge of what is being done, thought or said in the larger business world that incorporates your own.

This wider vision and fuller knowledge can be procured from a reading each week of The Financial Post. (Price $3.00 for 52 issues).

No other single paper perhaps will serve you so soundly and broadly.

How: By guiding you in your investments. It is often harder to invest money wisely than it was to earn it. The successful purchase of securities requires long study of investment matters.

Then when you have about made up your mind what to buy, The Post's Investors' Information Bureau will give you a careful analysis of these securities and its opinion respecting them.

We put it to you that if you admit the truth and force of what we have said above, the logical thing is to subscribe to The POST. In this way you take a necessary step in the direction of larger progress.

This is a high appeal to minds and men of high calibre—men who have the will and courage to follow the biddings of their convictions.

Therefore, we expect many to sign and return the form below:

THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

MACLEAN'S MAGAZINE

for JANUARY

MORE than any other magazine, MACLEAN'S interprets the life, thought and spirit of the Canadian people. It entertains, of course, as a magazine of its class should—this by fine short and serial stories by the foremost living Canadian authors (see "Stories" in the summary of contents on the right, and note that Sir Gilbert Parker begins a new serial in the January MACLEAN'S). But MACLEAN'S does more than entertain: it informs the reader on matters Canadian in a broad way.

As a consequence of its distinctively Canadian character — both as to its principal contents and as to its contributors—MACLEAN'S MAGAZINE has a sure appeal to the best element of the Canadian people, many of whom declare with enthusiasm that it is easily the first of all magazines in their affection and esteem.

At All News-Agents Fifteen Cents

Contents:

SIR GILBERT PARKER. The opening chapters of a new serial, "Jordan is a Hard Road"—a story of the Canadian North-West, introducing some old friends.

STEPHEN LEACOCK. "In Dry Toronto"—rich humor, combined with a latent seriousness. Leacock is always good.

AGNES C. LAUT. "The Cost of the War"—an international business article by this brilliant Canadian writer, whose intimate friends are bankers and financiers and others with inside knowledge.

BETTY THORNLEY. Another Canadian woman writer with the mind of a business man and with a burning love for her Western homeland. Her contribution—"Putting the Yardstick on Canada," is the story of a journey she made last summer to the Skagway region of British Columbia—a part of that province seldom visited and about which most of us know little.

MAIN JOHNSON. Mr. N. W. Rowell's secretary, and who accompanied Mr. Rowell on his recent trip abroad, and visited THE FRONT with him. Mr. Johnson contributes a vivid story of what he saw and learned on the Western Front.

W. ARNOT CRAICK writes of the New Shipbuilding Industry in Canada—a timely article on a matter of the first importance.

STORIES by the following distinguished Canadian short-story writers: Alan Sullivan, A. C. Allenson, Peter McArthur and H. M. Tandy.

DEPARTMENTS. Review of Reviews, where are condensed for busy readers the best things in current literature; The Business Outlook, a well-informed survey of Canadian business conditions, and Information for Investors, a valuable department for those with money invested or looking for investment.

A Straight Talk from the Manager

No. 55

"Going Into" Auto Accessories

HERE and there, all over the Dominion, Hardware Merchants have been telling representatives of HARDWARE AND METAL that they intend "going into" Auto Accessories in a bigger way after the first of the year.

To all these subscribers the colored pages of this week's issue of HARDWARE AND METAL will be very interesting, because they contain information of the greatest importance about quick-selling Automobile Specialties and Sporting Goods.

In these specialty lines, it is the dealer who first takes them up in his town who takes the cream of the profits, and works up an established business.

So it is most important for you to read all the advertisements on the colored pages, and to write the advertisers for more information.

Canadian Laco Philips Company, Limited

Montreal Toronto Winnipeg Vancouver

WANTED, AT ONCE — CAPABLE HARDware man to manage retail hardware business in thriving Ontario town. State experience, salary expected, and give references. Apply Box 182, Hardware and Metal.

Men who are capable of managing a retail hardware business are not easy to find. The position requires a high type of ability. Above all, it requires a man who recognizes opportunities and who knows how to make the most of them. That type of man in the hardware business is almost invariably a reader of HARDWARE AND METAL. There were fifteen replies to the advertisement shown here. It was a point in favor of all the applicants that they were in the habit of reading HARDWARE AND METAL.

USE THE WANT AD PAGE

HOYT METALS

MEMO

January 13th *for your Babbitt Metal file*

There's something behind a five million dollar business, more than reputation.

There's actual value, real service, which means perfect satisfaction.

Last year our business went well over the five million mark, a very satisfactory showing, to say the least.

There's a reason, and it lies in the quality and uniformity of Hoyt Metals; in the excellent service we give, despite the prevailing labor and metal conditions.

Whether you're selling or buying babbitt metals during the coming year, make your buying guide the name "Hoyt."

We make all kinds and grades of babbitt metals, solders, etc. a grade to suit every known requirement.

Write for our price list.

HOYT METAL CO., Toronto

NEW YORK, N.Y. LONDON, ENG. ST. LOUIS, MO.

Condensed or "Want" Advertisements

There is always someone, somewhere, who is looking for just such a proposition as you have to offer—and it is more than likely that he is a hardwareman and a subscriber to HARDWARE AND METAL. Let an advertisement on this page bring you together.

RATES (payable in advance): 2 cents per word first insertion, 1c per word subsequent insertion. An additional charge of 5 cents for each insertion is made when Box Number is required. Each figure counts as one word.

BUSINESS CHANCES

LET JOHN NEW, 154 BAY STREET, TORONTO, sell your business. (4)

HARDWARE STOCK AND FIXTURES FOR sale in a Western Ontario city. Stock is clean and well assorted, and will be sold at a rate on the dollar for a quick sale. Box 416, Hardware and Metal.

PAPER BALERS

THERE IS MONEY IN USING AND SELLing the Jewell Paper Baler. It is the only low-priced, efficient baler on the market. Every hardware store should use one. Splendid side line for one line traveller in each territory. General Sales Co., Stair Bldg., Toronto.

MISCELLANEOUS

SAVE MONEY ON YOUR GLASS SCRAP. We need pieces 4 x 6, at reasonable prices. For particulars apply to Courchesne & Chaput, Joliette, Quebec.

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited. Room 314, Stair Building, Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada. (tf)

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fenson hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fenson Elevator Co., Toronto.

MR. HARDWARE DEALER—YOU CANnot recommend any ash sifter with the talking points that the Burrowes Patent Dust-Proof Rocker Ash Sifter has. What other sifter has a closed scuttle, double rims, easy rocker motion, etc.? You ought to sell this sifter because of its merit. The Burrowes Mfg. Co., 607 King St. W., Toronto. (50)

SIGNS AND SHOW CARDS.

WE ARE THE MOST UP-TO-DATE SIGN and show card firm in Canada. W. H. Stevenson, Stevenson Building, Toronto.

WANTED

WANTED — CHICAGO STEEL BRAKE, eight-foot, second-hand, also second-hand Brown-Boggs circular shears, 2¼ to 19". A. Spratt & Sons, Inglewood, Ont. (26)

WANTED, IMMEDIATELY, FIRST-CLASS, all-round plumber and tinsmith. Married man preferred. Steady work and best wages for right man. Apply to McKinley Hardware Co., Parry Sound.

WANTED — A RETAIL HARDWARE clerk with four or five years' experience in general hardware. State age, experience and salary expected. House & Maunder, Box 419, Trenton, Ont.

If you have a business to dispose of, or are in need of efficient help, try a Want Ad. in Hardware and Metal, and let it assist you in filling your needs.

Kindly Mention This Paper When Writing Advertisers

United States Manufacturers

Have your goods made for you in Canada until your trade here is large enough to warrant your putting up your own plant. An old established manufacturer, now busy on munitions work, with one of the largest and most up-to-date machines and metal-working plants in Canada, would like to undertake the manufacture of hardware, machinery or other metal specialty for the Canadian, British Empire and Allied markets with which preferential trade arrangements are now being planned. Address in the first instance:

BADEN TORONTO MONTREAL

HARDWARE AND METAL

Vol. XXIX No. 3 | PUBLISHED EVERY SATURDAY SINCE 1888 | Jan. 20 1917

THE MACLEAN PUBLISHING COMPANY, LIMITED

PUBLICATION OFFICE: TORONTO, CANADA

SAID THE SUPERINTENDENT TO THE PURCHASING AGENT:

The "Famous Five" files, Fred, are sharp and hard and do lots of work, and if we discard them as soon as they cease to be efficient, as the maker suggests, we will get the best results. The firm that is manufacturing and selling 60,000,000 files a year must know how to use them to the best advantage.

Good advice that, to buyer and to retailer. So specify "Famous Five" when next you order.

Just Calipers—

Because calipers and dividers are in such common use, a mechanic may forget their importance. But these tools *are* important and *do* have points which determine quality,—points not noticed when present, but missed if lacking.

It is on such fine matters as shape and balance, hardness of contacts, or method of adjustment that machinists judge Starrett calipers and dividers. You know that there is a complete line of inside, outside, and Hermaphrodite calipers to choose from, all made to give long and satisfactory service.

Our free catalog No. 21MA describes 2100 styles and sizes of fine tools and hack saws.

Merchants are warned against buying

IMITATIONS

or articles bearing BLACK DIAMOND Brand

This trade-mark, as applied to Axes, Cross-cut Saws, Scythes, Tools and other articles too numerous to mention here, is the exclusive property of this Company. The trade-mark was registered many years ago with the Department of Agriculture, Ottawa.

Numerous spurious imitations have appeared and we have several suits pending against some manufacturers and jobbers who wish to make profit out of other people's efforts by furnishing an inferior article, knowing that the trade-mark stands for the very highest quality.

Merchants offering these imitations are just as liable as the maker.

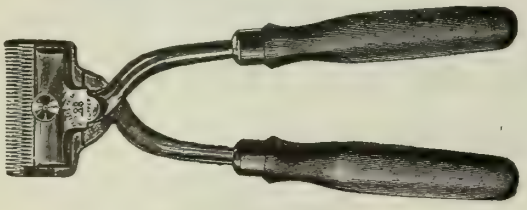
PRIEST'S HORSE and TOILET CLIPPERS

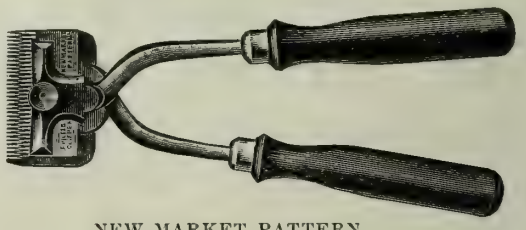
Made by American Shearer Mfg. Co.

present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.

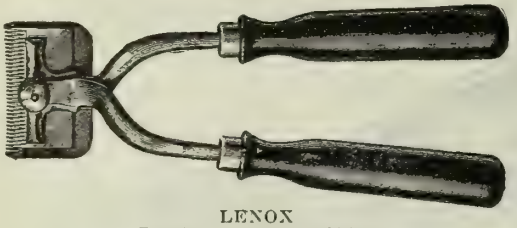
Some styles of hand Horse Clippers are illustrated below. All handles are heavy malleables, with threaded shanks, to keep the wood handles from pulling off. Spring tension on the adjusting nuts insures perfect contact at both ends of the cutting plates. Plates are perfectly ground and designed to cut hair, not break it off by main force.



BALL BEARING
Retailing at about $2.50.

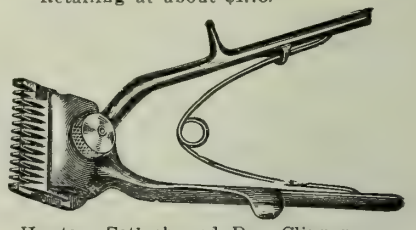


NEW MARKET PATTERN
Retailing at about $1.75.



LENOX
Retailing at about $1.50.

If you are not familiar with these goods, send for samples and compare them with others.



Hunter, Fetlock and Dog Clipper
Retailing at about $1.50.

Seeds That Grow Sales

SPRINGTIME will soon start thousands thinking gardenward. This year the high cost of foods will make more people want to plant gardens than ever before. Why not sell them Ferry's Seeds? These new gardeners will then need spades, rakes, hoes and other garden hardware, and they'll naturally buy them from you.

Besides the sure profit, there's a great satisfaction in selling

FERRY'S SEEDS

You know you are giving your customers tested seeds that will produce, seeds with a long line of ancestry back of them—pedigreed varieties that, on the highest average, bring successful yields and make satisfied customers.

Experienced gardeners everywhere know the superior quality of Ferry's Seeds. Sixty years of experience stand back of this name. Your customers will be glad to find Ferry's Seeds in your store. Send for our liberal dealer proposition and prepare to meet this growing demand.

QUALITY

THE leader in every industry, to maintain his lead, must safeguard the quality of his products.—Rigid inspection and careful supervision are important factors.—To products of iron and steel this principle applies with tremendous force.—It means safety, security and stability.—We safeguard the quality of our products, believing quality will be recognized long after the price is forgotten.

SERVICE

OUR customers must be served. One of the dominating factors in any successful business is Service.—We succeed only through the good will and good wish of the people we serve.—This thought permeates our entire Organization, from the President down.—Our employees feel the sense of responsibility this principle implies; and each one directs his efforts to maintain the high standard of service we aim to render.

A Trade Paper That's Free

Every live hardware man takes at least one trade paper for new ideas on selling and merchandising. Here's a little trade paper that is chock full of new selling ideas and better retailing methods which costs you nothing but the trouble to send us your name.

Some of the dealers who are getting it have told us they often get better selling ideas from the "Star" than from the trade papers they are paying real money for. Our articles don't deal in beautiful generalities, but get down to bed-rock facts behind better selling, better window trimming, faster turn-overs and all the other problems that confront the progressive merchant. The chances are ten to one that you will get at least one real idea in each issue that you can adopt and put to work. Isn't that worth the price of a postal? Send us your name today and join the long line of forward-looking merchants now on our list.

As Staple as Nails

You can hardly run a hardware store without a stock of nails. And you can hardly run a tool department without a stock of our 732 Bit Brace. It is the standard brace with thousands of carpenters and amateurs as well because it has the two features that every real mechanic insists on having—a covered ratchet and ball-bearing head. Nickel-plated with cocobolo handles this brace is as handsomely finished as any tool in our line. Should have a place in every mechanic's stock.

Dealers—Handle this Fence

YOUR success in the sale of fencing does not depend so much on your sales ability as on the fencing you sell. It's fence service—not price—that brings you customers. Ours is a fence of service—a fence of repeat orders. We have letters from dealers all over the Dominion substantiating these statements.

Peerless Ornamental Fencing

not only protects, but beautifies property as well. Every stay is made of strong, stiff wire that will not sag. Our fencing is made from galvanized wire and in addition, is given a coating of zinc enamel paint, thus forming the best possible insurance against rust. Peerless fence is easy to erect and will hold its shape for years to come. We also build a full line of ornamental gates.

Send for Dealers' Proposition

Get our literature showing many beautiful designs for lawns, parks, cemeteries, etc. Also ask about our farm fencing and gates.

DISPLAY DEAL No. 63

	Sells for
3½ doz. 4 oz. O-Cedar Polish	$10.50
7 doz. 12 oz. O-Cedar Polish	42.00
½ doz. quarts O-Cedar Polish	7.50
O-Cedar Electric Sign.	
	$60.00

Above prices are subject to usual discount. Order from your jobber.

DISPLAY DEAL No. 64

	Sells for
10¾ doz. 4 oz. O-Cedar Polish	$32.25
4 doz. 12 oz. O-Cedar Polish	24.00
¼ doz. quarts O-Cedar Polish	3.75
O-Cedar Electric Sign.	
	$60.00

Above prices are subject to usual discount. Order from your jobber.

YOU NEED THIS VALUABLE SIGN

You get this sign free with either of the above orders. Every merchant knows the supreme value of the electric sign as an aid to attractive window dressing.

This O-Cedar Electric Sign is an exceptionally bright and powerful one—not merely an advertisement for O-Cedar, but a real help to your shop-front and therefore a real asset for your business.

It is well for the dealer to first take advantage of our Display Deals as above outlined. Later he can largely increase his O-Cedar profits by taking advantage of the O-Cedar Profit Deals which provide free goods equivalent to an extra discount.

O-Cedar Polish

(MADE IN CANADA)

Write for our new list of Profit Deals, which shows assortments with which Free Goods are offered.

Merchants who consider they might sell more of the O-Cedar Products than they are now selling, should call on us for help. We have other advertising matter which we supply Free, and which will help wonderfully in bringing to your store a part of the big O-Cedar business created by our newspaper publicity.

Our Dealer Helps are at the disposal of every merchant who sells O-Cedar—we back up the man who only stocks the line in a limited way, just as enthusiastically as we support the larger customers.

CHANNELL CHEMICAL COMPANY, LIMITED, 369 SORAUREN AVENUE, TORONTO

Canada's Only Weekly Hardware Paper

HARDWARE AND METAL

Published Every Saturday Since 1888

Vol. 29 TORONTO, JANUARY 20, 1917 No. 3

Results of Christmas Display Contest

More and Better Windows Entered Than Ever Before—Decisions Reached Were Very Close in All Cases—Selling Force Was the Quality Sought Chiefly in Appraising the Displays—The Winners.

EACH year has seen the Christmas Window Display Contest of HARDWARE AND METAL grow bigger and more keenly contested; and 1916 was no exception to this rule. During the last few weeks of the year photographs poured in to the editor's office in ever increasing number, and when the judges began their task, they found a formidable assortment of displays awaiting them. Not only were more windows entered than ever before, but the quality of the displays undoubtedly was better; and, inasmuch as HARDWARE AND METAL'S contests have always produced some remarkable displays, this infers that the 1916 windows were on a remarkably high plane indeed.

It follows that the task of judging was an onerous one. There were so many good windows that the selections could be made only after a very careful consideration on all points and the minutest examination into the details of each display. In practically every case the decisions were close.

OVER 5,000.

1st prize.—H. W. Parr, c|o. Fawcett Hardware, Saskatoon, Sask.
2nd prize.—Chas. Byford, Bond Hardware Co., Guelph, Ont.
3rd prize.—Alex. Bailey, c|o Sumner Co., Moncton, New Brunswick.
4th prize.—P. E. Hughes, c|o Cochrane Hardware, North Bay, Ont.

The following received honorable mention in order of merit:—F. S. Keller, Latham's Hardware, Moose Jaw, Sask.; E. Hammond, Mills Hardware Co., Barton St. Branch, Hamilton, Ont.; Jack McKinnon, Sumner Co., Moncton, N.B.; Dunlop Bros. & Co., Amherst, N.S.; Barton & Fisher, Port Arthur, Ont.

UNDER 5,000.

1st prize.—Frank Butcher, c|o E. Miller, Aylmer, Ont.
2nd prize.—C. L. Black, c|o Binns Hardware, Newmarket, Ont.
3rd prize.—F. Menzies, c|o Owen & Birmingham, Campbellford, Ont.
4th prize.—Rutherford & Koeper, Simcoe, Ont.

The following received honorable mention in order of merit:—G. W. Eldridge, c|o Marshall-Eccles-tone, Timmins, Ont.; W. H. Hoffman, c|o Bernhardt & Spalding, Preston, Ont.; D. Warren, Canada Supply, Timmins, Ont.

Selling Force

Selling force was the quality sought for in the displays. A window is planned to sell goods, and the most successful display is the one which will create the most business. Although a striking display—one constructed with artistic balance and nicety of detail—will always attract attention, it may not always prove as successful from the standpoint of sales as another display less ornate and perhaps less striking at first glance. A good assortment of articles is one of the prime essentials, and price cards are now regarded as being necessary to achieve the best results. The judges kept these points in mind in making their selections.

The terms of the contest were similar to those established in previous years. Two sections were established—places of 5,000 and over and places under 5,000. Four prizes were given in each section as follows:—First, $10.00; second, $5.00; third, $3.00; fourth, $2.00.

The list of the prize-winners is given in the accompanying panel, and the displays that won first prize in both sections are reproduced herewith. Space does not permit showing all of the prize-winners in this issue, but the rest will be reproduced later.

The descriptions of the two leaders, as supplied by the winning display men, are appended.

Winner in Over 5,000

Harold W. Parr, of the Fawcett Hardware Co., Saskatoon, says: "Briefly, the description is as follows:—Color scheme for background and pedestals, cream and maroon. The three uprights are pebbled with alabastine, with frosted snow covering. The panels in the background are done in alabastine color. White forms the base, and by adding black showcards, the various shades, as shown in the panels, are produced. The two large showcards are made by using combination of wallpaper samples. Over 200 price tickets in the same color as the background were used.

"This was one of the best things we have done during all our experience in window display work. In scores of instances the goods were sold before the customer entered the store. We featured summer sporting goods very strongly and the results were exceptionally good.

"All the work, including the electric wiring, the showcards, the backgrounds and the panels, I handled myself."

Winner in Second Section

Frank Butcher, with E. Miller, Aylmer, who trimmed the first prize-winner in the section for places under 5,000, describes the display as follows:—"The bottom is covered with white, bleached cotton. Brass jardiniers, library lamps, and serving trays are displayed on a shelf near the top of the window, in order to overcome the bareness. Purple sateen and lattice work compose the background. In the arches are arranged cutlery and silver flatware. As a reminder of Christmas holly is scattered

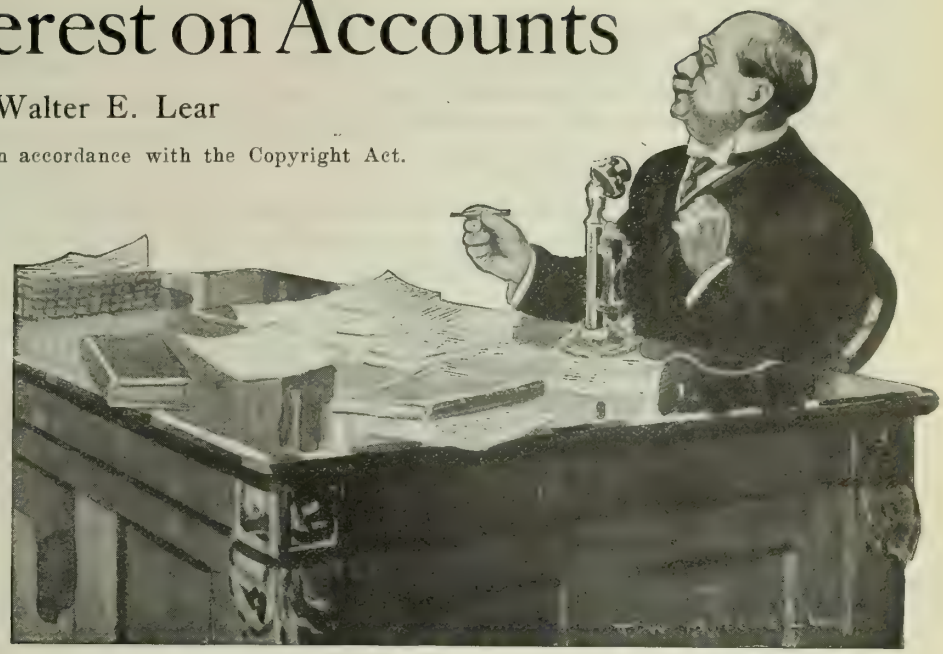
Charging Interest on Accounts

By Walter E. Lear

Registered by Walter Lear, in accordance with the Copyright Act.



Is it legal for a merchant to charge interest on accounts? If so, when can he start to add interest? And how much interest can he charge under the law?

YOUR question is simple enough as asked, but to give you a short, simple answer would be dangerous. The answer to the above question all depends upon the particular circumstances of each particular case.

Let me take the retail merchant first. A customer telephones in an order for goods. The merchant delivers the goods. If this is the first order the merchant has received from the customer and if the customer has not asked for credit for any stated period, then the law presumes that the customer agreed to pay cash for the goods, either on delivery or upon the receipt of an invoice. In such a case, if the customer does not pay up at once, the merchant is entitled to charge 5% interest on the amount so overdue. He cannot charge a higher rate than 5%, no matter how his invoices may be drawn. Statements printed or stamped on invoices to the effect that *interest will be charged upon all overdue accounts at the rate of* 8, 10 *or* 12%, have no effect whatever, in such a case, because the customer did not agree to pay any such rate of interest and it always takes two to make a contract which the law will enforce.

Now supposing the customer has been in the habit of dealing with the merchant and the merchant has been in the habit of sending out monthly statements. Here the law presumes that the customer will pay the account within a reasonable time after it is received. If he does not do so, then the merchant is entitled to charge 5% interest on his overdue account, but no more, because the customer did not agree to pay any rate of interest at all and it is only by operation of the law that the merchant is entitled to charge the 5%. The law permits the merchant to charge the legal rate of 5% interest from the time when the customer should have paid the bill until such time as he actually does pay it.

WALTER E. LEAR.

Again, a prospective customer writes in to either a wholesaler or retailer and asks on what terms goods will be supplied to the customer; then is the time for the merchant to mention what rate of interest he will charge on all overdue accounts. He can thereafter collect any rate he mentions in his reply, because *the Interest Act,* Revised Statutes of Canada (1906), chapter 120, section 2, provides: "Except as otherwise provided by this or by any other Act of the Parliament of Canada, any person may stipulate for, allow and exact, on any contract or agreement whatsoever, any rate of interest or discount which is agreed upon." But, if the merchant fails to mention interest on overdue accounts, he will be allowed only 5% interest from the time when they should have been paid until the time when the accounts are actually paid. The letter asking for credit and the reply by the merchant when read together constitute a contract or agreement, provided that goods are ordered by the customer. The merchant cannot collect a higher rate of interest on overdue accounts than the customer has agreed to pay, but the customer must pay at least 5% interest on his overdue accounts, because the law presumes that he will pay his bills as they become due, according to the terms of credit agreed upon.

There is one exception to what I have just been saying as the merchant's right to stipulate for and recover any rate of interest on his overdue accounts. The above is perfectly good law so long as the rate of interest mentioned is so much per centum per annum, but for some unknown reason merchants have the foolish habit of printing statements on their invoices to the effect that interest at the rate of 1% per month will be charged on all overdue accounts."

If such statements are made in a reply to a letter asking for credit, or on invoices, etc., they have the effect of reducing the rate of interest which may be collected to 5%, because by section 4 of the above Act it is provided: "Whereby the terms of any written or printed contract, whether under seal or not, if any interest is made payable at a rate or percentage per day, week, month, or at any rate or percentage for any period less than a year, no interest exceeding the rate or percentage of 5% per annum shall be chargeable, payable or recoverable on any part of the principal money unless the contract contains an express statement of

HARDWARE & METAL
CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXIX. TORONTO, JANUARY 20, 1917 No. 3

THE BONNE ENTENTE

THE visit of representative business men from the Province of Quebec to the Province of Ontario is the outcome of an idea that should find a response in every mind—the drawing closer together of the two dominant races in Canada. Between peoples of different origin and tongue it is never difficult to find causes of discord; and unfortunately there have been in Canada plenty of firebrands on both sides to light the fires and industriously fan the flames.

Race strife and class suspicion are inimical to progress. Comparatively small though the friction between French-speaking Quebec and English-speaking Ontario has been it has proven an obstacle to business. If Canada is to live up to her opportunities, if she is to shoulder her war burdens and sturdily face the future, there is no room for provincial friction or race strife.

As an evidence of the desire of French-speaking business men to bring about a wider amity, the Bonne Entente is a move that every patriotic Canadian will approve.

FIGHTING MAIL ORDER HOUSES

IT HAS often been asserted that all the retailer needs to combat the mail order menace is backbone—the courage to get out and fight the catalogue houses on their own ground. In this connection it is interesting to quote the advertisement of a western concern directed at the arch enemy. It was a full-page broadside, announcing the intention of the store to fight the mail order to a finish. If courage is all that is needed to beat the enemy this concern should make mail order buying a thing of the past in the environs of Moose Jaw. But, to quote from the ad.:—

"For some years past the much advertised mail order house has had full sway in Medicine Hat, and more particularly in the surrounding district. With grim determination and undaunted courage, we purpose campaigning Medicine Hat and district in the year 1917 in such a manner as will leave little doubt in the minds of any man, woman or child living within trading distance of our store, as to our ability to successfully compete with all competitors, mail order or otherwise. There has never been a greater opportunity afforded the local merchant within the past ten years than this year to eliminate the necessity of mail order buying. Never before in the past decade has the purchaser been so disappointed and dissatisfied with mail order goods as last year. We believe that fully forty per cent. of the mail order purchases in this district in 1916 were returned to the mail order house and a return of the purchase price demanded. It is one thing to substitute by and with the consent and approval of the customer over the counter—it is quite another thing to substitute by mail. It is one thing to read an exaggerated description of goods in a catalogue, written by an advertising man who is paid ten or fifteen thousand dollars per year to write a highly colored advertisement—it is quite another thing when you get the goods and compare.

"Have you ever noticed how few of the standard lines manufactured by the RELIABLE manufacturing institutions of Canada are advertised in the catalogue? Why? Have you ever received a guarantee with any article you ever purchased from a mail order house? If not, why?

"As we are entirely dependent upon the good will and patronage of the people of this city and district for our existence as merchants, we are compelled to sell ONLY such goods as will be satisfactory to our customers. As we are directly in competition with mail order houses, who spend huge sums of money in advertisements, and who place an elaborately designed free catalogue on every kitchen table in this community two and three times a year, we are compelled, if we would exist, to offer exceptional inducements within the next 90 days to every man, woman, boy and girl who are buyers of eats and wears, to trade in our store.

DISPLAYS—AND SELLING FORCE

THE judges of HARDWARE AND METAL'S annual Christmas window contest found before them a remarkable array of photographs. Contests of previous years have brought together a fine lot of display pictures but in the matter of general excellence, 1916 broke all records.

Selecting the best displays from so many remarkably fine windows was no mean task; but the judges kept one great point in front of them—Selling Force? On that point each window was judged. Selling Force, in this connection, covered a broad sweep. Into it entered artistic arrangement, the power to arrest the eye and compel the admiration; but the display which ran to appearance solely and failed to supply a sufficient selection was considered to be deficient in selling force.

This, after all, is the focal point in all business. The retailer has only one objective—to sell goods. Selling Force must be behind everything he does. It must be the sole guiding factor in his advertising, the reason behind store arrangements, the potent influence on his buying. When Selling Force is found in all operations of a store, there you find a business that is going ahead.

Retail Merchants of Ontario Appeal Against the Peddler

Arguments Advanced to Prove That the Peddler is a Menace to the Retailer—How He Exerts an Unfair Competition

THE transient trader, or peddler, has in some centres become a very serious menace to the established trade. These peddlers who do a cut-price business, in many centres are, of course easily enabled to cut under the figure that for the established retailer would be only a fair margin of profit. Their place of business being mainly located under their own hat they have no taxes to pay on the property, while the license fee that they are compelled to pay is in no way a compensation for the grocer's rent charges. These traders have been increasing in such numbers that they have become a decided menace in various places, and they have spread into all lines of trade, so that their activities are not of moment to one class of dealers alone.

As these transient traders operate no established business they are not an asset to the community in which they exist. They are not even of real benefit to the consumer. They do indeed cut prices which may accrue to the advantage of the individual for the time being, but having no established stand and no business obligations, they serve the public only when they can do so to their own decided advantage. Nor do they always operate in what may be described as a legitimate way. It has been brought to our attention that not infrequently these peddlers, when their right to trade in any town has been questioned, have flashed in the faces of these officials a county license to peddle, and have claimed that this gave them liberty to operate anywhere within that county. In this way many of them have been enabled to trade in a community absolutely in defiance of the actual law. The difficulty in this connection is that many officials in small communities do not know just what their powers are, and consequently have been prone to accept the word of a brazen peddler as to their legal rights.

For this reason we are calling attention to an amendment to the Municipal Act, Chap. 34, which, after outlining the powers of a county to pass by-laws, states: "A by-law of a county passed under this paragraph, shall not have force in a town which has passed a by-law for a similar purpose." In other words, the acts of a town take precedence over those of the county in which the town is situated, and no peddler can lawfully present a county license in any town where there is a license by-law in operation.

In recognition of the dangerous element that the transient trader and peddler is introducing into the retail trade, the Retail Merchants' Association of the Province of Ontario is issuing a petition urging the Provincial Government to make some changes in the law governing this matter. This petition reads as follows:—

"We, the undersigned retail merchants, doing business in the municipality of desire to call your attention to the fact that the present Act which gives municipalities the power to regulate and license peddlers and transient traders, is by no means satisfactory.

"In calling your attention to some of the objections to this Act, we recognize that it is too large and important a subject to deal with in this brief memorial, and we would therefore request you to appoint a small committee from the members of the Legislature, before whom we would be pleased to submit the evidence which has been gathered by the executive officers of the Retail Merchants' Association of Canada, Ontario Provincial Board, on this important subject, and the proposed amendments to the Act which we think are necessary, both in the interests of the residents of the various municipalities of Ontario, as well as dealing fairly with those resident retail merchants who have their capital invested, and who are assisting to build up every city, town or village in the province."

IMPERIAL OIL COMPANY CONVENTION

The salesmen and heads of departments of the Imperial Oil Company of Canada met in convention at Sarnia from January 9 to 13. In the neighborhood of sixty representatives were present, including the resident and assistant managers, and large station agents from such points as Peterboro, St. Catharines and Brantford. G. W. Mayer, vice-president and managing director of the Imperial Oil Company, presided over the deliberations of the convention. The doings of the convention took the nature of discussions on the products of the company, the policy of the firm and advertising methods. Many ideas there brought to light will in all probability become a part of the policy of the company as worked out through the various department heads. President Ramsay, of the Perfection Stove Company at Sarnia, gave an address on oil burning devices, which was very instructive. The sales manager of the Gilbert & Barker Manufacturing Company, of Springfield, Mass., also gave an address on oil storage systems. Representatives of the Vacuum Oil Company, of Rochester, were also present and took part in the deliberations. The last day of the convention was given up to a visit to the refinery at Sarnia and to the Perfection stove works. Those attending from the Toronto office were J. F. Shatford, general manager Queen City Division; F. J. Wolfe, lubricating manager, and G. I. Hambly, travelling manager. This was the second annual convention. It will be held in Toronto next year.

CHARGING INTEREST ON ACCOUNTS

(Continued from page 23.)

the yearly rate or percentage of interest to which such other rate or percentage is equivalent."

I wish to particularly warn merchants from collecting interest, upon the assumption that they have the right so to do, because they have such notices printed on their invoices. The rate of interest sought to be charged must be stated at so much per centum per annum, not 1% per month. If the merchant collects 1% per month interest from any customer, then the customer has a right action against the merchant, for section 5 of the Interest Act, provided: "If any sum is paid on account of any interest not chargeable, payable or recoverable under the last preceding section, such sum may be recovered or deducted from any principal or interest payable under such contract."

My answer to the above question is, that a merchant may collect any rate of interest on overdue accounts, which the customer has agreed to pay, provided that the rate of interest is so much per centum per annum; and in case where no rate of interest has been agreed upon, then the merchant is entitled to collect 5% per annum on overdue accounts, from the time when they ought to have been paid until the time when they actually are paid.

RESULTS IN CHRISTMAS WINDOW CONTESTS

(Continued from page 21.)

throughout the lattice work and ceiling. In the foreground, flatware is seen. Back of this on raised plate-glass shelves, supported on stands, are displayed safety razors, cut glass, case goods, and electric library lamps, etc. Each line has been kept separate as far as possible. Price cards marked in plain figures are used throughout."

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

One of the notable advances in hardware lines during the week has been in cordage products, where an advance of one-half cent. to four cents per pound has been recorded. This advance was forecast in HARDWARE AND METAL in the leading article of December 30 issue. Waste has also made a big advance. This was also mentioned previously in these columns as being highly probable. Other advances have been recorded in iron rivets and burrs, curry combs, scales, garden hose, trace chains, bifurcated and tubular rivets, oil stoves, lamp chimneys, machinery steel, sleigh shoe steel, toe calk steel, horseshoe iron, crowbars, vises, clay and rock picks, pliers, pipe plates, dies and bushings, padlocks, cabinet locks. New prices have also been announced on electric weld chain. Gasoline and benzine have registered an advance of one cent per gallon. Linseed oil is in firm market and advances have been recorded in certain quarters. There is great difficulty being experienced by crushers in getting supplies of flaxseed forwarded. Some crushers are not looking for new trade under the conditions, but are only endeavoring to take care of their customers' needs. Turpentine held steady in price. Business in all hardware lines has been good. Embargoes placed on periodically by the railways in certain districts are a constant source of concern to wholesalers whose goods are thus held up.

MONTREAL MARKETS

MONTREAL, Jan. 17.—The hardware trade in Montreal is at present in every way in condition similar to that of the closing months of 1916. Business keeps coming in and prices keep going up. There are many minor changes and some major changes this week, and the retailer is warned by large wholesale firms to look out for possible advances soon in bolts, wood screws, wire nails, steel and bar iron, fittings, axes and lawn mowers, shovels and horseshoes. Shovels are said to have advanced in the States by 10 per cent. last week. Chain prices may be found increased. There is one solitary decline in price this week, one firm quoting tarred felt at $2.75 per 100 lbs., when last week it was quoted at $2.85. Canadian poultry netting is now on the same discount as U. S. netting, i.e., 30 off. The demand for maple season hardware is coming now, and many lines of articles required are up in price.

Iron and Steel Increasingly Firm

IRON AND STEEL.—To tell the story of iron and steel this week as regards conditions in Montreal is simply to reiterate all that has ever been reported before on this product of the great basic industry of construction and (in war time) of destruction at least as regards the purpose to which a vast proportion of the product of the industry is put. The situation is unrelieved by any new source of supply. It takes years to establish an iron and steel foundry plant, and those now starting their serious development in Canada will probably come in for the big boom that peace will ultimately bring to the Dominion. Supplies of all lines of iron and steel produced hardware, heavy and light, are extremely short at present in proportion to average national need for them, and all lines are hard to replace. Little wonder that prices still keep on their merry upward climb.

From the American Angle of Business

MANUFACTURED LINES.—In conversation with several of the greatest manufacturers of hardware lines imported into Canada from the United States during a conference in Buffalo last week, one of Montreal's principal hardware wholesalers heard facts of great interest to the whole trade, the sum and substance of which led only to the one conclusion, namely, that prices for hardware cannot possibly see any reduction for six months or more even should peace arrive. Deliveries of all lines of articles made from iron and steel by the mills are tremendously slow. Some mills are months behind with contracts, and have orders in hand placed a year ago not yet commenced. The shelves of the great wholesale stores of manufactured steel products are depleted to the verge of bareness. Replenishment is difficult and very slow. Prices must inevitably keep high, and the great firms of the United States have now issued written instructions to travellers to stay with the retailers, their customers, and patiently go over lists and prices to protect the retailers from selling goods at a loss.

Stoves and Ranges Have Sold Very Well

STOVES AND RANGES.—The slower period in range and stove selling from wholesale to retail trade has arrived, but leading wholesalers in Montreal declare that they have not for some time back experienced so busy conditions as prevailed in January so far, and the season altogether for stoves and ranges has been very busy up to now. Increased prices adopted recently have not retarded demand for the period of the year, for it is better than usual, and the iron and steel outlook is certainly not towards any chance of cheaper stoves in a hurry. All lines of heaters have sold well, and are selling still. Manufacturers of stove pipe announce the belated arrival of consignments of Canada plate ordered about a year ago, and now rather late for needs of the market, but none the less welcome, as this material has been in absolute scarcity in Montreal quite lately.

Maple Sugar Season Appliances Advance

MAPLE APPLIANCES.—The market is opening for maple sugar season appliances in the hardware line, and finds everything very much firmer priced than formerly. Perfection sap spouts have advanced 10 per cent., and are now quoted at $17 per thousand to the retailer. Empire and Beaver sap spouts are also increased in price in line with the tremendously advanced price of tin-

ned iron and tinplate. The many other varieties of sap spouts are generally increased in price on the same scale. Some lines have advanced 25 per cent. Buckets and covers and cans for the syrup are costing more this season by from 10 to 25 per cent., and there is a slight advance—10 per cent.—in tapping bitts, while the great cost of tinned iron and tinplate has also enhanced the cost of evaporator outfits by at least 10 to 15 per cent.

Steel Bars, Also Rivets and Burrs Up

STEEL BARS, ETC.—Increased prices are given out this week by several firms of wholesalers on steel. One leading firm quotes as follows:—Machinery steel (iron finish), $4.40 per 100 pounds (other firms quote 5c less); sleigh shoe steel, $4.35; band steel, $4.35; toe calk steel, $5.25; mild steel, $4.35; tire steel up to 1½ x ½ inch, $4.55, and over that size $4.45. The foregoing prices vary a little with other firms, being about 5c lower in most cases. Horseshoe iron is quoted at $3.65. It was $3.55 last week.

Iron Rivets and Burrs Up

Iron rivets and burrs show a new discount of 27½ per cent. Formerly this was 32½ per cent. The increase is inevitable in view of iron and steel conditions.

Crowbars Advance Again.

Crowbars have advanced a dollar per 100 pounds to $5.50 per 100, according to one large wholesale firm in Montreal.

Standard Vises Have Advanced Five Per Cent.

STANDARD VISES.—An advance is recorded in standard vises this week, the prices quoted by one large Montreal firm being as follows:—30-lb., $10.40; 35-lb., $9.40; 40-lb., $9.85; 45-lb., $10.30; 50-lb., $11.80; 55-lb., $11.25; 60-lb., $12.20; 65-lb,. $13.15; 70-lb., $14; 75-lb., $15; 80-lb., $16.50; 85-lb., $16.50; 90-lb., $18.75; 95-lb., $19.75; 100-lb., $20.95; 120-lb., $27.

These prices represent an advance over former quotations of about five per cent.

Picks, Clay and Rock and Hammers Advanced

CLAY AND ROCK PICKS.—Further advances are also recorded in clay and rock picks by the same firm which notes the advance in vises. This firm quotes for clay picks 5-6 lbs., per dozen, $6.50; 6-7 lbs., doz., $6.75; 7-8 lbs., per doz., $7; 8-9 lbs., doz., $7.50; 9-10 lbs., doz., $8.50.

Rock Picks

For rock picks the prices quoted are: 5-6 lbs., $7; 6-7 lbs., $7.25; 7-8 lbs., $7.50: 8-9 lbs., $8, and 9-10 lbs., $9.

Pick Mattocks

Pick mattocks are priced at $7.25 per doz.

Hammers Also

All hammers fitted with handles, both light and heavy, are reported up about 10 per cent., or at least half a cent a pound, according to general trade reports in Montreal by the principal wholesalers of hardware.

Shelf Goods Show Various Minor Changes

SHELF GOODS.—Besides the 10 per cent. increase on hammers of the light-handled varieties, both American and Canadian, there were not many specially noteworthy changes in shelf goods prices.

Pliers Advance

The many lines of Smith & Hemmenway pliers of all sorts and kinds show an advance of at least 10 per cent. this week. The Henry Boker pliers are not so prominent on the Canadian market since the war, being a German standard make, though very good at that.

Pipe Plates, Dies and Bushings

Butterfield pipe plates, dies and bushings are up in price this week, showing a new discount equivalent to a rise of about 10 per cent, the discount not yet calculated for trade purposes. The dies and bushings may take a higher discount than the pipe plate.

Remington U.M.C. Goods

The Remington U.M.C. rifles and ammunition supplies are being priced according to the Winchester new list scale and discount as given last week.

Padlocks Up in Price

PADLOCKS.—Padlocks and Corbin cabinet locks all show an advance of about 10 per cent. this week again. These lines come principally from across the border.

Rope Has Again Advanced in Price

ROPE.—Advances in price of rope again appear this week. The new base price for pure Manila is 1½c higher than previous quotations, being now 27c. British Manila base is 22½c, and sisal 20½c. An addition to Montreal report will be found on page 31.

TORONTO MARKETS

TORONTO, January 19.—There is little booking ahead these days. Business is largely of a hand-to-mouth nature. Both wholesalers and retailers have shown a disposition to be careful in their buying. Retailers are not looking ahead for contracts, neither are the wholesalers seeking to tie up to contracts for the future. Wholesalers on the other hand in their buying from the manufacturers are exercising the same care. Manufacturers are not seeking to give contracts for the wholesalers are not eager for them except in cases where it is plainly to their advantage. There are few such instances being recorded these days. One of the notable advances during the week has been in the price of cordage. Manila rope advanced a cent and a half and sisal rope went up another one-half cent. All classes of scales have again advanced by the change of the discount, approximately five to ten per cent. Garden hose has advanced approximately 10 per cent. Curry combs have again advanced. Iron rivets and burrs have gone up in price by the changing of the discount. Gasoline has advanced one cent per gallon and all other oil products are in a very firm market. Crude oil at the wells is now up to a record price with prospects of still more advances. The new lists and discounts on Winchester fire-arms and ammunition have been received by the trade. This is a rearrangement to facilitate the figuring of prices. This list will be found elsewhere in this issue. New price lists for Perfection oil stoves and heaters are out which provide for an increase of approximately 20 per cent. over prices charged heretofore. Business has been good during the week. There is considerable trouble experienced by wholesalers through temporary embargoes being placed on certain districts by the railways. This is not alone true of American railways but Canadian roads as well.

Iron Rivets and Burrs Have Discount Changed

RIVETS AND BURRS.—By the change in the discount for iron rivets and burrs there has been an increase of approximately 5 per cent. The former discount for black and tinned burrs was 30 per cent. off list while the new discount is 27½ per cent. Burrs were also formerly 30 per cent. discount and are now 27½ per cent. Copper rivets have not changed in price and remain at 30 per cent. added to list. With copper burrs the price still holds at 50 per cent. added to list. There is a firmness in bifurcated and tubular rivets and new lists are about to be issued on these which will provide for an increase of approximately 15 per cent. to the jobber.

American manufacturers have also advanced their prices on these articles and the Canadian market is following upward in sympathy. It is needless to say the higher prices have been occasioned by the high prices for raw materials and labor.

Curry Combs Make Advance of 5 Per Cent.

CURRY COMBS.—Following the recent advance of 5 per cent. in the price of curry combs still another advance in a like amount has been made effective during the past week. The price has been changed to 10 per cent. added to list as compared with 5 per cent. added formerly. Curry combs have been headed to higher levels for some weeks past, no less than four advances having taken place within the past six or eight weeks. With a continuation in the high price of raw materials there would be sufficient indication that the top price has not yet been reached.

All Scales Record Still Another Advance

SCALES.—New discounts have been issued to apply to Champion and standard scales which provides for a substantial advance in price. Where the discount was formerly 25 per cent. on the standard list it is now 20 per cent. Net prices on the Champion scales at the time of writing had not yet been issued by the manufacturers, but it is expected they will soon be sent out.

Big Advances Take Place in Cordage

CORDAGE.—An advance of 1½c per pound in the best grade of Manila rope and in the British and New Zealand brands establishes a new record for high prices for that commodity. The best brand of Manila is now selling at 27c per pound while British and New Zealand ropes are quoted at 22½c per pound. Sisal rope has also advanced a half cent per pound and is quoted at 20½c per pound. Sisal lathyarn, tarred and untarred, and both single and double, have advanced ½c per pound. Tarred ratline, marline, houseline and hambroline and halyards rope remain unchanged. There has, however, been an advance of 1½c per pound in African hem marline or lobster twine of 1½c per pound. There has been increase in the differential above basis in a number of instances which provide for increases from 4c to 5c per pound. On the bolt rope and whale line the differential has been increased from 3c above base price to 8c above base price. Manila transmission rope has also been advanced 5½ cents per pound by the changing of the differential from 4c above basis to 8c above base. In the special yacht rope for the three and four-strand the differential has been increased from 14c to 18c above basis, which makes an increase of 5½c per pound. The same increase of 5½c per pound has taken place on six-thread trawl line, tarred and untarred, and on lobster marline in both standard and fine. These advances were forecast in the leading article in HARDWARE AND METAL of December 30. Referring to the condition at that time this article said: "During the past week quotations have again been made by the Regulating Commmission which are 3½c per pound higher than recent quotations. The sisal fibre is now quoted at 13½c per pound, as compared with 10⅜c at the time of the last sales. This puts great firmness in the sisal rope and Manila rope products. An advance is looked for in these products almost any time and may probably take place before this article is printed." The advance in sisal rope of 1c was recorded in our issue of January 6. Now this week an advance of 1½c per pound on manila rope has taken place and an extra ½c per pound on sisal which makes the advances for both brands of rope an equal amount. There is a continued firmness in the market for these products as the Regulating Commission has again withdrawn quotations on the sisal fibre which previously had been quoted at 14½c per pound.

FIREARMS AND AMMUNITION PRICES.

Revised prices of Winchester Repeating Arms Co., in which they advise having revised their list prices to facilitate uniform discounts.

Models 1873, 1890, 1892, 1894, 1903 Automatic, 1886, 1895, 1905 Self-loading, 1907 Self-loading, 1910 Self-loading.

Above 5% advance on list.

Single Shot Rifles.

Model 1897—Repeating shotguns.

Model 1901—Lever action repeating shotguns.

Above 5% advance on list.

Single Shot Shotguns.

Model 1912—Hammerless repeating shotguns.

Model 1911—Self-loading shotguns, interchangeable bbl. and forearm.

Model 1911—Interchangeable bbl., including receiver and action.

Model 1911—Extras on this gun.

Model 1911—Trap grade guns.

Model 1911—Pigeon grade guns.

Above 5% advance on list.

Thumb Trigger Single Shot Rifles.

Model 1902—Single shot rifles.

Model 1904—Single shot rifles.

Model 1906—Extra lightweight 22 cal. repeating rifles.

Above 5% advance on list.

Detached sights, 22½% advance on list.

Reloading tools and gun parts, 22½% advance on list.

Supplemental chambers, 61½% advance on list, equal $7.45 doz. net.

Red W. Jointed Cleaning Rods, 61½% advance on list, equals $13.40 doz. net.

Breech Loading Cannon, 40% advance on list, equals $12.25 each net.

AMERICAN AMMUNITION.

All ammunition is subject to a discount of 2½%.

B.B. Caps—Round ball.

B.B. Caps—Conical.

Cartridges.

Rim fire (except 41 Swiss), black, lesmok or smokeless powder, including 22 short, 22 short spotlight, 22 long, 22 long rifles, with regular or hollow point bullet.

Cartridges.

41 Swiss rim fire, centre fire pistol sizes, centre fire military and sporting sizes.

All blank cartridges, including 22 short rim fire, 32 short rim fire, 32 S. & W. and 32 S. & W.

Shot Cartridges, rim fire—Shot cartridges, pistol sizes; shot cartridges, centre fire; shot cartridges, centre fire. Sporting sizes.

Primed shells and bullets.

Primers.

Winchester Nos. 1, 1½, 2½, 2, 250 in box.

Winchester Nos. 1 and 2, 100 in box.

Winchester Nos. 1-W, 1½-W, 2½-W, 3-W, new 4-4½-5½, 100 in box.

Berdan Nos. 1, 1½, 2, 250 in box.

Empty Paper Shot Shells.

Leader, 4 and 8 gauges, 10, 12, 16 and 20.

Repeater, 10, 12, 14, 16, 20, 24 and 28 gauge.

New Rival, 10 and 12 gauges.

New Rival, 14, 16 and 20 gauges.

Empty Brass Shot Shells.

First quality; Rival.

Gun Wads.

Felt or cardboard.

Percussion Caps.

G.D., F.L., E.B. or ground edge.

Musket 4 split, U.S. army; Musket 6 split, varnished; Musket 6 split, foil lined; Musket Spanish ribbed.

Loaded Paper Shot Shells.

New Rival—Blue in color, loaded with black powder.

Nublack—Yellow, loaded with black powder.

Repeater—Loaded with smokeless powder.

Leader—Loaded with smokeless powder.

Small gauges, 410 cal. (12 m/m) and 32 ga. (14 m/m).

Broken cases 5% advance.

Tie Out Chains Follow Cow Ties Up

CHAINS.—New discounts have been made effective on tie out chains following the change in discount announced last week on cow ties. The discount from list prices on cow ties is now 25 per cent. while the discount on tie out chains is 67½ per cent. In the case of cow ties the discount was formerly 32½ per cent. and for tie out chains 70 per cent. Three-chain and four-chain cow ties are also changed to 25 per cent. Stall fixture bars remain at a discount of 25 per cent.

Waste Products Have Made Big Advances

WASTE.—The advance in waste products forecast in HARDWARE AND METAL last week as likely to take place has been made effective. The advances are considerable and range from 1½c per pound to 3c per pound on certain grades. Cream polishing waste that formerly sold for 20c per pound is now quoted at 21½c. One brand of white wiping waste that formerly sold for 15c is now quoted at 18c per pound. The higher market has been caused through the big demand for these products and the scarcity of raw materials from which they are made.

Garden Hose Makes Advance of 10 Per Cent.

GARDEN HOSE.—By an advance in the discounts the price of garden hose has been increased approximately 10 per

cent. The increase has been occasioned by the high price of cotton which enters into the making of the fabric. All sizes and grades from ½-inch up to 3-inch in diameter have shared in the advance. For the best grade of hose in sizes ½-inch to 3-inch the discounts have been changed from 30 and 5 per cent. off list to 25 per cent. off list. On No. 2 grade the discount has been changed from 50 and 5 per cent. to 40 and 10 per cent. For No. 3 hose in all sizes the discount has been changed from 50, 10 and 5 per cent. to 50 and 5 per cent. off list. No. 4 grade has been changed from 60 and 5 per cent. to 50, 10 and 5 per cent. off list. On the wire wound in ½-inch and ¾-inch the discount has been changed from 50, 10 and 5 to 50 and 5 per cent. For sheeting hoes the advance has been from ½c per foot to 1½c per foot. On the 3-ply ½-inch in this variety of hose the price has been increased from 6½c to 7c per foot and on the ¾-inch six-ply the price has been raised from 13c to 14½c per foot.

New Prices on Oil Stoves Are Announced

OIL STOVES, OVENS, HEATERS.—New prices of Perfection oil stoves, cabinets, ovens and water heaters have been announced to the trade this week. This advance has been anticipated in HARDWARE AND METAL for some weeks past. It is considerable and amounts to about 20 per cent. For instance on the three-burner stove the increase has been from $10.45 to $12.55 each. Other lines have been advanced in proportion. Following are the new prices that have been made effective from January 12, 1917:

Stoves

No. 2 Perfection, $9.50; No. 3 Perfection, $12.55; No. 4 Perfection, $16.00; No. 37 Perfection, $40.00; No. 92 Puritan, $9.50; No. 93 Puritan, $12.55; No. 94 Puritan, $16.00; No. 61 Perfection, $3.40; No. 62 Perfection, $7.65; No. 81 Perfection, $4.90; No. 82 Perfection, $9.40.

Cabinets

No. 92, $4.25; No. 93, $4.75; No. 94, $5.75.

Ovens

No. 21G, $2.60; No. 22G, $3.30; No. 41G, $2.60; No. 42G, $3.30; No. 141G, $2.50; No. 142G, $3.20.

Water Heaters

No. 01, $22.30; No. 03, $30.30; No. 08, $32.00.

Sad Iron Heaters, doz.	$4.30
Wicks and Carriers, doz.	2.40
Broilers, each	3.10
Toasters (Enamel), each	1.05
Toasters (Tin), each	.50

Lamp Chimneys Go Up 25 Cents Per Dozen

LAMP CHIMNEYS.—There has been an advance of 25c per dozen in the various sizes of lamp chimneys carried by the Imperial Oil Company. On the large size chimney that formerly sold for 90c per dozen the price is now $1.15 per dozen. The smaller sized chimneys are 10c per dozen cheaper than the large size and are now quoted at $1.05. This increase has been occasioned by the higher prices of the manufacturers of lamp chimneys in the United States. Chimmneys have followed the tendency of other glass products in the firm tone of the market.

Ammunition Lists Have Been Issued

FIREARMS, AMMUNITION. — The new lists on Winchester ammunition have been received by wholesalers during the week which while they do not provide for any material increase make the discounts uniform on all the various grades of ammunition. This change was made by the company in order to facilitate efficiency. The discount from list is now 2½ per cent. on ammunition. The various discounts on firearms are given in this issue. Following are the list prices on some of the well-known classes of ammunition:

AMERICAN AMMUNITION

List Prices

	Per M.
B.B. Caps	$3.50
B.B. Caps, concave ball	4.40
22 Short	5.00
22 Long	6.00
22 Long Rifle	7.00
22 Short Smokeless	5.35
22 Long Smokeless	7.50
22 Long Rifle Smokeless	8.75

SPORTING CARTRIDGES

Centre Fire Smokeless:	
303 Winchester	$32.75
303 Savage	32.75
303 British	95.00
32 Winchester Special	32.75
38-55 Winchester	76.00
401 Winchester, Self-loading	76.00

PRIMERS

Nos. 1, 1½ and 2½	$3.60
Nos. 1 and 2 (100 in box)	3.80
Nos. 1-W, 1½-W, 2½-W, 3-W and New 4, 5 and 5½ (100 in box)	3.80
Berdan, Nos. 1, 1½, 2 (250 in box)	3.60
Berdan, Nos. 1, 1½, 2 (100 in box)	3.80

Globe, Angle and Check Valves Again Up

VALVES.—An advance of approximately 5 per cent. has been made in the price of globe, angle and check valves for the high grade and medium pressure. Where the discount on the high grade was formemrly 22½ per cent. it is now 20 per cent. On the medium pressure valves the discount has been changed from 45 per cent. to 40 per cent. Discount on the quick opening radiator valves is now quite general with dealers at 60 per cent. off list. Formerly some were quoting at 60 per cent. and others were quoting at 65 per cent. All other classes of valves remain unchanged, with the exception of brass gate valves which have registered a considerable advance. Where formerly the discount was 30 per cent. off list it is now 22½ per cent. There is a firmness in the market for all valves owing to the high price of raw materials. Labor also is an increasing factor of importance in the high cost of production. Demand for these articles has been good, particularly so in valves for steam work. Following are the discounts:

	Per Cent.
Ground work	45-47
Compression work, standard	55
High grade	48
Cushion work	40
Fuller work, standard	54
High grade	47
Basin cocks, No. 0, standard	49-53
High grade	49
Nos. 1 and 2, standard	49-53
High grade	40
Bath cocks	55
Flatway stop and waste cocks, standard	53
High grade	50
Roundway stop and waste cocks, standard	53
High grade	50
Steam cocks, standard	53
Steam cocks, high grade	50
Globe, angle and check valves, standard	25
High grade	20
Radiator valves, standard	30
High grade	30
Patent quick opening valves	60
Basin Cocks—	
No. 0 & 1, Fuller pattern	53
No. 0 & 1, compression	49
Midget	51
Steam cocks, square nut	50
Steam cocks, iron body	45
Globe, angle and check valves, medium pressure	40
Radiator valves, standard	60
Radiator valves, Jenkins disc	60
Radiator valves, quick opening	60

Soil Pipe and Fittings Have Been Marked Up

SOIL PIPE.—An advance has been recorded in the price of soil pipe and fittings by the change of the discount on these commodities. Where the discount on medium and extra heavy pipe 6-inch and under was formerly 60 per cent. it is now 55 per cent. For 8-inch pipe and larger the discount is now 40 per cent. as compared with 45 per cent. formerly. For fittings the discount is now 60 per cent. for both medium and extra heavy as compared with 65 per cent. formerly. There is a firmness in the market for this product and with heavier demand there would undoubtedly be still higher prices.

Steel of Various Kinds Go Still Higher

STEEL AND IRON.—There is a firmness in the market for iron and steel that has resulted in moving up the prices on a number of the steel lines from 10c to 25c per hundred pounds. Mild steel is now quoted at $4 as compared with $3.75 recently. Band steel is quoted at $4.25 as compared with $4.15 formerly. Sleight shoe steel has been moved up from $3.90 to $4. Tire steel has been advanced 25c and is now selling at $4.20. Toe calk steel is quoted at $4.65 the former price being $4.50. There is no indication as yet that the top price has been reached in these commodities.

Peace Proposals Have Steadied Metal Markets

The situation in the metal markets is practically unchanged, and there have been no developments of importance during the week. The peace proposals are still affecting the market to some extent and will doubtless tend to steady prices for a considerable time. Prices generally are firm and unchanged.

COPPER.—The market is steady and prices firm. Practically all the big producers are sold up for six months, and are out of the market. Prices being quoted now are for resale metal. Local quotations are nominal and unchanged at 36½c per pound.

TIN.—Quotations in London advanced recently, but the New York market is dull and unsettled, with a small volume of business. Local quotations unchanged at 47-48c a pound.

SPELTER.—The possibility of the war being prolonged has strengthened the spelter market, but prices are unchanged. Local quotation, 13¼c per pound.

LEAD.—The market is dull and featureless at unchanged quotations. Local price, 9½ per pound.

ANTIMONY.—The market continues dull and prices have an easier tendency. Local quotation, 18c per pound.

ALUMINUM.—The market is quiet and easy, with quotations unchanged at 68c per pound.

SCRAP.—The market for scrap ingot metals is now steadier after the recent decline, but has still a weak tendency. Indications do not point to a revival in the near future, and a further decline in price is not unlikely. Prices of scrap steel, on the other hand, are holding firm, but no changes have been made during the week. The embargo on the export of steel scrap is tending to depress the market, particularly on steel turnings, as supplies of this material are again accumulating.

Spelter, lb.	$0.13	....
Pig lead, per lb.	0.09¼	$0.09½
Lead pipe, lb.	0.13	.....
Lead waste pipe, lb.	0.14	.....
Lead traps and bends	Net list	
Lead wool, lb.	0.12	.....
Lead sheets, 3 lbs. sq. ft.	0.12¼	.....
Lead sheets, 3½ lbs. sq. ft. .	0.12¼	.....
Lead sheets, 4 to 6 lbs. sq. ft..	0.12	.....

Cut sheets, ¾c lb. extra and cut sheets to size 1c lb. extra.

Solder, guaranteed, lb.	0.28½	.....
Solder, strictly, lb.	0.26	0.28
Solder, commercial, lb.	0.24½	.....
Solder, wiping, lb.	0.23	0.26
Solder, wire, lb.	0.27	0.35
Zinc sheets, per lb.	0.25	.....

LONDON MARKETS

LONDON, ONT., JAN. 18.—With stocktaking completed, retailers are now busy going after trade. The outlook for 1917 is very promising, and retailers here and in the surrounding districts are very optimistic. Prices still continue to advance, although the changes are not quite so numerous as they were towards the end of the year.

Alabastine and Muresco have advanced in price. This advance will not come as a surprise to the members of the trade who have been following the market reports. HARDWARE AND METAL, in the issue of Dec. 30, stated that higher prices on calcemines were inevitable.

Roofing Nails Go Still Higher

American large head roofing nails have advanced, and are now quoted at $7.70 per 100 lbs. in 100-lb. kegs, and $7.95 per 100 lbs. in 25-lb. boxes.

Wire nails remain firm at $4.70 per keg, base. Cut nails are also firm at $4.25 base. Horseshoe nails are firm at the advanced prices noted last week.

Fence wire is unchanged at the following prices per 100 lbs.: Barb, $4.50; No. 9 plain gal., $4.25; No .12 plain gal., $4.40; No. 13 plain gal., $4.50; No. 9 coil spring, $4.30; No. 10 O. and A., $5.16; No. 11 O. and A., $5.22; No. 12 O. and A., $5.30.

Cow Chains, Ties, Halters, Etc., Advanced

New discounts are out on cow ties, trace chains, etc., as follows:—Cow ties, 25 per cent.; trace chains, 25 per cent.; stall fixtures, 25 per cent.; dog chains, 37½ per cent.; halter chains, 37½ per cent.; tie-out chains, 67½ per cent.

Oil Cooking and Heating Stoves Advance

New and higher prices have been issued on New Perfection and Puritan oil stoves. Prices for present and spring shipment are as follows:—

Two burner oil stoves	$9.50 ea.
Three burner oil stoves	12.55 ea.
Four burner oil stoves	16.00 ea.
1 burner ovens, No. 141g	2.50 ea.
2 burner ovens, No. 142g	3.20 ea.
New Perfection wicks	2.40 dz.
New Perfection Oil Heaters, No. 120	3.35 ea.
New Perfection Oil Heaters, No. 125	3.25 ea.
New Perfection Oil Heaters, No. 130	3.75 ea.

Alabastine Advances

Alabastine has advanced 1c lb. list, and the new price follows:—White, $11 per 100 lbs. list, less 40 per cent., or $6.60 net; colors, $12 per 100 lbs. list, less 40 per cent., or $7.20 net. Add 20c per case for ½ packages.

Sinks, Rivets, Burrs, Valves Advanced

Cast enamel sinks have again advanced. The new prices are as follows:—

Size	16x24 in. Each	18x30 in. Each	18x36 in. Each
Lots of 1	$4.32	$4.72	$5.76
Lots of 2	4.26	4.66	5.70
Lots of 3	4.20	4.60	

Rivets and Burrs Higher

A new discount of 27½ per cent. is quoted on iron rivets and burrs. Net prices on 5-lb. packages, assorted coppered rivets and burrs follow:—

Asstd. No. 8 x ½-lb.	$1.60 pkg.
Asstd. No. 8 x ¼-lb.	1.74 pkg
Asstd. No. 10 x ½-lb.	1.70 pkg.

Valves Advanced

Standard and Jenkin pattern, globe, angle, and check valves have advanced about 10 per cent. The new discount is 40 per cent. off list.

Shoe Thread Advanced

New and higher prices are named on shoe thread. Prices are now quoted as follows, per lb.:—Barbour, No. 8, $1.64; No. 10, $1.72; No. 12, $1.75; No. 15, $1.82; No. 20, $1.87. Star, No. 8, $1.57 lb.; No. 10, $1.64 lb.; No. 15, $1.77 lb.

Stillson and Trimo Wrenches Higher

Stillson and Trimo wrenches are now quoted at 50, 5 per cent off list; parts for same are quoted at 50 per cent. off list.

Shellac Prices Are Adjusted

Revised prices have been issued on orange and white shellac, as follows:—Orange, 1 gal., $2.45 gal.; ½ gal., $2.55 gal.; ¼ gal., $2.65 gal.; pints, $4.45 doz.; ½ pints, $2.65 doz.; ¼ pints, $1.50 doz.; ⅛ pint, 90c doz. White, 1 gal., $2.70 gal.; ½ gal., $2.80 gal.; ¼ gal., $2.90 gal.; pints, $5 doz.; ½ pints, $2.90 doz.; ¼ pints, $1.70 doz.; ⅛ pints, 95c doz.

Oil, Turps and Glass Unchanged

The demand for linseed oil is light. Prices are unchanged as follows:—

	Raw.	Boiled.
1-2 bbls.	$1.15	$1.18
3-5 bbls.	1.14	1.17
6-9 bbls.	1.12	1.15

Turpentine is unchanged at 81c per Imp. gallon in single barrel lots; 80c per Imp. gallon in 2 to 4-barrel lots; 88c per Imp. gallon in 5-gal. lots.

Glass remains as follows:—Single dia., 20 per cent.; double dia., 20 per cent.; cut lights, 50-5 per cent.

White lead in oil remains firm at $14.50 per 100 lbs. in ton lots, and $14.80 per 100 lbs. in less than ton lots.

WINNIPEG MARKETS

WINNIPEG, Jan. 18.—Predictions as to the business to be handled during the month are coming true, with the result that jobbers throughout the city are very busy. A big proportion of the orders being handled are for mixed cars—at this time of the month retailers are busy with their stocktaking and as a result, mail-orders are not very numerous.

The tendency is still upward but the feature of the week reveals itself in the price of linseed oil, which after holding firm for several weeks through an erratic grain market, declines five cents per gallon. The new prices based on this decline are as follows:
Raw $1.35 per gal. bbl. lots; Boiled $1.38 per gal. bbl. lots.

No change is evident in the price of turpentine, the market remaining firm at the following prices: bbl. lots 85c gal.; ½ bbl. lots, 88c gal.; 5 gal. and 1 gal. lots, 90c gal.

During the past few weeks, there have been a great many advances in the price of wrought iron pipe and though each advance has been small, the aggregate is assuming large proportions, and the visions as recorded below set a new high water mark. The demand continues fair in accordance with the season and no decided falling off is to be noted in the quantity of business being handled.

Wrought iron pipe black, per 100 ft., ¼, $4.28; ⅜, $4.37; ½, $5.67; ¾, $6.98; 1, $10.35; 1¼, $13.95; 1½, $16.70; 2, $22.50.

Wrought iron pipe galvanized, per 100 feet: ¼, $6.75 ⅜, $6.84; ½, $7.47 ¾, $9.41; 1, $13.91; 1¼, $18.81; 1½, $22.50; 2, $30.24.

A further advance is noted during the week in the price of wood alcohol, quotations now being as follows, with price of container included: 5 gals. $1.52 per gal.; 1 gal. $1.70 per gal.

During the week another incline is evident in the price of tacks, the discounts now being carpet tacks 70 per cent. discount; cut tacks 70 per cent. discount; wire tacks, 60 per cent. discount; shoe tacks 20 per cent. advance on list.

One of the most important lines affected during the week is drills. For sometime now advances have threatened but it is only now that revised discounts are coming into effect. To-day's prices are: No. 108 twist drill, 40 per cent. discount; No. 105 jobbers stet shank, 35 per cent. discount; No. 110, blacksmiths, 35 per cent. discount; No. 112 blacksmiths, 35 per cent. discount; No. 104A taper shank, 10 per cent. advance on list.

One line, at least, in the hardware business has suffered very little during the past two years of war in the matter of price and that is grindstones. In spite of the many advances recorded in nearly every other line, no change has been evident in this commodity until this week, when an advance of 25c per 100 lbs. is given out. This makes the price to-day on grindstones $2.00 per 100 lbs.

It is some time since activity has been noted in the glass market, but from reports avaialble an advance seems probable nearly any time. Jobbers have been selling on the basis of their cost of some months ago, and when new stocks begin to arrive, a decided increase will have to be made. To-days prices are as follows on window glass:—

	Single	Double.
Up to 25 in.	$7.25	$11.00
26 to 40 in.	8.25	12.75
41 to 50 in.	10.75	14.25
51 to 60 in.	11.25	15.00
61 to 70 in.	12.25	16.00

A slight revision in the price on files is noted during the week, the Canadian lines being the only ones affected. The new discount now applying on quotations is 55 per cent.

Other lines on which an advance is in evidence, and the latest discounts are:—

Cow bells, 35 per cent.

Dudgeon tube expanders, 70-10 per cent.

MONTREAL MARKETS

(Continued from page 27.)

The Ingot Metals Show Some Strength

INGOT METALS.—The market for the ingot metals this week was rather quiet still. Most of the metals noted as being in demand at all last week showed further firmness and strength during the present week.

Copper in Varied Mood

COPPER.—While in some quarters copper was found to be in slightly easier toned market, other directions reported a reversion to firmness and strength; $36 per 100 pounds was the high quotation; $35 the low.

Lead Rather Firmer

LEAD.—The market for lead, which was strengthening last week, continued this tone for the present week, and was in good demand at prices around $10.25 100 lbs., with chances of going to firmer, and some quotations as high as $10.50.

Tin Still Firming Up

TIN.—In the market for tin also there was strength of tone, and rather more activity than prevailed last week, when the first strengthening tendencies became apparent. Prices per 100 pounds for tin were about $49 to $49.50, with an upward tendency for the time being.

Spelter Was Unchanged

SPELTER.—The market conditions for spelter were unchanged this week, and prices remained in Montreal as quoted here last week, viz., $15 to $15.25 per 100 pounds, with only fair demand.

Sheet Zinc Also Quiet

SHEET ZINC.—The conditions as regards sheet zinc were also unchanged from last week, and these quieter conditions of demand kept prices as before, namely, 25c to 25½c per lb. for this metal.

Antimony Very Quiet

ANTIMONY.—Unquoted for some few weeks back in the Montreal report, but steadily quoted in Toronto reports, antimony was in Montreal this week found to be still in quiet, rather slack market, and quoted at 18c.

Solders Unchanged

SOLDERS.—Prices for solders, tinsmiths' and wiping, remain unchanged in Montreal this week, as compared with last week's quotations. The price for tinsmiths' is 32c per lb., and for wiping 30c.

PRACTICAL SHEET METAL WORK

(Continued from page 34.)

small arc 4, cutting this by using top 2 and top R as radius.

To complete the whole pattern, repeat operation until four large and four small pieces have been made; by carefully breaking the metal at each angle a neat taper piece can be made. Fig. 3 is not necessary, except that it will prove good practice for the reader, enabling him to draw different elevations, viz., diagonal plan and elevation in this case.

If flange is required to cover the chimney cap, allowance must be made for seam and lock at lower portion of pattern.

(Continued in next issue.)

Mr. A. Frigon, hardware dealer and general merchant of Amos, Ont. (near Cobalt), arrived this week in Montreal after a chilly trip through wintry weather, and reported business very brisk in his direction. He placed some good orders for new supplies to meet the requirements of his growing district.

SALESMAN WANTED

WANTED — HARDWARE SALESMAN with not less than 5 years' experience; good stockkeeper and window trimmer; good opportunity for the right man. Apply, with full particulars, to Box 419 Hardware and Metal, Toronto.

EVENTS IN THE TRADE

Business Changes

Baden, Ont.—Allen Bechtel has sold his hardware and coal business.

Lethbridge, Alberta.—C. W. Gray, hardware merchant has sold out.

Camrose, Alta.—Hiram Burgar, hardware merchant, has sold to Morris & Taylor.

Makinak, Manitoba—H. Leslie, harness and hardware has been succeeded by John Hodges.

Halifax, N.S.—Longard Bros. have been succeeded by Longards, Ltd. The officers of the new company, which has recently been incorporated, are as follows: C. C. Longard, president; A. H. Longard, vice-president; John J. Hines, general manager; W. H. Wilson, secretary-treasurer.

Personal

Raymond Cantlin was a visitor in Montreal this week from New Britain, Conn.

Morris Wheeler, of New Haven, Conn., U.S.A., paid a business visit to Montreal during the current week.

J. Poole, of McArthur, Irwin, Ltd., Montreal, was visiting in Toronto and district during the current week.

A. W. Peck, of New Britain, Conn., was in Montreal this week and called on business friends in hardware circles.

A. Birmingham, of New York, well known in hardware circles, was renewing acquaintances in Montreal this week.

R. C. Misson, of the Sherwin-Williams Co., Montreal, was in Ontario on business this week. He visited Woodstock.

Brandram, Henderson Co., Ltd., have appointed H. Cunningham to the managership of their Western Division, with offices in Winnipeg.

G. M. Edwards, who for a considerable time has occupied the position of manager of the Central Division of Brandram, Henderson, Ltd., is at present taking a recuperative rest from business, and may go South for a holiday.

A former Montreal hardware merchant, very well known to a wide circle in the trade, visited Montreal this week from New York, in the person of D. J. Smith, of the Smith-Hemenway Co. Mr. Smith was the original proprietor of the Smith Hardware Co. in Montreal.

Sergt. Robt. H. Harrison, of the 20th Battalion, formerly Canadian representative of the Hall Mfg. Co., Monticello, Iowa, is home from France on sick furlough, after spending 2 years and 3 months in khaki. He is suffering from heart trouble, brought on by his many months of active service.

J. Glenister, manager of the plumbing department of the J. H. Ashdown Hardware Co., wholesalers, Winnipeg, left this week for Chicago, Milwaukee, Minneapolis, Madison, Detroit, and will probably go East as far as Toronto. He is calling on manufacturers, and will be away probably three weeks.

H. Seybold, of Starke-Seybold Co., Montreal, has returned from Buffalo, where he spent an interesting time attending the convention of the Beaver Board Co. Mr. Seybold brings back some interesting impressions of conditions in the hardware business in the United States, having met a number of prominent U. S. hardware men while at the convention. Mr. Seybold spent a busy half day in Toronto while away on this business trip, and there renewed a number of valued business acquaintances.

Obituary

Renfrew, Ont.—Alex. Barnet, president Barnet Mfg. Co., is dead.

Vancouver, B.C.—The funeral was held in this city of the late William Arthur McMartin, who was recently in charge of the city sales department of McLennan, McFeely & Co., and who passed away at the General Hospital. Formerly of Pembroke, deceased had been with the firm for eight years.

St. John, N.B. Notes

Lance-Corporal William R. Longmire of the 26th battalion a former employee in the hardware establishment of Philip Crannan, M.P.P., St. John, has been awarded the military medal for distinguished services at the front.

W. S. Fisher of Emerson & Fisher, Ltd., St. John, is leaving soon for the South accompanying his son, Captain Donald S. Fisher who has returned from the front to recuperate and who has not yet entirely recovered.

James S. Neill of J. S. Neill & Sons, Ltd., wholesale and retail hardware, has been re-elected president of the Board of Trade of Fredericton, N.B. Other officers elected are W. S. Hooper, vice-president; R. H. Simonds, secretary, and J. M. Lemont, treasurer.

Major Percy McAvity of McLean, Holt & Co., St. John, and Captain George Keefe, formerly of the staff of The James Robertson, Co., St. John, both of whom returned after being wounded, have been recommended for staff appointments with the New Brunswick command, headquarters.

A novel advertising device for attracting attention to their establishment is in use on the big hardware establishment of T. McAvity & Sons, St. John. A flood light is concentrated on the Union Jack which flies at the top of a tall flag pole mounted on the roof and the illuminated flag, fluttering in the breeze against the background of the dark sky, is an attention attracter of the first order.

Frank Dunstan, master mechanic with T. McAvity & Sons, Ltd., St. John, has left for New Glasgow to become assistant to the superintendent of the Nova Scotia Steel & Coal Co., there. On Saturday evening he was the guest of honor at a banquet given by his former associates in St. John. A case of pipes was presented to him, on behalf of the gathering, by the Superintendent, H. C. Evans.

Winnipeg Notes

The Alberta Linseed Oil Mills, Medicine Hat, Alta., have appointed G. T. Mumford, Galt Bldg., Winnipeg, as their representative there.

Sherwood and Fraser, Galt Building, Winnipeg, have been succeeded by G. T. Mumford, who has run the business for the past year. Mr. Mumford was formerly manager of the Manitoba Linseed Oil Mills, Winnipeg. He is now representing Sadler and Haworth, Montreal, and carries a stock of belting at Winnipeg.

To Open Calgary Branch

Vancouver, B.C.—The annual meeting of the F. R. Murray Co., Ltd., 117 Pender street west, Vancouver, B.C., was held recently, and a most satisfactory year was reported. Two additional directors were elected for the ensuing year, C. A. Rogers and O. E. MacQuoid. In order to keep pace with their expanding business and for greater convenience of the trade, it was decided to open a sample room in Calgary, early in the New Year, and Mr. MacQuoid, who looks after the Alberta business, will be in charge. The F. R. Murray Co. are importers of basket wares, aluminum goods, household specialties, and jobbers of toys and fancy goods.

HARDWARE LETTER BOX

Maytag Washer

S. R. Peart, Rockwood, Ont.—Please give name of firm making the Magtie power washer, which is being sold in the West.

We do not know of a washer called the Magtie. The Maytag power washer is sold in the West, and is manufactured by the Maytag Co., Ltd., Winnipeg, Man. —Ed.

CATALOGUES AND BOOKLETS

Pflueger Fishing Tackle

A splendidly illustrated 394-page catalogue has been issued by the Enterprise Mfg. Co., Akron, Ohio, featuring a wide range of fishing tackle. It has been the company's aim in this work to illustrate the various products in a concise and practical manner, adding only such information as may prove of value. Copies of the new catalogue No. 37 will be supplied on request.

Books for Sheet Metal Workers

How to Make the Business Pay is the title of a helpful book for the merchant contractor, which just came from the press. Three of the chapters stand out with special prominence with respect to the subjects treated. These are: Ascertaining the True Cost of Conducting Business, Approved Methods of Estimating on Contracts, Book-keeping, a Complete System of Methods and Forms. There are six other chapters, all dealing with important topics.

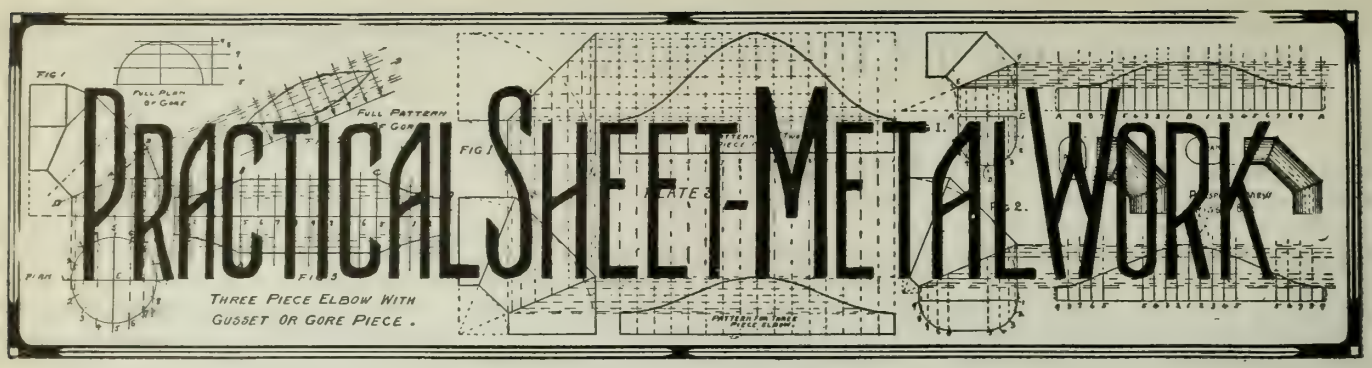
The book is illustrated with diagrams to add to the clearness of the text, and also with the reproduction of estimating blanks, book-keeping forms and charts.

It has been issued by the Sheet Metal Publication Co., under the authorship of Edwin L. Seabrook, secretary of the National Association of Sheet Metal Contractors. It comprises 175 pages, 6 x 9 in., is substantially bound in cloth, and retails at $2 per copy.

MILLION DOLLARS INSURANCE CHRISTMAS GIFT TO EMPLOYEES

Life and disability insurance policies, totaling in the neighborhood of one million dollars, were given to the 1,200 employees of F. E. Myers & Bros. and the Faultless Rubber Co., Ashland, Ohio, as holiday gifts.

The officers of these two concerns concluded after mature deliberation that nothing would be more desirable than insurance protection to those dependent upon workers in their establishments. All employees except travelling salesmen were included in the gift.



BY THOMAS STANFIELD

IT has often been found that a chimney on a fairly good-looking residence has been too short and an extension piece has been required so as to improve the draft. And a round extension piece has not been quite as artistic as the owner would like, the following article shows what was done in such a case not long ago. The existing chimneys on the house were octagonal, and to make the extension look somewhat in keeping with the rest of the chimneys an octagonal one, with ornamental top, was made to fit the one described herewith; the cap piece will appear in the next article. Herewith is simply the taper piece from square to octagonal, the latter being the centre.

First draw the plane as shown in G H I K, and from I K Aa Bb Cc Dd draw a number of dotted lines, from which the elevation can be drawn. Now extend the dotted lines from centre line L horizontally, upon which the pattern must be developed for the large side; dotted lines Ee Dd must also be extended, cutting same as shown at N. Now place the compass at F in elevation and open to C; this measurement is transferred to N, cutting dotted line at O, and draw a vertical line through point O until points R P are developed. Now draw two more horizontal lines from H and K to R and P respectively.

By drawing solid lines, as shown from N^1 N^2 to R and P the pattern for the large side is complete.

To develop the pattern for the small piece draw centre dotted line L M through point K. Then draw two more lines from Cc Dd to S S, and, by placing compass point at F, opening them up to C, the true length of the small pattern is procured. By transferring this measurement to centre line L M, from short line S S to M, and by joining points S S and M, the pattern for the small piece is completed.

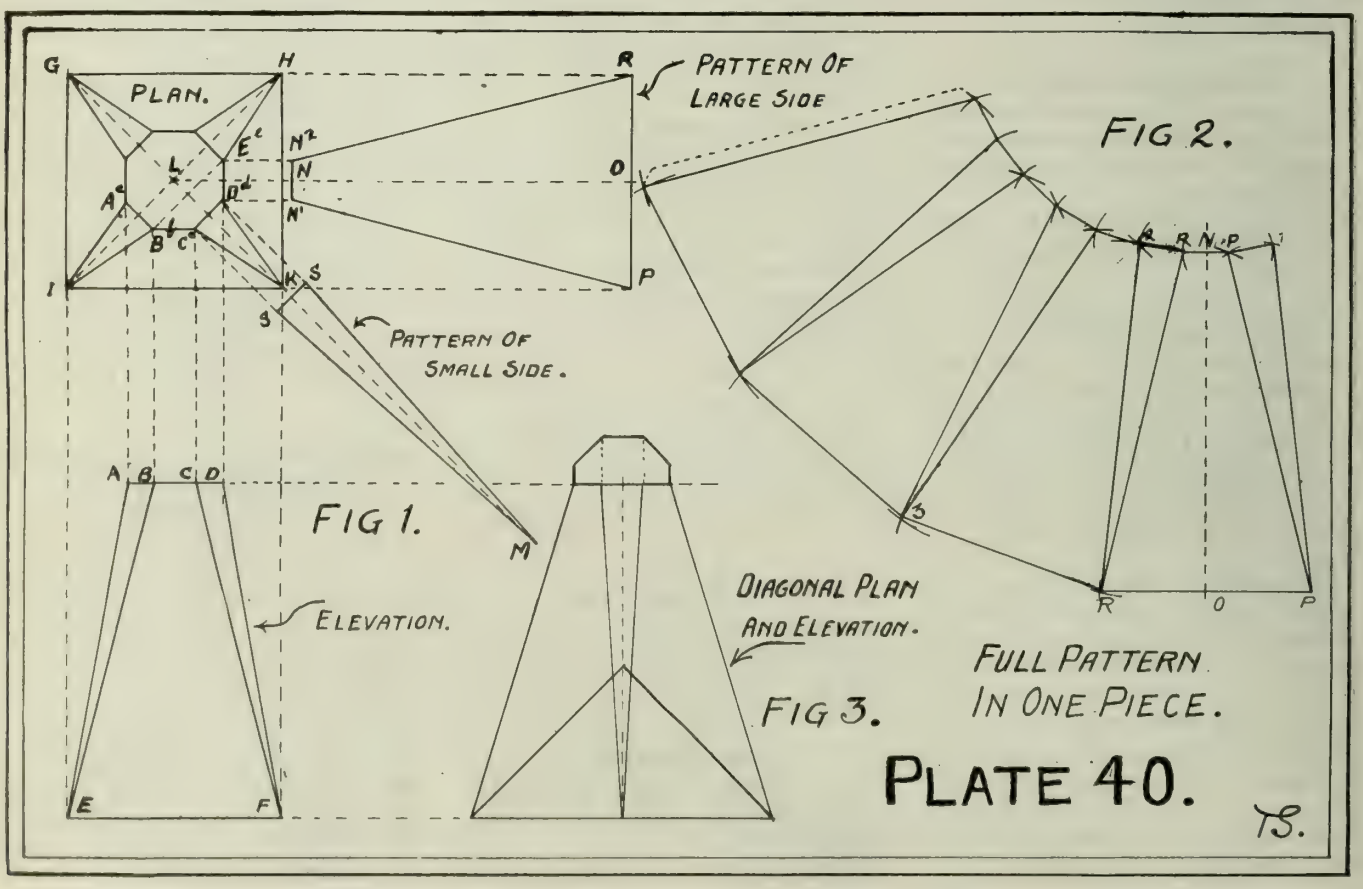
Now turn to the full one-piece pattern, Fig. 2, and first draw a vertical dotted line N O, repeating the instructions given when the pattern for the large piece was being developed.

Next place compass point at P, with P P as radius, draw arc 1, and by using P R at the top as radius, cut arc 1; by joining these points P 1 P the second portion of pattern is made.

Now place compass on lower point R, and with P at top as radius draw arc 2; then with R P at top as radius, cut the arc 2; drawing line from arc 2 to lower R completes the third piece.

The second large piece is now to be developed. With lower R and P as radius, draw arc 3, and again using the lower R and P at top as radius, draw

(Continued on page 31)



NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

NEW AUTO SIGNAL

When the automobile driver is about to stop or turn a corner in the daytime, his extended arm warns the cars behind him of his intention. When he wants to turn or stop at night, his warning arm is likely to be lost in darkness.

A new glove has been put on the market which has a tiny electric bulb fastened to the back, wired to a light battery in the gauntlet. By closing his thumb and forefinger, the driver can close the light circuit and light the bulb on the back of the glove. Thus, his extended arm carries a clearly visible point of light for night driving.

The glove is made of black cape-skin in gauntlet style, fleece-lined, the bat-

Auto Signal Glove.

tery hidden in the deep cuff. Although designed particularly for the illuminating of the driver's hand when he outstretches it at night by way of signal to cars behind him, the light in the glove is aslo useful in many emergencies —hunting the seat of the car for this and that, finding the keyhole in the garage, etc. In the daytime the bulb may be removed from the gove.

The glove is being manufactured by Hamilton-Carhartt Co., Toronto. Descriptive matter and prices will be supplied on request.

WAKYTE CLOSETS

Wakyte Mfg. Co., Winnipeg, Man., is offering to the trade the Wakyte odorless sanitary chemical closet, here illustrated. The makers claim that the steel frame Wakyte is stronger and lighter than heavy, breakable, cast frames and saves nearly 50 per cent. in freight. The makers claim that Wakyte can be used in the bathroom, clothes closet, or basement, and is absolutely odorless, requiring no alterations to instal, and can be set up by anybody in a few minutes.

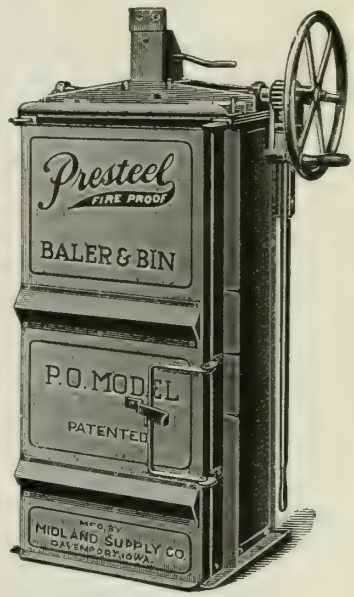
The body is manufactured from heavy iron, bolted and riveted to a steel frame

Wakyte Sanitary Closet.

and heavily braced; with a mahogany finish seat, highly polished. Between the upper and lower seat is a rubber pad, making the closet air tight when not in use. The door is equipped with a nickel plated damper, thus giving a perfect draft. The body of closet is painted in maroon to match the seat. The "Wakyte," it is claimed, is attractive in appearance, strong, durable, and built to last. The closet is made in two sizes, No. 2, family size; No. 3 for smaller families. One gallon of Wakyte chemical, it is claimed, will last the ordinary family six months. Prices and descriptive matter can be secured from the Wakyte Mfg. Co., 259 Stanley street, Winnipeg, Man.

PRESTEEL BALER

Spielman Agencies, St. Alexander street, Montreal, are selling the Presteel fire proof baler for old paper, etc. It is



The Presteel Baler.

claimed that the Presteel bale is tied under pressure—with a gradual release, to prevent snapping of wires. The full capacity of the baler bin is realized by using the high power hand lever, producing large, even, tightly compressed bales. The elastic sides of the bin provide for the easy, quick removal of the bale from the front of the baler. No prying, no poking, or grubbing is necessary. The makers claim that with this baler, strongly bound bales can be turned out by a small boy easily and rapidly. Simply open from the top; the plunger and wheel swing back, allowing rapid filling. When the baler is full, run the plunger down with the hand wheel. The lever completes the operation. The balers are made in three sizes.

E. E. Lyday, Canadian manager for the Maytag Co., manufacturers of washing machines, is making a trip from Winnipeg to the head office at Newton, Iowa, towards the end of this month, and will afterwards call on the jobbing trade in Ontario and Quebec.

WEEKLY PAINT DEPARTMENT

Pratt & Lambert's Sales Convention

President Has Just Completed 25th Anniversary—Vice-President Present From England—An Interesting and Practical Four Days' Session

EARLY in the morning of Jan. 3, the Buffalo plant of Pratt & Lambert, Inc., was the scene of great activity. From every nook and corner of the United States, and from Canada, the Pratt & Lambert sales force had been summoned to its Bi-ennial Four Days' Convention. Once there, they found that another had come from an even greater distance than they, for F. W. F. Clark, London, Eng., vice-president of the company, had arrived in Buffalo before them.

The fact which lent particular interest to this year's convention, and which incidentally was largely instrumental in calling Mr. Clark from England was the fact that 1916 has marked the completion of President W. H. Andrews' 25th year with the concern. The whole spirit of the convention was to do honor to the man at the firm's head, who has been so largely instrumental in its success.

From the first moment the convention was speeded up to the highest possible point. Under the direction of J. H. McNulty, general manager, the proceedings moved fast and smoothly. After the reception, the men were escorted through the great plant, where they found the two years' changes of great interest, especially the large new building that has just been erected to take care of the firm's increased business. The convention exhibits which had been prepared by the various departments of the home office were examined by the visiting salesmen with much interest. Luncheon was served in the firm's dining room, after which the first business session was opened with an address of welcome delivered by W. H. Andrews, president. Mr. Andrews introduced F. W. F. Clark, who expressed his pleasure at being able to attend the convention and the celebration of Mr. Andrews' 25th anniversary. The convention was then placed in the hands of Mr. J. H. McNulty, chairman, who gave a brief outline of the work to be accomplished during the three succeeding days. He was followed by F. W. Robinson, general superintendent, who gave an illustrated talk on the facilities and methods of the company's factories.

J. F. Thomas, laboratory superintendent, spoke on laboratory work. He explained the great amount of research that is a regular part of the laboratory routine, and also emphasized the infinite care that is taken to insure the quality and uniformity of goods, by a ceaseless round of comparisons and service tests

An illustrated talk on raw materials used in varnish making, delivered by R. W. Lindsay, chief chemist, awakened the minds of his hearers to the romantic element in varnish making, as he showed the gathering from every nook and corner of the globe, of the materials that enter into the making of varnish.

The distribution of prizes to employees took place this year on one of the floors of the new building, because of the increase in the number of employees. The presentation of $5 gold pieces and insurance policies to those who had been in the employ of the firm a year or more, was made by Mr. Andrews, who emphasized in his address to the employees the value of continuous employment with one organization.

On Wednesday evening the opening dinner was held at the Iroquois Hotel, and the "boys" showed pretty thoroughly that it takes more than two years' separation to dull the edge of their gift of harmony. New and old P. & L. songs were rendered with real spirit. The conventioneers then hastened to the theatre which was already full with the employees of the Buffalo office and factory and their friends. Many were the P. & L. quips that passed over the boards during the evening.

The business sessions on Thursday were for the most part devoted to the discussion of products; a number of new lines were presented, and the demonstrations of various materials proved of lively interest.

One of the speakers, A. E. Hay, who has been covering the northern and west-

Selling organization of Pratt & Lambert Inc. in attendance at the big four-day Convention.

ern provinces of Canada, brought before the men a number of unique selling points which he has evolved for some of the company's products. His handling of a complex selling problem was among the most interesting features of the day.

J. H. Waterbury, resident manager at Buffalo, also spoke. The selling points which were brought out by Mr. Waterbury occasioned much interested discussion.

Thursday evening marked the coming of the Southern Dinner, which was held at the University Club. After the feast, which was completely southern, the diners enjoyed a full-fledged minstrel show, in which the various characteristics of the P. & L. celebrities came in for a good-humored panning.

The real convention spirit is shown not so much in the social activities, as it is when the roll is called at the beginning of next morning's meeting. Not a man was reported absent or tardy at any of the sessions, proving the vital interest shown by the salesmen in the serious business of the week.

The programme for Friday was a varied one, the first speaker being J. B. Bouck, Jr., who spoke on prices and terms. He dwelt on the fact that the varnish industry has been undergoing a period of change in these matters during the last few years, and showed how greatly the new system would benefit the industry as a whole.

A. G. Simpson, comptroller, gave a very interesting exposition of the firm's credit systems.

R. W. Lindsay spoke on the special materials which the firm makes for paint grinders.

The afternoon session was devoted to the work of advertising and architectural service departments. W. P. Werheim, advertising manager, opened the meeting with an address on P. & L. advertising, in which he outlined the general plan of the firm's publicity.

P. Randolph Campbell, assistant advertising manager, spoke on intensive advertising, taking up the trade papers and letter campaigns conducted by the advertising department. A three reel motion picture was next shown to the men, to explain the value of the complete advertising proposition.

Mr. Werheim then exhibited two charts showing the remarkable increases that had been made in the firm's advertising and general business, and also in the sale of advertised specialties during the last eight years.

At the climax of the most inspiring three days that the P. & L. organization has ever known, came the convention banquet, which was held in the big ball room of the Statler on Friday evening at 7.30 o'clock. The room was especially decorated for the occasion, and at the far end immediately over the speaker's table was a huge portrait of President W. H. Andrews, draped in flags and illuminated by concealed lights. Above and below this, in electric lights, were the words, "W. H. Andrews' 25th Anniversary." When the room was darkened the beautiful effect produced by this decoration may be more easily imagined than described.

During the dinner the men were entertained by a stringed orchestra, which accompanied the singing, and also by the Royal Poinciana Quartette, which sang old and new songs.

President Andrews then gave an illustrated talk on the business life of the organization, starting with pictures showing life in New York city in 1849, when the firm was founded. One of these old pictures showed the actual site of the present New York office. The pictures outlined the various stages in the firm's history, and included portraits of A. W. Pratt and H. S. Lambert, whose names the firm bears to-day. A number of interesting portraits were shown of men at present high in the organization as they looked twenty or more years ago.

PREDICTS BIG BUSINESS AFTER WAR

The Pratt & Lambert salesmen had an interesting opportunity to hear at first hand of war conditions in England, from F. W. F. Clark, London, Eng., who is vice-president of the British associate house, Robt. Ingham Clark & Co.

Mr. Clark's son is a lieutenant in the army and has been on the Somme front for 17 months. He is now home on sick leave, convalescing from an attack of trench fever. His presence home gave Mr. Clark his first opportunity to leave London in many months.

"It seemed very odd when I landed in New York to find myself once more in a city that is lighted at night," he said. "London is a very dismal place at night, since we have had to keep the lights out as a precautionary measure against the Zeppelins. Still, there is quite a bit of gayety in the city. The theatres and the restaurants have their crowds just the same. The great majority of the men are in khaki, being officers home on leave or wounded men who are on sick leave."

He expressed the opinion that all England is united in backing the leadership of Lloyd George and that the country is confident that he will be able to conduct the war to a successful issue.

Man of the Hour

"I did not have very great faith in Lloyd George a few years ago," Mr. Clark added, "but I have come to believe now that he is England's man of the hour."

Following a successful conclusion of the war for the allies, Mr. Clark looks for a great rush of business "both for England and the States." Just at present England is enjoying prosperity of a kind, he said. The munition works are all busy and there is plenty of work for the British artisans. The cost of living is higher, but Mr. Clark believes the rise is due to increased consumption rather than a shortage of food products. Workmen are receiving higher wages and they and their families are eating more meat and are generally enjoying a higher standard of living than they have had heretofore.

His own business, paint and varnish manufacture, has suffered, he says. The building trades are practically at a standstill.

PAINT NOTES

VALENTINE & CO., varnish makers, have allowed all employees a bonus of 10 per cent. on yearly salaries.

* * *

AT THE recent convention of the Canadian National Association of Master Painters, held at Toronto, the following officers were elected:—

President, William Delaney, Niagara Falls; vice-president, James Kitchener, Toronto; secretary-treasurer, Ernest J. Linington, Toronto; executive board, H. Weatherwax, Tilsonburg; William Paris, Toronto; T. W. Milo, Kingston; Charles Chapman, St. Catharines; William Dobson, Hamilton.

* * *

REPRESENTATIVES of turpentine manufacturing interests of Texas, Mississippi, and Louisiana, met recently in New Orleans and decided to organize a turpentine producers' association, to be operated along lines somewhat similar to that of the Southern Pine Association.

* * *

A. RAMSAY & SON CO., LTD., Montreal, recently completed 75 years in business in Canada. The business was founded in 1842 and during the past three-quarters of a century has been successively controlled by three generations of the Ramsay family.

* * *

The British American Paint Co., Victoria, B.C., recently held a sales conference at the head office. The conference lasted for three days. All representatives were optimistic regarding the future outlook. It was pointed out that bookings for spring delivery are in excess of any previous year. The company has established warehouses in Calgary and Edmonton, Alta. Among those in attendance at the conference were the following:—W. M. Forbes, A. G. Pearce, W. E. Trump, W. H. Lawson, J. C. Pendray, H. J. Pendray, R. T. Pendray, H. H. Welch, J. N. Davey, R. C. Chown, J. W. McIntosh, Joseph Harcourt, F. W. Tracey, E. A. Cutler, J. C. Lee, W. R. Herbert, R. L. Shaw.

Kyanize Salesmen Convene at Boston

Three-Day Convention Held at Boston City Club—Practical Talks by Sales Staff—Selling Contest Held

LIVING up to the house legend—"There is only one thing that can be improved by being broken and that's a record," the salesmen's convention of the Boston Varnish Company, held recently at Boston, Mass., proved a ten strike. For the three days of the convention there was crowded into every minute of time more solid vitalizing business entertainment than any one of the forty or so salesmen assembled thought possible.

The discussions, addresses, the various demonstrations on selling points and selling talks, were all entered into with such enthusiasm that there was not a dull moment throughout.

Salesmen were present from east and west, with the men covering Canadian territory and managers from the various branches. Each man was given an opportunity to be heard and as a result the sales force has started out on 1917 with not a single problem for which they have not a solution and with unbounded enthusiasm for the company's product.

Following the reception to salesmen and addresses of welcome, etc., business conditions were outlined by representatives from various territories. Each showed a thorough grasp of the situation and future work will be made to conform to many of their suggestions.

Features of the first day's session were an address on "The Versatility of a Varnish Salesman," by W. H. Ennis, manager of the Canadian Department; an address on "Enthusiasm," by Henry Knott, vice-president of the Greenleaf Advertising Agency; a demonstration, "The Strong Selling Point," by Harry B. Winne, and "Office Helps to Salesmen, by Harry H. Little.

An address that proved one of the most interesting and helpful of the convention showed the importance of the small town field. This was given by Walter W. Manning, of *"Women's World."* Charles H. Tewksbury, manager of the Chicago branch, talked on salesmen's relation with the company, and E. M. Hook, of Washington, D.C., took as his subject, "Earnestness in Selling Kyanize."

A most helpful hour was devoted to complaints and confidences and a general discussion, after which a dinner was served, and the evening was given over to the enjoyment of Montgomery and Stone in "Chin Chin" at the Tremont Theatre.

The second day's session was given over in the morning to a series of talks on the various products of the company.

Most of the afternoon session was devoted to the question of advertising. The national advertising campaign which the company conducts was fully explained. How to use this advertising matter and just what it consists of was gone into by Mr. Lord and W. H. Gerke, after which there was a series of suggestions and recommendations conducted by Walter W. Knott, W. B. Stout, and Emil F. Schwab concluding with general discussions.

Probably the most amusing, and at the same time the most instructive part of the day's activities, was the selling contest that concluded the business end of the convention. This followed a dinner on the second day's programme. Some of the hardest tests imaginable were brought forward for the star salesmen of the company to surmount, and each in turn were successfully combated with and well founded selling arguments brought up.

The third day, and closing day of the convention, was spent at the factory. Here were more surprises, for the increases made to the plant at Everett, in several new stacks for manufacturing were found to have increased the capacity to take care of the vast increase in output which has been demanded.

A practical demonstration and technical information of the way Kyanize is manufactured, was conducted by Harry A. Hall, Elmer E. Tobey, and Garner H. Moise.

PAINT NOTES

Benjamin Moore & Co., New York, Chicago, Toronto, recently held their annual sales convention at St. Louis. L. P. Moore was advanced from vice-president to president, and former President Benjamin Moore becomes chairman of the Executive Board. The company has plants at New York, Chicago, Cleveland, St. Louis and Toronto.

Sales staff of Boston Varnish Co. who attended the Convention.

BOECKH'S "Steel Grip," Rubber Set Painters' Brushes

THE BRUSHES THAT LAST

The Bristles, due to the "STEEL GRIP" Process, converge to the centre of the brush, producing an elastic and resilient action — a feature demanded by the best practical painters, who know from long experience the advantage of using this type of brush.

Each individual bristle is held firmly by thoroughly hardened, best quality rubber, reinforced and protected by the famous "STEEL GRIP" Compressed Steel Ferrules, which add so materially to the life of the brush, and are not mere ornaments.

Cannot and will not shed the bristles.

Boeckh's "STEEL GRIP" Rubber Set Brushes are, on account of their excellent wearing qualities, the easiest selling and most satisfactory brushes.

Remember, there is no article that will try your customers' patience more than a Bristle Shedding Brush.

"STEEL GRIP" Rubber Set Brushes are guaranteed for use in any liquid which will not destroy the Bristles.

THE BOECKH BROS. COMPANY, Ltd.

TORONTO, CANADA

IT IS SERVICE

that Determines the Value of Paints

Because a can of paint sells at a very cheap price it is no sign that it is big in value.

Jamieson's Pure Prepared Paints

are extraordinary in their service-giving qualities and their price is no higher than the ordinary kind. They are big value in every sense of the word.

Just the line for which you should have the agency.

It will pay you to write for our proposition.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, January 17.—Paint market conditions for the present week are something like those of last week with greater intensity in linseed oil firmness. It is declared that but for the extra firmness in feeds which creates a specially brisk demand for the oil cake linseed oil would possibly go higher in price at a jump. Crushers are certainly of opinion that oil is in for a lengthy period of firmness, and are quoting from $1.08 to $1.09 for deliveries of spot linseed oil, and are not quoting for future supplies. Mixed paints are in good demand for spring. Shellac is firmer. Gasoline has gone up a cent, and turpentine is in firm market. Glass and putty also keep very firm priced on account of shortage of supply in these lines and increased cost of production.

Mixed Paints Show Brisk Spring Demand

MIXED PAINTS.—There is every evidence of a good spring demand for mixed paints, and in the opinion of leading manufacturers the outlook is still for continued firmness in price, with very little chance of any reduction from the present scale even if oils and raw materials were to reduce in price instead of increasing as the oils at least are doing at present. It is argued by the manufacturers that the increases so far in paint prices arrived late long after raw materials had risen, and that these increases only just about prevent the manufacturing business from running at a loss, certainly the increases provide only for a reduced profit on paints as compared with former days. In white paint for instance there is only about an even break for the maker. The flow of spring orders so far seems to show that the present prices are being accepted as well as justified by many retailers throughout the country, and manufacturers are agreed that no reduction could possibly come to make any difference in spring business for the retailer.

Linseed Oil Very Firm Indeed Now

LINSEED OIL.—Great firmness characterises the market for linseed oil in Montreal this week. There is no reassuring note as regards hope of reduction in prices. News from the distant sources of supply continues to influence only towards firmness. The upset in shipping circles caused by the raider rumors and raider realities, the first exaggerated, the second annoying, has had its effect on freight rates for Argentine seed, and this is scarce enough and high priced enough anyway. Similarly transportation trouble and congestion of railway circumstances have exercised their firming effects on the market as regards Canadian flaxseed supplies. Flaxseed at $2.62 this week is hard to secure and crush,ers were not booking orders for spring delivery in anticipation of higher price conditions. One leading firm of hardware wholesalers had a warning note circulated to their executive staff to the effect that linseed oil might reach as high as $1.50 a gallon. Several firms of paint manufacturers in Montreal were not anxious to part with any of their stocks, and were not quoting. But other firms were doing business as usual and quoted prices according to the same range as last week's with the emphasis rather more heavily on the higher figures as follows:

Linseed oil	Raw.	Boiled.
1 to 4 barrels	$1.15-1.20	$1.18-1.25
5 to 9 barrels	1.14-1.19	1.17-1.24
10 to 25 barrels ..	1.13-1.18	1.16-1.23

Turpentine Seems Increasingly Firm

TURPENTINE.—Reports regarding turpentine are continuously firm at present the market showing no tendency to produce lower prices. Some manufacturers of paint are not parting with turpentine in any large quantities, and the outlook in most expressed opinions is for supplies none to large for requirements and very firmly maintained prices even after the arrival of new crop shipments. Prices in Montreal remain as quoted last week though the tendency is towards firmer figures than the following quotations:

Turpentne	Per Imp. Gal.
1 barrel lots	75-80c
2 to 4 barrels	74-79c
5 to 10 barrels	73-78

White Lead in Oil Ingredients Firm

WHITE LEAD IN OIL.—There is no change in the market for white lead in oil this week, though both the oil and the lead are in reasonably firm market, and it would not require any great leverage on the part of both these factors together to produce the necessity for another increase. Manufacturers however, are hopeful of being able to maintain prices without need for further increase, and at present orders are being accepted for delivery up to April 1st at the prices presently quoted which are as will be recalled $14.30 per 100 lbs. for ton lots and over, and thirty cents additional per hundred pounds for smaller quantities.

Gasoline Advanced By One Cent Per Gal.

GASOLINE.—Another advance is registered by gasoline this week. The present advance is a one cent increase per gallon delivered from the tank car making the price 29½ cents per gallon. The same price holds for gasoline supplied in barrels with a two dollar charge (refundable) for the container. The advance is due to the greatly increased price of crude oil from the American middle West. Crude oil is priced to-day at $1.70 per barrel which is vastly different from the 90 cents figure of about a month ago. The ultimate reason for the advance is not fathomed for certain in Montreal, but the supply is believed to be shorter and transportation troubles prevent rapid shipments to relieve district shortages.

Shellac is Again on the Firm Trend

SHELLAC.—There is still considerable firmness in the market condition for shellac, and only a week ago from date of publication (last Friday to be exact) shellac had advanced a further 3 cents in New York, while the spirit was also very firmly priced. These matters make the market for varnishes made from shellac firm in outlook, and the prospect seems to be for prolonged of tone.

Does the Paint You Sell Advertise Your Store?

Every painting job is some kind of an advertisement for the manufacturer who made the paint and the merchant who sold it.

It depends on the paint whether that job makes another sale or kills one. When you consider paint selling from this angle you realize the real necessity of placing your faith in

B-H English Paint

because it has a long and good record behind it that is an absolute guarantee of faithful performance in the future.

The merchant who has a B-H agency never need be afraid to refer prospective purchasers to jobs on which B-H paint has been used. They are his best advertisement.

Where we are not already represented, we would be glad to hear from a progressive merchant.

TORONTO

TORONTO, Jan. 19.—Wholesale paint houses report trade somewhat disappointing during the opening weeks of the present year. Retailers are not given to booking ahead in the face of the high prices, and in this respect there has not been the same volume of forward orders. There is an inclination for the retail merchants to be cautious in their buying. There is a continued firmness in almost all lines of paint materials. An advance in alabastine of 1c per pound on list price has been recorded. Glass discounts have been advanced in some instances to 15 per cent. off list. This is not general as yet, quite a range of prices still prevailing. This is but an intimation of the way the market is headed. Some wholesalers have been contemplating putting an advance into effect in the near future. Shellac is in firm market, and in certain instances has been quoted up 20c per gallon. There are intimations also that it is likely to go still higher. Gasoline and benzine have recorded advances during the week, and there is a continued firmness in this market owing to the record high price for crude oil at the wells. Consumption of all oil products is greatly overstepping production. Waste has also been marked up for considerable gains. Putty held in firm market on the recent advances, and white lead in oil is also steady. There is a disposition to look for higher prices in this commodity owing to the firm position of linseed oil. Pig lead being in firm market also, has its effect on the situation. Linseed oil advanced in price during the week, the lowest quotation obtained being $1.15 for raw in one to two-barrel lots. Turpentine held firm, with a possibility of a continuation of this condition for the next six weeks.

Linseed Oil Again Quoted at Higher Levels

LINSEED OIL.—There is a firmness in the linseed oil situation, which has made itself manifest by a movement of prices toward higher levels. The lowest quotation obtained was $1.15 for raw oil and $1.18 for boiled. This represents an advance of 3c per gallon. The range is still within comparatively narrow limits, the high quotation being $1.17 for raw and $1.20 for boiled. Some of the crushers are experiencing difficulty in getting a supply of flaxseed from the West owing to the freight situation. For this reason some are practically out of the market for quotations to new customers. They are endeavoring to look after the needs of their regular customers, but are not looking for new business. There was a net advance of 4c per bushel in flaxseed during the week. On Wednesday of last week the cash article at Winnipeg sold at $2.58½, and on the same day this week the selling price was $2.62½. There was a slight fluctuation in the flaxseed market on Saturday of last week, when it went as low as $2.56⅜. But the tone of the market was firm and generally in an upward direction. The May option for flaxseed was quoted up as high as $2.71 on Wednesday of this week, which would seem to indicate the strength of the seed for future delivery. Receipts in carloads at Winnipeg for the six days ending wtih Wednesday amounted to 90 cars, or an average of 15 cars per day.

1 to 2 barrels	$1.15-1.17	$1.18-1.20
3 to 5 barrels	1.14-1.16	1.17-1.19
6 to 9 barrels	1.13-1.15	1.16-1.18

Gasoline Goes Up 1 Cent Per Gallon

GASOLINE.—The increased firmness and high price in the price of crude oil at the wells has resulted in an advance of 1c per gallon on the price of gasoline. It is now selling at 28½c and 29c per gallon. A new record for crude oil was established during the week when Mid-Continent jumped to $1.70, or a 20c advance. The highest price reached by crude oil last year was $1.55 per gallon. Gasoline at that time was selling at practically the same figure as that quoted at present. In the face of the crude market a higher price than that now prevailing would seem justified for gasoline. There is consequently a firmness in the market at the recent advance. Coal oil and lubricating oils share the firmness in the market. Benzine also advanced in like amount with gasoline, and is now quoted at 27½c and 28c.

White Lead Firm, Due to Linseed Situation

WHITE LEAD IN OIL.—There is a continued firmness in white lead in oil, due to the strong position of linseed oil. Advances have been recorded in the latter commodity during the week, and there looms largely a possible difficulty of getting supplies of oil for future delivery. There are those in the trade who assert their belief that higher prices for white lead are reasonably sure to follow. The pig lead market in New York holds in a strong position at $7.60 per hundred. Differentials of 20c for Toronto and Hamilton over the Montreal prices and 25c for London and Windsor over the Montreal prices, and 30c for Port Arthur and Fort William when navigation opens have been quite generally recorded. White lead is quoted at $14.80 in small lots per hundred pounds and $14.50 in ton lots.

Turpentine Expected to Hold Steady Until March

TURPENTINE.—There was a slight weakening in the primary market at Savannah during the past week for turpentine. This was due in large measure to the fact that the consuming trade in the West and North-West has been quiet recently. There was some speculatively-carried tank turpentine that also put in an appearance, and this helped to give the market a weak tone for the time. Some export, however, has been going on, and the new crop turpentine will not come on the market until about March 1. This is expected to cause a steadiness in turpentine for the next six weeks at least. Locally the demand has been light. Prices held steady.

1-barrel lots	$0.75-$0.81
2 to 5 barrels	0.74- 0.80
6 to 9 barrels	0.73- 0.79
5-gallon	0.80- 0.78

Some Glass Concerns Have Increased Price

GLASS.—The firm feeling in the glass market since the recent announcement by the American manufacturers of higher prices made itself manifest during the week in that some of the local dealers have made their discount 15 per cent. off list, as compared with 20 per cent. formerly. This new discount has been announced by at least one glass house, and other jobbers intimated their intention of revising their prices upward in the near future. There is quite a wide range in glass prices, however, owing to the comparatively heavy stocks that were on hand before the recent advance at the American mills took place.

Advances Recorded in Calcimines During Week

CALCIMINES.—Following the intimation made by HARDWARE AND METAL last week that calcimines were in strong position, advances have been recorded during the week. Alabastine is one of the lines that has been advanced 1c per pound on list. List prices are now 11c for white and 12c for colored. Discount on this line remains at 40 per cent. The advance is, therefore 60c per 100 pounds. Calcimines quite generally have been marked up ½c per pound. In referring to the condition respecting calcimines, HARDWARE AND METAL last week said:—"In all probability calcimine prices will be advanced in the very near future. Costs of all raw materials have advanced considerably, and manufacturers have been absorbing the additional increase. It is now claimed that the limit has been reached and higher prices are inevitable. Whiting and glue have reached high cost levels, and the added cost and difficulty in securing tinting colors have also made the situation more acute. The glue problem is probably the most serious at present, and glue, which at one time cost 14c per pound, now costs 35c lb. Even at the high prices now prevailing, glue manufacturers are only able to make shipments in small quantities. The advances will probably range from ½c to ¾c lb."

TRADE SIMMS SET IN RUBBER MARK

ARE

BETTER BRUSHES

But do not get the impression that all "SET IN RUBBER" Brushes are

BETTER BRUSHES

The setting of brushes in rubber is a complicated and difficult process in which great care and skill, exercised by thoroughly trained mechanics of long experience at the work, are necessary to produce A MECHANICALLY SATISFACTORY BRUSH.

The words "SET IN RUBBER" mean nothing to you unless supplemented by this trade-mark

SIMMS SET IN RUBBER

which guarantees you

BETTER BRUSHES

Made by the most modern methods, in a thoroughly equipped, up-to-date factory, and sold at prices no higher than are charged for brushes only claimed to be "just as good" as

Re Gauges and Prices of Sheets.

Prices which follow on black and galvanized sheets are purely nominal. The market has reached a state where prices are quoted only on application and for immediate acceptance.

On account of it being practically impossible to secure galvanized sheets from England, owing to the war, American mills have decided that they will no longer roll the English gauges to meet this competition. However, they will continue to roll at 10¾ oz., which will be known as such or a 30 gauge, and will take the place of the former English 28 gauge.

SHEETS (BLACK)

	Montreal 100 lbs.	Toronto 100 lbs.
10 gauge	6 00	6 00
12 gauge	6 00	6 00
14 gauge	5 40	5 40

Let's Call a Convention in Your Store

Let's do in your store what the great Manufacturing organizations accomplish when they call in their salesmen, managers and officers—

Let's thresh out this Paint Problem once for all.

Either we've got the finest Paint Proposition — including the quality Paint, the quality advertising and the quality co-operation as we say, or we haven't. Either we can make more money for you in your Paint Department than anyone else, or we can't.

You can't lose. You'll certainly learn something. Let's talk it over now.

MACLEAN'S MAGAZINE *for* February

Just suppose you were made Editor of MACLEAN'S MAGAZINE for one issue!

WHAT would you provide for your readers? You would probably want some good short stories, and you would like to offer chapters of a good serial. You would want something in lighter vein. Perhaps some verse. Certainly some serious articles of an informative and critical nature. Probably you would want everything—contributions and illustrations—to be by Canadians. Good! But who are they? And could you get their work?

Look at what the regular editor, T. B. Costain, has provided for the February issue of MACLEAN'S:

A serial story by **Sir Gilbert Parker**—"Jordan is a Hard Road."

A short story by **H. G. Wells**—"Into the Abyss."

A complete novelette by **A. C. Allenson**—"Danton of the Fleet."

A gripping sketch of "The Greatest Hotelman in the World"—a Canadian, by name John McE. Bowman, of the Hotel Biltmore, New York; and the man behind the Manhattan Hotel, New York, and the hotel now building in the same city, The Commodore, and the new Canadian hotel, The Devonshire, to be built this year in Toronto. **W. A. Craick** gives the story of this remarkably successful and interesting man—a veritable romance of achievement.

Stephen Leacock is in the February MACLEAN'S with one of his inimitable sketches—this one entitled—"In Merry Mexico." What a fancy, what a humor this man has! He roams the earth, and always is visiting some land or country in the spotlight of the world's history.

Then Editor Costain has **Miss Agnes C. Laut** in the February issue with a timely and thought-provoking article, "The Elections and Canada." She is writing of the American elections of last November, and in her virile style and with her amazing inside knowledge of things political, she gives all Canadians much to think about, and a wider vision of the place Canada holds in world affairs—dwelling especially on the new Anglo-Saxon relations which will be the result of the war now being waged, and which gives promise of involving the United States. Miss Laut's contribution is well worth reading.

H. F. Gadsby, free lance, ever a-tilting at politicians and politics, and never failing to get under the guard of parties and partisans, writes sparklingly on "How Premiers Control Their Cabinets" — of piquant interest in view of Sir Sam Hughes's recent encounters with Premier Borden. Gadsby studies other Canadian Cabinets than those of Premier Borden's. Good reading, this.

Then Editor Costain starts in this February issue of MACLEAN'S a new department—snappy biographical sketches and zestful stories of notable and interesting Canadians. You will enjoy this yourself and so will all others to whom you may introduce MACLEAN'S MAGAZINE.

The usual departments—Review of Reviews and "Information for Investors"—are present as usual; and illustrations by these Canadian artists, C. W. Jefferys, Harry C. Edwards, Lou Skuce, E. J. Dinsmore, assist to give the February MACLEAN'S *distinction and appeal.*

Now if you have been keeping in mind yourself—as a possible editor of MACLEAN'S MAGAZINE for a single issue—do you think you could excel or equal what the regular editor has provided for MACLEAN'S readers?

Transparent Wood Finish

The finest, most beautiful and most durable house varnish ever put upon the market.

Costs a little more by the gallon than some other varnishes, but costs less BY THE JOB and lasts several times as long. There are jobs done with T.W.F. forty years ago that are still in perfect condition and good for many years yet.

MYERS TANK PUMPS
EASIEST TO OPERATE

The Patented Cog Gear Head, as used on Myers Tank Pumps saves one-third of the operating power.

The valves are each located under a removable, individual cap, where they can be easily reached.

The purchaser buys the most service when he buys a Myers Tank Pump. Write for booklet.

Wellington Mills, London, England

If you have a business to dispose of, or are in need of efficient help, try a Want Ad. in Hardware and Metal, and let it assist you in filling your needs.

THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

$469.20 a Year for National Advertising

A half-page advertisement in **MacLean's Magazine**, every issue for a year (12 times), costs $469.20.

Figured out proportionately, it means:

$161.22	to influence		Ontarians
$102.00	"	"	Quebecers
$ 23.46	"	"	New Brunswickers
$ 28.15	"	"	Nova Scotians
$ 4.69	"	"	P.E. Islanders
$ 32.84	"	"	Manitobans
$ 37.54	"	"	Saskatchewans
$ 28.15	"	"	Albertans
$ 28 15	"	"	British Columbians

(This division on the basis of provincial populations.)

Really, when you break it up this way, the amount per province for a whole year's powerful influence is ridiculously small. Honestly, can you say "I can't afford $469.20 a year for national advertising?"

MACLEAN'S MAGAZINE

Can perform a service for you, at a price, which you cannot have rendered by any other single medium, or at so low a cost.

N.B.—Objectionable advertising not accepted. Both editorial and advertising columns are closely censored to keep them clean and decent.

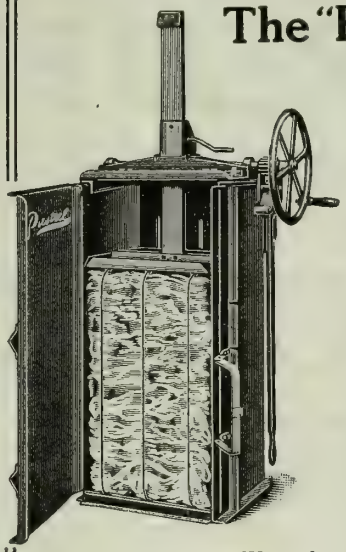
Don't Burn Dollars

Turn Your Waste Paper Into Paper Money

The waste paper that you spend so much time in destroying has a considerable cash value, which is increasing almost daily.

The "Presteel" Fire-Proof Baler



Is all-steel and fire-proof, unbreakable and unburnable, also very compact.

The Presteel has fewer parts than any other baler. It cannot get out of order, and will last a lifetime. It is easy, simple and quick to operate.

Its special features make it superior to any other baler on the market.

Greatly reduces fire danger.

There's a place for a Presteel in every store, office and factory.

They're profitable to use and profitable to sell.

Write for full details.

THE W. W. COOPER COMPANY LIMITED
WE SELL EVERYTHING
DIAMOND C BRAND COOPER'S GUARANTEE
EVERYTHING WE SELL WE GUARANTEE

SWIFT CURRENT, SASK. Sept. 20, 1916.

Messrs,
Hardware and Metal,
143-153 University Ave.,
Toronto, Ont.

Gentlemen:-

We beg to acknowledge receipt of your favor of the 16th., also cuts as mentioned therein and for which we thank you.

We are now using about fifty of these with good results.

Yours truly,

THE W.W.COOPER COMPANY Limited.

per. P.

P/H.

Since we announced HARDWARE AND METAL'S Electro Service about a year ago, nearly 200 subscribers have availed themselves of the opportunity to secure cuts for their local advertising at low cost.

The letter from The W. W. Cooper Company, reproduced above, is only one of many which we have received from merchants who have had good results from using these cuts.

You can have equally good results from a judicious selection of electros combined with good "copy." Write now for free proof sheets showing our complete assortment of hardware electros. They cost only 20 cents each, and they will open up big possibilities for expanding your sales.

More Dollars

You can make "Dollars Grow" out of your *spare time.* Spare-time efforts have made hundreds of dollars for MacLean Representatives. To-day there are in Canada, men and women, who find that our proposition worked for an hour or two daily provides for many of the added luxuries of life. You supply us the time,—we'll supply you the money. Write for full particulars.

Automobile Lamps and Fuses

You can't and won't sell these money-makers if you don't try to, or if you don't have them in stock.

Yet all your car-owning customers want lamps and fuses, and buy them—from somebody.

Be that somebody in your community.

And let us help you.

If any customers want Edeswan Automobile Connectors and Sockets, then make a mental note of the fact that we supply these.

Note this also: When it is things electrical, write us.

Have you our Catalogue?

TO INVESTORS

THOSE WHO, FROM TIME TO TIME, HAVE FUNDS REQUIRING INVESTMENT MAY PURCHASE AT PAR

DOMINION OF CANADA DEBENTURE STOCK

IN SUMS OF **$500** OR ANY MULTIPLE THEREOF.

Principal repayable 1st October, 1919.

Interest payable half-yearly, 1st April and 1st October by cheque (free of exchange at any chartered Bank in Canada) at the rate of five per cent per annum from the date of purchase.

Holders of this stock will have the privilege of surrendering at par and accrued interest, as the equivalent of cash, in payment of any allotment made under any future war loan issue in Canada other than an issue of Treasury Bills or other like short date security.

Proceeds of this stock are for war purposes only.

A commission of one-quarter of one per cent will be allowed to recognized bond and stock brokers on allotments made in respect of applications for this stock which bear their stamp.

For application forms apply to the Deputy Minister of Finance, Ottawa.

DEPARTMENT OF FINANCE, OTTAWA,
OCTOBER 7th, 1916.

WE HAVE THE STOCK. WE GIVE THE SERVICE.

44 to 50 Wellington Street East, Toronto, Ont. Also at Guelph, Ont.

FORGETTING

One of the things we all do well is to **forget.**
Names that were household worlds yesterday are gone to-day.
Because people knew your Name and your Line a year ago it is no sign they do to-day. They forget easily.
Keep yourself in the public mind by advertising. It is just as important to make old friends remember as it is to win new friends. Advertising does both.

If interested, tear out this page and keep with letters to be answered.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

Condensed or "Want" Advertisements

There is always someone, somewhere, who is looking for just such a proposition as you have to offer—and it is more than likely that he is a hardwareman and a subscriber to HARDWARE AND METAL. Let an advertisement on this page bring you together.

RATES (payable in advance): 2 cents per word first insertion, 1c per word subsequent insertion. An additional charge of 5 cents for each insertion is made when Box Number is required. Each figure counts as one word.

BUSINESS CHANCES

LET JOHN NEW, 154 BAY STREET, TORONTO. sell your business. (4)

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

ARTICLES FOR SALE

FOR SALE—EIGHT-FOOT BROWN-BOGG Iron Brake, good as new. McMurty Hardware Co., St. Thomas.

AGENCIES WANTED

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

STORE EQUIPMENT FOR SALE

YOU MUST HAVE A LOT OF OLD FIXtures around the store which are no longer of any value to you, but would prove very useful to someone else in the hardware business. Find a purchaser for this equipment through an advertisement on Hardware and Metal's Condensed Ad. Page.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

SALESMEN WANTED

WANTED — EXPERIENCED HARDWARE salesman. State experience and salary expected. A. G. Dobbie & Co., Brockville, Ont.

PAPER BALERS

THERE IS MONEY IN USING AND SELLing the Jewell Paper Baler. It is the only low-priced, efficient baler on the market. Every hardware store should use one. Splendid side line for one line traveller in each territory. General Sales Co., Stair Bldg., Toronto.

SITUATIONS WANTED

THE "CHANGING TIME" IS GETTING near. There are many firms who have vacancies on their sales or office staffs to fill during the next few months. If you want to qualify for some of these vacancies, tell your story briefly in a Condensed Advertisement, and try it out in Hardware and Metal. A twenty-five word advertisement may land you a permanent position with splendid prospects.

MISCELLANEOUS

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

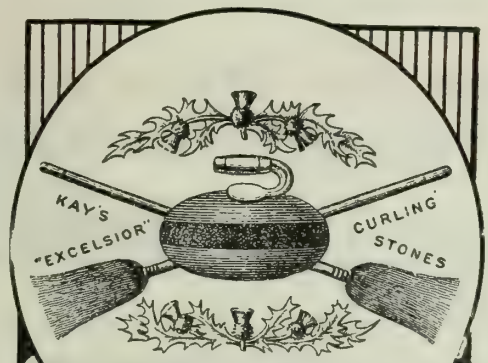
ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited. Room 314, Stair Building, Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada. (tf)

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fenson hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fenson Elevator Co., Toronto.

SIGNS AND SHOW CARDS

WE ARE THE MOST UP-TO-DATE SIGN and show card firm in Canada. W. H. Stevenson, Stevenson Building, Toronto.



"KAY'S EXCELSIOR" Curling Stones

Run perfectly from the very start. No working down with emery necessary.

We carry a full line, in assorted weights, 36 to 45 lbs. to the stone, exclusive of the handle.

Also Handles, Grips, Fancy Washers, Brooms, Boxes.

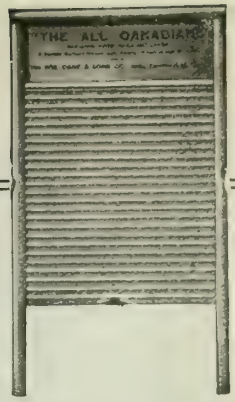
Also Builders' Supplies.

Walter Belyea

Successor to the late

THOMAS BLACK

WINNIPEG



COSTS LESS

than aluminum and zinc wash boards, is just as good and is more serviceable.

The All-Canadian
All-Wooden
Wash Boards

are the result of great scarcity and high price of zinc and aluminum—a price that has greatly handicapped washboard sales.

All-Canadian grown wood, Canadian-made nails, and by Canadian workmen—that's why it's all-Canadian.

The finest grained hardwood is used for rubbing surface.

Retails at 20c and leaves a BETTER profit.

Standard zinc, glass and enamel wash boards always on hand for prompt delivery, until notice to the contrary.

HAND TAPS

TAPPER TAPS

When the demand is for TAPS, DIES and REAMERS supply the "BUTTERFIELD" line

You will be doing your customers a service that will keep them coming to you for taps, dies and reamers, and you'll incidentally sell other goods as well.

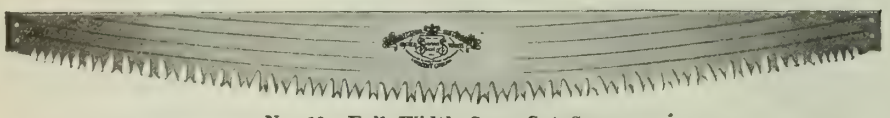
Butterfield Tools are much in favor of "those who know," due to their fast cutting and clean working qualities and their remarkable durability.

Butterfield tools sell fast—and the profit's good.

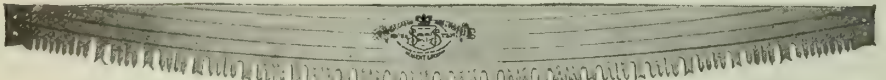
Send for our catalog.

BUTTERFIELD & Co., Inc.
ROCK ISLAND, QUE.

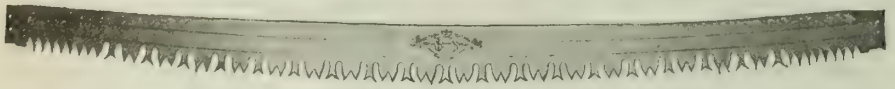
You should place your orders now for a stock of SIMONDS Crescent Ground Cross-Cut Saws



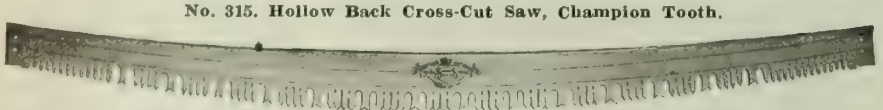
No. 13. Full Width Cross-Cut Saw.



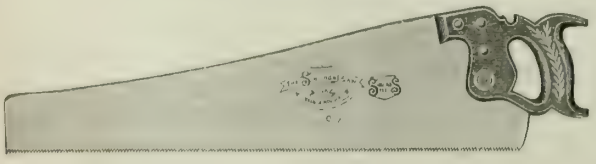
No. 22. Full Width Cross-Cut Saw.



No. 315. Hollow Back Cross-Cut Saw, Champion Tooth.



No. 325. Hollow Back Cross-Cut Saw, Lance Tooth.



YOU can make no mistake when you do this as every logger or woodsman knows this make of saws and will always pay more for them for the simple reason that they enable him to do more work with a smaller amount of labor. He knows the better cutting quality of the saw will make it more than pay for itself. Select the styles you want from these pictures or write for our complete catalog and more information.

We also have a complete line of Hand Saws.

Vol. XXIX No. 4 — PUBLISHED EVERY SATURDAY SINCE 1888 — Jan. 27 1917

THE MACLEAN PUBLISHING COMPANY, LIMITED

PUBLICATION OFFICE: TORONTO, CANADA

The Big 1917 Demand Is at Your Door

Millions will read about CAMPBELL'S VARNISH STAIN and CAMPBELL'S VIRGIN WHITE, and thousands of new purchasers will be added to the tens of thousands who now ask for them by name and who will accept no substitute. This means that 1917 will outstrip all previous prosperity records for merchants handling these two household leaders.

A Bigger, Better Advertising Campaign

Our advertising appropriation has been doubled, and the most convincing ads we've ever run, including *full* pages in four colors, are now in the hands of such publications as the Saturday Evening Post, Ladies' Home Journal, Good Housekeeping, Delineator, Pictorial Review, Woman's Magazine and similar mediums, with a total circulation of more than seven millions.

The first "big gun" appears in the January Good Housekeeping—read it, and identify your store with the big campaign by using the business-getting store and window displays we furnish free.

The most attractive window during Clean-Up Week wins an automobile or a cash prize. Equal chance for small stores as well as big ones. The big Sales' Help Book, illustrated above, tells *how to win*. It also contains many suggestions that will help increase your entire business. *Write for your copy today.*

Plymouth Rope Builds Business

Here's what they think of Plymouth Rope down in Fort Myers, Florida. Dealer C. F. Ireland wrote the letter:

> *"For ten years we have not had a foot of rope in our store other than 'PLYMOUTH' and we have a long list of satisfied rope users as customers who will travel miles to purchase 'Plymouth.'"*

Not all people who use Plymouth have to travel as far for it as some of Mr. Ireland's customers, but if obliged to most of them probably would.

This insistence upon Plymouth by those who have once learned its superior quality is one of the factors which make the Plymouth dealer's rope business pleasant and profitable.

QUALITY

THE leader in every industry, to maintain his lead, must safeguard the quality of his products.—Rigid inspection and careful supervision are important factors.—To products of iron and steel this principle applies with tremendous force.—It means safety, security and stability.—We safeguard the quality of our products, believing quality will be recognized long after the price is forgotten.

SERVICE

OUR customers must be served. One of the dominating factors in any successful business is Service.—We succeed only through the good will and good wish of the people we serve.—This thought permeates our entire Organization, from the President down.—Our employees feel the sense of responsibility this principle implies; and each one directs his efforts to maintain the high standard of service we aim to render.

Toncan Metal News

Vol. 1—No. 7 PUBLISHED IN THE INTEREST OF BETTER SHEET METAL January, 1917

VENTILATING DUCTS ARE TONCAN METAL

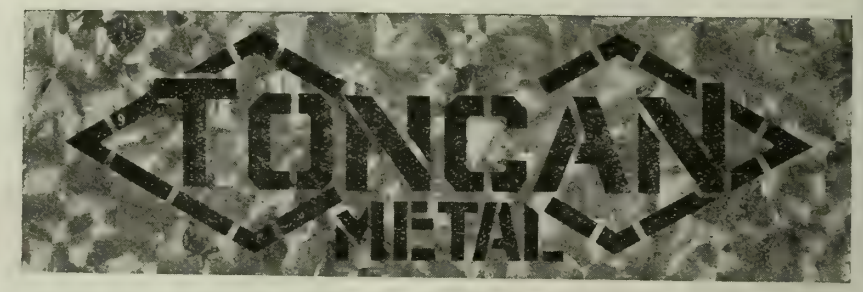
Architects Select Durable Material

At number Fifty East 42d Street, New York City, directly opposite the Grand Central Station, stands the newly erected Hecksher Bldg., a 25-story structure.

In an obscure and comparatively inaccessible part of the building are the ventilating ducts—an important factor in any building of this kind. To have them out of commission even for a few hours would mean considerable inconvenience and consequently the architects specified that they be made of Toncan Metal Sheets. This durable material assures against frequent replacements and repairs. It is rust and corrosion-resisting.

It is interesting to note the consideration which is being given to the sheet metal in building construction to-day, regardless of where it is used and the amount required. In former years it was not uncommon for an architect to specify merely "galvanized sheets" or use some equally as ambiguous phrase. To-day the discriminating architect specifies sheet metal by name, as in this instance—Toncan Metal. This practice prevents the use of short-lived sheet metal.

Hecksher Bldg., New York City.



Resists Corrosion

The Pedlar People, Limited, Oshawa, Ont., Canadian Distributors.
The Stark Rolling Mill Company, Canton, Ohio, Sole Makers.

ONE WEEK VERSUS FOUR WEEKS

Why More Time is Required for Making Toncan Metal Sheets

It requires at least four weeks to make a Toncan Metal Sheet, while an ordinary metal sheet can be made within one week. Is it any wonder, then, that Toncan Metal is so durable?

In making Toncan Metal Sheets every detail is carefully watched; nothing is slighted. To begin with, the iron ore for Toncan Metal is carefully selected—not from any one mine, but the most desirable ores from mines all over the country are used.

Special furnaces and appliances are used and special crews of men make it—men who have had years' experience in sheet metal making only are intrusted with the various processes.

To reduce the impurities it is necessary to permit the molten metal to remain in the furnaces at least one-third longer than steel sheets and at a very high temperature. This is costly because the terrific and prolonged heat destroys the furnace linings and makes frequent replacements necessary.

Analyses are constantly made at different stages of production to insure uniformity and the desired degree of purity.

And finally, rigid inspection of the finished sheets prevents the possibility of shipping any Toncan Metal which is not up to the standard of quality.

The result is what might truly be termed a perfect metal sheet—a material that has been known to outlast other sheet metals made from iron ore about 400%.

HERE'S WHAT TWO USERS SAY

Toncan Metal Withstands Unusually Severe Conditions

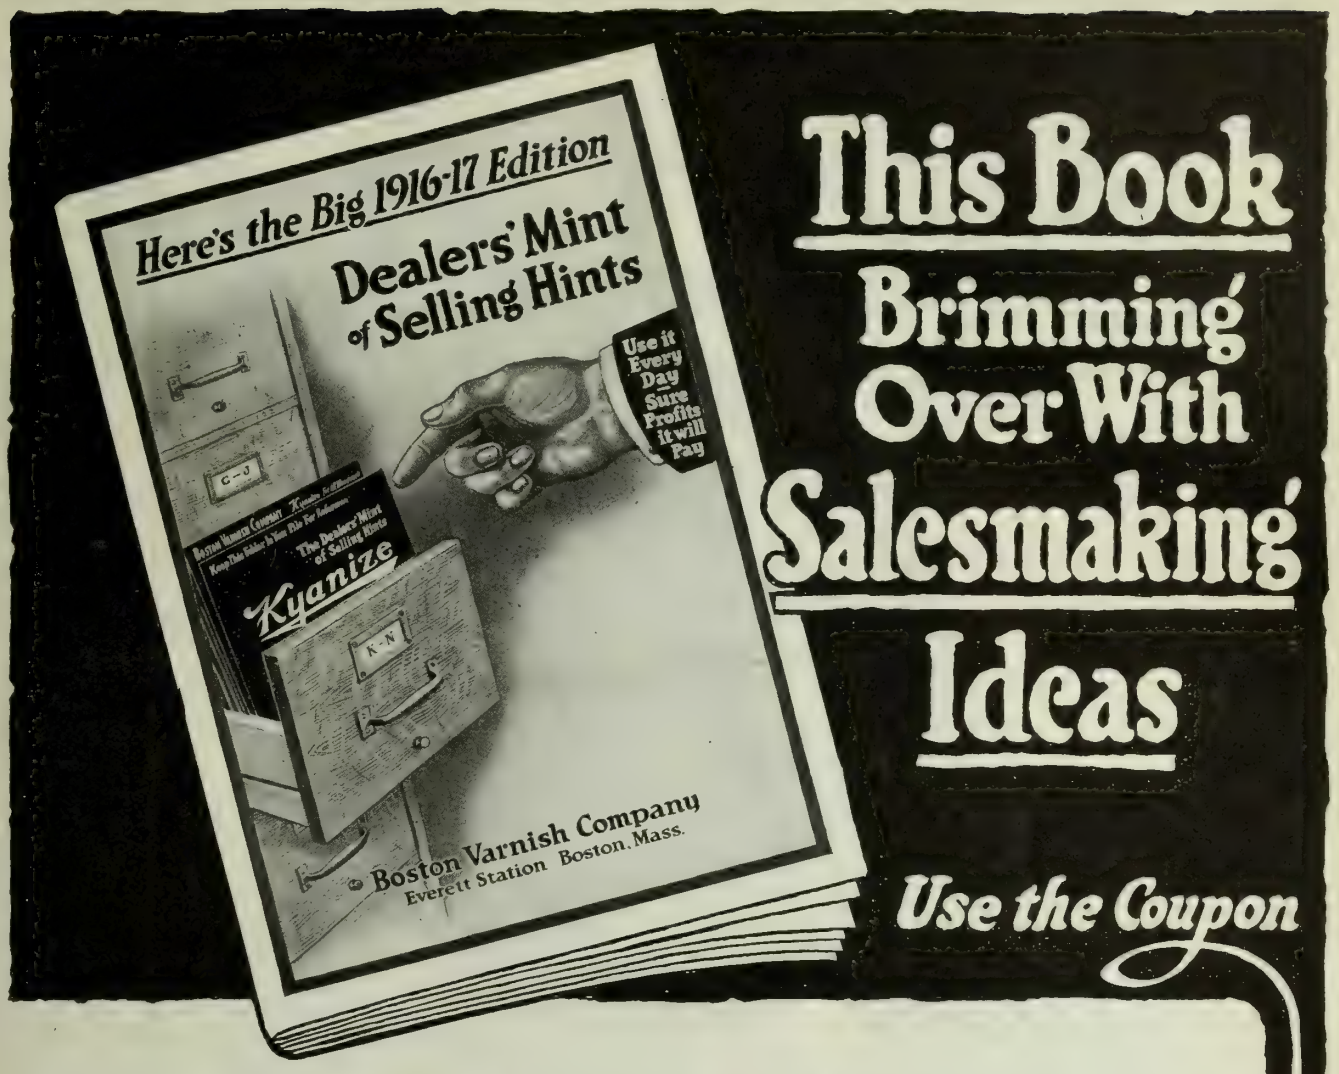
The following letter from Mr. E. T. Trego, Treas., Hoopeston Canning Co., Hoopeston, Ill., is dated March 15, 1916:

> "Replying to yours of the 9th, the buildings which we constructed in 1911 and on which we used your Toncan Metal Roofing and Siding, so far as we can tell, are in just as good shape to-day as when built. We have never found any Galvanized Iron that would compare with it."

Mr. A. LaCourse, Supt. of the Pierce Glass Co., Hamburg, N.Y., writes under date of March 28, 1916:

> "In reply to yours of the 25th, we are not in the market for corrugated iron at this time. We used your Toncan Metal some five years ago and to date it has withstood the conditions admirably. Most of it has not even been painted since putting on. We feel well satisfied with your material and should we at any time be in the market we will gladly communicate further with you."

These letters are reproduced here for only one purpose and that is to help the sheet metal man determine within a few minutes what might otherwise require months or perhaps years to learn. These letters are only two of many hundred received. Evidence of this kind is conclusive. It cannot be disputed.



The Dealer's Mint *of* Selling Hints

has always figured largely in the success of Kyanize Agents.

But the *Big, new* 1916-1917 *Edition* is miles ahead of anything you've seen before. It is richer and meatier in those specific sales and business-building ideas that show the way to increased profits.

A copy should be in the hands of every Kyanize Agent. It will never fail you.

Whether it's a new sales stunt you're looking for—whether it's a fresh suggestion for window, counter or store display—whether it's a used and proved plan for undermining local competition of any sort—*"The Dealer's Mint of Selling Hints"* contains the answer.

If you have not received your copy—send for it. You will want to read it—and study it. You will want your salespeople to read it. It should always be handy to your immediate use.

IMPORTANT: We invite progressive Dealers everywhere to write for a free copy of "The Dealer's Mint of Selling Hints" and full particulars regarding the Kyanize Exclusive Agency Line—provided there is no Kyanize Agent in your territory. The coupon makes it easy for you to do this. We recommend its immediate use.

Big Ben

A *Westclox* Alarm

In Canada $3.50

A sky high material market, increased duty and war tax, have made it necessary to raise Big Ben's Canadian price to $3.50.

Big Ben set himself a big task. When material prices began to climb, he decided to absorb the increase as long as possible. Everything he used advanced, but the economy of larger output, and shop savings here and there enabled him to hold his price and maintain his quality.

He couldn't overcome added duty and war tax. His loyal friends in Canada could not absorb a greater increase in cost, so he raised his price fifty cents.

In every Big Ben advertisement appearing in Canada and the States, the $3.50 price is quoted.

Since November tenth all Big Ben shipped from the factory have been fitted with $3.50 tags.

Dealers who have Big Ben in stock may secure $3.50 tags from our Toronto Office, 58-64 Wellington St. W.

Big Ben has done his share. He's notified the public, he's changed his price ticket, he's made it easy for you to standardize the new price.

Big Ben is oversold. Deliveries are slow. The new price is easy to get.

Methods of Charging Interest

How Merchants Have Succeeded in Putting the Idea Into Practice — A Further Discussion of the Legal Side of the Problem — One Hardwareman Has Never Been Able to Collect More Than 5 Per Cent.

THE question of the legality of charging interest on accounts, dealt with in the last issue by Walter E. Lear, is proving one of the most interesting that has been introduced in some time. Mr. Lear's article cleared away any doubt that may have existed as to the legal right of the merchant to charge interest on book accounts. He can do so within the certain limits outlined.

Opinions and communications on the subject have sifted in from various sources. One deduction is to be drawn—that practically all business men are convinced of the justice of demanding interest. A still more interesting fact is that more hardwaremen are putting the idea into actual practice than might have been supposed. A visitor in the office of HARDWARE AND METAL one day this week, a successful hardwareman located in a small Ontario town, was discussing the problem. He vouchsafed the information that he had been rigidly charging interest for years.

"As soon as an account exceeds the month," he explained, "I start to add interest to it. I reckon it at 5 per cent."

"Do your customers object?" he was asked.

"Quite a number did at first. Some do still. I lost business that way, and perhaps lose some still, but whatever losses I sustained were more than made up by the advantages of the system."

"Did it induce customers to settle up more promptly?"

"It most decidedly did. The bulk of unpaid accounts has been reduced."

It is worth noting that this merchant depends to a very great extent on farm trade. One of the objections most frequently voiced against charging interest on accounts is that the farmer, who often has to be carried for months, would at once desert the hardwareman who attempted to add on interest.

The Long Account Customer

A Western hardwareman writes that he does 80 per cent. of his trade with farmers, and that a great many of his customers pay either half-yearly or yearly. "My trade would dwindle to nothing," he adds, "if I attempted to charge them interest over that length of time."

Unquestionably he is right. In such cases the farmer buys goods on the understanding that he is to pay at a regular stipulated time which might be three or six or eight months. The dealer is justified; nay, he is compelled, to fix his prices to make this possible. It would be a different case, however, if Lemuel Lethbridge, who was due to square up for his half-yearly purchases on Oct. 1, neglected to pay until Feb. 1. In all reason it would be within the right of the dealer to charge him interest on the amount for the period between October 1 and February 1.

The Legal Rate

A question bearing on the legal rate of interest was sent in by a subscriber and referred to Mr. Lear. The question and his answer are appended.

Question.—"I read your article in HARDWARE AND METAL, on 'Interest on Merchants' Accounts.' I have never been able to collect more than 5 per cent. on my book accounts no matter what agreement I made with my customer. I once took a note from a customer at 7 per cent., but when I sued to recover on the note, the Judge only allowed me 5 per cent."

Answer.—This is not a question but a fact stated. I have no doubt that what you say is correct, but that does not change my opinion expressed in the article referred to. The law, as there stated, is perfectly good law, notwithstanding the truth of the fact stated. There may have been many reasons why you have never been able to collect more than 5 per cent. One reason may have been that your note was overdue when you sued upon it and the judge only allowed you 5 per cent. on the note from the time it became due until the time when he gave you judgment. This is all that he could allow you on an overdue note unless the note were drawn with interest payable at 7 per cent. "as well after as before maturity." This was most likely your case.

I might mention in passing that there are other cases where a judge might not allow more than 5 per cent. on merchants' accounts. Our courts are courts of justice as well as courts of law, and if a judge considers that an undue advantage has been taken by a merchant over his customer, the Judge has the right to open up the account rendered by the merchant and take it over again. In such a case the judge will act as a sort of an auditor for the customer and will allow only so much of the account as he considers to be just.

I cannot tell you why you have not been able to collect more than 5 per cent., but that does not effect the soundness of the law as laid down in the article referred to. There must be something wrong in your procedure. You had better consult a solicitor. Tell him all the facts of how you go about it and he will show you where you have been wrong.

The Steel Industry After the War

A General Review of Conditions—Brisk Competition Between Britain and the U. S. Anticipated—Where Canada Will Stand—The Prospects in Regard to Prices.

STEEL is the primary industry and any discussion of conditions after the war hinges on the outlook in iron and steel. The eyes of the business world are closely focused on the steel market, which holds the answer, therefore, to the ever-present question: What will happen when peace is declared?

It goes without saying that the steel industry will continue its present almost feverish activity as long as the war continues. Despite the fact that statistics of British imports and exports show a large diminution in exports the fact remains that the total production of iron and steel in Great Britain has advanced materially. Nearly all the steel made in the Mother Country is for war purposes, the bulk of the exports being to the Allies. The steel producing capacity of Britain will be taxed to the utmost to meet war needs. In the United States there is now a greater shortage of basic materials than at any time since the war started; that is in the materials needed by the finishing plants such as steel bullets, rods, tubing, sheet bars etc. Market prices in the U.S. are firmer and the products of the mills are being contracted for as far into the future, as eighteen months. Authorities state that the only reason why most American mills have not sold their product up well into the year 1918 is their reluctance to contracting so far ahead in view of uncertainty of supplies.

It is unnecessary to add anything with reference to the steel industry in Canada. Conditions in Britain and the United States are closely reflected here. It seems certain, in fact, that an era of still greater activity for Canada has been ushered in with the placing of vastly increased munition orders with Canadian firms. Certainly as long as the need for war materials holds the steel industry of Canada will continue production at the height of its capacity.

Prospects for the Future

This activity will probably continue on its own impetus for some months after peace is declared. Contracts will have to be finished up. Ships sunk or damaged during the course of hostilities will have to be replaced or refitted so that the demand from the naval side will be sufficient to lend a healthy feeling. Then the problem of

converting plants back for peace purposes again will have to be faced immediately and this in itself will mean a great activity for some time at least. But the real problem begins at the point where the industry has readjusted itself and is prepared to take up the task of meeting the peace demands of the world.

What then?

Strong Competition Expected

Dealing with the question of after-war competition for the trade in iron, steel and engineering, the Sheffield correspondent of *The Economist* expresses the opinion that Britain will regain her recently lost supremacy in the exportation of steel and steel products. Three entries are named in the race for this trade—America, Britain and Germany. Britain, it is pointed out, is dependent on exportation to even a greater extent than America or Germany, which are great agricultural countries. The outlook for competition with the latter nation is first dealt with. The increasing part that Germany was playing in the export steel trade prior to the war is admitted. The exportation of 800,000 tons of iron and steel in 1900 having risen to 6,000,000 tons in the last twelve months prior to August, 1914, while in the same period British exports had only increased from 3,300,000 tons to 5,000,000 tons.

The opinion is expressed by this correspondent that one result of the war will be to change the character of German competition. In this connection it is pointed out that the very mainspring of German competition before the war was the subsidizing of exports. After the war it is felt that German finances will be too depleted to permit of anything like the old subsidizing and bounty-feeding of exports while colossal losses in men should make a big difference in productive power.

The great competition is, therefore, expected to be between Britain and America. In this connection the writer says:—

> It is, therefore, quite possible that the world will only have two really great manufacturing countries to draw upon for steel goods for some years after the war. Germany will be at least partially crippled and penalized and boycotted. But there remains the question of American competition. Now, the natural resources of the United States are, of course, enormous. The country's coal and iron reserves are almost infinitely greater than ours. The American iron and steel works capacity is nearly four times as great as that of Britain. The American workmen give a larger output per man, or machine, than ours do. But in the last 15 years before the war we exported nearly a sovereign's worth of iron and steel for every dollar's worth exported by the Americans. Huge works in the States were often kept idle whilst we and the Germans, between us, took the bulk of the world's export trade. In their own protected home market, with its one hundred million of people, the United States iron and steel makers could sell between 20,000,000 and 30,000,000 tons of products a year; but their export business only amounted to between 1,000,000 and 2,000,000 tons a year, against Britain's exports, during late years, of between 4,000,000 and 5,000,000 tons, and Germany's 4,000,000 to 6,000,000 tons a year. The fact was that both Britain and Germany could sell cheaper than the Americans in neutral markets. But can we, after the war, produce and ship steel goods cheaper than the Americans?
>
> The danger to us is that our costs may be so enhanced by the war that they will be higher even than those of America. American costs are high because in the United States a distance of about a thousand miles separates the coal from the iron ore, because another 400 or 500 miles separate the steel works from the shipping ports, and because wages and salaries are high. In our country we hold a unique advantage in having our raw material supplies, our manufacturing plants, and our shipping ports all practically side by side. In any case we need not fear that the Americans will ever attempt to undersell us by means of export bounties and subsidies, as the Germans did. The probability is that the bulk of an enormous export trade in iron, steel, and engineering products will stand to be shared between Britain and the United States, at highly profitable prices. Our works will be taxed to their uttermost capacity, with the overflow of orders going to America. Though we shall be burdened with war taxation, it is highly likely that this new handicap will be offset by improved industrial efficiency, and that we shall still be able to produce and ship more cheaply than our American rivals.

The Situation in Canada

The future of the steel industry in Canada is fraught with considerable uncertainty as the war has brought about

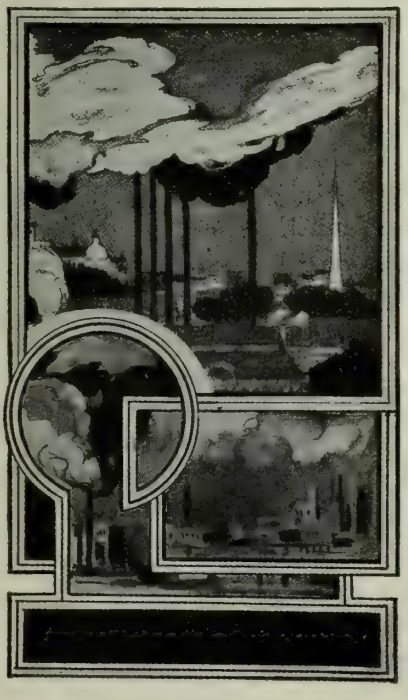
a considerable increase in our facilities for production. It seems certain that our present facilities are greater than will be needed to satisfy home consumption and that, therefore, when the business of making shells ends, it will be necessary for the Canadian mills to find a market elsewhere for the surplus. It will depend, therefore, on the ability and initiative of the manufacturer. If he rises to his opportunity and wins a place in the world's markets, the future of the steel industry in Canada will far transcend past records. Maintenance of the growth forced by war would mean a steady continuance of the very evident prosperity of the present.

As To Prices

A very important problem also is that of the probable trend of prices after the war. There will undoubtedly be a readjustment and buyers to-day are watching this end very closely. Only a very wise man or a very foolish one would hazard a positive opinion as to what will happen in regard to prices; but some men recognized as authorities have expressed opinions that are well worthy of careful consideration. For instances Thomas Oliver, president of Oliver Bros. Inc. writes in Iron Age as follows:

"We must made due allowances for a readjustment of values at the end of the war, yet we scarcely anticipate any radical decline in the prices of iron and steel products, and while we look forward to a substantial decline in the market prices of metals such as copper spelter, lead and antimony, we do not anticipate any such prices as those ruling in 1914, at least not for years to come, for if copper, for instance, should decline to 18 or 20 cents per lb., the decline will be radical as compared with the prevailing market prices, yet the advance very substantial as compared with the 1914 prices.

"In conclusion, we have the impression that the wholesalers of iron, steel, hardware and kindred supplies have several years of uninterrupted prosperity ahead of them, and that they will experience an agreeable surprise when they balance off their year's business following the end of the war, if they are reasonable enough to make comparisons between the profits obtained in normal times, before the war and after the war, rather than the abnormally great profits realized during the war, and provided they have priced their inventories during war times at their lowest purchase prices, rather than marking them up to the prevailing market prices, and we are quite sure that there are few, if any, jobbers among our clients who are doing this.



Exhibits at the Convention

In the Jan. 13 issue of HARDWARE AND METAL, it was stated that arrangements were being made to hold exhibits in connection with the convention of the Retail Hardware and Stove Dealers' Association to be held in Hamilton, February 20-21-22. An official notice in connection with the matter has been sent out by Secretary Macpherson of the O. R. H. & S. D. A. as follows:—

"Dear Sirs:

A number of manufacturers have expressed the desire to make an exhibit of their goods in connection with the annual Convention of the O. R. H. & S. D. A. to be held at the Royal Connaught Hotel, Hamilton, February 20th to 22nd.

In consideration of these requests, the Advisory Committee passed a resolution on behalf of the Association, promising official recognition of exhibitors who make due application for the privilege, enclosing a nominal fee of $10.00, the names of such exhibitors to be posted in the Convention Hall and recommended to the consideration of the members of the Association. A printed list of exhibitors and the location of exhibits will be given each member. Arrangements for display room to be made with the hotel management.

The opinion was expressed by a manufacturer that a semi-private exhibit would be more conductive to business getting than an expensive public exhibit.

There will be ample accommodation of the very best kind at the Hotel Connaught.

Should you wish to make an exhibit, kindly advise me.

Yours truly,

W. F. Macpherson,

Secretary.

P.S. The fee mentioned will include Association membership for those in charge of the exhibits."

NICHOLLS APPOINTED SENATOR.

Frederic Nicholls, one of the newly appointed Senators, is said to be the largest iron master in Canada and probably one of the largest in the world.

SENATOR NICHOLLS.

identified as he is with the Canada General Electric Co., the Canada Foundry Co., the Dominion Shell Corporation, and many other kindred enterprises.

He was one of the pioneers of electric development, and organized the first company in Canada, the Toronto Incandescent Electric Light Company. In all his undertakings he has shown himself a man of skill, courage and enterprise. He has many other interests. For seven years he was secretary of the Canadian Manufacturers' Association and founded the "Canadian Manufacturer," of which he was editor and proprietor until 1893.

He is consul for Portugal, life-member of the Board of Trade and Honorary member of the Canadian Press Association. In 1902 he presented a new Convocation hall, skating and hockey rink to Ridley College, St. Catharines, and in 1904, $25,000 to the funds of Trinity College, Toronto. Since the war began his energies have found a new opening in patriotic work. He is a member of the executive committee of the General Council of the Canadian Patriotic Fund; chairman of the executive committee of the Toronto branch of the Canadian Red Cross Society, and president of the Toronto Municipal Loan Association, a society formed to relieve distress.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXIX. TORONTO, JANUARY 27, 1917 No. 4

A FEW weeks more of winter—and then the spring campaign!

* * *

THEY can put the "To Let" sign up in the Tribunal at the Hague again.

* * *

IT IS easier to beat a plowshare into a sword than to beat the sword back into a plowshare.

* * *

IT IS FITTING that the food problem in Germany should have been taken up by the Prussian Diet.

* * *

PRESIDENT WILSON says it must be a peace without victory. President Wilson thus puts himself on record as the world's worst guesser.

* * *

THE hardware buyer used to need nothing more than a level head and a lead pencil. Now he needs, in addition, a telescope.

* * *

BUYERS, watching the trend of prices should remember the slogan of the Cousin Egbert Club—"They can be shoved just so far."

* * *

THE grocer, who is bearing the brunt of the popular storm against the high cost of living, has the sympathy of merchants in all other lines.

* * *

THE UNITED States is coining new half dollars with brand new designs. Everyone agrees, however, that they are only about half as pretty as the dollar coins.

* * *

A CERTAIN general merchant writes in to say that "the recruiting sergeants step in as soon as he has got a new clerk broken in." We are afraid he must get along without editorial sympathy.

* * *

THE charge of extravagance against Canada can be understood in view of the fact that some people, men and women alike, who never earned more than $2 a day before can now make $8 and $10 a day.

* * *

THE United States Department of Agriculture has just announced the value of all crops grown in the country this year. They aggregate $8,934,587,000. That is an increase of $2,165,989,000 over the crop of last year and about the same increase over the average for the past five years. It would not seem from this that the United States citizens are at the point of starvation. Why then the stress laid on the "Feed America First" campaign?

OUR WESTERN SERVICE

IF any Western reader of HARDWARE AND METAL has doubted the value of the market service given, from his individual standpoint, the events of the last few weeks which are brought to a head in this week's Winnipeg report, will prove an effectual answer. For some weeks, HARDWARE AND METAL'S Winnipeg editor has been predicting that price changes would occur in many lines as soon as stock-taking was completed. A long list of changes appears in this week's report. Look it over and you will find that practically all the changes have been specifically predicted at some time during the past few weeks. This is the kind of service that the hardwareman needs.

There is still another point that the Western reader should consider. The changes given out in Winnipeg this week have, for the most part, been in force at Eastern points for some time and have been duly recorded in the Montreal, Toronto and London market reports. The trend in hardware prices is from East to West; and the dealer who follows the reports from Eastern centres will gain a shrewd idea of what is likely to happen in his own locality. HARDWARE AND METAL'S market service is, therefore, double-pronged, so far as the Western fields are concerned.

CHARGING INTEREST ON ACCOUNTS

NO topics come closer home to the merchant than the matter of charging interest on accounts. The fortunate few who are so placed that they do business on a cash basis—or, as some would say, the *courageous* few who have taken the plunge—know nothing of the harrowing cases of credit. The retail merchant who has, say, five thousand dollars on his books—plenty have more than that—finds that the matter of making collections is his greatest care and he often thinks almost longingly of the one solution —the charging of interest. But, as a general rule, he hesitates from adopting this expedient. He fears to offend his customers.

Many merchants, however, do charge interest. HARDWARE AND METAL has heard from a number of them since the publication of the article last week on the legal phases of the question. These retailers make it clear to time customers that, if payment is not made as agreed, interest will be added; and they do not find that they lose business on that account. A number of merchants have been doing this for years and have found that it has solved for them the vexed question of prolonged credit.

HARDWARE AND METAL does not feel that it would be safe for all merchants to adopt the plan. Certainly, however, the idea is worth consideration and, as a start to serious study of the question, the legal discussion in the present issue should be followed closely.

THE REALITY OF MATT

IS Matt Horton real? Are his experiences, as recounted by Mr. Kirkwood, actual occurrences? These questions have been asked by readers of HARDWARE AND METAL since the start of the interesting series of stories dealing with Horton's business building methods.

No, Matt Horton is not real; not to the extent of it being possible to go out to a certain hardware store and point out the proprietor as the original Matthew. But one could travel from one end of the country to the other and find bits of him here, there and yonder. Matt Horton is composite. He is the result of ideas that the author has picked up from various sources in the course of his study of merchandising conditions. Matt is, in a sense, an ideal—the more or less perfect hardwareman in fact. It is not intended to imply that any dealer could model himself exactly on Horton lines and attempt to follow out all the plans of the versatile Matthew. He is used as a convenient medium for the discussion of methods, some of which should appeal to every dealer according to the scope and circumstance of his business.

Matt is serving another valuable purpose; he is the source of inspiration for a series of articles entertaining and readable in the extreme. The editor recommends him absolutely on that score.

But Matt is not real. He is, we fear, too good to be true. But, real or not, he's a "humdinger" on ideas,—all of them worth thinking over, anyway.

MERCHANTS GET TOGETHER

AN extremely interesting manifesto has been issued by the merchants of Rapid City, Manitoba. It was compiled after a series of meetings and published in the local newspaper over the signatures of twelve merchants, probably all of the responsible business men in the place. It reads, in part, as follows:

> After holding a number of business men's meetings and thoroughly discussing the credit end of the retail business, we have come to the following conclusion: That the terms of credit must be greatly shortened, or cut out altogether and we must sell for cash only. Under the present system the retail merchant has to bear the whole burden of financing his business and at the same time carry a large number of open accounts, many of which are not even paid in the fall. Under the present condition of the market we find it impossible to continue doing business along these lines. In the first place the manufacturer is forced to pay cash for his raw material; he in turn demands cash from the wholesaler for the manufactured article, and the wholesaler in his turn demands cash, or at least a very short term of credit, from the retailers.
>
> Now, if we continue to do a credit business along the old lines it means that we, the retail merchants, are carrying the whole load. We would like your co-operation. Think the matter over. Another letter will follow.

The only practical objection to the cash system—a very real one—has always been that unanimity of action could not be secured from all merchants in one centre. Jones, the hardwareman, has always been afraid to take the step because Smith, his competitor, would keep on in the old way and so steal any of Jones' customers who might become disgruntled; and, down the street, Robinson, the grocer is worrying himself into the grave over his book accounts but does not dare to step into the straight and narrow path of Cash for fear of what *his* competitors might do.

The experiment of the merchants of Rapid City is an interesting one. They are to be commended on the common sense they have shown in getting together to check this credit evil. Long may the same degree of amity continue.

And in the meantime the second letter will be awaited with keen expectancy.

THE BUSINESS OUTLOOK

THE situation in Canada, from a purely business standpoint, is unusually bright. It is not within the range of possibilities that Canada can be anything but highly, nay exuberantly, feverishly prosperous during 1917. The outstanding feature at the present time is the prospect of a larger volume of war orders for Canada. The peace proposals of the war-weary despot of Potsdam brought about the sudden scurrying of stock speculators to cover, which created such havoc on Wall Street; but back of the peace talk was a very tangible fact. John Bull had cancelled extensive orders placed in the United States for war supplies. This might mean either that Britain anticipated early peace or that it had been possible to so extend the munition manufacturing facilities of Great Britain and Canada that the bulk of British war needs could be supplied.

The latter explanation is the correct one. Great Britain does not anticipate an early cessation of hostilities. On the contrary John Bull is preparing to wage greater, grimmer war than ever before. But the organization of industrial resources has been improved to such an extent that an almost adequate supply of shells can be secured now from the workshops of Britain and Canada.

The prosperity that is coming to Canada this year as the result of the focusing of the wealth of an Empire on military needs, we must accept, not with personal complacency and smug realization of individual benefit, but purely with an eye to its later use in the more uncertain times following the declaration of peace. In this connection it must be noted in an admonitory mood that despite a million dollar increase in our exports for the year ending November over the year ending September, Canada's favorable balance of trade has fallen from $367,647,000 to $306,437,516 due, of course, to the increase in imports. This tendency began in October when a new upward movement in imports began and the favorable balance fell to about $335,000,000. This is in marked contrast with the advance in the favorable balance a year ago though, of course, this year the favorable balance is much higher than it was at that time. A point worth noting is that while exports of merchandise were only $109,588,950 for the month of November, 1916, against $94,436,093 in 1915, imports were $72,690,791 against only $45,217,559 a year ago. In one year imports have almost doubled and the advance has been very steady indeed.

Matt Horton, Trains His Salesmen

Matt Horton Multiplies the Power of His Salesmen—He Believes That Knowledge is Power—He Sends Them on Visits to Factories—He Has Conferences With Them—He Prepares Them to Leave Him

By John C. Kirkwood.

MY salesmen, the men I employ, serve many more customers than I do; and so I want them to be real salesmen. I want them to know the goods they are selling — as much about them as possible; and to be able to help the customer to decide when in doubt; and to be able to make a sale when the customer is hanging back, reluctant to make up his or her mind.

I have already said that I will not let my men urge customers to buy what they ought not to buy; but this is a different thing from urging customers to buy the thing they may want and that they should have, or the thing they don't want, yet should have.

My salesmen are under instructions not to try to sell every customer articles that belong to the luxury class, or that may be called, if bought, an extravagance; but I know of no good reason why the poorest of my customers should not have a washing machine—this by way of example. As I see it, a washing machine should be in every home; but silver trays and costly lamps, and some other lines I carry, are not for every home.

I take a lot of trouble with my salesmen, since I depend on them so much. They have chances that I have not to make sales and to make customers acquainted with new goods or lines that they ought to know about. So I coach them, and teach them, and stir them up to study.

Matt Hand-picks His Salesmen

Just here, I want to say that all my men are hand-picked. I satisfy myself as thoroughly as I can before engaging a man that he is going to give me the service desired, that he will grow, and that he is in earnest to make good. Any other sort of man is too expensive a man for me to have about the place. I will not have men working for me that are thinking more about things outside my business than about my business. One man I engaged got so much interested in church work that he thought church and worked church day and night. He lived for his evenings, when he could be attending church meetings or calling on the sick. And church people called on him during the day to talk over church affairs in my store and in my time. This man fagged himself out during his evenings; then he lived most intensely. In the daytime, in the store, he had no keenness for my work, but preferred to do dull chore work to serving customers. I pointed out to him that this sort of service would not do, but without any correction of his ways; and so I dropped him. I mention his case by way of illustration.

This is the third chapter in the story of Matt Horton, hardware dealer, and how he built up his business.

Matt shows himself to be possessed of unusual views and methods. He does not believe in being "it" all the time. And his ways enable him to get away from his business from time to time, with advantage to him and his business.

Matt's story, it is hoped, will take hold of some of his brethren and lead them to achieve more by attempting more.

The fourth chapter of the story of Matt Horton will appear in an early number of HARDWARE AND METAL.

Matt Meets His Salesmen After Hours

My salesmen and I have every week —every Monday, as a rule—an hour's conference. From September to May, our store closes at 6 o'clock; and our meeting follows promptly on the closing hour. Once a month I take my men to a hotel, and we have supper in a private room and have a longer session. I pay the shot, and try to make this little dinner a pleasant event.

The Monday conferences have to do with a variety of things. We talk over plans and experiences and store management. Also, we discuss ways by which we can increase the sales of a given article—paint, for example; or glass; or cutlery; or oil-stoves; or whatever line was soon to be seasonable.

At our monthly meetings we have papers on different subjects related to our business — these prepared by the men themselves; and talks on salesmanship and other subjects allied to store-keeping. I have my men prepare themselves to demonstrate the goods we sell. For example, one man prepared himself on the subject of stoves. He did this by studying closely the stove catalogues of various makers, finding out wherein one stove differed from another, wherein they were alike; what were the features of excellence, of novelty, of appeal, and so on. We did this also in respect to furnaces and hot water boilers; and I may mention that one important consequence of these investigations led us to seek the exclusive agency in our territory for a particular make of stoves, furnaces and hot-water boilers.

You can see the practical good of such an investigation. Every man in my employ became intelligently informed on the heating question, and became soundly "sold" on the lines we are agents for.

Matt's Salesmen Visit Factories

And similarly in regard to other things. I had one of our men dig into the question of silverware. He went to Toronto and went through the factory of the firm whose goods we favor, and learned there how flat and hollowware is made, how the silver is deposited, and so on. And what he saw and learned there was good for us all to know.

In the same way I had the man who looked after our tools visit some of the factories where the tools we sell are made.

I pursue this practice in regard to all lines, as much as possible; and at our conferences and dinners the men who visit the factories tell us about their visits.

Matt's Salesmen Inform Themselves

Just here I may say that before a man goes on his quest for first-hand knowledge, he is required to prepare himself beforehand by informing himself to the fullest extent possible—this by a study of catalogues, chiefly. Also, we have a series of standard questions, such as:—

Who, in Canada, make ——?

What are the claimed distinctions of the products of the various makers of ——?

What constitutes excellence in the product under consideration?

How is excellence achieved?

What are the common faults or shortcomings of the inferior article?

What are the raw materials and where do they come from?

You will see that any salesman who tries honestly to obtain answers to these questions is preparing himself to make a profitable visit to the factory where the product we sell is made; and will have his intelligence stimulated before-

hand. He will be intelligently inquisitive and promptly appreciative.

I ayways arrange beforehand with the manufacturer for his consent to have his factory visited by one of my men; and my man pays this visit at a time when he can be spared, with little disturbance to our business. In January, February, and March, for example, occur many days when business in the store is dull, by reason of stormy weather or bad roads, and because of the buying apathy that follows a busy December and autumn. Also, at other seasons, for special or local reasons, occur slack days, and it is such days that my men use to make their visits to factories. Of course, I pay all expenses, and my men are glad to make these visits, not only because they are agreeable outings, but because of the great personal profit there is in a visit to a factory.

You can see that it is needful for me to have good men to send on excursions of this sort—keen and intelligent men, and men who accept and meet fairly the responsibility such visits impose on them. My men recognize their debt to each other and to me, and seek to discharge this obligation. You can see, also, how my men grow in knowledge of the goods they are called upon to sell, how they have conviction themselves, how they are able to put enthusiasm in their sales talks; and earnestness and intelligence in their demonstrations.

"Pumping" Travelers

My men welcome the visits of the representatives of the firms from whom we buy goods, and ply them with questions; and I assure you that they ask many a question to which the jobbers' and manufacturers' representatives cannot always answer satisfactorily. But you can be sure that the next time these men call they have answers to the question which on a previous visit they had to throw up their hands, confessing, "I don't know."

Matt Trains His Men to Leave Him

I make it clear to my men that I want them to fit themselves to get into business for themselves some day; and to earn all they can; and my men see the point, and are eager to grow in knowledge and store-keeping ability.

I know employers who want to keep their men down and back. Well, as for me, I don't want any men in my employ willing to be kept down and back. I want men of ambition, men who will grow, and who will acquire an earning ability greater than can be adequately rewarded in my business. Men of this type earn, while they are with me, more than the salaries I pay them—this by real selling ability and enthusiasm. They back me up in all that I am doing and attempting, and this gives me freedom. If they were different—dead weights on my business, serving dully and perfunctorily—then I would not be as care-free as I am.

I expect my men to leave me soon or late. It is my business to make them able to leave me—to do more in a larger field and to earn more. More than one of my old employees has left me to become a traveler for a wholesale or manufacturing house—this as part of his process of education, looking forward to having a business of his own, modelled, I like to think, after the pattern of mine. Perhaps these graduates from my Hurston business may become manufacturers some day; but while I am interested in a sense in their future, my real interest in them is during the time they are with me.

I am not going to say that my interest in my men while they are with me is anything but selfish. I devote time to their education and advancement because it pays me handsomely to do so. I get back actual cash for all I do for them and cause them to do for me. Just as I try to make myself independent of them, so do I try to make them independent of me. I want men big potentially to serve me.

John Wanamaker, so I have heard, engages the best men he can find to manage his departments. I have hear it said that he pays these top men $12,000 a year or more—more money than they made (or can make, perhaps) when in business on their own account. In a humbler way, I follow the Wanamaker example: I try to get good men, and I pay them just as much as I honestly can.

Of course, I have junior men, youths, whom I expect to remain with me for several years. And they do remain with me, for they know that they are receiving a preparation better than most young fellows they know serving in other Hurston shops and stores. They recognize that they are getting a first-class schooling, and that there is promotion for them. I expect—and actually encourage—my senior men to attempt bigger things, in other fields — this when I think they are ready for something bigger and better than service with me. My men know this, and understand and trust me; and I help them in their quest for other employment.

Matt Tries to Make Himself Useless

I try to make myself useless in my business—this, of course, in measure. By this I mean that I want my business to be able to do without me for a time, should I leave it because of sickness or of desire. One year I went to Europe for two months, and did so confidently. Once or twice a year I go to New York, or Chicago; perhaps, also to other cities—not for "the sights," or the white lights, or the rest (?) they give, but to see the big stores there, to get the thrill of big business, to get inspirations.

(Continued on page 44.)

My men ply the representatives of the firms from whom we buy goods with questions.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

Features of the week in hardware markets have been considerable advances in the prices of bar iron and steel, horse shoes, wrought iron washers, axes, cow chains, shelf hardware and many miscellaneous lines. Cut nails have advanced 25c per keg, with further advances in sight. Ingot metals are firm in price, with slight advances recorded in some instances. The lead market continues firm, but with an improvement in the freight situation, prices are expected to ease up a little. Wholesalers and retailers have experienced great difficulty in securing shipments of goods, owing to embargoes placed on certain districts by the railways. Shipments from the United States have been very slow in arriving, and there is a scarcity of many lines of goods. Travellers are making the best of a trying situation created by the curtailment of the passenger train service. Travelers affected most are those working the smaller towns and cities. Business is seasonably good and the outlook for spring is very promising.

MONTREAL MARKETS

MONTREAL, Jan. 25.—Looking over the hardware and metal markets for the present week a tendency to steadiness is noted in regard to the metals, and a certain relaxation in the rush to augment prices in the line of smaller shelf goods at least. Nevertheless many changes are still to be recorded by the retailer concerned, and in the heavy goods there are changes and adjustments. Horseshoes have advanced, and chain is higher in price. Stanley goods are predicted in for a rise, and Sargeant goods also. Double-bitted axes will be found higher in price, now quoted $16 per dozen in Montreal. Cut nails are advanced. There has been noted a slight slackening of country trade owing, it is said, to the stock-taking operations of retail merchants, important business indeed for them in these days of many price changes.

Some Advances to Follow in Shelf Goods

SHELF GOODS. More hints of changes in price than actual changes are reported this week in Montreal as regards shelf goods. A tendency towards some reluctance to advance prices in any great hurry is noted on the part of wholesalers, as if the mere monotony of continually upward trending prices had grown wearisome. Some changes are nevertheless to be recorded.

Curry Combs, 10 Per Cent. on List

The advance on curry combs noted in the Toronto report last week is in full force also in Montreal, and there are hints that it is not the final advance either.

Iron Washers 10 Per Cent. Off List

Iron washers also are up in price this week. They used to be priced subject to 20 per cent. off list. Now the price is subject to 10 per cent. off list.

Cellar Window Bolts Up

Cellar window bolts, Nos. 1076 and 1078, are advanced in price this week. Though this line has been in rather slow market for some time, it is as well for retailers to note that there is a 10 per cent. advance on prices now.

Maydole Hammers Advance

Maydole hammers have advanced this week in line with other hammers which increased last week. The advance is a general one of 10 per cent.; in fact, rather over ten per cent. than under that figure, and with chances in favor of further advances.

Sandpaper in for an Advance

Sandpaper is in for another advance, due to the high cost of raw materials. The extent of the advance is not yet estimated closely, but it will be about 5 or 10 per cent. Sandpaper has had one or two advances within recent memory.

Stanley Tools to Increase

Not actualized as yet, but very much predicted, is a forthcoming increase in Stanley lines of tools. This is a natural increase and not unexpected considering cost of steel and iron.

Sargeant Goods Also to Rise

An advance in price has been predicted also in trade circles as regards Sargeant goods, and new prices will probably be made known before long.

Cattle Chains Advance

Cattle chains have advanced by about ten or fifteen per cent. this week, the advance taking the form of an alteration of discount to 25 per cent. off list.

Trace Chains Also Up

The same advance also affects trace chains, which are subject to a similar discount figure, 25 per cent. off.

Moore's Pushpins Advance

There is an advance to record in Moore's pushpins. The packets of these formerly sold to the trade at three for 25c, are now priced 10c each. This applies to all the various sizes and patterns of these pushpins.

Padlocks and Night Latches Up

The advance noted last week in padlocks and night latches is now general as regards the imported goods. Besides the Corbin padlocks and night latches, Miller (Philadelphia) locks and latches have advanced by fully ten per cent.

Wood Screws Very Scarce

There is a marked scarcity of wood screws at present, though prices have not so far altered. The possibility of an increase in price in this line is not lost sight of, though not actually predicted definitely.

Files in Freer Supply

Slightly better supplies of files have been noted by large firms of wholesalers in Montreal this week, but the scarcity is still very marked, also their firmness in price tone at present and prospectively.

Maple Tapping Bits in Demand

There is a demand as usual at this time of year for maple tapping bits, and these are advanced about 10 per cent. in general.

Paper Bags Advance

Attention of the retailer of hardware is called by one large firm of wholesalers in Montreal to the fact that paper bags have advanced, the discount being now 5 per cent. off list. This represents quite

a considerable advance, and perhaps not the last in this line, economy in wrapping material is enjoined.

Ammunition Demand Opening

Some opening demand for ammunition supplies under the new list conditions mentioned in recent reports, is noted by wholesalers in Montreal this week. The demand is so far not brisk. As will be recalled, prices have not been advanced by the new Winchester and Remington lists issued, but advances are not at all improbable in view of conditions.

Double Bitted Axes Go Up

Double-bitted axes are now priced $16 a dozen in Montreal, instead of the previous $14 per dozen.

Iron and Steel Are All Firmness Itself

IRON AND STEEL.—Conditions as regards iron and steel remain unaltered from last week's extreme firmness. There are no quotations available for domestic pig iron at present, prices having been withdrawn some time ago, and no new quotations having followed. About $40 per ton is the nominal figure used in reference to pig iron market conditions in Montreal at present. New York prices are also used to guide along this line. These are for No. 2 foundry, $32.75 f.o.b. New York, and for No. 2 plain, $32.50 f.o.b New York But pig iron is in a peculiar condition of market all its own at present. New prices were given last week on various marketable forms of iron and steel, and these maintain unaltered this week, and as given in current quotations.

Cut Nails Have Gone Up to New Base Price

WIRE NAILS, ETC.—The condition of market for nails of all kinds is very firm indeed at present owing to the extremely firm condition as regards iron and steel. The base price at present in Montreal is $4.75 for standard steel wire nails, but there are prospects of advances in the future.

Cut Nails Have Advanced

An advance is recorded over previous base price of cut nails. The new base price ruling this week in Montreal is $4.50, an advance of 25c; not perhaps the last, not perhaps by any means the last.

Horseshoes Have Advanced 50 Cents

HORSESHOES.—Fifty cents per keg of 100 lbs. is the advance recorded in all lines of horseshoes for the present week. This is only to be expected with iron and steel at their present prices, and an advance as noted in last week's report. One firm quotes as follows:

Ordinary Horseshoes

Light, medium, and heavy ordinary horseshoes are priced for No. 2 or larger $4.70 per 100 pounds; for No. 1 or smaller, $4.95 per 100 pounds.

Snow Pattern Shoes

The same firm's "snow pattern" horseshoes are quoted at: For No. 2 or larger, $4.95 per 100 lbs.; for No. 1 or smaller, $5.20 per 100 lbs.

Steel Horseshoes

Steel horseshoes are quoted at: No. 2 or larger, $5.15 per 100 lbs.; No. 1 or smaller, $5.40 per 100 lbs.

Feather and Toe Weight

Feather and toe weight horseshoes are quoted at $6.55 per 100 lbs., all sizes, and $7.55 per 100 lbs. respectively.

An Advance in Chain And More Expected

CHAIN.—Advances were put into effect for chain this week, and prices are as follows for fire-welded or "proof coil" chain, per 100 lbs.:—7/16s, $7.65; ½-inch, $7.45; ⅝ths, $7.25; ¾ths, $7.15; ⅞ths, $7; 1 inch, $6.85.

BBB chain is priced as follows:—¼ in., $13; 5/16ths, $11.10; ⅜ths, $10.30; 7/16ths, $10.05; ½ inch, $9.85; ⅝ths, $9.65; ¾ths, $9.50; ⅞ths, $9.35; 1 inch, $9.20.

It is expected that a further advance or advances will be noted in chain before long if the conditions as regards iron and steel continue on their present firm trend.

Sheets and Plates Are in Firm Market

SHEETS, PLATES, ETC.—The demand for galvanized plates is very strong, and supplies are none too plentiful, but prices remain for the present week as quoted in current quotations. The market for Canada plates is about at the end of its period of notable activity, supplies having arrived just too late to help much. Prices are as quoted in current quotations, and still to be regarded as nominal since the arrivals mentioned were more for firms requiring these for manufacturing purposes than for general market. What galvanized sheets may do in the near future is not subject for safe prediction at present in some good market opinion, though conditions look exceedingly firm. Current quotations cover prices on these as at present. It was stated by a firm using large quantities of tin and terne plate for making maple syrup buckets that there had been a slight reduction in prices of 20 x 28 x 200-lb. tinplate to $14 per case, and of terne plate, 20 x 28 x 216 to $15 per box. These plates are now in special demand for the season.

Ingot Metals All In Firm, Steady Market

INGOT METALS.—The market for the metals one and all, as in demand at all in Montreal, is subject this week to difficulties due to transportation trouble, and supplies of all the metals are not to be obtained in a hurry. Prices are rather steadier at present.

Copper Fluctuating

COPPER.—Firmer in tone from some directions, reported easier in other quarters, copper found market at prices as quoted last week, or in some cases about 2c a pound higher. Quotations varied from $35 to $36.

Pig Lead is Firm

PIG LEAD.—Firmness of market characterized pig lead, but prices quoted were not very even, as while some merchants were able to quote $7.75 for pig lead f.o.b. Montreal in bond, others quoted $10.25 to $10.50, and in the paint trade, pig lead was quoted about $9.60. The market was quiet as regards demand.

Tin Firm and Upward Tone

TIN.—The market for tin showed firmness and the upward tone rather markedly, with prices quoted as last week, viz., $49 to $49.50 (one metal merchant quoted $45 for tin). Stocks were reported low, and supplies slow in coming forward.

Spelter Firm

SPELTER.—Spelter was reported to be firm in market, at prices as quoted last week, viz., $15 and $15.25. Deliveries were not prompt to meet requirements in spelter, and stocks are rather low in Montreal.

Antimony Unchanged

ANTIMONY.—Unchanged at $18, antimony was in quiet market, with small demand recorded. This metal has been keeping very steady of late.

Aluminum Also Steady

ALUMINUM.—The characteristic of steadiness affects the market for aluminum, which is quoted at $68, and is not in marked demand.

Sheet Zinc Unchanged

SHEET ZINC.—Sheet zinc is unchanged at $25 to $25.50 per 100 lbs., and demand for this form of the metal is not marked by any special point of note except a fair heaviness.

Roofing Caps Advance

An advance is noted in roofing caps by one important firm in Montreal. The prices quoted are for a barrel lot, $4.50, and for less than a barrel lot, $5.50.

TORONTO MARKETS

TORONTO, Jan. 26. — Perhaps the most serious situation in the hardware trade at the present time is the matter of freight shipments. Wholesalers are at a loss to know where they are when it comes to dependability on the carrier roads. Embargoes on different districts are frequent. They never know what district may have an embargo until they have occasion to ship goods to that district. They often receive the disquieting information that goods cannot be shipped to a particular district. These embargoes are raised in time, but it necessitates slow delivery and the retailer is usually the one who feels it. The same holds true with respect to goods being received by the wholesalers from the manufacturer. This has been particularly noticeable in goods coming from the United States. In spite of these difficulties business during the week has continued very good. There have been a number of prices changes during the week, some of the more notable being in skate lines, cut nails, sandpaper and emery cloth, iron washers, padlocks, hammers, horse clippers and oakum. Linseed oil is in firm market and advances are looked for. New prices on arsenate of lead have been announced. There is very little difference from prices that have been recently quoted. In some instances there is a slight advance while in others the price has remained practically stationary.

PEACE PROPOSALS—FROM "HUMOR IN THE ROYAL NAVY."

New Skate List Has Been Issued by Makers

SKATES.—A new list issued by the Starr Manufacturing Company of Dartmouth, N.S., provides for a revision on all lines of skates manufactured by that company. The list prices have been changed, together with the discount. Where formerly the discount was 20 per cent. off list it is now 30 per cent. off the new list. The advance on the previous list prices is approximately 15 per cent., but with the changing of the discount the actual advance has not been of any considerable amount. For instance, on the Scotia with the old list and 20 per cent. discount the selling price would be $2.24, while with the new list and discount of 30 per cent. the selling price would be $2.27½. In the spring-skates there has been an advance, however. In one line that formerly sold for 80c pair the price is now 91c. Other lines of spring-skates make a proportionate increase. New list prices will be found in the current quotations. The new prices will not materially affect the trade in skates this season as the bulk of the business is over for the season.

Sandpaper and Emery Cloth Advance 20%

SANDPAPER, EMERY CLOTH.—An advance of 20 per cent. has been made in the price of sandpaper and emery cloth. The new price is now at an advance of 25 per cent. on list. The kind generally handled by hardware stores is the B. & A. grades in flint sandpaper and B. & A. in emery cloth and emery paper. The last advance in this commodity took place some three or four months ago.

Iron Washers Go Up Approximately 10%

IRON WASHERS.—A new discount of 10 per cent. off list has been announced by the wholesale trade as being effective on iron washers. The former discount was 20 per cent. off list. The advance is, therefore, approximately 10 per cent. in cost. The firmness in the market for these products has been due to the advancing market in all iron and steel products.

Asbestos Building Paper Advance in Some Quarters

BUILDING PAPER.—Asbestos building paper has advanced in certain instances during the week and is being quoted up 2c. per pound. Some of the concerns who have been quoting at 8c. per pound have raised their price to 10c. per pound. There is a continued scarcity in this commodity as the manufacture has been discontinued in this country. Dealers have been inquiring among dealers in the United States as to the possibility of securing supplies there and it is stated that goods brought in from that source would have to be sold in the neighborhood of 15c. per pound when duty and freight is considered. Dry fibre and tarred fibre paper are holding firm at present prices. Coal tar in barrels has been quoted up in certain instances, the range of prices being from $4.50 to $5 per barrel.

Padlocks Register An Upward Movement

PADLOCKS.—An advance has been recorded in the price of all padlocks during the week. The increase amounts approximately to 7½ per cent. There has been a generally upward tendency in these articles within recent months. The increased prices are, of course, due to the generally higher prices for iron and steel and to the extra labor cost.

Nail Hammers Have Been Advanced 10%

HAMMERS. — One of the American makes of nail hammers has been advanced 10 per cent. during the week. The Maydole brand have been quoted up by the manufacturers. The reason assigned is the advancing price of steel. Hammers are one of the numerous hardware lines that feel the high prices in steel products.

Horse Clippers Go Up 40 Cents Per Pair

HORSE CLIPPERS.—An advance has been recorded on the Newmarket brand of horse clippers which amounts to 40c. per pair. The former price was $1.60 per pair, while the new price is $2 per pair.

Some Grades of Oakum Have Advanced in Price

OAKUM. — An advance of ¼c. per pound has gone into effect on the price of best American oakum, which now

makes the selling price $20.75 for the lowest quotations on this commodity. There is a scarcity of this commodity reported. Higher prices are anticipated for this product at the opening of navigation, when larger quantities of it are used. Prices of other oakums have held steady. Plumbers' spun oakum is quoted from $8 to $8.50 per hundred.

Cut Nails Have Advanced to $4.50

WIRE NAILS.—An advance of 25c per hundred pounds has been made on the price of cut nails, now making the base price $4.50 in 100 pound kegs. There is also a firmness in the market for wire nails and all wire products. Fence wire is in firm market and some wholesalers anticipate that an advance in this product would not be improbale in the near future. Standard steel wire nails are still quoted at $4.70 base per hundred pound kegs. Record prices are now being quoted on nails and with a continued firmness in the market higher prices are anticipated.

Corrugated Sheets Advance $1.25 *to* $3

SHEETS.—There has been an upward tendency in the price of corrugated sheets in both the galvanized and painted. In the heavier sizes of galvanized there has been an advance of $1.25 on No. 24 gauge, $1.50 on No. 22 gauge, $2 on No. 20 gauge, and $3 advance on No. 8 gauge. On Nos. 28 and 26 the price has remained unchanged. The new list prices are as follows:

	Galv.	Painted
28-gauge	$ 6.00	$ 5.00
26-gauge	6.50	6.00
24-gauge	10.00	7.50
22-gauge	12.00	9.50
20-gauge	14.00	11.50
18-gauge	18.00	14.75

The above prices are subject to a discount of 7½ per cent. In the painted corrugated sheets the increase has been from 50c. on No. 28 gauge to $3.25 on No. 18 gauge. In galvanized and black sheets the situation is becoming more acute. It is becoming increasingly difficult to secure both black and galvanized sheets, and the prices are accordingly in very firm market.

Iron and Steel Have Recorded Big Advances

IRON AND STEEL. — Advances in nearly all lines of steel and iron products have been recorded during the week. Common bar iron is now quoted as high as $4.10, ranging from that down to $3.75. Refined iron is quoted from $4.15 to $4.50. Angles are within smaller range, being quoted at $4.25 to $4.35 per hundred pounds. Horeshoes iron is quoted at $4 to $4.25. Norway iron still holds at $7.50, but the supplies of this article are very limited. Toe calk steel has made a big jump during the week and is quoted 60c. to 70c. higher, the range being from $4.65 to $4.75. Mining tool steel is being quoted up as high as 22c. per pound. Following is the range of prices prevailing:

	Per 100 Lbs.	
Common bar iron	$ 3.75	$ 4.10
Refined iron	4.15	4.40
Angles. base	4.25	4.35
Horseshoe iron	4.00	4.25
Norway iron	7.50	....
Mild steel	4.00	4.25
Band steel	4.40	....
Mining tool steel	14.00	22.00
Sheet cast steel	23.00	29.00
Spring steel	5.50	....

Pig Iron Prices Still Withdrawn

The demand for pig iron for making steel has exceeded the capacity of the Canadian furnaces and consequently considerable tonnages of basic iron are being imported from the States. Orders for basic iron have been placed with Chicago and Cleveland furnaces, while 500 tons of Southern foundry iron have also been purchased by Canadian interests for delivery over the last half of this year. Prices on domestic pig irons are still withdrawn, while U.S. prices are unchanged, basic iron at Buffalo furnace being quoted at $35 per ton.

New Steel Plant

An important and interesting development in the steel trade in this district is the steel plan which the Imperial Munitions Board are going to build here. The new plant will add approximately 100,000 tons per annum to this country's steel supply. It is understood that the plant will be operated as a steel foundry and the output will be taken over by the Munitions Board for the duration of the war. This plant is the outcome of the heavy demand for steel for munitions which is steadily increasing in volume and is leaving a comparatively small tonnage for other purposes.

Old Metals Record Advances During Week

OLD METALS.—There has been a number of changes in the price of old metals during the week, most of which are in the upward direction. Tea lead is quoted ¼c up, heavy lead pipe ¼c up, red brass ½c up, light brass ½c up, heavy zinc 1c up, heavy copper 1c up. Old rubbers are easier in price and are being quoted ¼c down. While the embargo on scrap iron and steel is still in force, licenses are being issued for the exportation of steel boring and turnings up to the end of the month, and the question of further extension is under consideration. Much satisfaction is felt in the trade over the installation of electric furnaces at the Ashbridge's Bay industrial district, Toronto, as it is understood that large quantities of steel scrap, particularly turnings and borings will be utilized Prices being paid locally are as follows:—

	Per Lb.	
Tea lead	$0.05¾	......
Heavy lead pipe	0.07¾	......
Yellow brass	0.15½	......
Red brass	0.19	......
Light brass	0.10	......
Heavy zinc	0.07½	......
Heavy copper	0.23½	......
Old cast iron, per ton	15.50	$16.00
Stove plate, per ton	11.50	......
Old rubbers, boots and shoes	0.08¾	......
Overshoes, lumbermen's rubber boots	0.06½	......
Auto tires	0.05½	......
Bicycle tires	0.02½	......

Metal Markets Are Very Firm

COPPER.—The market locally remains firm with a price quoted of 36½c lb.

TIN.—Tin is firmer and has registered an advance in some quarters. Ruling prices are from 47c to 48c lb.

SPELTER.—There is really no market for spelter at present. Supplies are very scarce, and a wide range of prices is being quoted from 13c to 15c lb.

LEAD.—Lead is firmer this week and advances in price have been registered. The tendency of the market is upwards. Locally the price ranges from 9¾c to 10c lb.

ANTIMONY.—The market is strong due to the reduced supply of antimony, but quotations are unchanged and nominal at 18c per pound.

ALUMINUM.—The market is easier on poor demand, but quotations are unchanged at 68c per pound.

Solder and Solder Wire Higher in Price

LEAD AND ZINC PRODUCTS.—There has been an advance of 1c to 1½c per pound in the price of solder during the week. Solder wire has also registered an advance of 2c per pound, the lowest quotations being moved up. Zinc sheets have held steady in price during the week. The advance in solder products is stated to be due to the firm market for tin. Following are the quotations:

Lead pipe, lb.	$0.13	.....
Lead waste pipe, lb.	0.14	.....
Lead traps and bends	Net list	
Lead wool, lb.	0.12	.....
Lead sheets, 3 lbs. sq. ft.	0.12¼¼	.....
Lead sheets, 3½ lbs. sq. ft.	0.12¼	.....
Lead sheets, 4 to 6 lbs. sq. ft.	0.12	.....
Cut sheets, ¾c lb. extra and cut sheets to size 1c lb. extra.		
Solder, guaranteed, lb.	0.29½	.....
Solder, strictly, lb.	0.27	0.28½
Solder, commercial, lb.	0.26	.....
Solder, wiping, lb.	0.24½	0.26
Solder, wire, lb.	0.29	0.35
Zinc sheets, per lb.	0.25	.....

Rope and Twine Hold Firm at Recent Advance

ROPE TWINE.—There is a continued firmness in the market for all cordage and twine products. Prices are holding at the recent advances which sent cordage to new record levels. The Regulat-

ing Commission have not yet come into the market with more offerings of sisal. Manila fibre is holding firm and at high prices. Prices on binder twine have not yet been announced but they are expected to be fixed within the next month or two. The demand for twines of various kinds is fair. Cordage has had a good seasonable demand which at this time of the year is comparatively light.

Boiler Tubes Have Advanced 15 Per Cent.

BOILER TUBES.—An advance of approximately 15 per cent. has been recorded in the price of boiler tubes, for both the cold drawn and the lapweld. Demand for this commodity is increasing with the approach of spring and dealers are anticipating a good trade during the coming months. Following are the net prices per 100 feet:

The Food Game—We all play it, whether or no.

—Rogers in New York Herald

	Per 100 Feet Cold Drawn	Lapweld
1-inch	$21.00	......
1¼-inch	24.00	......
1½ inch	27.00	$25.00
1¾-inch	27.00	21.00
2-inch	31.00	21.00
2¼-inch	31.00	......
2½ inch	36.00	27.50
3 inch	47.00	32.00
3¼ inch	.....	37.00
3½-inch	51.00	40.00
4 inch	58.00	50.00

Other Oil Stoves Likely to Advance

STOVES AND ENAMELWARE.—Following the advance recorded last week in the price of perfection oil stoves there is strong probability that other makes of this class of stoves will be advanced in the not distant future. Just at the present time the trade for stoves is somewhat quiet. There is a good demand however for gas ranges of all kinds. Manufacturers do not see any better prospects ahead for getting supplies of raw materials and stocks on hand are quite light. With a continuation of the present demand for gas ranges there gives promise of being a shortage by the time the summer months are here. Prices in all enamelware have held steady during the week.

Charcoal in City Routes Up 2c Per Bag

CHARCOAL. — Local dealers in charcoal have advanced the price of charcoal on their city routes from 8c per bag to 10c per bag, making an upward movement to the extent of 2c. The question of whether it will be advanced to country points had not yet been decided upon at the time of writing but it is expected this point will be decided upon before the present week is over. This new price in city stores necessitates that the retailer sell at 13c per bag or two for 25c. In some instances the retailer is charging 12c with an extra 1c added for war tax, while in other cases in the city it is selling at a straight 15c per bag. There is strong probability that the price will be raised to country points also.

Higher prices for coal has sent a bigger demand to charcoal. With the long-continued cold weather, people have found it necessary to use larger quantities of charcoal in reviving their fires. All these things have caused a bigger demand and put a greater firmness in the market for this commodity.

LONDON MARKETS

LONDON, ONT., Jan. 25.—Another heavy list of price changes has gone into effect this week. Business continues seasonably good. Winter lines are moving in a very satisfactory manner. Collections are good. Advances in price have taken place on cut nails, iron washers, hack saw blades, steel squares, bar iron, soft steel, plaster Paris, curry combs, Three-in-one oil, corn brooms, compression belts, horse shoes, hinge hasps.

Cut Nails Advance 25c Per Keg

An advance of 25c. per keg this week in the price of cut nails brings the price up to $4.50 base. Wire nails are unchanged at $4.70 base.

Washers Up 12½%.

Wrought iron washers have advanced 12½%. The new discount is 10% in 50 lb. boxes. Less than 50 lbs. add 1c. lb. net; less than 25 lbs. add 2c. lb. net.

Plaster Paris Up 10c.

Plaster Paris has advanced 10c. per barrel. The price now being quoted is $2.35 barrel.

Iron and Steel Squares Up.

All iron and steel squares have registered advances from 25 to 50%.

Corn Brooms Up 25c.

Corn brooms have again advanced 25c. dozen.

Compression Bibbs Up.

Compression bibbs have advanced 5%, and plain and hose are quoted at 55% off.

Curry Combs Up 5%.

An advance of 5% has gone into effect on curry combs and the price is now list plus 10%.

Three-in-one Oil Up.

Three-in-one oil has advanced 5% and new prices are as follows: Small size bottles 85c. doz.; large size bottles, $1.87 doz.; handy cans, $2.08 doz.; household size bottles, $4.10 doz

Hinge Hasps Up.

An advance of 20% has gone into effect on hinge hasps, and the new discount is 40%.

Bar Iron Goes Up 15c Per 100 Lbs.

An advance of 15c. per 100 lbs. has gone into effect this week, making a new base price of $3.75.

Soft steel has also advanced to a new base of $4 per 100 lbs.

Horseshoes Advanced 50c. per 100 lbs.

Horseshoes have advanced 50c. per 100 lbs. and new prices are as follows: Light iron No. 1 and smaller, $1.15 per 100 lbs.; No. 2 and larger, $4.90 per 100 lbs.

X. L. steel No. 1 and smaller are quoted at $5.60 per 100 lbs.; No. 2 and larger, $5.25 per 100 lbs

Hack Saw Blades Advanced.

Hack saw blades have advanced and new prices on common blades follows:

Per doz., 8 in. x ½, 75c.; 9 in. x ½, 85c.; 10 in. x ½, 95c.; 12 in. x 9-16, $1.15.

Rope Remains Firm, Unchanged.

All Manila and sisal products are firm. Quotations on rope follow:—

Lb. base, Pure Manila, 25½c.; British Manila, 21c.; African hemp, 21c.; Sisal, 20c.; Cotton, 3-16 (per lb.), 41c.; Cotton, ¼ and larger (lb.), $39½c.

Spring Booking Has Been Good.

Retailers are booking freely but cautiously for spring. Deliveries will be made earlier than usual this year. Some quotations on spring goods follow:—

Poultry netting, 30-10 per cent.; Screen cloth, 100 ft., $2.75; Screen cloth, 50 ft., $2.80; Bronze screen cloth, $14; Harvest tools, 40 per cent.; No. 20 hinges, gross, $11; Spades, shovels, 1sts, 35-10 per cent.; 2nds, 35 per cent.; 4ths, 30 per cent.; T. F. mowers, 50 per cent.; Eureka sap spouts, $7.50 M.

WINNIPEG MARKETS

WINNIPEG, Jan. 25. — That HARDWARE AND METAL predictions as to lengthy lists of price changes due on the completion of stock taking and the arrival of new goods are to come true can be seen quite plainly in the numerous items affected during the week and jobbers advise that the end is by no means in sight.

Galvanized and black sheets, rope annealed and tinners' wire, logging and tie out chains and cow ties are all under revision during the week in addition to many other lines. The advances in some instances are fairly slight but galvanized sheets have jumped from 65c to 75c per 100 lbs. and Manila rope is ½c per lb. higher.

New and Higher Prices on Sheets

The new prices on galvanized sheets just issued set a new high water mark and every indication is that further advances may go into effect almost any time. Quotations now being made on Premier, Apollo or Fleur de Lis are on the following basis, per 100 lbs.:—
10¾, $8.40; 28, $8.10; 26, $7.80; 24, $7.65; 22, $7.65; 20, $7.50; 18, $7.50.

The advances on black sheets while not so great, amount to 15c per 100 lbs., and shows that the tendency is still upwards. The new prices are as follows per 100 lbs.:—Black Iron, 28, $6.25; 26, $6.15; 24, $6.10; 22, $6.10; 20, $6.05; 18, $6.05; 16, $5.90; 14, $5.80; 12, $5.90; 10, $5.85.

Iron and Copper Rivets Make Another Advance

Another advance in iron rivets has taken place, the new discount being 20 per cent. as against 25 per cent. previously in effect. This affects coppered iron rivets and burrs, tinned rivets and burrs, wagon box, tinners, carriage, hame and section rivets. A few net prices based on the new discount shows to-day's ruling prices as follows:

Rivets and burrs assorted coppered 8, 35c lb.; 10, .38c lb. Coppered rivets only, 8, 21c; 10, 23c. Coppered burrs only, 8, 37c; 10, 40c. Tinned rivets only, 8, 23c; 10, 24c. Tinned burrs only, 8, 40c. lb.; 10, 43c. Carriage rivets, per 100 lbs., No. 6, 1 to 2 in., $16.75; No. 3, 1 to 2½ in., $16.00; No. 1, 1 to 2½ in, $15.75. Section rivets, per 100 lbs., No. 16, ¾ and ⅞ in., $17.75; 1 and over, $17.30. For cane or counter sunk head. Wagon box rivets, per 100 lbs., No. 6, ¼ to 2 in., $16.80; No. 3, 1 to 3, $16.00; No. 1, 1 to 3, $16.00.

Rope Advanced Clothes Line Higher

Through these columns HARDWARE AND METAL has expressed the view that further advances in all grades of rope might be expected, so the revised quotations now being issued will hardly come as a surprise. Prices to-day are: Pure Manila, 28½c lb. basis; British Manila, 23½c lb. basis; Sisal 21½c lb. basis; Lath yarn, 21½c lb. basis.

Sisal clothes lines have also advanced in sympathy with the rope market and to-day's prices are:— 48 ft. $1.20 doz.; 60 ft., $1.50 doz.; 72 ft., 1.80 doz.

Help yourself.

—Sykes in Philadelphia Evening Ledger.

Many Lines Wire Goods Higher

The change in annealed wire is certainly a big one. This line has been advancing steadily with 10c and 15c jumps at different intervals but this week's prices show that quotations are now 50c per 100 lbs. over former lists. This brings this line to an extremely high level but the market seems steady with demand fair, so lower prices are not likely to come into effect for a considerable period. The advances on bale ties is 30c per 100 lbs. The new prices follow, per 100 lbs.:—Annealed wire, 9 ga., $5.75; 10 ga., $5.75; 11 ga., $5.82; 12 ga., $5.90; 14 ga., $6.05; 15 ga., $6.20; 16 ga., $6.35

Bale ties 14 ga. x 9½ Ft. William, $6.05, and Winnipeg $6.45 per 100 lbs.

Bright tinners' wire, per 100 lbs.:— 0-9, $5.90; 10, $5.96; 11, $6.02; 12, $6.10; 13, $6.20; 14, $6.30; 15, $6.45; 16, $6.60.

Many Sundry Lines Go Higher

Log Chains Up

Log chains have also advanced 75c per 100 lbs. and new prices are as follows, per 100 lbs.:—5-16 in. $8.75; ⅜ in., $7.75; 7-16 in. $7.60; ½ in. $750

Other lines affected with new prices prevailing are Peerless horse nails, clay picks, mattocks, grub hoes, crow bars, wire rope, steel squares, shoe thread and sash balances In addition to all these a change is noted in Disston saws, try squares, T bevels, mitre squares, saddlery hardware such as bits and snaps, harness rings and buckles and thumb latches, etc.

Sash Cord Higher

One of the most important of sundry lines to change is sash cord. The new prices are higher than the old and from information we can gather, further advances would not be unexpected. To-day, quotations read as follows:—No. 6, 50c lb.; No. 7, 49c lb.; No. 8, 9 and 10, 48c lb.

Picks Higher

Clay picks have advanced 75c per doz., Mattocks $1.00 per doz. and Crow bars 75c per 100 lbs. New prices are on this basis:—Clay picks, 6-7, $7.00 doz. Long cutter mattocks No. 6, $7.75 Grub hoes, No. 1, $6.00; Crow bars, wedge point or chisel point, $6.25 per 100 lbs.

Horse Nails Up

New prices on horse nails have threatened for a long time so quotations below showing advanced figures will hardly come as a surprise:—Peerless horse nails, per box, 5, $3.54; 6, $3.27; 7, $3.15; 8, $3.07; 9, $2.95; 10, $2.87.

The new discount on Caldwell sash balances of 10 per cent., represents a big increase in the price of this line. The latest previous discount was 20 per cent., so to-day's figures are just 12½ per cent. higher. Net prices figured on the new discount are per set:—8, $2.00; 10, $2.15; 12, $2.35; 14, $2.50; 16, $2.70; 18, $290; 20, $3.05; 23, $3.60; 29, $4.05; 35; $4.95.

Shoe Thread Up

Another advance in shoe thread shows figures abnormally high. The new prices follow:—Barbours standard No. 8, $1.90 lb.; No. 10, $2.00 lb.; Harp, No. 8, $1.80 lb.; No. 10, $1.90 lb.

Hand Saws Up

The latest change to go into effect on Disston saws shows this line as now selling at 15 per cent. advances on list. A few net prices given herewith reveal the tendencies of these goods in conjunction with those of other makes:— Disston saws, per doz., D 20 x 26 in.,

$32.65; D 8 x 26 in., $29.45; 12 x 26 in., $37.95; 12 O x 26 in. $41.80. Rip, D 8 x 26 in., $29.45; 28 in. $23.35; 12 x 26 in, $37.95. Pannel, D 8 x 18 in. $21.25; 20 in., $23.80; 22 in., $26.20; 24 in., $28.10.

Cow and Tie Out Chains Higher

New discounts are now in effect on cow ties and tie out chains These are 25 per cent. and 65 per cent. respectively. Net prices based on these discounts are:—Cow ties, open ring per doz., 0, $2.15; 2-0, $2.40; 3-0, $2.60; 4-0, $3.30. Special, 0, $1.65; 2-0, $1.80; 3-0, $2.10. Three chain, 0, $2.15; 2-0, $2.40; 3-0, $2.60. Tie out chains, per doz., 0 x 30, $8.05; 40. $10.50; 50, $12.95; 2-0 x 40, $11.55; 50, $14.50. Trace chains, 6-0 x 6½, $6.75; 7, $7.50. Separator wire ropes, each, 5-8 x 60, $11.80; 3-4 x 60, $14.50

Unions and Wire Rope Advanced

Other lines affected with the new prices prevailing are:—Dart unions, each, ¼, 20c; ⅜, 26c; ½, 33c; ¾, 39c; 1, 52c; 1¼c, 78c; 1½, $1.04; 2, $1.30. Wire rope, per 100 ft., ⅜ and 7-16, $12.60; ½, $13.00; ⅝, $17.00; ¾, $21.25; ⅞, $27.00; 1, $35.00. Cut lens add 10 per cent. Nail boxes, $7.75 per 100 lbs. Harrow teeth, per 100, 9-16 x 6, $4.25; 5-8 x 6, $5.25. Steel squares, new discount of 25 per cent. Halter chains, new discount of 40 per cent. Post mauls, $3.75 per 100 lbs. Rim door knobs, $1.75 per doz.; Thumb latches, per doz., 2, $1.70; 3, $2.25; 4, $4.00.

Winnipeg Notes

J. M. Lynch, buyer for the Merrick-Anderson Co., Ltd., Winnipeg, left Sunday last with his wife and family for a six week's trip in the South.

JOHNS-MANVILLE SALESMEN MEET

The salesmen and heads of departments of the Canadian H. W. Johns-Manville Company, together with the general managers of the various departments of the company, met in Toronto at the King Edward Hotel, during the week, from January 15 to 20. There were present thirty-eight salesmen from all parts of Canada, and discussion on the various topics was led by some of the managers from the New York office of the company. Those who presided over the various topical discussions were: L. R. Hoff, general sales manager; H. R. Wardell, general manager of the roofing department; B. C. McClure, general manager of the insulation department; J. Berdan, general manager of construction. W. M. Hiller, general manager for Canada, presided over the deliberations of the convention. This was the first convention to be held within the past three years of the Canadian branch. The idea of the convention was to thoroughly familiarize the salesmen with the difficulties attending the manufacture of products in the way of high costs of raw material, shortage of labor, and generally to put them in touch with the situation in order that they may be better able to press for trade in the face of the necessity for higher prices for commodities. The banquet was dispensed with this year, the company feeling that the money could be put to better use for patriotic purposes. Reports on prospects for future business were very encouraging.

Why will she bring that disagreeable child?

—Brinkerhoff in New York Evening Mail.

WHAT OTHER PAPERS SAY

WORK FOR THE R. N. W. M. P.

From *The Financial Post.*

Outside of the fact that it may appear to be patriotic, the suggestion that the Royal Northwest Mounted Police be sent to the front has nothing to recommend it. It is hard to understand how anyone who has ever been west of Winnipeg could advocate such a course. For years the vast silent places of the far reaches of the northern prairies have been made safe to the lone settler and his possessions through the broad influence of the intrepid "red-coats" members of a force whose motto has been to let no crime go unpunished though the arm of the law be extended to the pole. To-day the stock raisers of the prairies are up in arms at the suggestion. And well they might be. The stock industry of the West is dependent upon the open prairies to a large extent for its maintenance. What the R. N. W. M. P. means to the stock man can only be appreciated by those who know of the roving reckless spirits which a vacant country creates and the ease with which stock in large or small numbers can be whisked away and hidden in the still little known sections of the north. Let the force be reduced to a minimum but the time has not yet arrived when it is advisable to remove its influence from that still but sparsely settled country.

BRITISH SHELLS FOR AMERICAN GUNS

From *Philadelphia Public Ledger.*

American Government officials and the American public will not fail to see the signifiance of the low bid for armor-piercing shells submitted by a British munition maker in competition with American manufacturers. After every allowance is made for the fact that our experience in the making of modern munitions is a limited one, and for the further fact that there has been no such competition here as would bring prices down to a narrow margin of divergence, the underbidding of our own manufacturers by a British firm distinctly reveals the extent to which Great Britain has now overtaken the demand for munitions for her own uses. It shows that the industrial resources of the United Kingdom are so perfectly mobilized that they are at last not only capable of supplying the needs of the British troops in the West, in Mesopotamia, in Egypt and elsewhere, as well as of the Entente Allies, but have a surplus capacity for the uses of a great neutral power besides.

PAINT PUBLICITY AND GOOD CITIZENSHIP

From *Paint and Oil and Drug Review.*

Speaking of the proposed movement for paint publicity throughout the country a well-known authority who prefers to be incognito, says:

"Looking at the subject from an advertising man's point of view, it is surprising that this was not done long ago, that it was not launched long ago. It was suggested and the opportunity was there five years ago. Unfortunately, for some reason or other, the Paint Manufacturers' Association had not grown to the point where it was feasible.

"As a matter of fact, you have the easiest advertising proposition of the whole lot before you. You have about 27,000,000 to 30,000,000 buildings in this country, which consume about 25 per cent. as much paint as they should consume to keep them in good condition, both from the point of view of preservation and the point of view of appearance.

"A part of my work is in connecting up good morals and good citizenship with painting. Now, the whole body politic, and especially the whole American public, is very susceptible to what we may call psychological influence. If you tell a man often enough that he does not connect up with good citizenship, unless he keeps his property in good condition, unless he keeps his roof, for example, fire-proof, or fire-retardant by the use of paint, the reiteration of those self-evident facts has such an effect that he cannot get away from it. He will think of it every time he sees a well-painted building. He will think of it every time he sees a can of paint.

"In such conditions, when you understand your market, it is perfectly easy to do what is proposed. It is like taking pennies from a blind man, as I look at it. You will not, when you sell an extra gallon of paint, be taking it away from some other man's dealer, but you will be creating a new market, a new demand; you will be creating a new dealer. And if only one pint of paint more is consumed by the 100,000,000 people in the United States, annually, you will all have plenty of business for some time, before you can enlarge your factories.

"To-day the business is limited just by the fact that you are competing with one another, and cannot afford to take the time and money to increase the market. You are not increasing the market when you get a dealer to handle your products; you are only getting that dealer interested to handle your goods instead of some one else's goods. It seems to me the easiest, simplest proposition ever presented to the trade and the cheapest. I cannot conceive that if anybody spends $5,000 or $1,000 in such a campaign as this, that at the end of five years he will not have reaped it many hundred times over."

EVENTS IN THE TRADE

Hardwareman Mayor

John Denison Smith, hardware merchant has been elected Mayor of Richmond, Que.

Appointed Refinery Manager

William Ellsworth, Sarnia, has been appointed manager of the new refinery of the Imperial Oil Company at Dartmouth, near Halifax, and will leave for that place in a few days. Mr. Ellsworth is one of the head officers of the company in Sarnia.

Canadian Goods for Russia

T. McOuat & Son, Lachute Mills, Que., hardware merchants, who also manufacture machinery, have recently shipped a patent plug machine and other machinery used in connection with paper-making, to a firm in Christiana, Norway, to be used in one of their mills in Northern Russia.

Industrial Notes

Guelph, Ont.—An addition 40 x 124 three stories high is being added to the plant of the Flexible Conduit Co.

Obituary

Toronto, Ont.—Wm. B. Stewart, 61 years of age, died at his residence, 136 Bedford Road, this city. The late Mr. Stewart was well known in business circles, having represented the Hamilton Cotton Co., in this city, for the past 23 years.

Cost of Plumbing Up

The following notice was published in the Medicine Hat newspapers last week:

"The plumbing and sheet metal shops of Medicine Hat find it necessary to increase the rates for plumbers' and tinners' time to $1 per hour, on and after Jan. 15.

"(Signed), Marsh & Scott, Wade & Perkins, R. P. McClelland, Mitchell Hardware Co., R. A. Bond & Co., and W. A. Fraser.

Benjamin Moore Co. to Enlarge Plant

Toronto, Ont.—Benjamin Moore & Co. have just purchased a piece of land on which they intend to erect another factory, 90 x 132 ft. The company just recently completed an addition to the main plant, and within the next few weeks will start to build a new varnish plant. Frederick W. Moore, vice-president and managing director, stated to HARDWARE AND METAL that the company had an increase of 33 1-3 per cent. in business last year, and that the increase referred to does not include any business from munition plants. The outlook for 1917 is decidedly bright, and up to the present business is coming in even better than last year.

Business Changes

Waseca, Sask.—The Waseca Hardware Co. have sold out.

Camrose, Alta.—Hiram Burgar has sold out to Morris & Taylor.

Spirit River, Alta.—Pope Hardware Company have experienced loss by fire.

Battrum, Sask.—D. A. Cohen, hardware merchant, has commenced business.

Montreal, Quebec.—A. Turgeon & Co., hardware merchants, have sold their stock.

Lethbridge, Alta.—C. W. Gray, hardware merchant, has been succeeded by J. M. Taylor.

Medicine Hat, Alta.—The Petit Bell Hardware Co. have been succeeded by the Bell Hardware Co.

Toy Fair At Toronto

The Toy Manufacturers of Canada will hold a Toy Fair, at Toronto for two weeks. Feb. 5-17. The exhibits will be on the second and third floors of the Trader's Bank Annex Building with entrance at 8 Colborne St. This fair is the outcome of the successful movement launched by the Department of Trade and Commerce and the toy manufacturers a year ago. Photographs and descriptions of the extensive exhibits appeared in HARDWARE AND METAL at that time. The toy industry has developed wonderfully in Canada during the past year. The fair this year will be on a much larger scale than that of last year, and manufacturers it is said, will this year be in a position to accept orders for many lines formerly imported from Germany. In addition to toy exhibits it is expected that many kindred lines will be displayed.

Winnipeg Notes

R. R. Kinread, jobber of rawhide halters, leaves this month for an extensive trip through the Prairie Provinces, calling on the retail trade.

L. R. Baker, vice-president of Canada Dry Cells, Ltd., Winnipeg, who was in New York and Philadelphia, arrived in Toronto this week and proceeded to Chicago, where he called on the Interstate Electric Novelty Co. He is due back in Winnipeg about Feb. 3.

After being at the front almost since the commencement of the war, Godfrey Darling, advertising manager of the G. F. Stephens Co., Ltd., Winnipeg, has been rewarded with a commission, and will in future be connected with the tanks brigade. He is very enthusiastic about his new work, and probably next thing we shall hear of G. Darling walking over the German trenches inside one of those terrible things with the caterpillar feet.

Dominion Incorporations

Ajax Rubber Co. of Canada, Ltd., capitalized at $1,000,000, head office, Toronto, to manufacture and deal in rubber and rubber goods.

North American Hardware Supply, Ltd., capitalized at $49,000, head office, Montreal, to carry on business as wholesale and retail hardware merchants.

Morgan's Supply House, capitalized at $75,000, head office, London, Ont., to purchase Morgan's Supply House and deal in cereals, poultry supplies, etc.

The Universal Machinery Co., capitalized at $200,000, head office, Montreal, to carry on business as manufacturers of iron and wood-working tools, etc.

St. Lawrence Smelting & Refining Co., capitalized at $100,000, head office, Kingston, Ont., to carry on the business of smelting, refining and treating ores, etc.

Personal

Jas. B. Walden is making a trip through Canada, representing the Champion Spark Plug Co., Toledo, Ohio.

From Mr. E. K. Spinney, hardware and metal merchant, of Yarmouth, N.S., HARDWARE AND METAL has received this season a very handsome calendar illustrated with a picture of "The Lass of Richmond Hill," very prettily lithographed.

From Alex. Paterson, well known to the hardware trade throughout Canada as representative of the Henry Rogers, Sons & Co., cutlers, Sheffield, England, comes the information that the recent British Government order prohibiting the use of copper for any purpose but munition making, is restricting the manufacture of nickel silver spoons and forks into the composition of which copper largely enters.

Dominion Toy Open Warehouse

The Dominion Toy Mfg. Co., have opened a new warehouse and sales room at 60 Front St., W., Toronto, and will handle a complete range of Canadian and American made toys. Some of the firms represented are, the United Incandescent toy Co., Toronto; Standard Toy Co., Toronto, Manual Construction Co., Toronto; Maple Leaf Toy Co., Toronto; Toy Products of Canada, Farm Point, Que.; Soren Bros., Toronto; The A. Mecky Co., Philadelphia, Pa.; The Ives Mfg. Co., New Haven, Conn.; The Gregory Rubber Co., Akron, Ohio.

News From St. John, N.B.

St. John, N.B.—The Canada Nail & Wire Co., of St John, have made such substantial progress in a comparatively short existence that they are seeking to purchase from the city the leasehold land on which their plant is located.

The St. John Board of Trade has been carrying on a campaign to enlist the

J. BRAULT.

One of the Quebec representatives of the Martin-Senour Co., winner of the Z. E. Martin Trophy in the annual 1916 sales competition of the company.

support of the other boards throughout the Maritime Provinces for a Dominion-wide daylight saving scheme, such as was applied successfully in St. John and Halifax last summer. Replies from many places throughout the provinces have been favorable.

At an inquest arising from the death of an employee, who died as a result of injuries received from an emery wheel burst in a St. John factory, the jury brought in a recommendation that additional safety appliances should be provided. The factory inspector said that the owners of the plant had shown great willingness to comply with any of his suggestions, but he knew of no device which would give absolute protection. He said the only safeguard is the reinforcement of the emery wheels with copper wire mesh, but no such wheels are manufactured in the province.

The need for Canadian manufacturers to plan definitely now what they are to do when the war is over was urged by George B. Squires, of New York, who is identified with the manufacture of machine tools, and whose experience has brought him into touch with many of the leading plants. While in St. John recently he spoke of the wonderful progress which has been made in industrial lines since the war began, and pointed out the need of finding products and outlets for these plants after war orders cease. Among the articles for which he could see a future opening of great promise along this line is the small tractor for farm use which he believes will go far towards replacing horses for agricultural work.

TO MAKE WIRE SOLDER, CAME LEAD AND LEAD PIPE

The Hoyt Metal Co., Eastern Avenue, Toronto, have installed equipment to manufacture wire solder, lead pipe and came lead. The latter product is the lead used in the manufacture of leaded glass. It is expected that the company will be able to make deliveries of the new products in the course of a month.

A CORRECTION

In announcing the prize winners in HARDWARE AND METAL'S Xmas window contest in last week's issue, the name of the fourth prize winner for places of 5,000 and under, was given as Rutherford & Koeper. The name should have appeared as Rutherford & Kayser.

HARDWARE LETTER BOX

Upright Boiler

Stewart & Bowden, Pembroke, Ont.—Where could we purchase an upright boiler, 4 to 6 horse-power.

H. W. Petrie & Co., Toronto; A. R. Williams & Co., Toronto.—Ed.

* * *

Bottle Stoppers

E. Boucher, St. Hyacinthe, Que.—Please advise where we can purchase patent bottle stoppers.

Crown Cork & Seal Co., 334 King St. E., Toronto.—Ed.

* * *

Paper Balers

Haig & Burns, Lansdowne, Ont.—Please give names of manufacturers of paper balers.

Spielman Agencies, Montreal, Que.; General Sales Co., Toronto; Stephenson, Blake & Co., Toronto; Climax Baler Co., Hamilton, Ont.—Ed.

CATALOGUES AND BOOKLETS

File Sharpener

Bulletin O, describing the "Buckeye" file sharpening machine, made by the McLeod Co., Cincinnati, Ohio. The principal features of this machine and its method of operation are described at length, accompanied by illustrations.

Pease Foundry Price Books

Pease Foundry Co., Toronto, have issued a net price book on boilers and radiators, and it is the intention of the company to issue booklets whenever price changes go into effect. The 12-page booklet is neatly gotten up, and will be mailed to any dealer handling or interested in boilers and radiators, etc.

Turner Day and Woolworth Price List

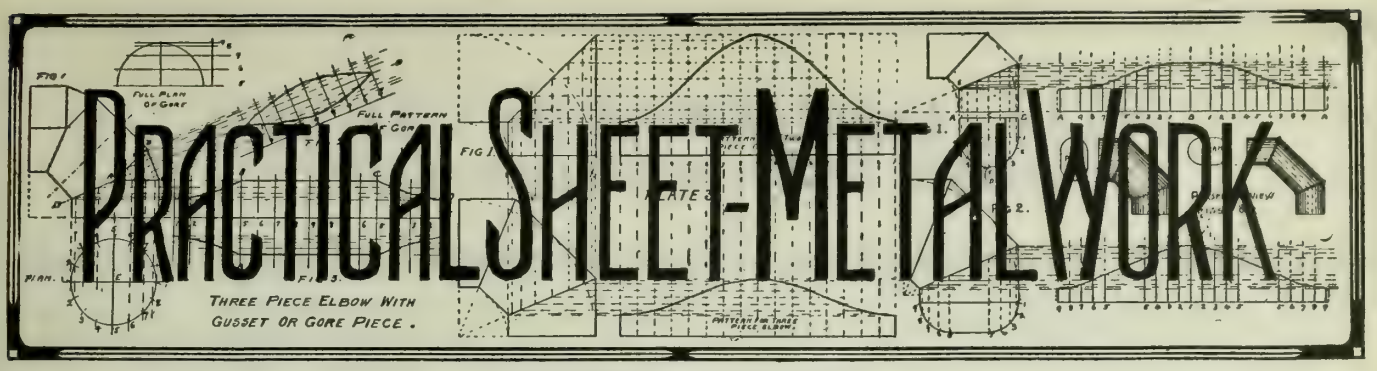
An illustrated 4 page price list has been issued by Turner Day and Woolworth of Canada, Ltd., Hamilton, Ont. The list covers the various lines of handles etc., now being made in Hamilton by the above company. Among the lines of handles featured are axe, pick, hatchet, hammer, maul, edge, sledge and other handles.

Stellite

Two bulletins have been issued by the Deloro Smelting & Refining Co., Toronto. One of these bulletins contains directions for using "Stellite" tools, while the other deals with "Stellite" as a money saver. In the latter bulletin, which was written by Elwood Haynes, the subject is treated from an efficiency viewpoint.

Storage Battery Trucks

Storage Battery Trucks for industrial plants is the title of Bulletin No. 200, recently issued by the Jeffrey Mfg. Co., Columbus, Ohio. The bulletin contains illustrations, specifications and descriptions of various types of storage battery trucks for industrial plants, warehouses, factories and foundries, etc. The illustrations show various types of trucks working under different conditions featuring their wide range of operation. Copies of this bulletin can be obtained by writing to the company's Canadian office in the Power Building, Montreal.



BY THOMAS STANFIELD

IT will be noted that plate 40 appeared in the last issue so as to better show how the interior for the extension piece shown could be developed.

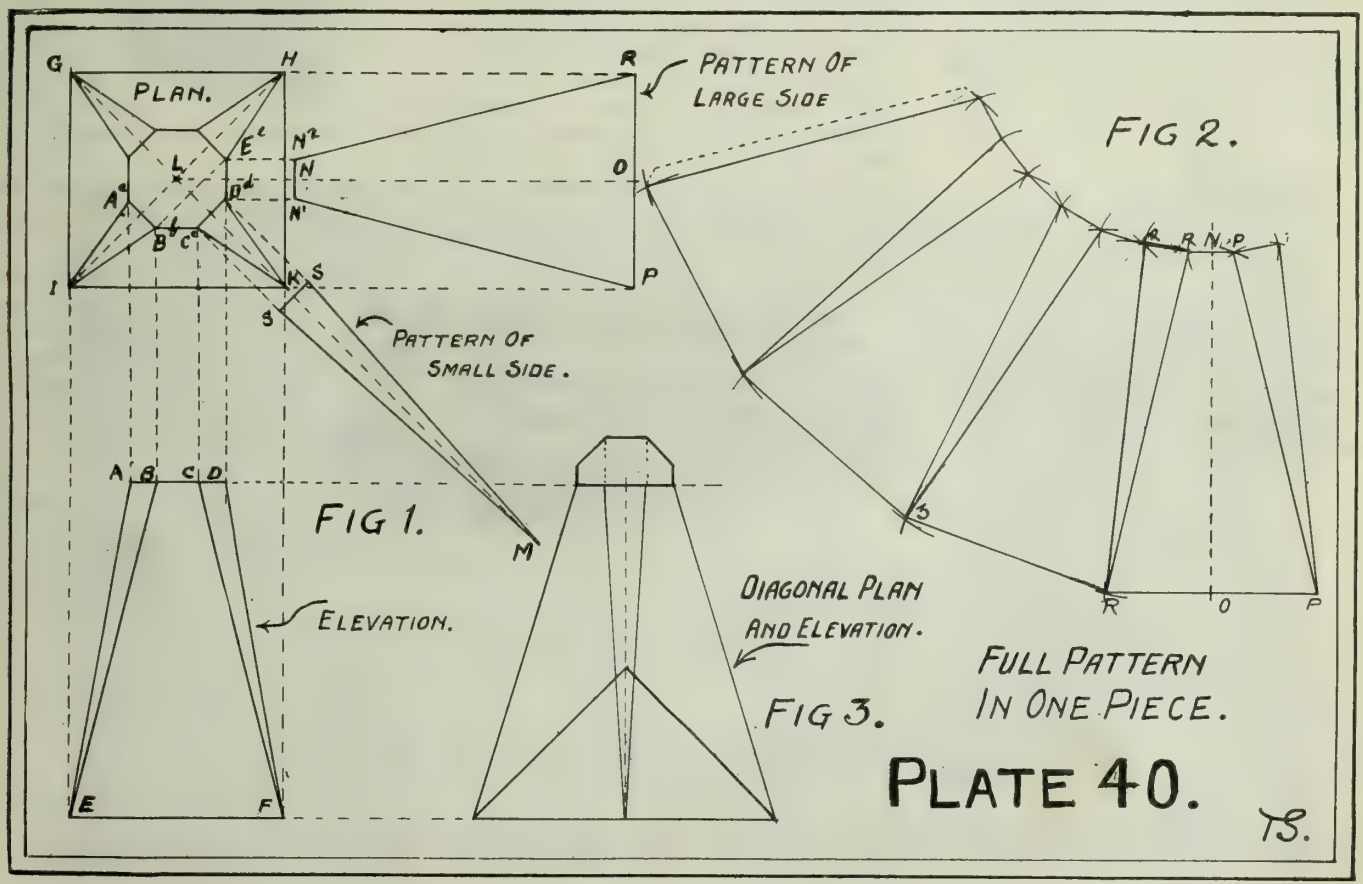
As there are no true sizes given, it will not be necessary to consider them. Assuming, however, that e, d, in plan, is the radius and L is centre, draw a circle first and divide it into any number of equal parts, just as is done when determining the true circumference of a circle. Then draw a straight line equal in length to the circumference, which will show what length or width the material should be. Next find out the height or rather the length which this round pipe has to be, and measure it off, allowing material for the locks, in some cases this pipe is made of heavy gauge sheet metal and is riveted at the seam. Then a round to square piece is made in a similar manner as is followed when developing the pattern for a round to square register box, previously described in this course.

Another point should not be omitted that of making a long enough interior as well as outer cap which should be sufficiently long so as to dispense with the use of wire braces, or guy wires. These wires are often very undesirable and can be dispensed with.

Another method of bracing these extension pieces can be followed by extending long pieces of angle iron down into the chimney at the corners, the part extending up through the pipe being heated and made circular, to fit the inside of the round pipe and well riveted. The round inside piece should be securely riveted as well and made as rigid as possible.

Plate 41 which will appear in the next issue will be in the nature of detail drawings, showing also a perspective view of the finished top, comparing too the difference between a plain round extension and one described in this article and that which appeared in Jan. 20 issue.

(Continued in next issue)



NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

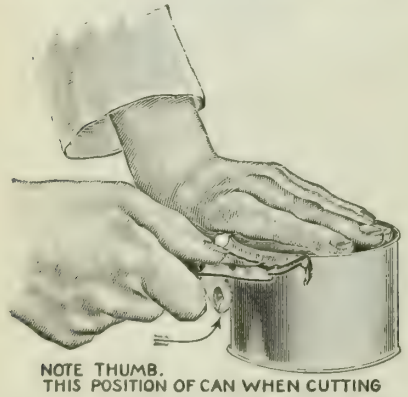
NEW FORM CAN CUTTER

The Lo-Vis Company, Kalamazoo, Mich., offers to the trade the new-form can cutter, here illustrated. This cutter is used to open cans, in a different

Newform Can Cutter and Bottle Opener.

manner to the ordinary can opener. One of the accompanying cuts shows the cutter in operation. When opening cans the new form way, the contents of a can are removable without damage from ragged edges, etc. The makers of this opener claim that the proper way to open a can is from the side.. In this way the entire top of the can is removed and contents can be removed in whole formation. The opener is simple, safe and sanitary. The cutter is made of 65 per cent. carbon cutlery steel, ground to a chisel edge, and has a cocoa bola wood handle. It is impervious to hot water. The blade is part of the whole structure. The directions for using the opener are as follows:—

"First, remove wrapper, then locate seam, place can on side and puncture to the immedidate right of seam, about 1/4



Newform Can Cutter in Operation.

inch from top of can. Place can in an upright position, cut around until you reach the seam, then remove top by raising same, as it then breaks off readily. The cut edge, or side wall of can is turned outward, forming a lip and permitting contents of can to be served in its whole formation. Hold can steadily by placing palm of your left hand on the inside top of can, your thumb turned down as you cut, to control the side wall of can."

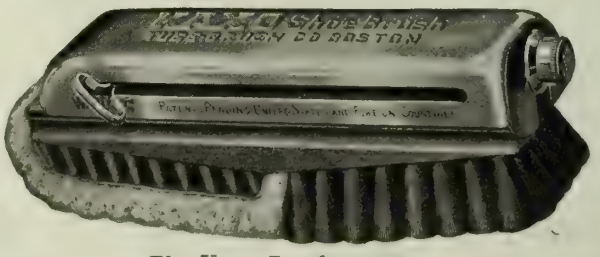
THE KAXO BRUSH

The Tube-Brush Co., 145 Main street, Cambridge, Mass., is introducing the Kaxo blacking, brush and polisher all in one. The Kaxo brush is claimed by the makers to be an economical and compact shoe shining device for shoes and rubbers. One-half of the face of the brush is composed of bristles; the other

The Kaxo Brush in Use.

half is of lambs' wool. The polish is contained in a tube on the back of the brush and is encased in a patented cap or cover. Polish is placed on the shoes by turning a key in the tube. The tube can be renewed at any time. The makers claim that one tube contains sufficient polish for 150 shines. The directions for using the brush follow:—

"Turn the cap. Twist the key, depositing a small amount of polish directly on the shoe.



The Kaxo Brush.

Spread with bristles until the polish is thoroughly distributed and dry; then brush with bristles until a shine appears.

Finally, use the lamb's wool, rubbing lightly until a perfect mirror polish is obtained."

EZY-OUT EXTRACTOR

The Cleveland Twist Drill Company have patented and will soon announce a tool designed for the sole and express purpose of removing broken screws of all kinds.

This new tool is called the Ezy-Out Screw Extractor and is made in a range of sizes that adopt it for almost every field of work. The makers claim that the principle of its operation is simplicity itself, being much the same as that employed by the ordinary cork screw as it bites its way into the cork, secures a purchase and then backs the cork out, though Ezy-Out backs the broken screw out on its own threads.

The modern machinist, when a screw or stud snaps off, it is said need only drill a small hole in the broken screw and insert his Ezy-Out Screw Extractor, giving it a slight twist to the left to seat it firmly in the hole. As he twists, its left hand corkscrew-like spirals grip

Ezy-out Screw Extractor.

the sides of the drilled hole and exert a twisting—or rather untwisting action on the broken screw.

The tighter the screw sticks the harder Ezy-Out grips and twists, and when a wrench is brought into play, almost instantly the screw will begin to "come"—literally backed out of its own hole just as an unbroken screw is backed out. The whole operation, it is claimed, consumes but a fraction of the time and labor required by the old, laborious process and is accomplished without endangering the threads of the hole.

Ezy-Out is made of very tough steel, especially treated to withstand the torsional strains to which it is naturally subject. It can be used for the removal of broken set screws, studs staybolts, and broken screws of all kinds.

An attractive folder completely describing Ezy-Out and its operation has been prepared by the manufacturers.

WEEKLY PAINT DEPARTMENT

How Glass is Made and Graded

Practical Description of the Manufacture and Method of Grading on Everyday Hardware Commodity—How Terms are Derived.

PRIOR to the war the bulk of the sheet glass coming into Canada was imported from England and Belgium. Considerable quantities also came in from the United States prior to the war, and the quantity imported each year was rapidly increasing. Since the outbreak of the war Belgian and England supplies have been cut off, with the result that imports from the United States have mounted to a very high figure.

Canada's imports of common sheet glass from the United States in 1915,were double those of the year 1914. The following figures will give the reader an idea of how the consumption of U.S. glass has increased in Canada since 1911.

Common and colourless window glass imported from the United States was as follows:—

Year	
1911	1,426,561 sq ft.
1912	1,617,328 sq. ft.
1913	10,130,199 sq. ft.
1914	10,336,026 sq. ft.
1915	20,284,118 sq. ft.

The foregoing do not include figures for plain and beveled plate glass. In 1911 the quantity of plate glass imported amounted to 87,520 sq. ft. In 1915 imports of the same glass amounted to 716,583 sq. ft.

The American glass is made in a variety of grades or qualities. Various terms used by American glass manufacturers are not familiar to Canadian users. The terms 'AA'' ''A'' and ''B'' quality are not quite clear to some hardware merchants. Although every hardware merchant and clerk has sold large quantities of single thick glass, there are many who cannot tell exactly why it is called single thick.

In order to give readers of HARDWARE AND METAL a clearer idea of the processes of manufacturing and grading glass, information which follows is taken from an article in a recent issue of Painter and Decorator, an American publication.

Quality of Glass

The quality of window glass or sheet glass, also termed ''blown'' or cylinder glass,'' has been improved by the modern methods of production, and much has been expended in the effort to make perfect blown cylinder glass but there are still some waves and defects accepted in all window glass, due to the process of making, which differs entirely from cast and polished glass.

The glass is blown in cylinder form and flattened by reheating, which gives it a slight bend or bow, a possible variation in thickness in the larger sizes, and surface flaws.

The selection of the various grades is a matter of expert judgment. The large sheets produced, in single or double thickness and heavier, are cut to stock sizes according to the merits of the glass and graded in 'AA,'' ''A'' or ''B'' quality. The defects being eliminated to the greatest possible extent.

The ingredients, as we have said, are practically the same in window glass as in plate—it is wholly a matter of refinement and process which produces the different kinds of material.

A seasonable display in the window of the King St. store of the Mills Hardware Co., Hamilton, Ont.

Window glass—is made by two methods—by "machine" or by "hand." The difference is in the blowing process—both producing the cylinder from which all window glass is evolved. The same general treatment of the cylinder, to produce flat sheet glass follows in both machine or human blown material, and both produce equally standard quality.

Sources of Manufacture

To make the cylinder the molten glass or "metal" is brought to proper consistency by extreme heat, and the glass in the human blown process is "gathered" upon the end of a tube (or blow pipe) from the furnace and blown into a huge cylinder by repeated heatings and blowings, until the material is all evenly distributed. From a globular mass about the size of a man's head, the blower swings the pipe into an alley or opening in the door, blowing as he swings until the full sized cylinder is formed. This requires skill of the highest degree—the blower, by regulating the amount of material entering the cylinder, makes a single strength or double strength heavier glass as desired.

The blowing machine accomplishes the same result by purely mechanical process—the intricate working of the mechanism, the supply of molten glass, the air pressure, rapidity of action, making single or double thickness, being controlled by a single operator who appears to have supernatural powers, surely never dreamed of throughout the great stretch of years when the glass-blower was master of the art and accredited with inimitable skill.

The cylinder is decapitated at both ends by an ingenious method of spinning a string of hot glass at the proper place, or by the use of a wire wrapped around the glass and electrically heated which causes the cap and crown to break off clean. The cylinder is then split lengthwise—placed in the flattening oven of a large circular stone, and as the glass begins to wilt it is quickly smoothed out to the shape of the flat stone upon which it rests.

Cylinder glass cannot be perfectly flattened, and the waviness and bow or slight curve will always occur in this product.

In glazing—the bend or bow should be glazed outward in the sash—the bulge towards the exterior.

Window Glass Sizes

Window glass in double strength, or heavier is made as large as 30 in. x 90 in. or 38 in. x 86 in. or 48 in. x 80 in. and such extreme sizes containing twenty-five square feet, but it is inadvisable to use such glass in these measurements on account of the liability of breakage and the distorted vision due to waves, etc.

The same may be said of the extreme sizes of single strength which can be made up to 24 in. x 60 in. or 30 in. x 54 in. or 36 in. x 50 in. in sizes containing ten to twelve and one-half square feet.

Crystal Sheet Glass

A heavy blown glass, made by the same process as ordinary window glass and subject to the same inherent defects. Graded in "AA," "A" or "B" quality and made in various thickness: 26 ounce, 29 ounce, 34 ounce and 39 ounce (3-16 in. thick).

In examining samples of small size for inspection of quality it should be remembered that the large light of glass will show the natural waves and defects, while the small piece may appear nearly perfect.

It is not altogether a matter of expert judgment to determine the various grades and certain rules may be accepted governing window glass specifications.

Thickness and Weight

Single strength measures approximately twelve lights to the inch, but a small variation either way is permissible. Single strength weighs approximately 16 ounces to the square foot. Double strength measures approximately nine lights to the inch. The thickness should be fairly uniform and the weight approximately twenty-four ounces to the square foot.

Window glass is packed in regular sizes approximately 50 square feet to the box up to the 100 united inch bracket (adding width and length), and 100 square feet to the box in sizes over 100 united inches.

Single strength in factory packages weighs from 65 to 75 pounds to the box (shipping weight). Double strength in factory packages weighs from 85 to 110 pounds to the box, 50 feet boxes (shipping weight).

The Various Qualities

"AA" quality should be clear glass, free from any perceptible amount of air bubbles or blisters, burnt specks or burns, cords and strings. It should have a good gloss and an even surface and be well flattened. By air bubbles it is understood that tiny blisters, or imperfections not perceptible on the cutters' table, but detectable when placing the sheet directly towards the light, would not be objectionable. This should be a careful selection in both single and double and should represent the very best that can be produced in window glass by the present methods.

"A" glass is the normal selection of glass when no special selection is desired or specified and it admits of such defects as small strings or lines, small blisters when not too close to one another or located in the center of the sheet. Well flattened, the surface even, and devoid of noticeable scratches, cropper marks, burns and other prominent defects.

"B" glass covers a wider range than either "AA" quality or "A" quality. It permits many of the defects inherent to the process of making such as waves, strings, lines, blisters, scratches, burns and other similar or equivalent defects. This quality embraces everything below "A" quality, not stony or full of blisters or other large defects objectionable for any common purpose, such as heavy scratches, heavy blisters, cords and sulphur stains.

MATT HORTON TRAINS HIS SALESMEN

(Continued from page 31.)

and to brush away cobwebs and burnish away rust. While I am gone, I know that business goes on as usual.

Matt Gets Good Out of Going Away

These absences of mine give me much that I need. They take me from my business far enough so that I can see it in perspective; and a man needs to see his own business so. Being always hugged close by his business is good for no man, for so he becomes shrunken and complacent. A man needs to get away from his everyday environment periodically. Thus does his mind become freshened and elastic. The relaxation from the tension of the day's work enables him to take up his burden with new power and a new zest.

There's another aspect to this going away to a bigger environment: It advertises me more or less to my community, and makes those I serve feel that I am bigger than they in experience and knowledge. My opinions are listened to with more respect and I am regarded differently from those other merchants of Hurston who rarely go far, or long from their own businesses, or visit metropolitan centres.

My constant aim is to be on top of my business. I don't want my business to be on top of me — a burden and weight. My business, I am glad to say, does not drive me. I drive it. Because I am the master of my business, I make it do my will, and my will is that it shall provide me with a living and something more; that it shall give my brain and purposes abundant exercise; that it shall be for me a delight and a means of growth. I am not money-mad or business-mad. I value money, and I find great happiness in my business; but beyond money and business, I find joy in my independence, in my power to use the things about me for my own ends. I am a man, not a creature, or a slave. And to me "man" means "mind." I am matching my mind against other minds and against conditions and things; and it is when I triumph over opposition that I really live.

(To be continued).

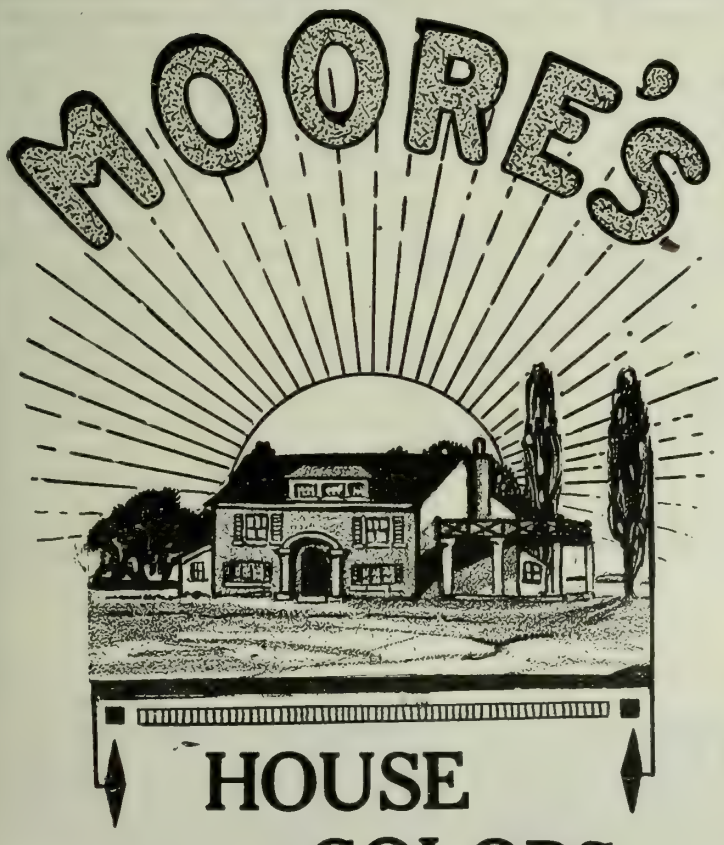
Customers Come Back and Forth To Your Store For

Jamieson's Pure Prepared Paints

It is the satisfaction given by the quality and the **readiness** of Jamieson's Paints that builds up this steady patronage. Let your store be the "Mecca" for customers who are satisfied with this paint.

Our dealer proposition will interest you. Let us tell you about it.

R. C. JAMIESON & CO., Limited, Montreal, Canada
ESTABLISHED 1858
Owning and Operating P. D. DODS & CO., LIMITED



Every year our sales show a remarkable increase.

We are constantly receiving big repeat orders and many new customers.

The high quality of these pure linseed oil paints, plus their reasonable price, make a very popular value.

Moore agents "swear by" Moore's House Colors—never at them.

It places you under no obligation whatsoever to ask for full details of our agency proposition.

It will pay you to write us now.

Moore's House Colors pay a big profit.

Limited
WEST TORONTO, CANADA

If interested, tear out this page and keep with letters to be answered.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 25.—The feature of the market for paints and oils, etc., this week in Montreal is the extremely difficult situation as regards linseed oil due principally to the shortage of supply of flax-seed in Montreal, and the embargo preventing the consignments on rail at Fort William from coming through rapidly. Shellac also presents a point of interest, having advanced, due to the advance in the spirit, and the loss of an enormous amount of this material at sea owing to enemy operations against shipping. Otherwise the market remains not greatly altered from conditions of last week, and with mixed paint orders coming in freely in anticipation of a brisk business this spring.

Linseed Oil is in Firmest of Markets

LINSEED OIL.—Owing to the tremendous difficulties occasioned by the operation and rigid enforcement of the freight embargo on flax-seed from the North-West the market for linseed oil in Montreal is this week very seriously affected, and firms are simply not quoting linseed oil to the retail trade. It has become necessary for the great paint manufacturing firms to conserve their supplies of this oil in order to meet their own requirements. The rush of orders for spring paint supply is considerable and the outlook as regards future supplies of linseed oil is extremely uncertain. Nevertheless the paint manufacturers are not restricting their manufacture so far, but are going ahead more or less confident of being able to secure sufficient linseed oil for their future needs. Regarding the future, crushers are disinclined to venture opinions very freely.

"The future," said one, "is in the hands of the Government and the railroads." Considerable quantities of flax-seed are reported held up by the embargo at Fort William, and the release of these is hoped for within a reasonable time. Flax-seed was quoted at $2.62¾, which is three-quarters of a cent higher than last week. With the principal firms usually quoting for linseed out of the market this week the following prices as quoted last week may be considered merely nominal, and if linseed oil is obtainable at all by the retailer the higher quotations will undoubtedly rule:

Linseed oil.	Raw.	Boiled.
1 to 4 barrels	$1.15-1.20	$1.18-1.25
5 to 9 barrels	1.14-1.19	1.17-1.24
10 to 25 barrels	1.13-1.18	1.16-1.23

White Lead in Oil Remains Unchanged

WHITE LEAD IN OIL.—Although linseed oil is in a remarkably firm and difficult condition of market at present, and though pig lead is also showing the firmer tendency, there is no change in the prices of white lead in oil this week, and no immediate change is anticipated short of some unexpected intensification of the conditions referred to. Pig lead at the time of writing was being quoted at $7.75 per 100 lbs., f.o.b. New York, or about $9.60 Montreal. Quotations are still good for delivery up to April 1st at the prices of last week's report, viz.: $14.30 per 100 lbs. for ton lots, and 30 cents per 100 lbs. additional for quantities of less than one ton.

Turpentine Showing A Firmer Tendency

TURPENTINE.—The market for turpentine this week shows a tone rather more pronouncedly firm as compared with conditions of last week. The Naval Stores in New York were quoting higher prices, and news from Savannah indicated a condition of continued firmness. Supplies in Montreal were reported in the main sufficient for requirements with no suggestion of shortage, but there was a disposition to expect higher prices owing to the difficulties besetting marine transportation at present. Prices as quoted for the present week in Montreal are similar to quotations of last week, except that the lower quotations of last week are this week advanced by two cents, the lowest quotation for one barrel lots being 77 cents, and the prevailing price being 80 cents.

Turpentine	Per Imp. Gal.
1 barrel lots	77-80c.
2 to 4 barrels	76-79c.
5 to 10 barrels	75-78c.

Gasoline Seems Likely to Advance

GASOLINE.—While gasoline is unchanged in price this week from the 29½ cent figure per gallon ex cars as reported last week, which price represents an increase over the prevailing price a couple of weeks ago, the market for this oil is very firm, and in the opinion of those most able to indicate tendencies, the price of gasoline will go up further before it comes down any. Crude oil is always on the climb still, and the outlook is for firmer priced gasoline perhaps before very long.

Putty Unchanged But in a Firm Market

PUTTY.—Price of linseed oil naturally affects putty, but the market for putty is not reported higher this week in Montreal and since the last adjustment of prices and advances in differential no further alterations have been made. Nevertheless with whiting very firm and ocean freights so seriously affected by war conditions generally, putty is in firm market.

Market for Shellac Firm and Rising

SHELLAC.—There has been a further advance in shellac, both white and orange, of from ten to fifteen cents per gallon. Orange shellac is selling in one gallon containers at $2.70 to $2.75, and white at $2.95 to $3 in Montreal at present. What is more, the market for shellac is exceedingly firm in tone, and further increases would not surprise anyone. The immediate cause of the present advance is said to be the cost of spirit which has advanced to $1.08 per gallon(cost to manufacturer) as compared with 82 cents not very long ago. The shellac itself which is imported largely from India has suffered most seriously commercially by the enemy submarine or raider activities. No fewer than 80,000 and more cases of shellac have been lost lately at sea, and this causing something of a noticeable shortage has advanced the material itself apart from the spirit by about ten cents a pound. Thus the outlook is firm for shellac.

Mixed Paints Cause No Market Flutter

MIXED PAINTS.—There is no change this week, nor any immediate prospect apparently, of change in regard to the market for mixed paints. Manufacturers are booking spring trade orders still in lively procession, and indications are towards good business for the retailers this spring. Prices remain steady in spite of the situation as regards linseed oil, and this situation the manufacturers are hop-

Every New House That's Painted Helps You to Sell More Paint

Because all around town it is talked about and your name is associated with the job if you sold the paint. This gossip is always very favorable and worth many sales when it concerns a B-H agent and

B-H English Paint

Houses on which this Standard paint has been used have an individuality that makes them stand out from others. They constitute a lasting advertisement for B-H Paint and the B-H Agent, with the result that **you** are the dealer who gets the business when others decide to brighten up their premises.

Where we are not represented we will be glad to discuss an agency proposition wth a progressive dealer.

BRANDRAM-HENDERSON LIMITED

Montreal Halifax St. John Toronto Winnipeg

If interested, tear out this page and keep with letters to be answered.

ing will be relieved before it goes far enough to affect manufacture of paint. Prices of containers continue to give firmness of tendency to the mixed paint market, also the metal for making cans being much more costly now than in any previous experience of the trade. Turpentine is also firmish, but mixed paints maintain their aspect of steadiness in present markets.

TORONTO

TORONTO, Jan. 26.—Prices on arsenate of lead in dry and paste form have been issued to the trade during the week. There is practically no advance over the prices quoted at the time previous prices were withdrawn. Where advances are recorded they are very slight. The interesting situation in the paint trade during the week is the exceedingly firm situation in linseed oil. Some of the dealers withdrew from giving quotations during certain days of the week owing to the uncertainty in the situation. While flaxseed held fairly steady during the week the crushers report they are unable to get supplies of seed from the West. This is caused through embargoes placed on the carrying of this commodity by the railways. Munitions and other war supplies are given preference. Turpentine held in steady market. Glass is still in a doubtful market. There was an inclination on the part of some dealers to follow the lead made toward higher prices by one dealer last week. Some of the large paint concerns report a continuation of booking orders that indicates business equally as good if not better than last year. Some jobbers, however, report trade somewhat disappointing and state that retailers are not booking as freely as in past for forward orders. This is accounted for by the fact that prices are high and they will be able to book later if their needs demand it.

Great Uncertainty in Linseed: Higher Prices

LINSEED OIL. — Great uncertainty prevailed in the linseed oil market during the week. At the time of writing several concerns were out of the market altogether and were not making any quotations pending further advice as to the situation. Those who were quoting had advanced their prices considerably from the levels of last week. The situation in linseed oil is becoming an extremely difficult one. Crushers in the East assert they are unable to get sufficient supplies of flaxseed from the North-West owing to the embargoes which have been placed on the seed by Canadian railroads. The manager of one oil concern recently returned from the United States and states that crushers in that country state there is an actual shortage of 10,000,000 bushels of flaxseed in the crop there. Crushers from the United States have had buyers in the Canadian West securing all available seed they could get hold of. From the number of car inspections of flaxseed at Winnipeg during the week it would seem that they are getting fairly large quantities comparatively. During the five days ending with Wednesday of this week some 83 cars of flaxseed had passed inspection. Eastern crushers state the seed is not moving eastward into Canada and the conclusion they draw is that it is finding an outlet over the American lines running into Winnipeg. Flaxseed for spot delivery at Winnipeg held very steady in price during the week. On Thursday of last week the market for the spot seed closed at $2.63¼ per bushel and on Wednesday of the present week the cash article closed at exactly the same figure. The range of prices during the week was only 1c. higher than these figures and less than a cent below. There are those in the oil trade who can see nothing but much higher prices in the near future. Following are the range of prices, with the higher figures quoted by practically all dealers. One firm only quoted the low price and will probably advance prices at once.

1 to 2 barrels	$1.15-1.20	$1.18-1.23
3 to 5 barrels	1.14-1.19	1.17-1.22
6 to 9 barrels	1.13-1.18	1.16-1.21

Gasoline Held Steady In Very Firm Market

GASOLINE.—The price of gasoline held steady at the advance recorded last week. Quotations range from 28½c to 29c per gallon with benzine one cent per gallon below these figures. Crude oil in the Oklahoma field also held steady at the record price of $1.70 per barrel. Demand for gasoline during the winter season is reported heavier this year than ever before at this time. This is partly accounted for by the fact that more cars are in use and partly because people are using their cars more generally throughout the year as a matter of convenience.

Arsenate of Lead Prices Announced

ARSENATE OF LEAD.—New prices for arsenate of lead have been announced by the grinders during the week. There is very little change in prices over those prevailing at the time previous quotations were withdrawn. Where the change has been made in an upward direction it is stated to be inconsiderable in amount. Following are the prices for less than ton lots:

	Per 100 lbs. Dry	Paste
1-lb. tins	$29.50	$21.00
2-lb. tins	....	18.00
5-lb. tins	27.50	14.00
10-lb. tins	26.50	....
25-lb. casks	26.00	13.00
50-lb. casks	25.50	12.50
100-lb. casks	25.00	11.75
300-lb. casks	....	11.60
600-lb. casks	....	11.00

Arsenate of lime prices are also quoted as follows: 1-lb. tins, $24.50, 5-lb. tins, $22.50; 10-lb. tins. $21.50; 25-lb. casks, $21; 50-lb. casks, $20.50; 100-lb. casks, $20. These prices are per 100 pounds in less than ton lots.

Prices for white lead in oil held steady during the week. It is quoted at $14.80 per hundred pounds in small lots and $14.50 per 100 pounds in ton lots.

Turpentine Steady In Uneventful Market

TURPENTINE.—There was little of interest in the turpentine situation during the week. In the primary market there was a quiet feeling, with business reported as offering, but dealers unable to take it up because they are unable to get shipment on the railroads of the South. Locally the demand has been light. It is anticipated there will be only a moderate demand until about the middle of March, when spring demand sets in. Prices remain unchanged.

1-barrel lots	$0.75-$0.81
2 to 5 barrels	0.74- 0.80
6 to 9 barrels	0.73- 0.79
5-gallon	0.80- 0.88

Inclination for Other Glass Dealers to Advance

GLASS.—There was an inclination during the week for some wholesalers to follow the lead set by one concern last week in advancing the price of glass to 15 per cent. off list. It was stated by one concern that they would in all probability revise their prices upward at this week-end. While there is this disposition to advance, there is still a wide range of prices, instances being noted where the discount was at 30 per cent. The nominal discount for glass at present is 20 per cent. off list, but prices are shaded according to whether the stocks are light or heavy.

PERSONAL

Mr. Allen, of Stephens Hepner, Port Elgin Ontario was in Montreal this week.

Mr. Matheson of United Awl and Neddle Co., West Medway, Mass., was in Montreal this week.

W. Cuzner, of Cuzner Hardware Co., Ottawa was in Montreal during the past week on his way through to Ottawa after a trip to American Cities.

THE *Paint, Oil and Drug Review* states that the big domestic consumption of natural gas has resulted in a weak supply for glass makers in Southern Indiana, with the result that the American Window Glass Co., on December 15, closed its plant at Hartford City, Ind., and a portion of the Johnston plant has also been closed. Attempts will probably be made to use some other fuel.

Why

Does the Daisy Churn Sell Ahead of All Others?

Set it side by side with any other churn and you will see at once. The beautiful, golden-oak finish and the handsome appearance, alone, make it stand out from all others as a superior article. Hoops are painted gold and the frame finished in expensive grey enamel.

The frame is easily assembled, consisting of only three parts which can be put together quickly. The stand is riveted together. There are not a lot of stove bolts to shake loose and cause you and your customer infinite trouble.

It runs three times easier than any dash churn. It is the easiest churn to run that is made, for the barrel turns on bicycle ball-bearings. There is a wide, comfortable treadle for the foot besides the bow lever. (We recommend the bow lever, for it applies power evenly to both sides and does not send the churn creeping in a circle).

If you have not tried the Daisy, order from us or our salesman. Once you make its acquaintance you will wonder why you ever sold any other.

BT Daisy Churn

Quality First

IN the long run quality is the deciding factor in marketing varnish.

Discriminating buyers have learned by experience that the price per gallon is less inportant than quality and uniformity.

Berry Brothers' made-in-Canada varnishes and enamels need no selling arguments because the label is accepted by even the smallest buyers as a guarantee that all products sold under it are right and true to description.

You can increase the volume of your varnish business by featuring Berry Brothers' brands.

TRADE-MARK

Every Farmer in Your District Will Spray This Spring

Are you prepared to supply the Spray Materials that prosperity will bring into greater use than ever before?

This spring your farmer customers will insist on efficient insecticides rather than those low in price—but if your brands combine quality with economy your sales will surely be increased.

C.P. Kalcikill
C.P. Paris Green
C.P. Arsenate of Lead

(Paste or Dry)

All are products of the highest standard qualities—the best values that money will buy and are guaranteed.

C.P. Kalcikill is a new insecticide that is sure to be in great demand because of its remarkable efficiency, easy application and low price.

Place your orders at once and be ready for your share of the Spray Material trade this spring.

The "C.P. Full Line Agency" is the best profit producer of all paint agencies. Ask us to tell you about it.

Re Gauges and Prices of Sheets.

Prices which follow on black and galvanized sheets are purely nominal. The market has reached a state where prices are quoted only on application and for immediate acceptance.

On account of it being practically impossible to secure galvanized sheets from England, owing to the war, American mills have decided that they will no longer roll the English gauges to meet this competition. However, they will continue to roll at 10¾ oz., which will be known as such or a 30 gauge, and will take the place of the former English 28 gauge.

SHEETS (BLACK)

	Montreal 100 lbs.	Toronto 100 lbs.
10 gauge	6 00	6 00
12 gauge	6 00	6 00
14 gauge	5 40	5 40

The Organization Behind the CROWN DIAMOND Products

This group of McArthur, Irwin, Limited, and affiliated factories, will give you an idea of the tremendous forces behind the CROWN DIAMOND PAINT PRODUCTS.

The reduction in overhead expense due to having this group of factories under one head, combined with the control and manufacture of the raw materials, means economy in production. The dealer who is fortunate enough to be linked up with CROWN DIAMOND PAINT PRODUCTS derives the benefit. The building and strength of an organization of this character is not due to the progressiveness and enthusiasm of the principals alone, but to the making of a good product and reliable dealings at all times.

CROWN DIAMOND PAINTS (the New-Old Line) have proved their endurance since 1842.

MACLEAN'S MAGAZINE *for* February

Just suppose you were made Editor of MACLEAN'S MAGAZINE for one issue!

WHAT would you provide for your readers? You would probably want some good short stories, and you would like to offer chapters of a good serial. You would want something in lighter vein. Perhaps some verse. Certainly some serious articles of an informative and critical nature. Probably you would want everything—contributions and illustrations—to be by Canadians. Good! But who are they? And could you get their work?

Look at what the regular editor, T. B. Costain, has provided for the February issue of MACLEAN'S:

A serial story by **Sir Gilbert Parker**—"Jordan is a Hard Road."

A short story by **H. G. Wells**—"Into the Abyss."

A complete novelette by **A. C. Allenson**—"Danton of the Fleet."

A gripping sketch of "The Greatest Hotelman in the World"—a Canadian, by name John McE. Bowman, of the Hotel Biltmore, New York; and the man behind the Manhattan Hotel, New York, and the hotel now building in the same city, The Commodore, and the new Canadian hotel, The Devonshire, to be built this year in Toronto. **W. A. Craick** gives the story of this remarkably successful and interesting man—a veritable romance of achievement.

Stephen Leacock is in the February MACLEAN'S with one of his inimitable sketches—this one entitled—"In Merry Mexico." What a fancy, what a humor this man has! He roams the earth, and always is visiting some land or country in the spotlight of the world's history.

Then Editor Costain has **Miss Agnes C. Laut** in the February issue with a timely and thought-provoking article, "The Elections and Canada." She is writing of the American elections of last November, and in her virile style and with her amazing inside knowledge of things political, she gives all Canadians much to think about, and a wider vision of the place Canada holds in world affairs—dwelling especially on the new Anglo-Saxon relations which will be the result of the war now being waged, and which gives promise of involving the United States. Miss Laut's contribution is well worth reading.

H. F. Gadsby, free lance, ever a-tilting at politicians and politics, and never failing to get under the guard of parties and partisans, writes sparklingly on "How Premiers Control Their Cabinets" — of piquant interest in view of Sir Sam Hughes's recent encounters with Premier Borden. Gadsby studies other Canadian Cabinets than those of Premier Borden's. Good reading, this.

Then Editor Costain starts in this February issue of MACLEAN'S a new department—snappy biographical sketches and zestful stories of notable and interesting Canadians. You will enjoy this yourself and so will all others to whom you may introduce MACLEAN'S MAGAZINE.

The usual departments—Review of Reviews and "Information for Investors"—are present as usual; and illustrations by these Canadian artists, C. W. Jefferys, Harry C. Edwards, Lou Skuce, E. J. Dinsmore, assist to give the February MACLEAN'S *distinction and appeal.*

Now if you have been keeping in mind yourself—as a possible editor of MACLEAN'S MAGAZINE for a single issue—do you think you could excel or equal what the regular editor has provided for MACLEAN'S readers?

Varnish de Luxe

Before it is applied, poor varnish looks very similar to good varnish. For this reason varnish is a difficult thing to buy, and the purchaser can only be guided by reputation and past performances.

There is a great difference in varnishes. because there is a great difference in methods of manufacture and materials used.

DOUGALL VARNISH

is made in an up-to-date factory devoted entirely to the manufacture of varnishes, equipped with the most modern machinery, manned by the most expert help. Every gallon of varnish is rigidly inspected, tested and aged. You will be safe in recommending it to your customers—we will stand back of your guarantee.

WINNIPEG MANITOBA LIMITED

PYRENE
The Universal Fire Extinguisher

IS ALWAYS READY

Never Deteriorates, Freezes or Corrodes

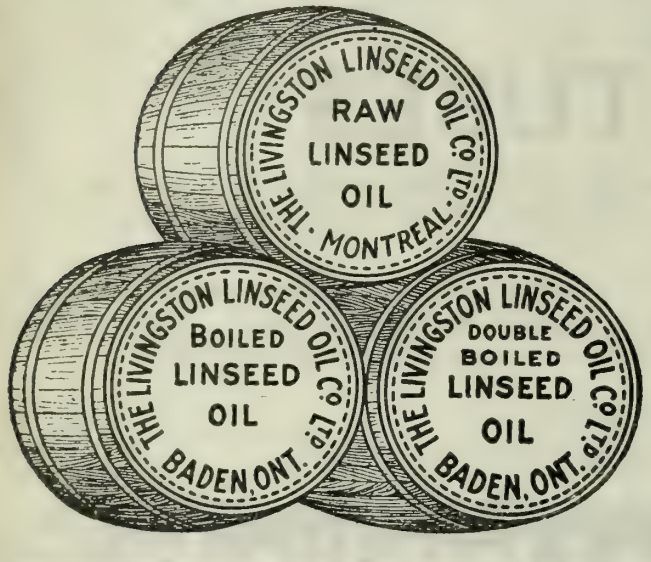
PYRENE

will put out all kinds of fire, gasoline or oil. It is as effective on an arc of 100,000 volts as on burning shavings. It is a non-conductor, will not injure the finest fabrics and will not freeze at 50 degrees below zero.

GREAT WEST ELECTRIC CO., LIMITED

Winnipeg, Manitoba

No New Seed Used in



LIVINGSTON BRAND
LINSEED OIL

This is the outcome of fifty years practical experience—experience which stands between you and satisfied patrons.

New seed, though fully matured, and the oil, though well boiled, can never give the high standard quality in oil that you get in Livingston Brand.

To make sure of the **STANDARD** quality, raw and boiled linseed oils, always insist on your jobber supplying you with Livingston Brand (**always in the blue barrels**). If he cannot supply you write direct to us.

ALMOST A CLEAN SWEEP

made by

MARTIN-SENOUR DEALER-AGENTS

A striking proof of the fact that the best hardware stores sell the best paint is shown in the recent announcement of the winners of HARDWARE AND METAL'S Christmas Window Contest.

Out of 8 Prize-winners—6 are M-S Dealer-Agents

The contest was divided into two classes—towns over 5000 and towns under 5000. In the first class all four prize-winners were M-S Dealer-Agents.

In the other class two prizes, the first and fourth, went to M-S Dealer-Agents.

Here Is the List—All Winners

Class I

1st Prize, Fawcett Hardware Co., Saskatoon
(H. W. Pott)

2nd Prize, Bond Hardware Co., Guelph
(Chas. Byford)

3rd Prize, Sumner Co., Moncton
(Alex. Bailey)

4th Prize, Cochrane Hardware, North Bay
(P. E. Hughes)

Class II

1st Prize, E. Miller, Aylmer, Ont.
(Frank Butcher)

4th Prize, Rutherford & Kayser, Simcoe, Ont.

Get into the Winning Class by becoming a Martin-Senour Dealer-Agent.

Jot down a line for our proposition.

The family that uses Lowe Brothers Paints are ready spenders

They are people of judgment. They are observant. They have inquired carefully and know that Lowe Brothers' High Standard Paints spread better and last longer than any other kind they can buy.

Our big, co-operative advertising campaigns are always hard at work bringing just this kind of prosperous, hard-headed paint users into our dealers' stores. There isn't a paint user or "paint prospect" in any square yard of territory served by any of our dealers, who isn't reached again and again by our unusual publicity methods.

We certainly have the Paint—the Publicity—the Service. Do you want them to make more money for you than you ever dreamed of getting from your Paint department? If so, write us for particulars to-day.

OPEN HEARTH STEEL

Unrivalled in strength and finish

The "Hercules"
is top-notch in
Step Ladder
construction

The wide top, sides, steps and all stock entering into it is carefully selected from the finest material.

The nails which pass into the end of each step are firmly held in place by a patent malleable iron washer, an exclusive feature of great value and importance when durability is considered. Iron rods connecting these washers form with a small block under the centre of each step, a truss support, the tension of which can be readily adjusted.

The lock used is the celebrated "Boyer's Faultless," another exclusive feature of much merit.

The ears are of malleable iron, and all braces are bound with steel angles.

It is the strongest and most perfect ladder made.

THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

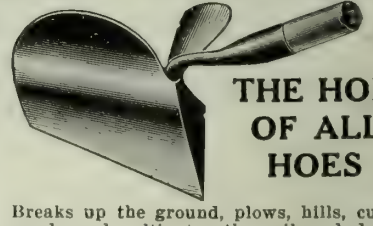
Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

If you have a business to dispose of, or are in need of efficient help, try a Want Ad. in Hardware and Metal, and let it assist you in filling your needs.



THE HOE OF ALL HOES

Breaks up the ground, plows, hills, cuts weeds and cultivates the soil and does the work in half the time, and better, easier and more satisfactorily.

Manufactured by

SCHOENER MFG. COMPANY

Are You Getting the Benefits of "Home Comfort" Popularity?

The **"Home Comfort"** Malleable Steel Range has made good for 20 years and won a host of friends—a total of 50,000 are using the **"Home Comfort"** Range and a great momentum has been given the sales by recommendation from these satisfied users.

"HOME COMFORT" is an economy. It saves fuel, makes baking a pleasure and is very easy to manage. It is a woman's ideal — built largely on suggestions from the women themselves.

Selling **"Home Comfort"** is a pleasure and profitable, too! Why not be the agent for your community?

Let us send you particulars.

The Man with a Horse

You can interest every horse-owner if you ask him to look at the Ventiplex Line — housings, sweat pads, and Saddle blankets. He will perceive the value of these things to him, and out will come his money to possess them. Every horse owner in your community ought to be worth at least a dollar profit to you each year. So count up the number of farmers, teamsters, delivery men and people owning horses for pleasure in your territory; and then reckon the income that you can obtain from selling them a single line.

"Comfy" Weather Strip

This is the season for getting things snug for the winter. Weather Strip is selling freely right now. Supply customers with "Comfy" brand—put up in 1 lb. cartons (39 feet). Good profit maker. **Order without delay.**

Burlington Windsor Blanket Co., Ltd.

793 King St. W., TORONTO, ONT.

Condensed or "Want" Advertisements

There is always someone, somewhere, who is looking for just such a proposition as you have to offer—and it is more than likely that he is a hardwareman and a subscriber to HARDWARE AND METAL. Let an advertisement on this page bring you together.

RATES (payable in advance): 2 cents per word first insertion, 1c per word subsequent insertion. An additional charge of 5 cents for each insertion is made when Box Number is required. Each figure counts as one word.

BUSINESS CHANCES

LET JOHN NEW, 154 BAY STREET, TORONTO, sell your business. (4)

BUSINESS WANTED

WANTED—HARDWARE BUSINESS. REply, giving turnover and complete information. Box 423, Hardware and Metal.

ARTICLES FOR SALE

FOR SALE—EIGHT-FOOT BROWN-BOGG Iron Brake, good as new. McMurty Hardware Co., St. Thomas.

AGENCIES WANTED

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

STORE EQUIPMENT FOR SALE

YOU MUST HAVE A LOT OF OLD FIXtures around the store which are no longer of any value to you, but would prove very useful to someone else in the hardware business. Find a purchaser for this equipment through an advertisement on Hardware and Metal's Condensed Ad. Page.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

PAPER BALERS

THERE IS MONEY IN USING AND SELLing the Jewell Paper Baler. It is the only low-priced, efficient baler on the market. Every hardware store should use one. Splendid side line for one line traveller in each territory. General Sales Co., Stair Bldg., Toronto.

SITUATIONS WANTED

EXPERIENCED SALES MANAGER wishes similar position or assistant. Eighteen years' experience in paints, oils, glass, varnishes and hardware. Have special training in mercantile credits. Excellent connection in Western Canada, and can get results. Reply Box 421, Hardware and Metal.

HARDWARE SPECIALTY SALESMAN with excellent connection in Ontario desires road position. Has "done his bit" in France, and while now medically unfit for service is perfectly fit for certain duties. Box 420, Hardware and Metal.

THE "CHANGING TIME" IS GETTING near. There are many firms who have vacancies on their sales or office staffs to fill during the next few months. If you want to qualify for some of these vacancies, tell your story briefly in a Condensed Advertisement, and try it out in Hardware and Metal. A twenty-five word advertisement may land you a permanent position with splendid prospects.

SALESMAN WANTED

WANTED — HARDWARE SALESMAN with not less than 5 years' experience; good stockkeeper and window trimmer; good opportunity for the right man. Apply, with full particulars, to Box 419 Hardware and Metal, Toronto.

MISCELLANEOUS

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited. Room 314, Stair Building, Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada. (tf)

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fenson hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fenson Elevator Co., Toronto.

Want Ads.

Try it out

If you want a buyer for your business, or have a situation to fill or want a situation, send us a Condensed Advertisement. There is someone who is looking for a proposition such as yours. For two cents a word you can speak across the continent with a condensed advertisement in this paper.

SEPARATE SEALED TENDERS, addressed to the undersigned, will be received at this office until 4.00 P.M., on Monday, February 12, 1917, for the supply of: "Brooms and Brushes," "Chain," "Coal," "Hardware," "Hose," "Oils and Greases,' "Packing," "Paint and Paint Oils," "Manilla Rope," "Wire Rope" and "Steam Pipe, Valves and Fittings," for the requirements of the Departmental Dredging plant in Ontario and Quebec during the fiscal year 1917-18.

Each tender must be sent in a separate envelope and endorsed: "Tender for Hardware, Ontario and Quebec," "Tender for Chain, Ontario and Quebec," etc., etc., as the case may be.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures. These forms can be obtained at the Department of Public Works, Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, for amount stated in form of tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the contract. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, January 17, 1917.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

HARDWARE AND METAL

Vol. XXIX No. 5 — PUBLISHED EVERY SATURDAY SINCE 1888 — Feb. 3 1917

THE MACLEAN PUBLISHING COMPANY, LIMITED

PUBLICATION OFFICE: TORONTO, CANADA

1917—NEPONSET YEAR

This year will be remembered among the hardware and building trades as Neponset Year. We are out to shatter all records!

NEPONSET

Paroid ROOFING

In the past year, with the co-operation of dealers all over the Dominion, Paroid definitely took its place as the greatest of all roll roofings. This year we have plans completed to capitalize the fact with the biggest and most aggressive campaign ever attempted in Canada for roofing materials.

What Will You Make Out Of It?

The demand for Paroid comes through dealers. You will profit by our expenditure just in proportion to the energy you exert in co-operation with our efforts. Stock up ready for the record-breaking year.

Keep a roll of Paroid outside your store!

NEW DEALERS Although the Dominion is practically taken up by live dealers, certain territories are still available for the right kind of merchants. Immediate application is advised.

BIRD & SON, Dept. V.
Hamilton Ontario

The Largest Manufacturers of Roofings, Wall Boards and Roofing Felts in Canada.

LOOK FOR THE PAROID ROLL

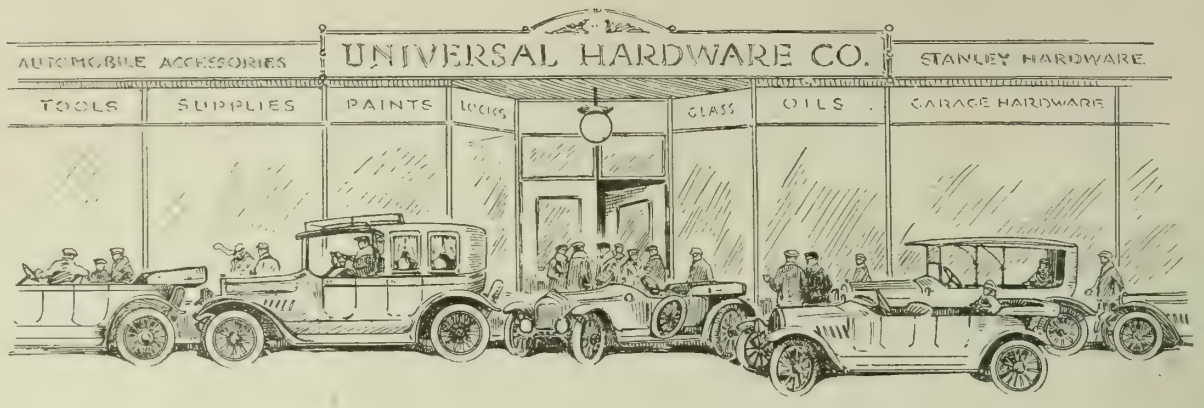
In addition to our Paroid advertising, we will advertise widely "The Greatest Development of the Twentieth Century."

NEPONSET TWIN SHINGLES

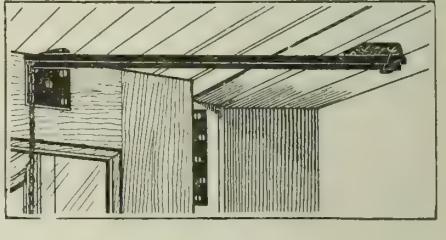
Note the size of a TWIN Shingle as compared with a hammer.



A ROW of automobiles in front of your store is the best proof that you are doing business with a desirable class of customers. You will attract the people who ride in automobiles if you keep the sort of merchandise that appeals to them. A convenience that is of interest to every motorist is the

Stanley Garage Door Holder
No. 1774

For this device there is a rapidy growing demand, as Stanley advertising is daily bringing it to public attention. And your first sale of the Stanley Door Holder will bring you others, for its value is instantly apparent to everyone who sees it.



When a garage door equipped with the Holder is swung open, it catches automatically and remains securely locked in place, so that it cannot slam against the incoming or outgoing car. A pull on the chain leaves it free to close.

STANLEY Garage Hardware will please your most exacting customers. It is strong and substantial, smooth in operation, and handsome in design and finish. Though selected by those who are able and desirous to buy the best, it is within the means of most garage builders. And, at the same time, it allows you a handsome profit.

If you are not yet a Stanley Garage Hardware Dealer, write for Garage Hardware Catalog, R—21 and information about selling helps.

Stanley Garage Hardware is a profitable line for you to purchase.

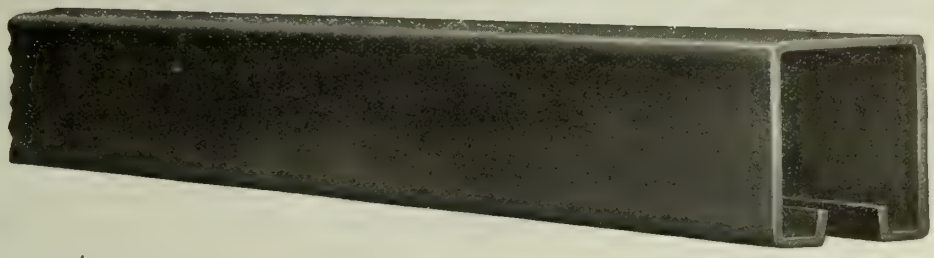
That Good RICHARDS-WILCOX Trolley Track

"The Track that made Sliding Doors PRACTICAL"



PICK up a length of it and look it over carefully. Run your eye down one side and then down the other side, and see how straight it is.

Look through it and see how straight the runway is. See if there's any twist or bend or warp in it.

Now put a Champion 321 Hanger in it. Observe that the only point of contact is right on the tread, where the machined wheel runs on a flat surface, eliminating all friction.

It is the only track on the market in which the wheels cannot scrape the side of the box, or the pendant scrape the flange.

There are cheaper hangers than "R-W"—there are none so good.

When a farmer buys a trolley hanger, he thinks he is buying the best. Sell him THE BEST rather than the second best.

WHEN YOU CAN HAND OUT A HANGER AND SAY, HONESTLY, "JOHN, THAT'S THE VERY BEST HANGER I KNOW OF," THE SALE IS HALF MADE.

Look for the name on every length of track.

"You'll use a Disston Saw, too, someday"

Saws and Tools That Last For Generations

It takes a mighty good saw to serve two or three generations of mechanics, yet there are numerous cases where a Disston Saw has passed from father to son more than once in its lifetime. This quality of great durability is only one of the many that attest the wonderful superiority of Disston Saws.

The reputation which has been built up in the past 73 years for these saws is shared by other Disston products, for

Disston

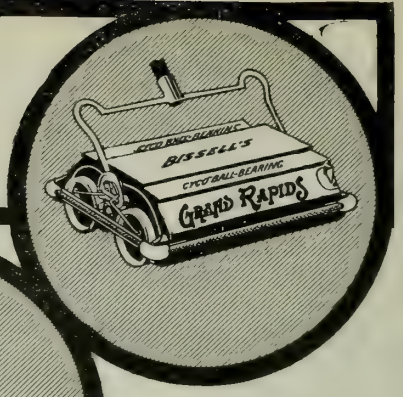
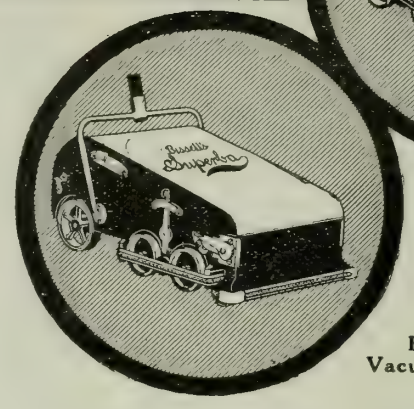
Preferred Stock
In the Cleaning Device Market



Bissell's Carpet Sweeper



Bissell's Vacuum Sweeper

Notwithstanding the flood of cleaning devices which have been offered the public in the last decade, Bissell machines have easily maintained the supremacy established during 40 years.

The Bissell Carpet Sweeper is just as popular as the day it was introduced. It is just as much valued by intelligent housekeepers as in the days when it was the only "sweeper" in existence.

Bissell Vacuum Sweepers, introduced more recently, have been a phenomenal success. They are efficient, convenient, and built for a lifetime of use. They are worthy of the famous name

BISSELL'S

Therefore these two Bissell machines are preferred stock with all experienced merchants. You know from experience how the name is valued by the purchaser, how the price is standardized by constant advertising, how the profit is always assured.

You know that for these reasons the Bissell outsells all competing machines. That it keeps you clear of the price wars which continually rage in the cleaning device market—wars which rob the retailer of his legitimate profits.

Because of these exclusive advantages most dealers specialize on the Bissell line.

The Bissell line has been manufactured for over forty years in a factory devoted entirely to the making of cleaning devices. If you need further information, address

You Can Sell Every "1900" You Stock

There are thousands of women who have read our advertisements for years but have never had an opportunity to examine our Washing Machines.

Put at least one or two "1900" Washers "up front." The moment your customer catches sight of them she will be interested. She will look them over—a little sales effort from you—and she buys.

Keep a "1900" Washer always in sight.

There's a special line of profitable business in your town in Motor Washer, Wringer, and Ironing Outfits that we doubt if you have thought of. Every "1900" dealer should ask us for information on this idea.

The "1900" Line

includes 3 styles of Hand Power Washers, 2 styles of Water Power Washers, 2 styles in 2 sizes each of complete Motor Washer and Wringer Machines to operate by Electric Motor or Gasolene Engine—and a full assortment of sizes and grades of superior, beautifully finished hand and power wringers.

The "1900" line offers the hardware merchant a splendid opportunity both in generous profit on the individual sale and in resulting business.

If there is not a live "1900" dealer in your town, there may be a chance for you. Write

BAILEY IRON PLANES

THE STANDARD FOR MORE THAN FIFTY YEARS

Made by the most skilled Plane makers in the world

The average Carpenter invariably demands a *Bailey*.

He learned his trade by their use as did his father before him. You never have to "carry over" a *Bailey Plane*. They are always in demand and constitute one of the most staple articles a Hardware Dealer stocks.

Improvements are constantly being made in their manufacture, tending to make them daily more popular and more sought after by discriminating Carpenters and Mechanics.

If you do not carry these Planes, arrange to do so at once. You will be surprised how your Plane sales will increase.

Faultless Caster Company

EVANSVILLE, INDIANA

Advertising a Labor-Saver

The merchant's greatest labor-saver is not necessarily an adding machine. It is more likely to be advertising.

A great factor in the cost of goods is the time it takes to move them. *Advertising and trade-marks,* working together, are the most efficient movers of goods—consequently the greatest reducers of selling cost.

The producer who places his trade-mark on his goods and advertises it nationally, is so sure of their quality that he is willing to stand the full force of possible complaints.

The whole tendency of trade-marks and advertising is to raise qualities and standardize them, while reducing prices and stabilizing them.

Walter J. Green is a Shrewd Buyer

ASK any wholesale house selling to Walter J. Green, or any traveller calling on him, the reason why this retailer is prospering so visibly, and you'll hear some of them say: "He is the best informed man we know of. That man reads and thinks. His world of interest is a good deal larger than his own town, or his own store. He seems to have eyes that can see far into the future, and he buys accordingly." Isn't that a fine tribute to Walter J. Green? It would be a fine tribute to any man.

▫ ▫ ▫

When H. S. Holt, President of the Royal Bank of Canada, gave his address at the recent annual meeting of this institution, he said:

"The proper course is to conserve the unusual profits and accumulate working capital, the lack of which is so prevalent and so detrimental to the general interests of the manufacturer."

Now Green, while not a manufacturer, has perceived "the proper course," and is conserving "unusual profits"—this by investing them in good liquid securities. Whenever he has $100 or so to spare he buys a bond yielding from 5 to 6%—something which can be turned into cash quickly, or deposited with his banker as security for a temporary loan.

But he could not do this intelligently had he not for a long time made a careful study of investment conditions, and of particular securities, through a paper like The Financial Post. He would know the history of the company over a period of years. He would know how its business is going now. He would thus be well informed as to the safety, yield in interest, marketability, etc., of the particular securities he has in view.

Also he makes use of his privileges as a subscriber to The Financial Post to consult with the Editors on matters pertaining to his business, his money investments, the market tendencies, and so on.

▫ ▫ ▫

Why not be a Walter J. Green? Why not become a regular reader of The Financial Post?

The Post is a weekly survey of general business conditions in Canada—a review of matters relating to Investments, Securities, Insurance, Municipal Finance, Bank Clearings. It is not edited with a view to interesting bankers, professional investors and brokers so much as the ordinary business man.

If you could spend an hour each day discussing current events in the business world with the leading manufacturers, bankers, merchants, financiers, lawyers, etc., you would get somewhat the same information as the Post gives each week.

▫ ▫ ▫

The Post, read regularly, makes the merchant enter confidently a world that is all about him always. A world which the average man does not enter—to his own great loss.

▫ ▫ ▫

Sign the order form herewith and mail, and thus take the first necessary step in securing this service, or we will send you sample copy on request.

PUSH TOOLS

with the Millers Falls Selling Service

Make tools an important part of your Spring drive. They mean a good profit in themselves and lead to big business on other things.

We furnish co-operating dealers with handsome window display fixtures that are as handsome as any that can be bought—with window suggestions that apply to your whole business—with advertising matter that features your whole store and with merchandise selling suggestions that are worth thousands of dollars to any live dealer who takes advantage of them.

Millers Falls tools have a reputation of leadership that makes them a great line to sell even without our Selling Service. Together they make a combination that means a big tool selling success.

Whether you sell few tools or many—buy direct or through a jobber—you ought to know about the Millers Falls Service proposition to dealers.

Send for book describing our Dealer Service and we will include with it our hand book "How to Sell Tools" and sample copies of our monthly dealer paper the "Star" that is jammed full of selling ideas and suggestions.

MILLERS FALLS COMPANY

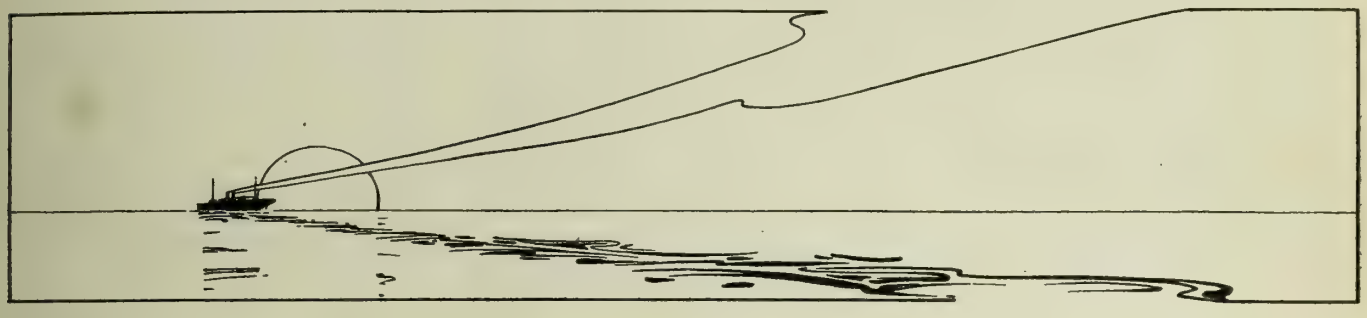
Vol. 29 TORONTO FEBRUARY 3, 1917 No.



Over Billion Export Trade in 1916

The Exports for Year 1916 Almost Tripled Those of 1914 — Manufactured Products Head List of Exports—Agricultural Products Second on List.

GOVERNMENT figures issued this week show that Canada's export trade for 1916 reached a figure considerably over the billion mark.

Total Canadian trade for 12 months ending December, exclusive of coin and bullion amounts to $1,879,171,893. This shows an increase of $775,135,707 over the total for 1915, and of $969,537,072 over the total for 1914.

Total trade for the month of December, 1916, amounted to $200,548,572, an increase of $61,263,248 over the corresponding month of 1915.

Exports Reach High Figure.

Total exports of Canadian produce for the year 1916 amounted to $1,091,706,403, an increase of $477,576,558 over the total exports for the year 1915, and an increase of $712,410,549 over exports for the year 1914.

In addition to the foregoing there were exports of foreign produce amounting to $20,738,599, and of coin and bullion amounting to $196,468,416. Exports of Canadian produce for the month of December, 1916, amounted to $130,037,174, as against $92,171,402 during December, 1915, and $37,193,609 during December, 1914. Canada's exports for 1916 almost tripled those of 1914.

Manufacturers Head the List.

The value of manufactured products exported in 1916 greatly exceeded the value of agricultural products. Exports of manufactures were valued at $440,477,143. Exports of agricultural products were valued at $364,605,703. Animal produce came next, valued at $117,909,753. Other products exported were valued as follows: the forest, $55,224,919; the fisheries, $24,349,835; the mine, 81,281,244; miscellaneous, $7,857,806.

The Imports.

Canada's imports of dutiable goods for 1916 amounted to $422,173,311, as compared with $261,842,472 in 1915, and $302,516,964 in 1914. Imports of free goods in 1916 were valued at $344,553,580, as compared with $261,842,173 in 1915, and $302,516,964 in 1914. Duty collected in 1916 amounted to $139,002,178, compared with $91,907,722 in 1915, and $81,771,651 in 1915.

Heavy Exports of Steel.

Figures are not yet available showing the value of various products listed under the head of manufactured products. Manufacturers of iron and steel, and more particularly the latter, will form a very large proportion of the exports of manufactured products. The export demand for steel and steel products continues to be good, and some firms have had to turn down inquiries.

Export Trade is Heavy.

An official of one of the largest steel companies in Canada stated this week that the export demand is as great as at any time since the outbreak of the war. His company did some export trade prior to the war, but during the past 2½ years the company's export trade has increased tremendously, and many new connections have been formed. It is said that the company's products compare very favorably with, and in many cases excel in quality, products of a similar nature made in other countries. One of the chief difficulties has heretofore been that of taking care of the increased demands from abroad. Some manufacturers have had to turn down many inquiries from abroad, but this is a condition which was expected and has to be faced at a time like the present. One thing is certain, however, and it is that Canadian manufacturers have grappled most effectively with the export situation, and have handled an amount of export trade which, prior to the war, would have been thought impossible.

The railway tie-up in Canada has been a handicap to manufacturers. For several months transportation problems have confronted manufacturers at every turn. The situation has been a trying one, but with

the curtailment of passenger service there should be an almost immediate improvement in the freight situation.

C.P.R. Purchases For Export $24,000,000 for 1916.

Purchases in Canada on British War Office account by the Canadian Pacific Railway amounted to $24,000,000 in 1916. This compares with a total of $26,000,000 for the 18-month period, from May 1, 1915, to Nov. 1, 1916. Although, as a general rule, the purchases have been pretty equally divided from month to month, the relative increase for the year is significant.

Of the $24,000,000 total $20,000,000 is covered by purchase of foodstuffs of all kinds other than flour; none of the latter having been bought through the C.P.R. This account includes the several cargoes of Canadian refined sugar that were purchased last summer.

Miscellaneous manufactures of iron and steel accounted for $1,500,000, and miscellaneous supplies, including rubber boots, rubber hose, leather shoe packs and sundry articles, for another $1,500,000, while cotton and woolen goods purchases totalled $1,000,000. The only gain for the year occurred in purchases of foodstuffs.

Purchases on this scale are understood to be still under way and if the past rate of gain is maintained, further increases may occcur. A comparison of the last published figures with those just given out follows:—

	May, 1915 to Nov., '16	Jan. 1 to Dec. 31, '16
Cotton and woolen goods.	$ 2,550,000	$ 1,000,000
Foodstuffs	16,200,000	*20,000,000
Sugar	2,600,000	.....
Manufacturers of iron and steel	2,400,000	1,500.000
Miscellaneous supplies...	2,250,000	1,500.000
	$26,000.000	$24,000.000

*Including sugar.

Canadians After Trade.

Many Canadian manufacturers, whose business heretofore has been confined to Canada, are particularly desirous of entering foreign markets. Not a few manufacturers created their first openings in foreign markets during 1916. That the buyers in foreign markets are interested in Canadian manufactures is quite evident by the many inquiries being received in this country.

Goods Canada Can Export.

Following are among the products which Canadian manufacturers of hardware and allied lines are in a position to export:

Brass valves; ships' pumps; locomotive specialties; fire hydrants; castings (brass, bronze, copper and aluminum); special castings (all metals); steel chain; steel chain specialties; coil and machine chain; halter chain; cow ties; heel chains; trace chains; logging chains; electric welded chain; ornamental iron gates; coal and wood ranges; shoe polish; silver polish; iron and steel hames; saddlery hardware, steel and malleable, such as rings, dies, bits, buckles, snaps, etc.; wagon and carriage hardware; automobile accessories, including bumpers, auxiliary seats, tire holders, tire irons, etc.; special forgings, fly swatters; flour sifters; fly traps; bread mixers; lunch boxes; galvanized pails; tinware; steel enamelled wares; pieced tinware; metallic ceilings; wall material; metallic shingles; metallic sidings; farm and poultry fence; ornamental iron fencing; mantles and grates; boys' express wagons; boys' and girls' sleds; kitchen cabinets; lawn furniture; folding chairs; oil cake; oil cake meal; lanterns; sheet zinc; plates; stoves; washboards; extension ladders; shoofly rockers; blacksmith's forges; blowers; hand drills; rotary wing pumps; iron and steel drills; blackmith tools; linseed oils; oxides; dry colors; mixed paints; varnishes; bar iron; bar steel; wrought pipe; wire nails; annealed wire; galvanized wire; barbed wire; tinned mattress wire; horse shoes; bolts and nuts; plumbers' supplies; safety razors and blades; painters' brushes; cotton rope; wrapping twine; awning cord; wire fencing; wire gates; hack saw blades; cast iron enameled goods; collar pads for horses; working men's cotton gloves; hand saws; files; circular saws for wood and metal; band saws; band re-saws; paper trimming knives; wood-working machinery; knives; narrow band saws; galvanized sheets; lawn mowers.

Canadian Hardware for Russia

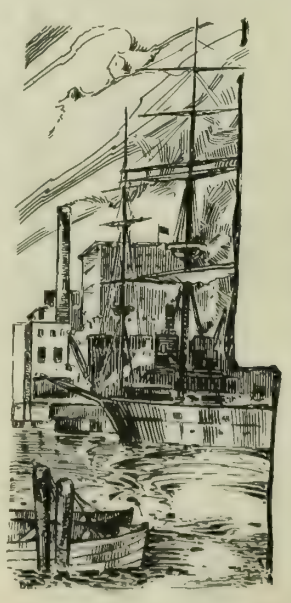
According to the Canadian Trade Commissioner in Russia in Asia, L. D. Wilgress. Imsk, Siberia, there is an opening for Canadian hardware in that country. Prior to the war the hardware trade in Siberia was catered to largely by Germany. The manufacturers of Great Britain, the United States and other countries were practically only able to compete with the Germans in a few special lines, such as tools. Dealers are now seeking alternative sources of supply to replace the goods formerly imported from countries with which Russia is at war. In this connection the manager of one of the principal houses distributing hardware in Siberia stated that they would willingly give trial orders to Canadian firms able to offer articles suitable to the requirements of the market. The stocks of nearly all kinds of hardware are very low and high prices, it is said, are being paid. As an example it may be mentioned that wire nails which formerly were sold wholesale for 3 roubles (rouble is about 50c.) a pood (36 pounds) now bring from 20 roubles or more a pood, and retail at from 1 rouble to 1.25 rouble per pound. An opportunity is, therefore, presented for the execution of trial orders after the manner described in the preceding paragraph. Canadian manufacturers of the smaller kinds of hardware which are adapted to consignment by parcel post can in this way get their goods known and establish connections which would be sure to prove valuable when normal trade is resumed after the war.

A list is submitted herewith of some of the principal lines of hardware which appear to present openings for Canadian manufacturers sending trial shipments by parcel post under the present difficult conditions of trade. This list has been prepared after interviews with the managers of leading firms distributing hardware in Western Siberia: —

Articles of Hardware Required.

Bell pushes, bolts and nuts, buckles, builders' hardware of all kinds, burners for kerosene lamps, drills, electric light fittings, enameled ware, files, flasks, flasks for hot water, hair clippers, hammers, handles for doors, hinges, hooks for clothes, lamps, lanterns, nails, wire, pulleys, pumps, hand; radiator fittings, razors, saw blades for frame (buck) saws, scales, screws, shovels, skates, tools of all kinds, wire, wringers, clothes; valves.

Most of the products enumerated in the foregoing are made in Canada, and are made in a large variety of designs. The quality of the goods in most cases is excellent. Whether or not the designs would appeal to, or meet the requirements of, the Russian trade, can only be ascertained by arranging to have samples submitted with prices, terms, etc.



The necessity for Canadian manufacturers adapting their products to the requirements of the market was emphasized by the leading hardware dealers in Omsk. The willingness of German firms to meet the wishes of customers contributed very largely towards their success in securing so large a share of the hardware trade in Siberia. German travellers would personally canvass the territory and take away with them samples of the kind of articles required.

Siberia is principally a peasant market, and in order to meet with a ready sale goods must be cheap in price and adapted to

the purpose for which they are designed. This migth prove a handicap to some extent to Canadian manufacturers, because the latter pay more attention to quality rather than to cheapness. Germany prior to the war, turned out many lines of cheap goods, in the many instances the goods were mighty expensive even at the low price.

Canadian Trade in South Africa.

During the year 1915 imports of Canadian goods into South Africa increased almost a million dollars.

The imports into the Union of South Africa in 1915 were valued at $142,149,974, as compared with a valuation in 1914 of $152,436,604. In 1915 the British Empire was credited with supplying goods of a value of $98,806,200, or 69.5 per cent. of the total imports, and foreign countries goods of a value of $43,343,774, or 30.5 per cent. of the total imports.

Imports of Canadian goods into South Africa showed an increase to $4,759,985 in 1915 as compared with $3,791,503 in 1914.

During the year 1915 the imports of the following articles from Canada were greater in value than similar imports from the United States, viz.: butter, calcium carbide, cheese, fish, glycerine for making soap, oatmeal, printing paper and wheat flour.

During the year 1915 the imports from Canada were as follows: Agricultural implements, $117,107, decrease $84,198; agricultural machinery, $21,500, decrease $70,914; bacon and hams, $85,575, increase $24,182; binder twine, $32,519, decrease $54,375; butter $107,587, increase $107,582; calcium carbide $205,256, increase $94,092; cheese, $135,171, increase $45,196; fruits and nuts, $12,814, decrease $8,269; furniture, $52,453, decrease $1,395; machinery, n.e.s., $17,038, decrease $2,755; milk, condensed, $11,480, increase $11,480; motor cars and parts, $703,457, increase $81,852; nails and screws $49,274, increase $49,138; oatmeal $98,817, decrease $3,115; printing paper, $274,470, decrease $13,933; paper, other, $13,184, increase $10,303; pipes and fittings, $9,782, increase $8,093; preserved fish, $199,830, increase $16,347; rubber tires, $17,728; tools, $10,765, increase $6,682; preserved fish, $199,830, increase $16,347; rubber tires, $17,728; tools, $10,765, increase $6,682; preserved fish, $199,830, increase $16,347; wheat, $525,643, increase $208,818; wheat flour, $1,671,169, increase $542,001; wood and manufactures, $289,553, decrease $19,762.

It will be noted in the foregoing that increases have been recorded on most hardware lines.

An Explanation of Exchange

How Payments and Collections Abroad Are Handled to Avoid Sending in Gold—How Exchange Rates Are Governed—Keeping up Sterling During War Times.

THE manufacturer who is interested in export business faces a number of more or less complex problems, not the least of which is the question of exchange. When he comes to collect on the goods that he sells abroad the same question comes up. As a matter of fact, contrary to general opinion, there is nothing difficult in understanding the exchange problem. It is simply the payment of an obligation in one place by the transfer of a credit from another. If an industrial corporation has purchased raw materials, wood for instance, in Montana or in Australia, it owes money or its equivalent for these materials and sooner or later it will have to pay. It can pay its obligations by contractng with a bank to ship gold. But that is a costly procedure. It pays to purchase the obligation of a dealer in Montana or Australia as the case may be, and send it to the creditor to defray the indebtedness. It is the profitable practice to cancel one debt against another, thus discharging the obligation without the actual transfer of money.

Inland Versus Foreign Exchange

Inland or domestic change, to which the same general principles apply as to foreign exchange, represents the transfer of funds between the different points in the same country, generally by means of drafts or checks. Inland exchange operates as a clearing house between different sections of the same country.

Keeping in mind the expense of shipping gold, let us follow the creditor through his transactions. A Toronto manufacturer has sold a firm in Saskatoon a bill of goods, agricultural implements, for instance, and he wants the money owed him. He, therefore, draws upon the Saskatoon customer, or to put it in another way he sells the bank his credit. But should Saskatoon firms owe a good deal of money in Toronto more than Toronto firms owe Saskatoon, the banks would have a scarcity of Saskatoon funds and the draft would cost more than if debts between the two cities were equal, or if Toronto owed more than did Saskatoon.

In Canada the rate for inland exchange is generally very low—much below the cost of shipping the actual money. This is due to the branch banking system and the consequent fluidity of our credit. Each bank through its branches is generally able to supply the bulk of its own domestic exchange requirements and it is only in the case of special transactions of large amounts that outside purchases or sales are made. The maximum discount or premium between Montreal and Toronto on large tranfers between banks, never exceeds 15 cents per $1000. Otherwise it would be cheaper for a bank to remit large Dominion notes by registered mail insured. This is an important fact for the treasurer of an industrial corporation to know, else the firm might be charged more for a draft than the bank under the circumstances needed to have assessed its customer.

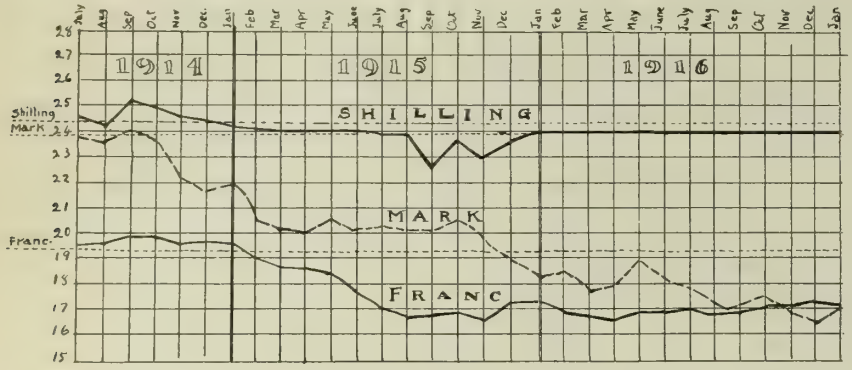
Exchange Between the United States and Canada

It must be evident that inland exchange is very simple because it does not involve quotations in different monetary systems. For this same reason the exchange question between the United States (New York) and Canada is a relatively simple one. A shipment of gold can be made from New York to Toronto at the rate of 70 cents per $1000. Of course the volume of business is very large, for Canada has been buying heavily in the United States.

Until 1912 New York funds were generally at a slight discount in Canada notwithstanding the fact that Canada bought more from than she sold to the States. This strange condition was due to the fact that British capital was paying for Canada's surplus imports from the United States. As a rule, ordinary business can be conducted without resorts to gold shipments, but for the reason that Canada has no exchange centre of her own and conducts her exchange relations with Europe through New York and, since there are sharp fluctuations monthly the subject is important.

On this last point it is important for an industrial treasurer to know that at the end of each month Canadian banks try to convert their surplus funds accumulated in New York into Canadian funds. New York funds go to a discount and for a day or two there is an opportunity to purchase New York funds

in Montreal to advantage. As regards Canadian investments in foreign securities something may depend not only on the exchange rates between New York and, say Russia, but also between Canada and New York.



This chart shows the trend of the mark, franc and shilling since July 1, 1914. *The shilling is worth, at par,* 24.33 *cents; the mark* 23.81 *cents, and the franc* 19.3 *cents.*

During the first few months of the War, Canadian exchange rates were especially favorable, but towards the end of 1914 and throughout 1915, they were adverse until the Dominion loan was floated in August of 1915.

The Par of Exchange and Gold Points

While it is now apparent that heavy buying or a small supply of London funds in New York will increase the rates for sterling, that is, will cause the New York buyer to pay more than $4.866 per pound, Sterling, it does not follow that the price will go up indefinitely.

The price can only rise to a point where it would be more advantageous to buy gold, ship it abroad and have it made into golden currency of the country to which it is owed. It can fall only to the extent that it would cost to have it shipped into the United States or Canada. These two points are called the Gold points and, in the case of Sterling funds, are normally $4.845 and $4.887. The par of exchange lies between the gold points at $4.866.

The outstanding feature of the foreign exchanges in 1916 has been the effort of the British Government to keep the pound sterling stable. It ought probably to be said that success in the effort is the really remarkable result. From the first of January, when there were some rigid fluctuations at the end of a gradual and regular improvement from the time sterling was about $4.60, the quotations have been pinned very closely to $4.76 or thereabout. This represented a discount of about 2 per cent., or a little more.

Mobilizing to Support Sterling

The chief method used by Great Britain was one begun in December, 1915, when arrangements were completed by which a syndicate of American bankers granted a group of eight leading joint stock banks a credit of $50,000,000 to facilitate private transactions. This credit was secured by a deposit of British Government securities. This provided payment for about $50,000,000 of American exports.

Furthermore, the British Government began as early as August, 1915, to mobilize the holdings of French and English investors in American securities in order to prepare for the inevitable secured loan to be issued in America. After several appeals to patriotism, the British Government resorted to taxation as a means of bringing out the securities, though even this scheme has been none too successful. The sale of securities by private investors themselves was not prevented—indeed it was even encouraged, as it obtained the same end—namely, means of payment for American munitions and supplies.

Russia and Italy employed about the same methods as France and Great Britain to maintain exchange, though not with as great success. In fact at the end of the year roubles are at a discount of 41.3 per cent. and lires at 31.2 per cent.

They have raised loans chiefly from the banks for payment for munitions and supplies though some of the internal Russian loan was sold in America and the Russian Government sold $50,000,000 of an external loan in America.

Marks and Kronen

The German Government and German financiers have had to face the decline in marks, a sharp decline from April to the present time when they are down to 66.12½ representing a discount of 24.4 per cent. against a discount of only 2.2 per cent. for sterling and 12.5 per cent. for francs. Exchange with Vienna is at a discount of 38.3 per cent. Efforts have been made in Germany as in Russia to fix exchange rates arbitrarily, but without success. This may steady the rates somewhat, but it does not raise the rate at a time when Germany cannot settle her foreign debts with gold or by exporting merchandize.

The Canadian Situation

Exchange between Canada and New York has been more irregular than between Great Britain and New York in 1916. After the New Year, New York funds went to a premium in Canada ranging as high as ¾ per cent. in February. This indicates that Canada owed New York money, and those who wished to pay bid up New York funds. Some relief from this situation was secured by the sale of the $75,000,000 loan in March and from time to time by the sale of municipal and provincial securities. From April 1 to Sept. 1, the rates varied around a premimum of ¼ to ⅜ per cent., but since the movement of the crop set in the rates have fallen to around par., as they did in 1915, and as they usually do.

One interesting feature of the exchange situation—one not generally recognized as an exchange problem— is the fact that the Canadian Government and Canadian banks have helped to finance British war orders in Canada. Since Canada deals in exchange through New York, this helps to maintain pound sterling; otherwise there would be even more London exchange in New York. But it also means that Canada's exchange relations with New York are less favorable than they would be if New York owed Canada for British payments for Canadian supplies. That is, New York funds in Canada are at a greater premium than if New York owed Canada more. This is, however, an advantage to the Canadian exporter, who gets par or more for his British payments. It is a disadvantage to the importer, especially the importer from the United States who has to pay a premium for New York funds. But this obviously has its advantages, an advantage with which Sir Thomas White has not generally been credited.

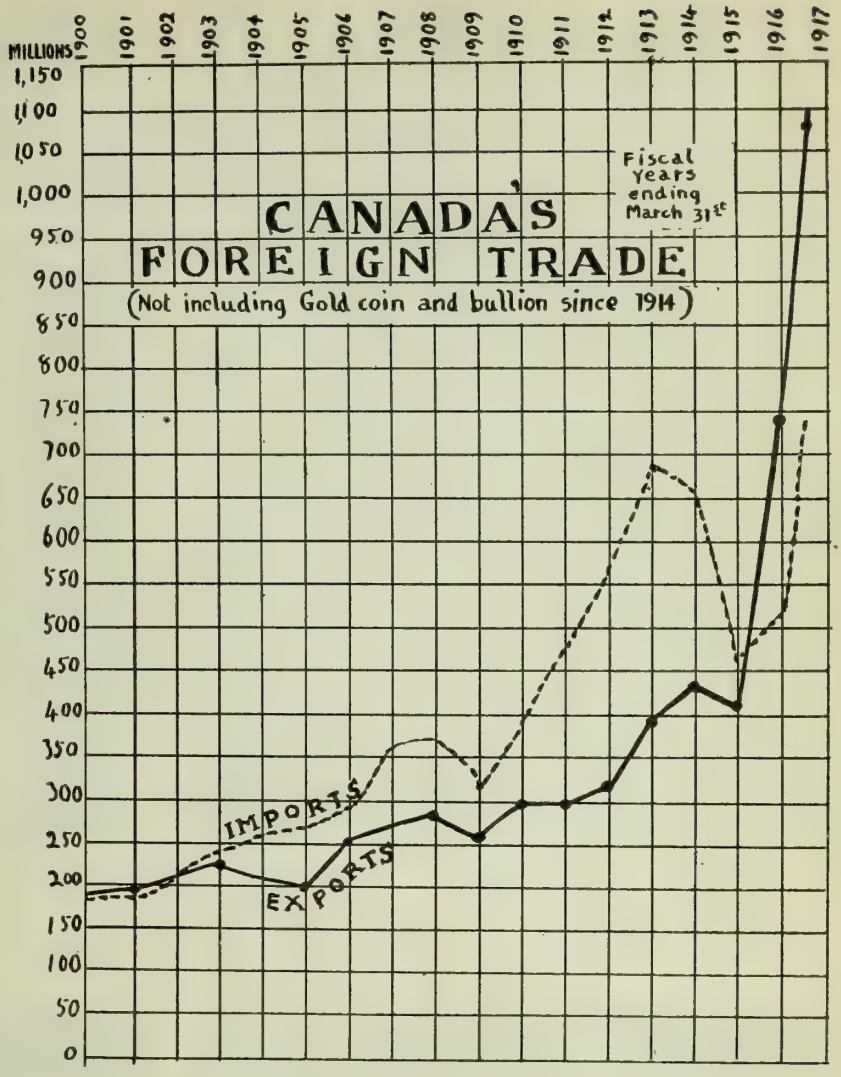
Dollar Exchange

It is important to remember, too, that a year or two ago there was scarcely a market in New York for South American or Russian exchange, and, therefore, if the United States had to pay South America money, it had to buy South American exchange in London, paying for it in sterling— may be at a premium. The greater part of the world's exchange business was done through London. Dollars had to be converted into sterling funds and reconverted into pesos, sucres, milreis, bolivars, etc., and vice versa. This was a costly procedure and a different one. But now since the Federal Reserve Act has enabled American banks to open branches abroad a direct market in South American exchange has developed. To-day New

Yorkers can buy checks on Buenos Ayres without first having to buy checks on London. This is, of course, an advantage for Canadian industrial exporters to South America as well as to Americans. Petrograd exchange is developing similarly, but it will be some time before it will be a broad exchange market. That one has developed at all in 1916 is a significant fact for the future of American and the Canadian export trade.

Future of Exchange

It may be expected that the warring countries will have to put forth additional efforts to support exchange rates. If Germany cannot pay in gold or in goods, fortunately for her she is not able to contract new debts abroad. Financially it is a good thing for Germany in the long run that she cannot import goods or sell securities to advantage abroad. She has to live within herself. It is also probable that Great Britain and France will try to do with less of American goods. Our American neighbors are apt to become increasing sceptical about the security, of British loans, and the supply of American securities will not last forever. In fact, over half have been sold back to America. If the foreign exchanges go against Europe worse than at present, importing from America will become very expensive. It is for this reason that Great Britain is bending every energy to produce as large a proportion as possible of her munitions and war supplies and even food at home.



Canada's Balance of Trade.

This diagram scarcely needs explanation. The war wrought a complete change. It must be remembered, however, that in 1914 *Canada owed* $120,000,000 *of interest annually, and to-day about* $200,000,000; *so that she must have a favorable balance amounting to this before she is paying her way.*

WRITE DIRECT TO PENSION BOARD

The Dominion Government have appointed a Board of Pension Commissioners for Canada with offices in Ottawa. As this board wish to cause as little delay as possible in dealing with communications with regard to pensions, they wish the public to correspond directly with the Board of Pension Commissioners, Ottawa.

A great deal of delay may be caused by communications being sent through other Departments of the Government.

The Patriotic Fund Association and the Military Hospitals Commission have kindly consented to give information and assistance to those wishing to write direct to the Board of Pension Commissioners. These societies have offices in certain localities throughout Canada.

In addition, in order to facilitate the granting of pensions, the Board is opening branch pension offices in Vancouver, Calgary, Edmonton, Regina, Winnipeg. London, Hamilton, Toronto, Barrie, Kingston, Ottawa, Montreal, Quebec, St. John and Halifax. All information with regard to pensions may be obtained from these offices.

WAR PURCHASING COMMISSION

FOUR large volumes are comprised in the report of the War Purchasing Commission tabled in the House of Commons, Ottawa, on January 23, and covering the work of that body from the time of its appointment, up to December 31st, 1916. Details of all accepted tenders in thousands of contracts are given along with all the Orders in Council relating to war purchases.

The commission is composed of Hon. A. E. Kemp, George F. Galt and H. Laporte. In a letter transmitting the report, Mr. Kemp says the duties of the commission include the supervision of purchases for the Canadian forces as well as the naval service and internment operations of clothing, equipment, munitions and supplies of every sort and the supervision of contracts for transportation. Purchases are made upon a tender or competitive basis. Inspection is carried out at the headquarters in Ottawa.

The rates charged for the transport of bodies of troops of 350 or more of all ranks for distances over 100 miles are one cent per mile second-class whether the railway company provides second-class accommodation or not, and one and a half cent per mile first-class. The rates for numbers fewer than 350 and for distances of 100 miles or less are one and a third cents per mile for second-class and two cents for first-class. These rates for freight are on a commodity basis of fourth-class on military equipment. For the transport of troops these are fixed by an agreement in connection with the sailing of each vessel these rates on an average being $61 for officers and for other ranks varying from $33.75 to $36.25, according to the class of vessel.

The hardware and furniture business established in Camrose, Alta., under the name of Burgar, Davidson & Co., and later Hiram Burgar Hardware Co., has been transferred to Messrs. Taylor & Morris, of Edmonton, who has been in the hardware business in Lacombe.

The Making of a Modern Range

An Account of the Varying Processes of Manufacture—How the Different Parts Are Cast, Prepared and Assembled—New Processes in the Manufacture of the Sheet Steel Gas Stove.

Based on a visit of a Hardware and Metal representative to the plant of the Gurney Foundry Company, Toronto.

MOST people are contented to take stoves for granted, using them daily, with never a thought of the many intricate processes that go towards their make-up. The stove is an ordinary article, in some form or other, one of the most common of all the articles that modern thought has produced to add to the comfort of life. It is not, however, one of those articles that naturally encourage a curiosity into the process of production. Yet this process is varied and interesting and full of surprises. Few people would realize the extent of the work required for the production of the ordinary stove, nor the care that is used in its construction.

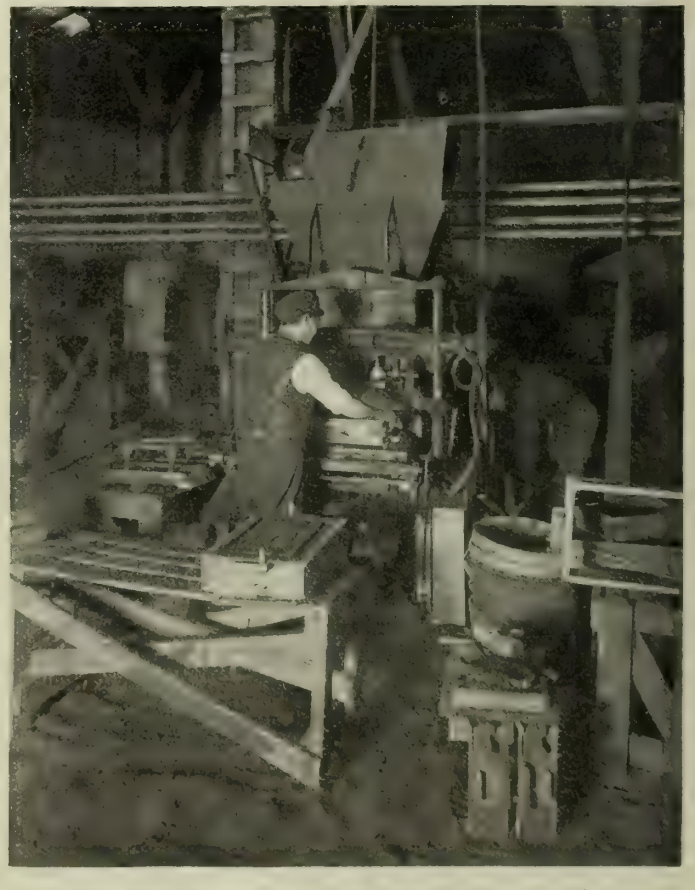
Making Patterns for Patterns

The care begins with the very first department, where the stove patterns are made, and is continued consistently till the stove leaves the shipping room. The pattern room is the first point of interest of any stove factory of any size. Here the patterns for the stoves to be cast are painstakingly fashioned by skilled wood carvers. Formerly these wood patterns were used as the master pattern for all the castings, but wood had one great fault: it is subject to shrinking with much use; the casting would not be quite true to the original pattern, and in just that much the stove fell short of a possibility of perfection. As a result, modernly equipped plants are now only using these wooden models to make a mould for the aluminum pattern, which is proof against these disadvantages. These aluminum patterns become the master patterns from which all the castings are to be made.

How the Moulds Are Made

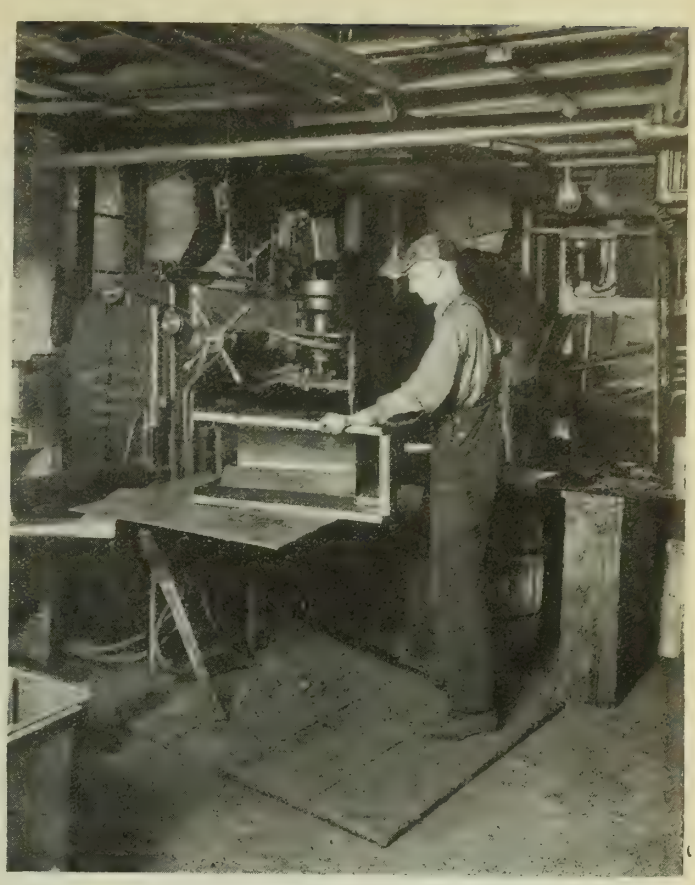
In the moulding shop the large pieces even in the most modern plants are still moulded entirely by hand, as this method has proved to give the most satisfactory results. All the medium-sized and small pieces, however, are moulded on moulding machines that materially increase the speed of the process, though even with these there is a good deal of personal care required. The moulding box is made in two sections, the upper half fitting down over an iron guide, so that both sections may be kept in absolute alignment. One-half of this mould box is filled with fine sifted sand and the pattern placed upon it. The upper half is then placed on and also filled. A lever is pulled and a press catches the open ends of the box, pressing them firmly. At the same time a movement of the operator's knee starts a vibrator going; this vibrates the mould box and loosens the hold of the sand on the pattern. A wooden plug is then driven in to touch the pattern. This opening is made to allow the entrance of the molten iron. When this is done, the upper box is removed and the pattern taken out; the top is placed back again, and the mould form lifted entirely off, leaving a little

Hand Welding—the moulder tooling out irregularities in the mould.



Moulding Machine—used for all small pieces—adds greatly to speed of work.

The Nickeling Vats—removing a finished plate.



Spot Welding—a new machine that has simplified steel stove making.

square mound of sand, that is placed on the ground along with many other rows of similar mounds that await the pouring of the metal.

The larger moulds are made in the same way, except that the work is done entirely by hand, and, consequently, all the operations of pressing the sand must have the care of the moulder; other than this, however, and the fact that with these large castings the mould box is not removed, there is very little difference other than in the time required for each operation.

When the moulds are all set it is time for the pour. The spout of the furnace is opened and the fiery metal pours out, giving a strange mysterious light to the place. Lines of sweating men in heavy leather aprons, carrying buckets with handles five feet long, carry the molten metal to the moulds. The pouring of each mould adds another glow of light to the surroundings. When the last mould has been filled they are opened and the sand distributed. While still hot the neck of iron, that is due to the filling of the pouring entrance, is knocked off with a heavy hammer and the mass of rough castings are left to cool.

Where Bedlam is Let Loose

The next process in the manufacture of the stove takes you to a place of horrible noise. The din is terrific. Imagine thousands of bits of heavy iron being shaken about in iron tubs, and you will have some idea of the din that prevails, for that is about what is happening. When the castings come from the moulds there are many particles of sand adhering to them that have to be removed. In the large castings, like the bottoms of furnaces, or the great boilers used for cooking purposes in large hotels and institutions, they are cleared by hand. This is done by brushing them with wire brushes, a long and tedious process. The revolving drum process achieves the same result at a fraction of the time and labor. Great square drums of iron are filled with these smaller castings, and the drums are turned, and the castings bang around in happy confusion. It is hard to imagine the pandemonium that results. Imagine the clamor of the cement mixer that is a not infrequent visitor on our streets; consider its ability as a disturber of the public peace, and then if you can imagine a whole fleet of such machines—say, a dozen or more of them, grouped around a square, and you will have only a slight idea of the blissful peace of the atmosphere of this department of a stove factory, for crusted stone is a feeble noise-maker by the side of cast iron. To the high tenor of these many great drums, each about four feet square by six feet long, there is the lower tenor of the grinding stones which take the castings as they come from these drums, cleaned of the sands of the mould and grind off any irregularities on their surface.

The Peaceful Nickeling Process

From this bedlam of noise it is a happy relief to step into the sabbath peace of the nickeling department. Here is a great room filled with long vats. At one end of the room are the cleaning vats—a very necessary part of the equipment, for a casting must be free from any suggestion of grease if the nickeling is to be even. The castings as they come from the grinders are attached by a wire hook to a long pipe that runs the length of the vat. This pipe is charged with electricity, and causes the alkaline solution to act quickly. The casting is taken out of this bath and cleaned in fresh water. If this water runs off the surface of the casting evenly it is known to be free from grease. It is then dipped into a similar bath to the first, only that this bath is acid in its reaction, and neutralizes the effect of the alkaline bath. After this it is again rinsed, following which it goes to another bath similar to the first, save that the composition of the solution is different, and it is more highly charged with electricity.

The time it takes to nickel a casting depends a good deal on its size and character. A smooth casting will be

effected much quicker than one showing design. Anywhere from 10 minutes to 45 minutes will be required to properly nickel these pieces. Coming from this bath the castings have a dull greyish-silver look. The next process is burnishing.

Burnishing Brushes of Cotton Sheets

These burnishing brushes are of very unusual construction, being nothing more than circular cotton sheets about two feet in diameter. These sheets are piled one upon another till a thickness of about two inches is reached; this is the burnishing wheel. While the wheel is at rest it is possible to separate and feel each sheet of this cotton, but when in motion the speed with which it turns gives it a hard brushing surface that

Hand Polishing—burnishing the nickeled parts.

quickly puts a bright finish on the nickeled part. All the parts of the stove, whether nickeled or merely the plain cast iron, are brushed to a high polish by machine brushes. This is the last step in their actual manufacture. The next step is to the assembling room, where the stoves are set up and examined before they are crated ready for shipment.

The Pressed Steel Stove Differs in Manufacture

Up to the present we have only spoken of the cast iron stoves; the development of the modern gas stove has made quite a change in the manufacture of these. The bulk of the gas stoves are, instead of being made of cast iron, pressed out of sheet steel. This, of course, necessitates an entirely different system of manufacture. The different parts of these stoves are stamped out of steel by an immense press, that gives the part exactly the shape that it is supposed ultimately to have. The fronts, tops and bases of these stoves are made of 16-gauge steel, other parts of 22-gauge, while the doors and legs are of cast iron, as in the ranges described before; these different parts are all welded into a solid piece by the aid of the oxy-acetylene torch.

Spot Welding a Modern Invention

In the good old days all different parts would have had to be riveted together, but modern invention has permitted a great saving of lavor in the spot welding machine. There are a great many connections and jointings that are required in the gas stove manufacture that would require infinite time by the old method of riveting; they are now joined together and placed between the points of the welding machine. These points are drawn together, letting loose 600 volts that welds the points touched, as though they were a single piece. It is only the work of a moment. The welding can be done just as fast as the lever can be raised and lowered.

Its sheet steel parts all assembled, the stove is ready for its outer dress, the familiar coat of japan enamel. Before this can be applied, however, the whole pressed steel form is thoroughly washed in benzine and cold water. It is then taken to the japanning room, where the huge vats of varnish and the immense baking ovens that set the varnish are located. When the rough stove form enters this department it is not brush painted, as most people imagine, but is attached to a chain and lowered into the japan varnish vat, where it is quite submerged. Under this method there is no part so small that the varnish does not reach it. When once thoroughly dipped, the dripping stove form is hauled up out of the vat and left to drain. The long line of stove forms dripping over these vats make a curious sight. These forms are allowed to drip for half an hour to remove all the superfluous moisture, and are then run into the immense ovens that bake the varnish into the hard enameled surface with which we are all familiar.

These ovens are a matter of curiosity in themselves; they are 15 feet deep, six feet tall, and six feet wide, and are heated by gas pipes running the full depth of the oven on each side. Into this oven the dripping stove forms are wheeled and the heat is turned on. It takes 35 minutes to bring the ovens to the required heat of 450 degrees; at this temperature they are baked for two and a half hours. From this room the stoves go to the assembling rooms, where the doors and legs are attached and the gas fixtures installed; all these are, of course, castings made in the moulding shop.

We have spoken only of the manufacture of stoves. This, although the chief product, is not the only one, though the varieties of stoves produced might well justify a separate industry. From the little sheet steel "Quebec Heaters," lined with fire brick, through a whole series of heating stoves and an equally extensive array of cooking stoves, from the modest "Ranchers" stove that, as its name implies, is fitted for the modest cooking requirements of the bachelor, to the immense hotel range, with its numerous fires and multitude of ovens, the whole gamut of the stove manufacturing industry is seen.

Throughout every part of the processes of manufacture, from the chemist's laboratory, where the samples of steel and iron are examined, to the shipping room, where the crated finished product starts on its way to the consumer, there is the most rigid series of examination. In every process there is the supervision of an expert, and every part must meet the tests before it is allowed to be finally assembled into the finished product. Cure is the watchword in every department. The writer in his visit saw castings discarded because under test they failed to come up to the exacting demands of the department to which they belonged.

Joe. O'Grady, who for several years represented the McClary Mfg. Co. in Toronto, has been transferred to Northern Ontario territory with headquarters at Sudbury. Joe as he was familiarly known, will be greatly missed in Toronto hardware circles where he had many warm friends.

Systems for Export Trade

How a Manufacturer Seeking Trade Abroad May Make Sure That all Conditions Are Being Met—Information Which Must be Secured on All Points.

A VERY important matter for a manufacturer to consider when it is planned to go after export trade is the proper organizing of the department to handle the export end. Many new problems are faced when trade is sought outside of the home market. Goods must be packed differently, different custom's regulations must be considered, likes and dislikes of foreign customers must be taken into account.

An interesting article on this point was contributed to a recent issue of System by William Moskowitz. He outlined his own method of overcoming difficulties as follows:

Certain records essential to a well managed export department differ from the records commonly required in domestic trade. I have, therefore, found it necessary to develop a comprehensive plan that will keep my export records at all times complete in every detail. Confusion, uncertainty, delay and possible financial loss are as a result quite often avoided.

The classification given below may not fill all the requirements of all lines of business engaged in the export trade. But it can probably serve as a basis for covering all the necessary elementary data that must be on file if details connected with the handling of export shipments of every type are to be carried out properly. I have found that much time and labor are saved when all the details mentioned under the various headings are obtained at the time an agency or dealer connection is established.

I have also found it well to place copies of this classification in the hands of salesmen. They can then fill in the data when new arrangements are made. The result is that their reports cover essential details with uniformity and without overlooking anything.

DATA COVERING CUSTOMERS:

Full name of agent, agents, company or partnership; trade name (if any); full street address; post office box number (if any); city; province, state, or department; country; cable name; codes used; branches at; sub-agents at; territory to be covered; date of contract; duration of contract; termination notice on contract.

SHIPPING INSTRUCTIONS (CHECK THE PROPER INSTRUCTIONS AND ADD THE NECESSARY DATA):

Shipments with bill of lading in name of representatives: Shipment with bill of lading made out "to order:" Shipment with bill of lading in name of forwarding agent at port of entry (it is important to secure the name of this agent, as the documents not only go to him, but must be made out in his name): Consolidation of shipment with goods going forward by another concern (for this purpose secure the names of other houses which the agent represents): Through a commission house or forwarding agent: By express: By mail or parcel post: Shipping marks and numbers.

INSURANCE:

Yes or no? If yes, for what percentage above invoice value shall goods be insured? If no, state why. Note: If a sight or time draft is attached to the bill of lading, it is desirable to have insurance, as in the event of loss of merchandise at sea or otherwise, or damage of any kind, it might be difficult to collect from the agent. In the event of damage, where the shipment is not covered by insurance, the agent may refuse to accept the goods. The shipper is thus protected. Where, however, shipment is paid for at port of embarkation, or the representative has a floating policy, it is, of course, immaterial.

PACKING OF ADVERTISING:

May the advertising matter be packed in the same case with other goods? Or must it be packed in a separate case? If packed with other goods, must it be declared on the consular invoice, bill of lading, and (or) commercial invoices?

INVOICING:

Whether in dollars, pounds, francs, marks, etc.: Are invoices to be signed by a member of the firm making the shipment? Must any special stamping or notation be made on the invoice?

MEASUREMENTS AND WEIGHTS ON INVOICES:

Whether in feet, pounds, kilos, gallons, etc.
Stencil or brush? Gross and net weights and measurements in pounds, feet, and (or) kilos?

PRICES AND DISCOUNTS:
SPECIAL CONCESSIONS:
REIMBURSEMENT (CHECK AS NECESSARY):

By remittance with order: By part remittance with order, balance on a sight or time draft sent with documents to the bank: By sight draft with documents attached: By time draft with documents attached: By part sight and part time drafts with documents attached: Through a commission house: By letter of credit or letter of authority in possession of the shipper: By open account: By instalments through a local bank, warehouse or direct: Note: It is invariably safe to send the documents to a bank at destination of goods with a draft for their value attached. In some cases, however (for example, Colombia and Santo Domingo), it is not possible to make out an "order" bill of lading. The shipper, therefore, has no protection unless the goods are consigned to a bank or other concern well known to him, with instructions to release goods only upon payment of the sight draft attached to the documents. In such cases, time drafts are valueless if any uncertainty exists.

ADVERTISING:

Advertising material: Whether in English, Spanish, French, Portuguese, German, etc.: Kinds of advertising material to be distributed: Catalogues, folders, calendars, blotters, pencils, watches, desk weights, rulers, etc.: Imprint on advertising material: Advertising allowance: For newspapers, magazines, circulars, posters, etc. Language to be used for correspondence.

The above information we have standardized, and require our salesmen to give us reports in as great detail as possible. We file the information where it is readily accessible, and make sure on each shipment that no errors are made.

The following are some facts and sources of general information which are important for every concern that does an exporting business:

LOCAL PRICES:
DUTY:
REGISTRATION OF TRADE-MARK:

Note: The trade-mark and (or) trade-name should be registered in each country, inasmuch as an unscrupulous individual, by prior registration, can often make matters exceedingly unpleasant and may demand an exorbitant sum of money for a release. In some cases, it is impossible for the manufacturer to ship goods to a country where his trade-mark or trade-name has been taken. Trade-mark registrations usually run for a period of five or ten years and are, as a rule, comparatively inexpensive and always desirable as a means of avoiding possible complications.

CONSULAR DECLARATIONS:

Note: Full information regarding the exact declarations should be given, in whatever language is necessary. In view of the high tariff in many countries on advertising material, it is also desirable to secure the proper declarations for the different kinds of advertising material that may be forwarded to the dealer: such for instance, as catalogues, folders, booklets or blotters.

AN EXPORTERS' HAND BOOK:

Note: A book of this type is practically indispensable in connection with all export work. One standard work which is published and brought up to date every year, is said to contain "full and authentic information relative to shipments for every country in the world." In addition, it contains a mass of very useful information regarding many topics: the value of moneys, weights and measurements, consular invoice forms, and the like.

ADJUSTMENT OF INVADING SALES:

Note: On certain commodities (type-writers, for instance), it is desirable to make some arrangement whereby the representative will be compensated if the article which he represents should be imported into his territory by others and discovered by him after a certain period; a clause to this effect can be inserted in contracts.

SALES TO COMMISSION HOUSES:

Note: Where it is desired to protect the local agent, and at the same time not lose the business which commission houses may have to offer for goods to be shipped to the agent's ter-

ritory, an arrangement can be made with the commission house whereby a certain discount or special concession may be given to it with the understanding that the rebate will not be in turn pased on to the local purchaser. In such a case it is evident that the commission house must be assured that no direct discount will be quoted at any time.

CREDIT INFORMATION:

Note: With regard to the financial standing and character of the agent or prospective agent, the traveling representative on the ground will, of course, in all probability apply to the various local banks. Other methods may be employed either by him or the home office. For example:

1. Inquiries addressed to credit rating houses;
2. Inquiries on reference submitted by dealer;
3. Inquiries addressed to any other merchants who are already represented by the agent;
4. Inquiries addressed to export associations or suitably-equipped banks.

SECURING DESIRABLE RERESENTATIVES:

Note: Best way, of course, is to appoint them by a direct traveler. Where this course is not feasible, the following may be suggested:

1. Writing our Consular representative for the names of concerns that might consider an agency proposition;
2. Writing Department of Commerce at Washington for the same information;
3. Getting copies of local newspapers and looking up concerns advertising therein;
4. Advertising in export mediums;
5. Using trade directories and similar publications.

IN GENERAL (DEVELOPING BUSINESS):

Note: Much depends on the nature of the article. The following suggestions are submitted:

1. Let local dealer do it all;
2. Direct circularization;
3. By travelers;
4. Through commission houses;
5. Local newspaper or export magazine advertising.

If the article is such that the volume of its exports is classified in the monthly report of the Department of Commerce, comparison may be made of the total volume exported and the purchases of the agent, in order to determine approximately whether or not he is obtaining a fair share of the business in his territory.

How Furnaces Are Made

Description of How the Great Moulds for the Furnace Castings are Made—Some Technical Terms Explained—Interesting Methods of Carrying the Molten Metal to the Moulds—How the Rough Castings are Made

Based on a trip by a Hardware and Metal representative through the plant of the Pease Foundry Co., Brampton, Ont.

PROBABLY the North American continent more than any other section of the globe has helped to bring the manufacture of stoves and furnaces to the greatest perfection. In this part of the world nature has required that there be adequate protection against the extremes of temperature, and the ingenuity of man has risen to meet the demand. The modern furnace has demonstrated that such a thing can be done, that it is possible to stimulate the comfort of summer even in the most severe weather. This achievement was not the result of any fortunate chance, but the careful development of years of care and scientific experimentation, till the present steam, hot air, and hot water furnaces have reached about the Nth. degree of perfection.

The manufacture of a furnace is not the simple process that some people imagine. The bulk of the furnace is made of cast iron, but looking from the outside it is hard to realize the size of the castings that are integral parts of the assembled whole. In conjunction they are dwarfed by their relation to other parts, but in the actual cast their size appears very great.

Mechanical moulders in use in the making of all small mouldings.

Making the "Match-plate" Pattern

The first step in the process of manufacture is the making of the "match-plates," as the aluminum patterns from which the actual castings are made are called. These are first patterned in wood, and from this wood pattern a cast was made. Formerly the wood pattern served the purpose, or else a cast iron pattern was made, but in the large castings to be made it was found that the iron plate or even the wood was so cumbersome that it was difficult to handle, and made it almost impossible for a man to work up to his top speed and yet to do flawless work. To avoid this difficulty, and to make the labor lighter, the change to the aluminum match-plate was made.

Making the Great Moulds

The castings for a furnace are so large that most of them have to be made by hand, though many devices are used to aid and simplify this hand process. First the "drag" is prepared. The "drag" is the bottom half of the mould on top of this the pattern or matchplate is laid and the "cope" as the upper half of the mould is called is applied. Around this plate the sand is poured and pounded down by great wooded plungers that hammer the soft sand into close cohesion with the matchplate. These moulds are so large that it would be possible to lift the cope to remove the matchplate by man power alone. So great lifts worked by compressed air run on cranes over the

In the Assembly Room showing the parts ready to be assembled. The large pieces in the foreground are the steel jackets that fit around the furnace.

moulding floor. These are attached to the cope and the air turned on and the upper part of the cast is raised smoothly from the drag. The matchplate is then removed, and with numerous little tools the workman goes over the mould working out any little flaws that have materialized in the removal of the pattern. This done the cope is wheeled once more over the drag, and carefully lowered, and the mould is ready for filling.

Machine Moulding

Further on in the shops are the machines where the smaller moulds are made by machine. These are in many ways similar to the machines used in stove moulding. The moulding boxes open in the same way, on a swivel, the matchplate pattern is fitted in the same way into the centre of the mould, and one after another both the "drag" and the "cope" are finished. Here, however, the pressing is done by compressed air. Two wooden plates fit just inside the mould box. A lever holds the top one in place and the bottom one rests on the floor of the machine. When the air is turned on, this floor is driven up compressing the mould, doing with one movement and one second's time all the compressing that it takes many minutes to do by hand. Attached to the matchplate is a vibrator, that as soon as the pressing is completed is set in motion. This vibrates the aluminum plate and loosens the sand from around it so that it may be readily lifted out without destroying the mould form. The cope is then replaced. To provide against the possibility of poor alignment the drag, or lower half of the mould has a guide bar on each end over which the cope runs. In this way the two parts of the mould are held together as firmly as though they were made of one piece.

Molten Metal Carried by Overhead Rails

At one side of the moulding room, which is a great hall as big as a barracks there are the two furnaces from which the molten metal comes through two long spouts. It is poured into immense buckets that travel on an overhead rail, and by this means reach all parts of the shop. This does away with the back-breaking work of carrying the molten metal by hand, a thing impossible where such large castings are to be made, for one man could not possibly carry anything near enough for one of the giant moulds, and repeated pourings would be likely to weaken the cast.

The Sand Core and Its Use

Many people wonder how the hot water coils that appear in most furnaces are cast. This is certainly a point of interest. They require besides the making of the mould the making of what is known as a sand core. These sand cores are made in a separate department. These cores are made of a composition of sand and oil with a little flour added. This soft mass is moulded in the form of the coils desired though slightly smaller in size. When these sand cores are completed they are run in a furnace and baked which gives them a hard brick-like appearance. These are introduced in the centre of the coil mould. When the molten metal is poured in it completely covers this sand core. The shaking that follows the other processes of manufacture disintegrates this sand core which returns to its normal state and is readily poured out of the cast thus leaving the coils empty. In this way all the pipe-like castings are made.

The Shot Blast Cleaning Process

When the different castings come from the mould they are covered with sand that eats its way into the substance. All this has to be cleaned off. Formerly this was done with wire brushes, scraping it off by hand, or in huge revolving shaking drums that banged the pieces about

(Continued on page 60.)

A carload of Furnaces ready for shipment at the Pease Plant. The small parts are packed in the barrels.

How Bolts Are Manufactured

The Story of the Process by Which Bolts Are Produced in Canada — A Complete Description of the Treatment by Which all Varieties of Bolts Are Made —A Glimpse of Canadian Industrial Efficiency.

GREAT interest attaches to everything connected with the actual facts of manufacture. The finished product itself may be more or less simple or elementary—say, a nail or a bolt—but back of it is an interesting story. The manner in which processes are simplified or combined in order to speed up production and lessen cost, makes the story of the making of even the simplest article a veritable romance.

HARDWARE AND METAL has at various times during the past few years presented very complete articles on the manufacture of practically all hardware lines. This series has undoubtedly been one of the most popular of features and continual requests have been received for the reprinting of certain articles from the services. As this is an export number and will travel to all parts of the world, it was felt that it should contain something to show how Canadian manufacturers handle the production of what mght be termed basic articles; and accordingly it was decided to tell of the manufacture of bolts. The following articles gives in succinct from the most important facts on the making of bolts in Canada.

First let us observe one or two bolt facts. Carriage bolts, machine bolts and coach screws are measured from under the head to the end. Tire and sleigh-shoe bolts are measured over all.

There are two kinds of tire bolts—the fluted and the plain. The flute grips the wood better. Those with flutes are made only up to ⅜ x 3 in. while the plain are made in all sizes. Like sleigh-shoe bolts, they are counter-sunk.

Carriage bolts have a square neck and a button head. Coach screws sometimes called lag screws are usually made with gimlet points. Machine bolts are made with a square head. A square machine bolt means a square head and square nut, and a hex. machine bolt means a hex. head and hex. nut. There are also bolts with square head and hex. nut, which must be specified when ordered.

All sizes up to ⅜ by 6 inches of carriage bolts, machine bolts, tire bolts, sleigh-shoe bolts and coach screws, are made cold, that is, they are cut from stock and headed without first being heated. Larger sizes must be heated at the end before they are headed.

Let us, first, consider the manufacture of the smaller sizes, i.e., those which are made from cold stock. They are made from rods which have been drawn in the wire mill to the thickness of the bolt required. The rods are fed from a coil into a heading machine, which we will not stop to describe in detail. What the machine does concerns us more than how it does it. In the case of a carriage bolt, the machine is set so as to cut the correct length, and at the same time to give the button head and the square neck. This is done so quickly that the bolts fall in a constant stream into the pan below. This operation has the effect of hardening the steel, and unless specially treated the bolts would be unfit for use. The process through which they now pass is known as annealing, and applies only to bolts made cold. Before going to the annealing furnace, the rough edges are removed by an operation known as rumbling. The bolts are placed in a large iron barrel, called a rumbler which is revolved by machinery. By thus shaking them together they are made smooth and clean.

After leaving the annealing furnace, the bolts are removed to machines to be pointed a simple operation, which consists of rounding the bottom end. This is done with remarkable rapidity by girls.

Threading the Bolt

The average bolt is now ready for its thread, but the machine bolt requires to have the button head, which it now possesses, converted into a square or hexagon head, according to requirements. Automatic machines perform this operation at great speed. This is called "trimming" the bolt.

There are two ways of threading bolts by machinery. First there is the roll thread which is made by running the bolt between two long dies. Some idea of this operation can be obtained by rolling a lead pencil between the palms of your hands. If there were dies on your hands, a mark would be made on the pencil similar to that on the bolt. These machines go at great speed, and are fed by girls. The plant of the Steel Company of Canada, Montreal, and in most Canadian factories, the U.S. Standard thread is used entirely.

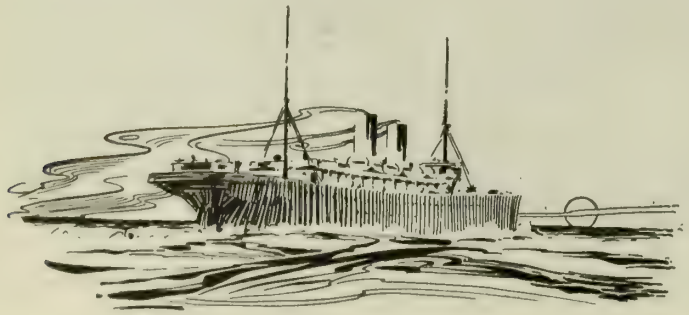
Work is not turned out so quickly on the second type of machine, but the work is done more efficiently. The second way is used more, when threading larger sizes, as in this case the cuttings escape, whereas by the other method the metal is forced into the shank. The bolt passes through four dies, just as in the ordinary stocks and dies, the space between the dies permitting the cuttings to escape. The bolt which is stationary, is forced through the revolving dies by a lever. When the lever is withdrawn the dies are released, and the bolt drops into a pan. In both cases a solution is poured continuously on the bolt as it is being threaded. This prevents the dies from burning and the solution is one that will not permit the steel to rust. The thread on a coach screw is made by dies as described above.

Prepared for Packing

Before being packed, it is necessary to wash them. For this operation, they are packed in perforated buckets, and passed through tanks containing a hot solution of soda and soap. They stay in there for a few minutes until the oil has been washed away.

From the wash room, they are transferred to the packing room, and dumped on benches. First, each bolt is tested to see that it goes on the nut smoothly. Should a bolt not fit the nut, it shows there is something wrong with the threading, and the bolts are rejected.

After this inspection they are arranged in neat piles, wrapped in double paper and tied with twine. The packages are labelled, and on the label in bold figures are the quantity, diameter



and length. Now they are sent to the stock room ready to be shipped when ordered by the wholesale houses.

Larger Sizes

Up to this point we have watched the manufacture of sizes up to ½ x 6 inches, no mention being made of larger sizes, which are made from stock which has been heated. This work is done in a separate department. In the plant of the Steel Co. of Canada, the whole length of one side of the building is occupied by furnaces and headers. They are arranged, so that the furnace man, as soon as the heads are hot, can easily pass them over to the man on the header. The stock is brought into the building on trucks, the bars being from 10 to 14 feet long. They first go through the shears, which cut them into desired lengths, a certain amount being allowed for making the head. These pieces are then moved in wheel barrows to the furnace, in which they are placed a sufficient distance to allow the heads to become red hot. The furnaceman knows by experience just how hot the end should be. An oil fire and blast is used in the furnace.

The headers perform more operations than in the case of those working on cold stock. It is easier to do this work when the steel is hot. The head is made complete. All bolts are rumbled when they require to be galvanized, as for galvanizing it is necessary to remove all scale from the bolt. While the actual operations on large size bolts are less, the cost of making them is higher because of the furnace, and being heavier, they cost more to handle. No annealing is required for large size bolts. After the head is made, they are moved to another department to be threaded.

Making the Nuts

Just the same as in the case of bolts, nuts are made cold up to a certain size, and hot any size. They are made from nut steel, the shape of which is the same as the nut required. Large sizes are made very similar to large size bolts. There is a long line of furnaces with the same number of nut machines. The rods are heated to a certain temperature, and are then fed into the machine, which cuts them, crowns them, and punches the hole. When they are cool, they are sent first to the burring machine, and then to a rumbler to have the sharp edges removed. Small nuts are made cold from nut steel, which is fed into the machine from a coil.

There has been a remarkable advance in the manufacture of machinery for tapping nuts in the past few years. Until a short time ago, the spindle of the tap entered the nut, and was then withdrawn. Then a machine was made which allowed the nuts to pass up the spindle until the spindle was full, when they were emptied into a box, the spindle placed back, and the machine set in motion again. A machine of more recent invention allows the nuts to pass along the tap and to fall off at the other end. In this case the spiindle revolves horizontally.

After being washed, the nuts are ready for the bolts, and are removed to the packing room.

Sea Casualties and Trade

The Part of the Tramp Steamer in the World's Trade — The Dangers That Surround It on Every Side an Item in the High Price of Commodities

NOT the least among the causes for the high cost of living is the item of sea casualties. They pass us by unnoticed in the whirl of world events; yet very few days pass by that there are not added to the list of these casualties of the sea some one or more names. Here is an instance culled from a recent paper:

"London, Jan. 1.—Lloyds reports the sinking of the British steamship Apsley Hall, 3,882 tons gross."

Down in a lower corner used as a filler the "Apsley Hall" has its brief moment. of history in a three-line notice. No one except her owners know where she hailed from and what stores she was laden with. Her loss marks a casualty item in the world of commerce, and serves to make the cost of some commodity a little higher.

The Tramps of the Sea.

No one notices the fate of these tramps of the sea, they are familiar in the quiet roadsteads where few ships come, they explore the shaded estuaries of palm bordered rivers; their ports of departure are the four corners of the world; the "Ultimate Isles" of the Seven Seas. The gatherers of commerce, they travel on no schedule, stopping for neither fair wind nor foul, gaining no word of comment or commendation, save the brief item that closes their career.

We hear of the arrival of great ships heavily laden with a various cargo, but the great ships are comparatively few and the lesser ships are many, they are the feeders of the nations, the gap in their ranks is hardly noticed, but each gap makes some commodity a little harder to get, a little higher priced. We grumble without thinking, we pay little attention to the causes behind that increase, we may blame the retailer or the wholesaler, but these little items in the daily press with their world of significance pass us by unnoticed.

Less than 4,000 tons burden, many of the boats that ply our inland waters are of heavier tonnage. One of the smallest cogs on the wheels of progress, yet their presence is a necessity and lacking it there is a grinding in the wheels and the result to us is higher prices.

A Name That Lived for a Moment

A little over a year ago the "Ancona" was torpedoed in the Mediterranean, a few days out from Palermo. It was not a great steamer, but it flared for a moment into the head lines of the public press because some of its seamen were Americans, and in those days it seemed that even the humblest seaman's life might be worth more than a word of protest. It flared for a day or so and died out, and the "Ancona" became only a term of diplomatic wrangling. On the "Ancona" there was $100,000 worth of macaroni, all consigned to American firms; there were thousands of boxes of lemons, as well as a general cargo; all of this was a total loss, because there was no war insurance on the cargo. A small item, doubtless in a world trade, but someone had to pay for it. This and other incidents all had their effect.

Difficulties of Transportation?

Of recent date Spanish onions and grapes have been high in price. The cause given is the familiar "difficulties of transportation," scarcity of tonnage is one item in this the other item is, Casualty. Liverpool, England, is the great market for these Spanish products. It is the great clearing house of the Spanish market, thither ply the tramp steamers straight across the zone of danger. Of recent months three of these "tramps," deep laden with Spanish goods, have joined the casualties of the sea; these are only three we know of. How many other of these notices of loss that daily dot the public print may be the bearers of these goods we cannot know, but we do know that all of them are bearing some goods of use to mankind.

"The Acts of God and the Enemies of the Government."

What percentage of the cost of living can be chalked up against the loss at sea, we do not know, we never can know, and it would serve no particular purpose if we could, save, perhaps, to add to our admiration for those sturdy men who go down to the sea in ships.

On every ocean they are found, following their various occasions, facing in the interests of the world's commerce the multiplied dangers of the sea, meeting unflinching those trials of courage that in their Bills of Lading are solemnly described as "the acts of God, or the enemies of the Government."

When you see these small items in the newspapers, outlining some other loss there may be no word to suggest the cargo, but there are few items in the world of trade that do not affect everyone directly or indirectly, and every one of these three line items is of moment to you. Every loss in the world's commodities is an actual loss that must be met somewhere, somehow, sometime. It is all an item in the upward marching price of things, and in remembering the loss remember the debt to these sailors of the broad seas who risk their lives that other men may live in comfort.

Higher Linseed Oil Seems Inevitable

Crop in Argentine Has been Greatly Reduced Through Drought and Ravages of Locusts —Estimated Supplies of Seed Obtainable in Canada and United States Will be in Neighborhood of 10,000,000 Bushels Short — Eastern Crushers Unable to Get Flaxseed.

THERE is a serious situation developing in linseed oil at the present time which to some men closely identified with the oil industry indicates higher prices for that commodity if relief does not come. At the present time there is an embargo on flaxseed being carried from the Northwest by the Canadian railways. Crushers are unable to get forward their supplies of seed and they are not in a promising way to take care of any new business. Some of the linseed oil mills in the East have found it necessary to close down for lack of seed. Others while they have fairly good supplies of oil are unable to foresee when they will be able to get additional stocks of seed. Accordingly they have withdrawn quotations on any new business and are only looking after their regular customers' needs. Linseed oil at the time of writing is being quoted as high as $1.22 per gallon in single barrel lots. With the prospect of being unable to get further supplies of seed until the railroads are in a position to move the grain, a situation is developing that may mean even higher prices before relief can come. With a good demand for varnishes from the furniture factories and with the spring paint trade only a short distance in the offing it is pointed out that even were it possible to start seed rolling toward the mills at the present minute it would take some six weeks before that oil would be ready for consumptive channels. But just at the present there is small prospect of the railways carrying the flaxseed. They are engaged in carrying munitions and foodstuffs of various kinds which are necessary to the conduct of the war. Flaxseed must take a secondary position. It is not considered essential to the winning of the war. The yield of flaxseed in the Canadian Northwest is well up to last year's figures according to the statistics of the Census Department of Canada. The estimated production of flaxseed for the year 1916 is placed at 7,122,300 bushels and the value of this crop is placed at $14,581,300. Prices for flaxseed are placed at $2.05 as an average price for 1916 by the Census and Statistics office as compared with $1.50 for 1915. The yield for flaxseed for the years 1913 and 1914 were 17,539,000 bushels in the former year and 7,533,000 bushels in the year 1914. The average yield of flaxseed per acre in 1913 was 11.30 bushels and in 1914 was 6.95 bushels per acre.

World Shortage of Flaxseed

At the latter part of January of last year the price of linseed oil in Toronto was quoted at $1.09 per gallon. At the present time it is quoted up to $1.22 per gallon in single barrel lots. As to the situation that has brought this about: it is partially due to the fact that crushers are unable to get the seed from the Canadian West. But it is also caused partially through a general shortage in the world's crop of flaxseed during the year 1916. In the Argentine the crop of flaxseed is estimated at only about a quarter crop of the previous year. Drought and locusts have made a serious raid on the crop in that country during the past year and as a result where 675,000 tons of linseed were exported in 1915 there is an estimated export of 200,000 tons available in 1916. Accordingly the price in that country has been greatly in advanced of the year 1915. In November of last year when it became known more definitely that the crop there would be short the price of seed for January delivery was at a big premium. For January delivery at Buenos Aires the seed in November was quoted at $2.95 per bushel against $1.23 per bushel at the same time in 1915. These figures were the highest ever quoted on the Buenos Aires cereal exchange at the time they were reported. In a report on the condition of the flaxseed in that country written on November 15 of last

year the United States consul at Buenos Aires stated:—

"In addition to the drought which has already produced so much destruction, swarms of locusts have made an especially early appearance this year in the northern part of the grain belt, causing considerable damage. Throughout most of Santa Fe, Entre Rios and Corrientes Provinces the locusts have attacked everything in sight and are swiftly moving southward. The Argentine Agricultural Department is doing everything in its power to combat the scourge, but the plague has already grown to such proportions that the work can be carried on only with difficulty. Recently the Minister of Agriculture sought the assistance of the different railways in Argentine in co-operating with his department in exterminating these pests, and the railways have agreed to furnish free transportation to the employees of the Department of Agriculture and to all the equipment necessary in the work of extermination as well as other aid.

Shortage in United States

Already there is a shortage of seed in the United States. Crops in that country did not turn out as good as was expected during the past year. During the year 1915-16 the imports of Argentine flaxseed into the United States were 13,222,000 bushels. During the same time there was consumed in the United States 31,029,000 bushels of flaxseed, which supplies were secured from the domestic crop, from imports from Argentine, Canada, India and other countries. Canadian imports of flaxseed in the United States from September 1 to December 31 of last year were 1,825,000 bushels. It is estimated that the Canadian surplus in stores at terminal elevators, in country elevators and in farmers' hands at the first of the present year was in the neighborhood of 4,000,000 bushels. From available figures of the needs of Canada and the United States it is estimated there will be a shortage of some 10,000,000 bushels of seed for the requirements of these two countries. This will mean that at least there will be a shortage of linseed oil supplies of 20,000,000 gallons if the shortage of seed proves as anticipated. With a normal demand for paint and for other articles for commerce it can readily be seen that linseed oil gives promise of being at a good premium. In normal years quantities of Indian flaxseed reach the United States and Canada. Owing to the shipping facilities brought about through war conditions there will be very little flaxseed available from that source. It will therefore mean that the United States will have to depend on her own domestic production, on the Argentine and on Canada for her supplies.

Oil Cake Helps Steady Prices

Crushers during the past few months have been getting good prices for their oil cake. Stock men have sought this commodity eagerly for their cattle, because all mill feeds have been at a high ggure. It was pointed out by one man that the price of linseed oil at $1.22 per gallon is comparatively low at the present time when it is remembered that flaxseed is quoted at Winnipeg in the neighborhood of $2.63 for the cash article and at $2.71 per bushel for May delivery. The price for which the seed for future delivery is quoted would indicate belief in a firm market for the seed four months hence. High prices have been paid for the oil cake, the prices ranging from $45 to $57 per ton. This has enabled the oil crushers to get a fair share of profit from this source. In April and May, however, when cattle are again able to get out on pasture, there will be less demand for oil cake for feeding purposes, and the price may in consequence become easier for that commodity. With a lower price for oil cake it will be necessary for the crusher to get a higher price for linseed oil in order to make his accustomed margin of profit. For the past month flaxseed has held remarkably steady in price, the price ranging from $2.60 for the cash product at Winnipeg on December 27, as compared with $2.63 on January 26. The lowest point reached by the flaxseed during the month was $2.56.

Think High Levels Will Be Reached

There are those closely in touch with the linseed oil situation who believe that new high record prices will be reached before there is relief from the present situation. Some even assert their belief that there will be $1.50 oil in the not distant future. Inquiry for oil by some of the large users would seem to indicate that they are endeavoring to cover their needs as much as possible. With present stocks of oil pretty well sold up and with production greatly decreased because of the inability of the mills to get seed, there is every indication that there will be a still greater firmness in the price of this very necessary commodity in the paint trade. Mills in the United States are experiencing the same difficulty in getting supplies of seed.

Attention Mr G. Davis

Gentlemen,

I had looked forward with interest to the announcement giving names of Prize Winners in the recent Christmas Window Display Contest arranged by your Journal, and it has given me a good deal of pleasure to learn that business houses with which we have a good connection have been successful in almost sweeping the boards in this contest. Martin-Senour dealer agents and their competent window trimmers, have accounted for 6 of the 8 prizes which you so generously offered; 1st, 2nd, 3rd and 4th prizes in the large town contest and 1st and 4th prizes in the small town contest, were cleaned up by our aggressive dealers.

The writer has always taken a great interest in window trimming, and has always felt that well arranged window displays were an important factor in sales promotion work, and in the consideration of our own advertising and display material, we give a foremost place to the material provided for this purpose.

We think you are deserving of great credit, and manufacturers owe you a debt of gratitude, for the methods you employ in encouraging these good displays and arranging of this annual competition. It must be gratifying to the winners to be listed as such in such a keen competition. We are very proud of our own dealer agents who have been so successful in this contest and are happy to have been able to write them letters of congratulation in connection therewith.

Yours very truly,

THE MARTIN-SENOUR CO. Limited

ATB/EM

General Manager.

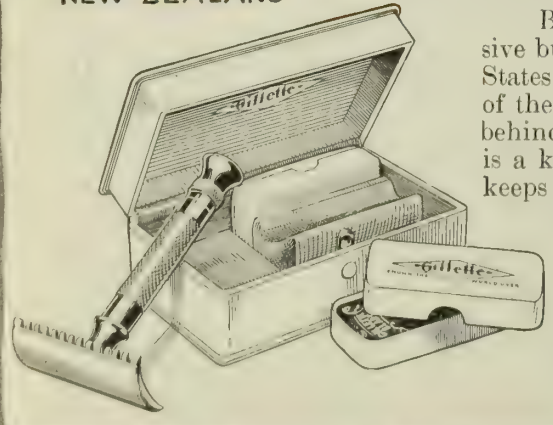
The Sun Never Sets on the Gillette Safety Razor

"Made in Canada"

Standard throughout the British Empire

When British troops from the ends of the earth fraternize overseas, they soon find one thing in common—the Gillette Safety Razor. The "folks at home," mindful of their comfort, have supplied thousands of the men with Gillettes—purchased perhaps in Great Britain, or in Canada, Australia, New Zealand, South Africa, India, Newfoundland, or the islands of the sea—but nearly all made in Canada.

The remarkable service which the Gillette Safety Razor is giving under the extreme conditions of war has done wonders in consolidating its position as the world's most popular razor. As a natural result, the demand from all quarters for both razors and blades has grown enormously, and to meet it we have more than doubled our capacity.



Back of the Gillette Safety Razor is a strong, progressive business organization, with great factories in the United States and Canada, and distributing points in the larger cities of the world. Manufacturing facilities are unsurpassed, and behind all, giving life and vigor to the whole Gillette business, is a keen, aggressive, continuous advertising campaign that keeps the goods moving and the demand steadily growing.

STRAITS SETTLEMENTS

Every one a "Booster"
And a Steady Customer for Blades

The Gillette is a permanent factor in the lives of increasing millions of men—and a permanent success! It is rapidly absorbing a larger and larger percentage of the razor business, and the enormous and never-ending demand for Blades gives the trade in Gillettes a steadiness most desirable for Wholesaler, Exporter or Importer.

The Gillette Safety Razor Co. of Canada, Limited, is particularly interested in extending the business in Australasia, South Africa and other parts of the British Empire. We have been shipping to these countries for some time, and are familiar with their tariffs and the need of special packing for the goods for the long ocean voyages. All our cases are tin-lined and hermetically sealed to prevent rust from humidity. The covers are securely strapped and wired, and the boxes in toto fastened with the Glardon Safety Clip, which prevents pilfering en route.

If your customers in the cities and larger towns of these countries operate drug, jewelry, cigar, cutlery, sporting goods or department stores, they should be doing a good business in Gillette Safety Razors and Blades. Write us direct and we will be pleased to have our Distributors forward you discount sheets and all other information you need in developing this trade.

STEEL PRICES TO REMAIN FIRM?

THERE is a feeling in some quarters that weakness will develop before long in steel prices, and some buyers are holding off as a result. Steel prices are undoubtedly at a high level. How long they will remain at present levels remains to be seen. The peace talk of the past few months has been largely responsible for predictions that the demand for steel would soon be lessened, with lower prices as a result of the lessened demand. There are some well-informed business men who express the view that peace is only a short distance away, and that it will come as a result of a collapse in Germany. Others express the view that the end of the war is not in sight and that it will continue for many months and possibly into 1918.

Speaking on market conditions for the next few months, there are several features worthy of consideration. In order to keep pace with present costs of raw materials, some steel products will have to go to higher price levels in the very near future. Practically all the steel companies have heavy commitments for 1917, and have considerable tonnage on their books for 1918. The steel companies are in a strong position and present commitments will probably keep them going at full capacity for six or eight months. One authority claims that if current business continues to come in at the rate of 30 to 50 per cent., it would be fully a year before the steel companies would be looking for new business. It would therefore seem that the market will continue firm for several months into the future.

It is true, of course, that the time is coming when the buyer of steel need be exceedingly cautious, buy only for actual needs, discontinue all speculative buying and prepare himself for the decline in values which will come in due time.

The export demand continues very heavy, and some companies have had to turn down many inquiries. Manufacturers of steel and steel products have all experienced considerable difficulty in securing supplies of raw materials. There have also been considerable delays in deliveries of packages and containers of various kinds in which manufactured steel products have to be packed.

OUR SOARING EXPORT TRADE

TO BE able to talk export trade in billions is almost miraculous to Canadians; and yet complete figures for 1916, just issued by the Department of Trade and Commerce, show that our export trade for the year ran a little better than a billion—$1,091,706,403. This was an increase of $477,576,558 over 1915 and of $712,410,547 over 1914. In other words our export trade has almost tripled in two years.

Iron and steel and steel products bulk very largely in the total and, of course, there is no escaping the obvious fact that it is the trade in munitions that has set our export totals soaring. It would perhaps, under the circumstances, be worse than fatuous to assume that we can continue to force our export trade ahead or even to hold the present high figure after the war is over. But, if blind confidence would be misguiding, we have no reason to despair. The leading article in this issue goes into the question of the future and points out that, in at least two directions, there are splendid fields for the exploitation of Canadian goods—Russia and South Africa. Unquestionably the exercise of energy and initiative would open up new fields for the Canadian manufacturer and present ample opportunity to find trade in ample volume to replace the export of munitions.

THE "CARRY-YOUR-BUNDLES" CAMPAIGN

IT DOES not need any urging or prompting to interest the merchant in the Carry-Your-Bundles idea. Knowing what a large part delivery

plays in the running up of overhead charges, every retailer is heart and soul with any movement or form of publicity calculated to win a little more consideration from the general public. It is not often, however, that the newspaper press bestirs itself to speak a word for the merchant and the following from the New York *Sun* is of much interest:—

> The Federal Bureau of Census has undertaken to investigate the cost of city cartage as applied to the distribution of commodities by retailers. The merchant has frequently made a study of the matter from the point of expense to himself, but the bureau is making its survey to discover the effect upon the high cost of living to the consumer.
>
> For four important commodities, coal and wood, milk, ice and department store merchandise, the expense of delivery costs on the average more than eight per cent. of the total cost to the consumer. There is no doubt that the delivery of merchandise has been carried to an excess; that the person who insists upon the delivery of the smallest and most inconsiderable article has set a standard that the originators of the system had not conceived, and that the delivery of goods, like expensive packing, adds greatly to the charges that must be borne by persons who do not seek such luxuries of shopping.
>
> Some merchants have attempted to reform matters by dispensing with the delivery system altogether, but have found they were unable to compete with those who retained the system. Others have offered a discount on purchases that are carried away by the buyers. And recently some of the large department stores attempted to reduce the labor of the delivery and return of merchandise by restricting the right of inspection of garments at homes of customers. The goods, it was claimed, were not only kept out of sale for days but had to be sent for as well as delivered. Another plan broached was a cooperative system of delivery by stores in the same neighborhood. But none of these reforms seem to have been practical in their operations. And as a result the number of delivery wagons has grown instead of decreasing. The burden has not fallen so heavily upon the large department store, where the delivery expense represents less than 2 per cent. of the selling price, as it does upon the corner grocer and the small shop keeper who are compelled to accept it on account of the competition.
>
> The further investigation promised may bring forth much enlightenment upon the subject and a reorganization of the system, but scarcely its elimination. It will be a long time before people will consent to carry home their own purchases even to defeat old H. C. L., or before there will be large retail firms bold enough to attempt to force them to be their own bundle bearers.

This presents the case concisely and well. Clip it out. It may be possible some day to use it to good advantage.

LOVE THY COMPETITOR!

THE Retail Merchants of Windsor held their annual banquet the other night and discussed some of the subjects which usually come up at such gatherings. The chairman struck the keynote in his opening address when he said, "the other fellow is not really so bad when you get to know him, even if he is your competitor."

There is a whole sermon in this. Competition is the life of trade but when competition is carried to the stage where personal rancor enters in, it becomes the opposite of a trade stimulant. There is too much personal feeling among retail competitors, even in cases where all concerned are hard-headed, common sense business men. It is not an uncommon thing to hear a merchant of standing, a pillar of the church without a mean instinct in him, refer with concentrated venom to his competitor as "that skunk of a Smith" or something even less complimentary. Such is the feeling that trade rivalry too often develops. The most useful work that associations do is to banish to some extent at least this tensity of trade strife.

Another interesting point brought out at the banquet in question was a comparison with retail conditions in the Mother Country. "They have a nicer time over there," said one speaker.. "The merchant goes to work in a silk hat and frocked coat, is all business while in the store and then forgets it at the end of the day. There is no Sunday selling there, holidays are observed and the social side of his life is not overlooked. He makes the money, too, but makes it easier. We are coming to this condition." Certainly we take things more strenuously here and it may be that we will come in time to the easier way of doing things. But as for the silk hat and "swallow-tail!" Banish the thought!

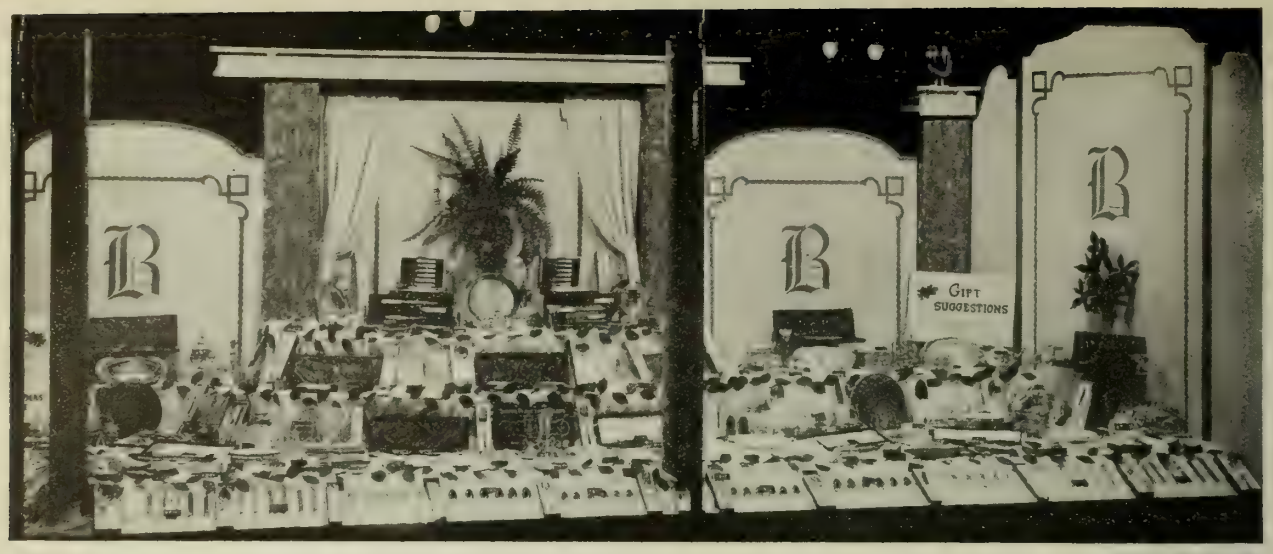
A WAR GOVERNMENT

THE idea of a War Government is beginning to occupy the public mind more and more. At the Winnipeg Board of Trade the following very important resolution was adopted:—

> "(1) Public opinion in Canada is determined that the present war shall end only when the entente allies are victorious.
>
> "(3) It is desirable that all the assistance Canada can render be given quickly and effectively.
>
> "(3) The conflict has reached the stage where a speeding up of this country's efforts will weigh heavily in bringing about the victory we all desire and expect.
>
> "(4) The United Kingdom has established a war government and a similar change on our system of administration is advisable.
>
> "(5) That the Right Hon. Sir Robert Borden, prime minister should assume the task of brining about this change.
>
> "(6) That in this re-organization he should assign any work directly connected with the prosecution of our share in the war to men whose executive and business capacity is recognized throughout the Dominion; that these men should be chosen solely on account of that capacity and without regard to territorial, racial, religious, political or other ordinary or traditional considerations; that they should constitute a war council and proceed along the same general lines as the corresponding organization in Great Britain.
>
> "(7) That in the opinion of this board, reorganization can and should be carried out without an appeal to the electors.
>
> "In making these representations, the Winnipeg Board of Trade desires to assure Sir Robert Borden that it is not acting in a spirit of criticism, nor has it any desire to interfere in the ordinary management of the country's affairs. The step now proposed is suggested solely with a view of insuring the full application of all our resources to the work of winning the war. This board does not deem it necessary or proper to make detailed suggestions regarding the manner of carrying out these proposals."

There was, apparently, no political influence at work. Conservatives and Liberals alike voted for the resolution. It was an earnest effort on the part of business men to impress the need for what would be, in every sense of the word, a business measure. HARDWARE AND METAL, as a business paper, believes that the formation of a War Government would be a step in the right direction. The same need that forced Lloyd George into power is felt here. Political expediency must be entirely forgotten for the duration of the war.

This does not necessarily mean bringing the Liberal leaders into the cabinet. It means going over the public men of Canada—the big men—and selecting for each portfolio the one man in Canada best fitted to fill it. If it so happens that some of the Liberal leaders are considered to be the best men for any of the positions, include them; but only in such instance should they be taken in. HARDWARE AND METAL believes it would be possible to form a strong War Cabinet which would include very few indeed of the political leaders on either side of the House.



Awarded second prize for places over 5,000 population. Arranged by Chas. Byford, for Bond Hardware Co., Guelph, Ont.

The Merit of Canadian Displays

Prize Winning Windows in Hardware and Metal Contest Attest the High Standard on Which Display Work Has Been Placed in This Country—Descriptions of the Winning Displays.

THE advance of Canadian hardware stores in point of equipment and arrangement has been very marked of recent years. Plate glass fronts, handsome wall fixtures, glass showcases, have become features of practically all stores. In no more tangible way has the general advance been shown, however, than in the matter of window display; and, HARDWARE AND METAL'S annual Christmas window contest serves as a barometer of progress in display. Great interest attached, therefore, to the announcement of results in the 1916 contest as made two weeks ago. Only the first prize winners in both classes (places of 5,000 and over and places under 5,000) were reproduced. Herewith are presented the other prize winning windows.

A Magnificent Display

The window dressed by Charles Byford, for the Bond Hardware Co., Guelph, which was awarded second prize in Class A, was undoubtedly one of the finest displays of hardware ever put behind plate glass. The arrangement of the goods, the decorative effects combined with the dignified background, were considered by the judges to be very close indeed to perfection. The only point on which the display given first prize was judged to be better was in the matter of a wider selection of goods.

Mr. Byford describes his display as follows:

"At this season of the year almost every business man in the different lines of merchandise realizes that to get the maximum amount of business he must put a little extra effort on the window displays that will attract attention. No better advertisement can a store have than the reputation of well dressed windows, it is the personality if the interior. The public generally look for special displays at Christmas time and the store which can attract the attention will get the business not only in the particular lines displayed but also lines that are expected to be sold in a hardware store, because the displays advertise the store's name.

"The photo of this Christmas display is described as follows:—

"The background was composed of four square pillars covered with imitation marble paper which presented a pleasing contrast to the centre and two end pieces which was made of beaver board and finished in cream and gold, the letter B in old English. The cap on the pillars and cross piece over centre was finished in white and gold.

"In the centre portion of the background cream curtains were draped to the side of the pillars with a large sword fern in the centre. The end division was made of beaver board and finished the same as the background, cream and gold, with a brush of poinsettas.

"The floor of the window being raised six inches with a slope to the front gave a splendid opportunity for displaying table cutlery, etc.

"The steps were arranged with a number of equal size boxes and the same as the floor was covered first with white paper and then cheese cloth. Holly garlands were used with good effect on the edges and around the front. This window was given over entirely to displaying silverware, carvers and cutlery, each article was marked with a neat price ticket. Two window cards were used, one which does not show plainly in the photo is 'A purchase now will save worry Christmas Eve.'

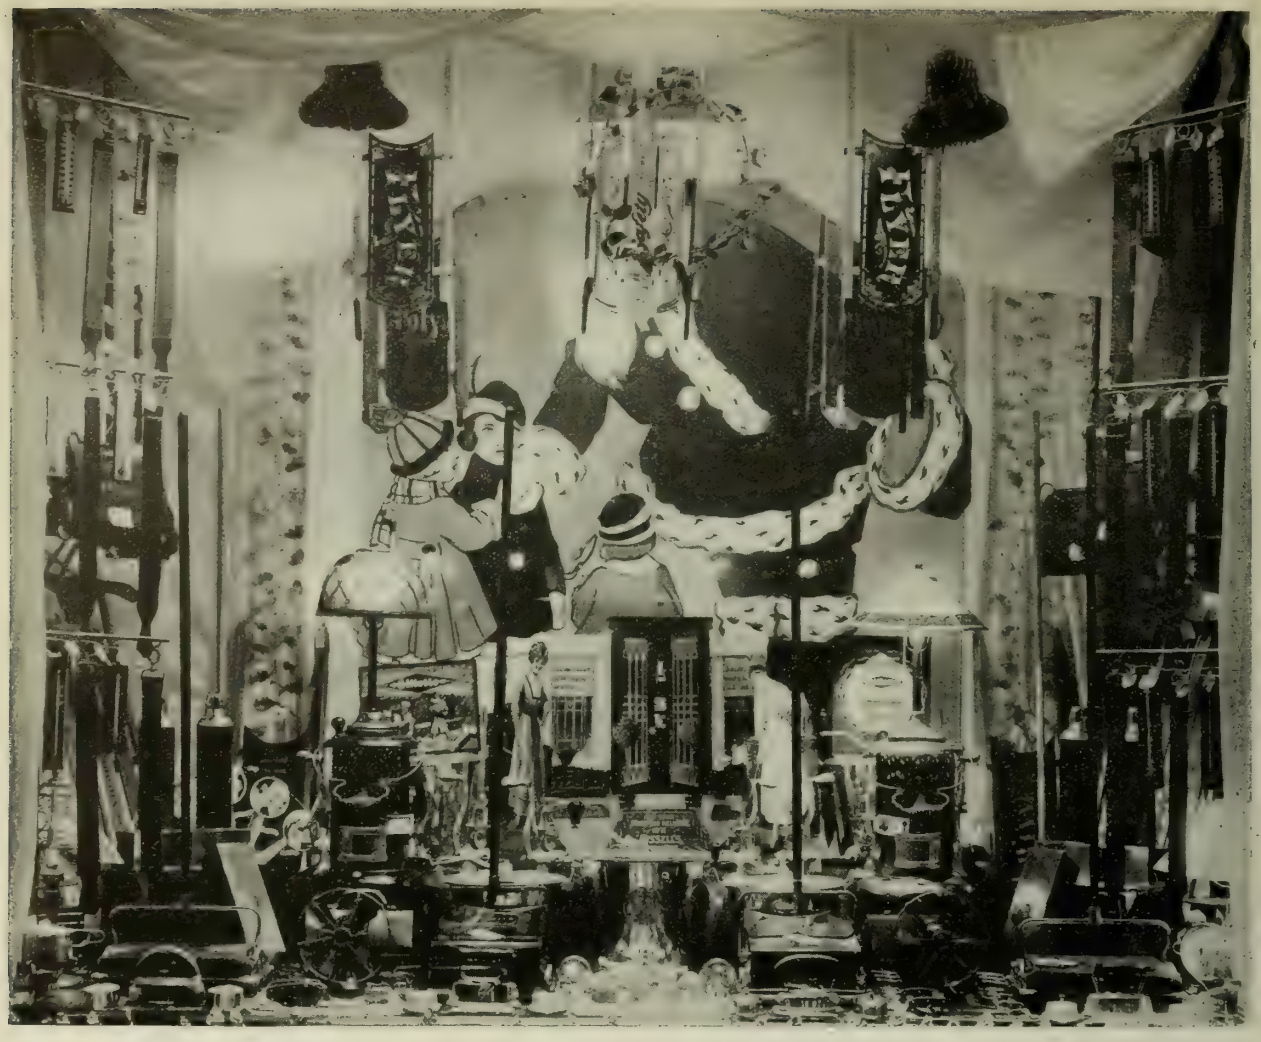
"Around the top of the window was hung a valance in cream and gold. The size of this window is 18 ft. x 6 ft., is lighted by five 100 c.p. lamps which showed up the display attractively at night.

TRIBUTE TO HARDWARE

An authority on window display in all lines of merchandize declares that "for all around excellence it is well nigh impossible to get better work than is shown in these hardware windows (H.&M. contest displays). It is not generally thought that hardware presents the same opportunities for display as some other lines; but, after seeing these photos, I am not so sure of that."

Awarded second prize for places under 5,000 population Arranged by C. L. Black, for Binn's Hardware, Newmarket, Ont.

Awarded third prize for places und er 5,000 population. Arranged by F. Menzies for Owen & Birmingham, Campbellford, Ont.



Awarded third prize for places over 5,000 population. Arranged by Alex. Bailey, for Sumner Co., Moncton, New Brunswick.

"In a display of this kind I believe in showing a good variety of articles but not crowding, so that it gives the public an opportunity to make a selection at their leisure and when price tickets are used it makes easy work for the salesman, we have proved this."

Maritime Prize Winnner

The third prize winner in Class A was dressed by Alex. Bailey for the Summer Co., Moncton, N.B. This display was noteworthy for what might be termed its "texture"—a point not thoroughly well brought out by the photograph. The arrangement of the goods that made up this window had been very cleverly worked out. The judges realized this more the closer they looked into it. Not only had the different varieties been kept well together but appearance and economy of space had been very carefully considered. Without effecting too crowded an appearance, **every available square** inch of space had been utilized.

This window would unquestionably be a big business getter and it was largely on the score of its selling force that it was given a place among the prize windows.

Another "Stocky" Display

The same quality—selling force, achieved by a well ordered and wide assortment of goods—won second prize in Class B for the display entered by C. Leonard Black for Binns Hardware, Newmarket. As will be seen, a variety of goods was presented with a sufficiently striking arrangement to catch the attention of passers-by. Mr. Black describes the display as follows:—

"I wish to say that I thought we needed a window so attractive that it would stop the passers-by so that they would see something that would fill the bill as a gift or a necessity to themselves and also settle the question by seeing the price right on the article.

"The background is made of panelled beaver board trimmed with maple leaves and holly, finished with evergreen sprays to make it more Christmassy. The panel strips have a double row of colored tinsel all around the background.

"The top is made of different colored festoons and tinsel. The right hand corner is built up of tin boxes covered with cotton batts. At the top Santa Claus is emerging from chimney with a glad smile to all. The bottom, like the back, is also covered with cotton batts so as to represent snow, the whole being covered with Christmas snow which gives a nice glistening effect when the lights are all turned on. The reading lamp at the back is also connected up and lights that part of the window very nicely. We have the pennants of the Allies on the left which is only partly shown."

Selling Force Here

The third prize in Class B was awarded again on Selling Force. It was trimmed by F. Menzies for Owen and Birmingham of Campbellford, Ont. As a striking window with a splendid assortment of goods it was judged to be well worth the order of merit given. Mr. Menzies gives the following description:

"The background is covered with white cotton and lattice work set out 10 in. from background with glass shelves on brackets behind. It is decorated with rose vines and holly. Both sides have shelves. The bottom is covered with white cotton and holly in and around."

Fourth Prize Winners

Space does not permit the reproduction here of the fourth prize winners but they will be presented later. They were excellent displays in every way.

Matt Horton Has a Program of Sales

Matt Keeps Ahead by Thinking and Planning Ahead — He Subscribes to Several Newspapers for the Advertisements of Department Stores in Them— Matt's Own Advertising—His Special Sales and How They Are Prepared for and Made Successful.

By John C. Kirkwood

I HAVE spoken of my salesmen—how I train them, how I guide them towards bigger things for themselves, how I encourage them to educate themselves by study, by visits to factories, and by investigations of various sorts. But my salesmen are much more than students—very much more: they are **salesmen**; their business is to sell goods, at a profit.

But to make maximum sales, preparation is needed. Their preparation by knowledge of the goods they sell is necessary; but there is another form of preparation: planning ahead.

A Sales Programme

There are fifty-two weeks in a year and numerous seasons. We know them in advance, and so can plan in advance. We know the spring activities and demands, and those of early summer; also those of early autumn, mid-autumn and pre-Christmas. We know too well those periods that are commonly called slack or dull—the in-between times when demand, left to itself, is sluggish, and when the cash register rings not very often, nor records big totals.

Now it is the business of myself and of my men to speed up sales, to stimulate buying in advance of seasons. We know that we'll be busy enough at times without any forcing on our part, but we try—and try successfully—to get some thrifty people to buy out of season—in advance of season; and so we "feature" many lines ahead of time, as it were.

Inspiration From Department Stores

I think I got my "tip" on this method from some of the department stores. Just here I want to say that I subscribe to several American daily newspapers which carry a good deal of department store advertising—papers published in New York, Boston, Philadelphia, and Chicago. They cost me $25 or so a year; but they're cheap, cheap! These advertisements of the big stores are the concrete expression of the ideas of big-brained men and of big-calibre merchants. I suppose some of the employed men earn $25,000 a year and more, and that principals may earn as much as a million a year. At any rate, I know of one man whose income from his department store is $2,000,000.

This is the fourth chapter of the story of Matt Horton, hardware dealer, and how he built up his business.

Matt once more dwells on the training and use of his salesmen as factors in the achievement of his success. His salesmen outnumber him and have multiplied selling opportunities. Therefore it is to Matt's advantage that he should make them crackerjack salesmen.

The fifth instalment of Matt's story will appear in an early issue of HARDWARE AND METAL.

These merchant princes, as they are called, are masters of merchandising—master salesmen. And they are surrounded with men to whom they pay big salaries, not to **buy** goods, but to **sell** them. The selling pace in these huge stores—which employ, each of them, thousands of sales people—is furiously fast. The finest brain-power in the world is engaged in directing these businesses, to make them clearance houses for goods gathered from all over the world, and to stimulate the public to buy—to buy when the seller wants them to buy.

These big department stores have the public where they want it—on the watch all the time for desired goods; and they **know** that the public will buy when it is bidden to buy, for have they not trained it to this readiness? and have they not had an avalanche of proof that the public will buy what it is bidden to buy and when it is bidden to buy?

Where Matt Gets His Ideas

In the department store advertisements in these big city papers and from other advertisements in them, I get ideas and inspirations—almost too many, and I catch their spirit, and am energized by them. People say, "Matt's a wonder! He's the most ideasful man we ever saw!" and even the commercial travellers who come to Hurston talk about me admiringly; and I think they have carried my fame over a good stretch of country. But, bless you, I don't dig out all of my ideas out of my own cranium. I buy and borrow them. I draw on other's experiences and doings. My business is to adapt ideas to Hurston conditions and to my own business; and this is not really difficult.

Matt's Advertisements

You may have wondered where I get the ginger I put into my advertisements in our two local papers. It is borrowed or appropriated ginger, if you will. From the advertisements of the big department stores in the papers I get I have caught a style, or imbibed a spirit. I do not copy others' language, but I listen to their conversation, as it were; and in listening closely I acquire points of view, and become more or less imitative, I suppose. But I am not concerned about that. I have ideas, I have merchandise, I have a medium of expression—our newspapers, I know my public, I know their capacity and the nature of their interest and responsiveness. And with all this I find no trouble in preparing my advertisements.

I have told you of a man in a dry goods store who helps me in the preparation of my catalogues and printed matter—a man who has a good knowledge of advertising. I pass on to him some of these newspapers I get after I have done with them, and he gets ideas and help from them for the use of the store he works in. This man, when I am away, prepares my advertisements for me, and does it very well.

Matt's Staff Helps Him

I have my men help me. They also see these papers we get; and they are free to keep any copies that appeal to them. As a matter of fact, they have an understanding among themselves as to which papers they take home with them.

But before any paper is taken away from our store, it is scanned by my men or me, or both, for ideas; and we cut out the advertisements or parts of advertisements, and other material, in which we have found a suggestion. These are mounted on sheets of paper, and passed on to me.

My senior men read these papers with an inquiring, judicial mind, and quite apart from me, get ideas and assistance useful to them and me; and these may be discussed at our weekly or monthly conferences.

Also, I encourage my men—indeed, require of them—to prepare advertise-

ments of the things in their departments which they want featured in our advertisements. Some take to this more kindly and better than others; but it is good practice for all; and since some knowledge of advertising expression and practice is essential nowadays in every man who expects to have ultimately a business of his own, these men of mine try to do their best. Each man gives me his "copy," and I edit it, if I think it needs condensation, or strengthened statements; or re-write it, if need be. My aim in all this is to impose on each man the right kind of burden, and to make him a real partner in the doing of our work.

Planning Ahead

Now I come back to what I set out to write about: our sales programme and plans.

Weeks in advance we know our weekly programme. Every man is called upon to think and plan ahead. Each senior man, I may say, is responsible for a department, or two or more departments. Paints, polishes, glass and such allied things constitute one department; cutlery and silverware another department; electrical goods, another; enamelware and tinware, another; stoves, another; and so on.

As I have said, we try as much as possible to stimulate demand in advance of the season of common buying. You know, perhaps, that some department stores "feature" enameled ware in January. We do the same. We give enameled ware a strong showing in January. We stock up more heavily in this line for this month than at other times, and we make a reduction from the prices which will govern later on. We do not cut profits to the quick, but we do concede a bona-fide and material discount—as an inducement to buy in January. This discount gives a due reward to those who take advantage of this sale.

Later on they know that higher prices will obtain; and so they have confidence in the sale, and can be induced to buy out of season.

Similarly we stimulate pre-season buying of garden tools, of paints and brushes, of sporting goods, of screens, of stoves, and so on.

Talking Sales in Advance

The justification of these pre-season sales is this: We bunch a lot of business of a given sort in a short space of time; we brighten business for our store by always having something distinctive and notable to offer; we boom our sales, and this at a satisfactory aggregate profit. What profit is surrendered per article is recovered in multiplied sales—that is, in increased sales.

These special sales, before they occur, are advertised well in advance; we let our customers and our community know that the sales will occur during such-and-such a week, or month, or fortnight, as the case may be. We do this without hesitation. What we may lose by holding back a buyer from making an immediate purchase at full profit we gain in other ways. For one thing, we keep people from buying elsewhere; they wait for our sale, if they can. Also, we induce action on the part of many who may be hanging back. The inducement of a special price does the trick many, many times.

Buyers Know Their Wants in Advance

In the case of the majority of purchases, buyers know well in advance of their requirements. They know, perhaps a full year in advance, that a new stove is needed, that their house needs painting, that screens for windows and doors are needed, that tools are needed. They know long before they purchase that a new set of harness is needed (and I sell harness), or that a bicycle is to be bought, or skates, or hockey sticks, or Christmas presents. They know long in advance that some day they will buy a ladder, or a gasoline engine, or builders' hardware or roofing. These things, as a rule, are not bought suddenly. They are considered purchases.

Now if I can induce my customers, and others not my regular customers, to buy from me—this by the temptation of a special price, and at a time when they are unhurried into action or decision by the urgency of their needs—I am doing a wise thing in my own interests as well as rendering them a real service.

You must remember that there are other sources of supply—the department stores and mail order houses. A good deal of buying of the things I sell is done elsewhere, for one reason or another; and I always keep in mind that I don't make a sou on the thing I don't sell. My bread and butter comes from what I sell, not from what the other man sells. And so I let it be known well in advance that at a given time and for a stated period my store will have a special sale of this or that.

Advertising Special Sales

In my store is a blackboard, boldly displayed. On this our sales programme for the next two months or so is conspicuously set forth, the writing or printing being put on with a brush in white. This does a good work for us—by its silence. Also, I put in parcels we send out, and in correspondence, little slips announcing forthcoming sales, and telling in particular of the one immediately due. Also, in the newspapers I use the sales programme is announced.

You must remember that these sales are established events in my territory, and that they are enough worth while to make an impression. When I began them they were much less successful than they are now. Now, they do take hold of those of thrifty disposition, and cause them to buy when otherwise they might defer buying indefinitely, or be trapped into buying elsewhere, and something not so desirable or such good value as can be obtained from me.

Then my staff and I, as we meet our customers, keep talking about the sale we will have shortly, and so do we help to give these sales importance in the esteem of our customers.

Staging Special Sales

The goods featured in connection with these special sales are displayed as strikingly and impressively as we can contrive. Our windows feature them; and they are brought forward, to the fullest possible extent, so that customers will be made conscious on entrance of the particular merchandise being featured.

Also, by means of hand-lettered cards, made bright with color, is the sale emphasized. Just here I want to mention my debt of obligation to that man Edwards who has been contributing to HARDWARE AND METAL a fine series of articles on the writing of show cards. More than one of my men uses these helpful lessons.

Using Spare Time

You can see that with always much preparatory work in hand, my men have small excuse to hang about the front door, gazing idly out, or for lounging about the store.

This work of planning and getting ready takes up time not used in selling or other service. It absorbs the interest and minds of my men in a profitable and agreeable way, and it prepares them in no small measure for the approaching sale. Ideas come to them during this labor of preparation; so that when the sale is on it is put on well.

Another result of this directed and focused interest of preparation is that my men acquire the habit of keeping their eyes open for special merchandise not ordinarily carried in hardware stores, but which they feel they can sell, and which will give distinction to the sale. Also, they are ever on the alert for ideas by which sales can be "staged" or made highly resultful and successful. All this means the development of my men in selling power and as merchants, which is of clear advantage to me.

(To be continued.)

Fire from unknown causes did $3,000 damage to the stock of the Transparent Rubber Company, Danforth Avenue, Toronto, January 29. The building suffered no damage.

Something New for the Cardwriter

A Series That Will Give Ideas and Instructions for the Cardwriter Who Has Already Mastered the Rudiments of the Work.

By R. T. D. Edwards

EDITOR'S NOTE—*Before introducing this new series of cardwriting, it is necessary to give a few words of explanation as to the kind of a series it will be. The "Cardwriting Made Easy" series, which is just completed, was composed of more or less standard alphabets and showcard methods. They ranged from the simplest beginners' exercises to fairly complicated work. This course covered the greater part of showcard work and those who followed it have had a thorough grounding. This new series, which will be called "Something New for the Cardwriter," will consist of twelve lessons, and should be of great interest to all who have followed the first series. The beginner, as well as the more accomplished man, will be able to follow this series, as each stroke will be explained in detail.*

Lesson I.

ALTHOUGH this month's chart shows a brush stroke style of Alphabet, the double stroke and outline work will be also gone into as this work is absolutely essential in the execution of all kinds of show card work. In addition to these alphabets, new styles of pen lettering will be featured.

The formation set forth in the chart is of a free and easy style and it is not at all necessary to keep to the exact type. If the chart and card reproduction are compared it will be seen what is meant. For instance in the chart the lower case "g" is of a different formation than the "g" used on the "Spring Goods" card. This is just one instance of the many varieties that can be effected without changing the general effect of the lettering.

It depends a great deal upon the various letters which go to make up a word, as to the style of letters that can be used together. Fig. 1 illustrates this. The cross bar of the "T" in the first instance is straight because no stroke interferes with it, but in the second case the "H" interferes and the cross stroke is made as shown. This will also be noticed as the different completed cards are examined. Thus we are getting away from hard and fast rules, making formations as the occasion arises and using the chart as a basis. The main thing to learn is the general effect of this alphabet then, it will be possible to carry it out successfully.

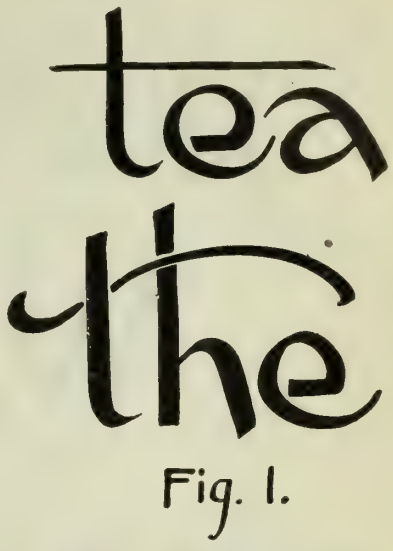


Fig. 1.

Note the absence of spurs from the letters of this chart. This feature is different from the Roman lettering and it requires much more care in finishing and commencing the strokes.

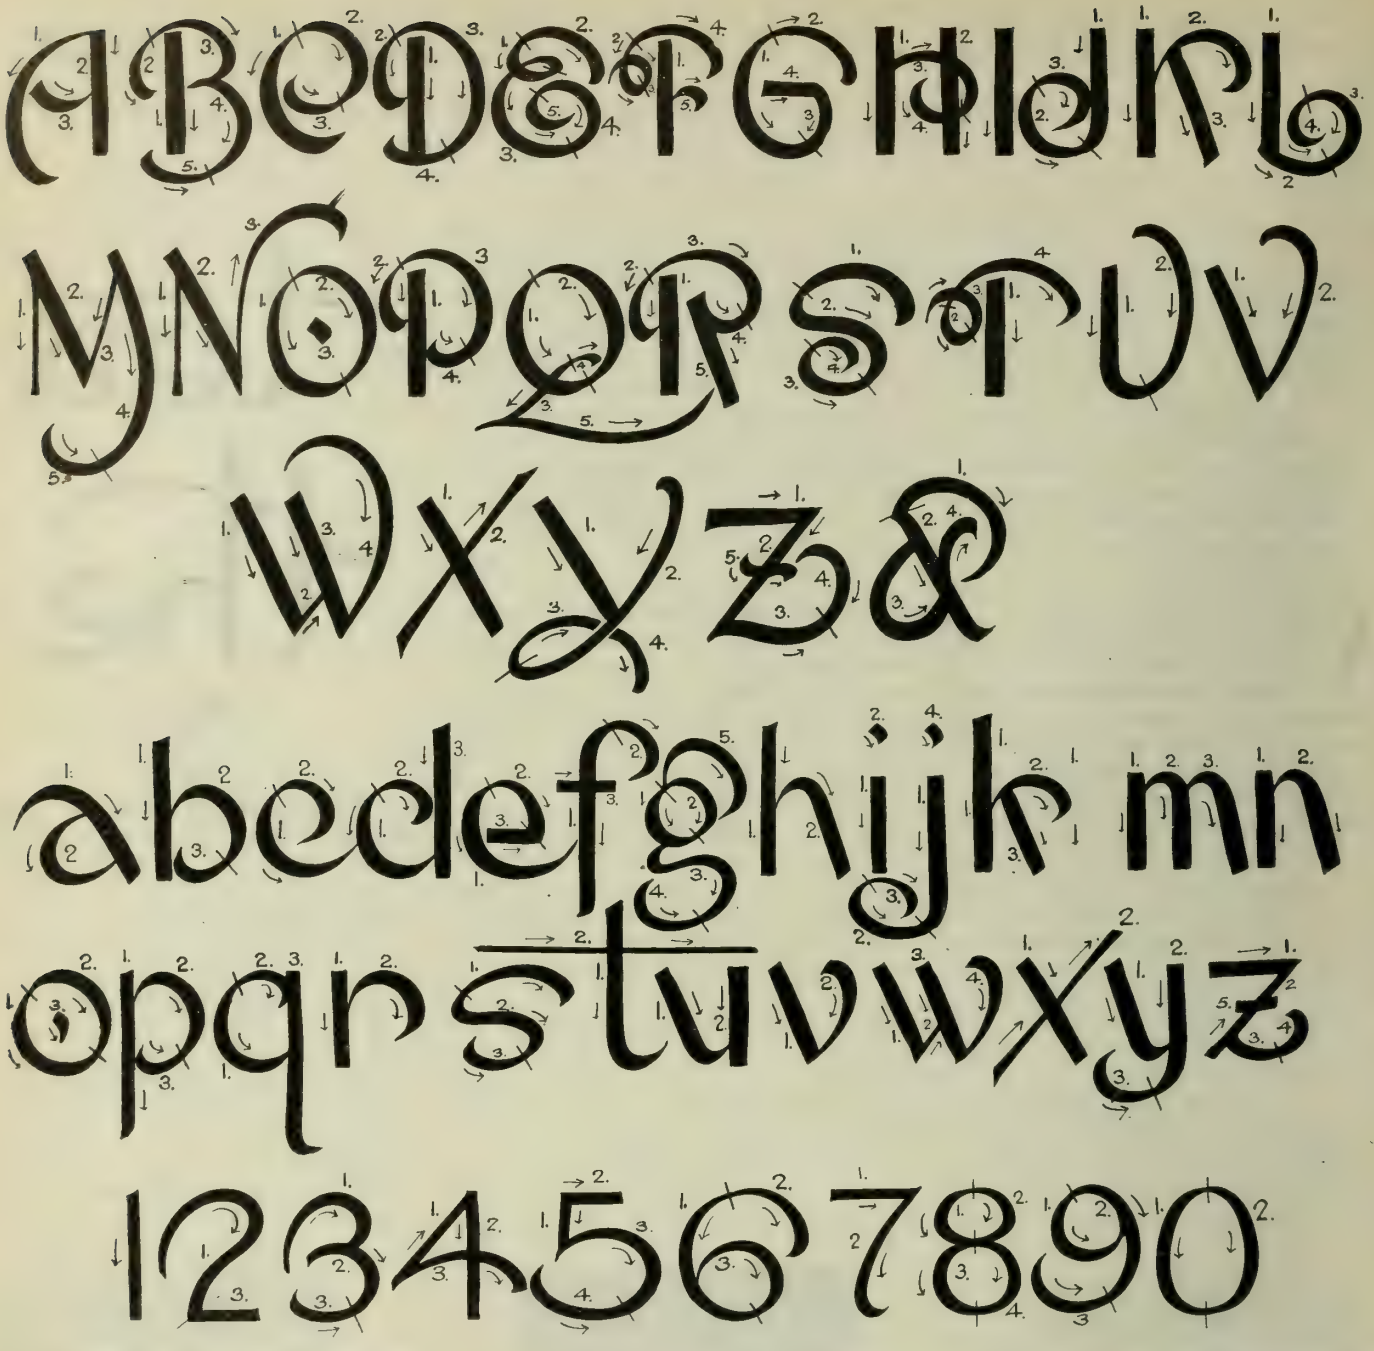
The Chart

It must be remembered that this is brush stroke work. Each stroke is made with one sweep of the brush. The brush used should be a red sable writer that can be drawn out to a chisel point which insures a thick or thin stroke as the worker desires.

Lower Case

"A", The main feature of this letter is stroke 1. This is made with one sweep of the brush. Not the angle, the end of this stroke is at. Also how much further stroke 1 projects to the right than does stroke 2. This letter requires much practice.

"B" is a three stroke letter and its feature is where stroke 1 and 3 meet.



"C"'s feature is stroke 1, note how it projects to right more than does stroke 2. Practise this letter often.

"D" Note the relation of stroke 2 has to stroke 1. They are all but joined.

"E" has somewhat of the same formation as "C". This is a typical letter of this alphabet. Stroke 3 must be parallel to the upper and lower guide lines.

The down stroke of "F" finishes below the lower guide line. Note that stroke 2 is brought down to the upper guide line. These strokes should be practised many times.

"G" is an all curved stroke letter and this is only one of the many formations which can be used in this style of letter. Note the long sweep of stroke 5.

The feature of "H" is stroke 2. Note the angle it is at and the angle the end of the stroke is. It will probably be difficult to get this at first but practice will rectify this. The only thing new about the I is that the dot is not round.

"J" has a very graceful base and you will find this needs much attention note how these strokes are brought under the other letters. This should work in the same when putting it into actual use.

The combination strokes 2 and 3 are the feature of "K." Practise these many times.

"M" and "N" have the same feature as has "H". Strokes 3 and 2 respectively are just at the right angle to give them an individual appearance.

Note that the narrow parts of the "O" are to the right and left instead of being in the centre as the correct form of Roman lettering shows it.

"P" and "Q" are somewhat similar in construction but reversed. They require much practice.

Stroke 2 of "R" is the feature of this letter, practise often.

In the usual construction of the Roman "S" the top portion is smaller than the lower. In this case it is the reverse. This is a good example of the idea of this alphabet.

You will note upon studying the completed cards that this letter is used in variety.

Stroke 2 of "T" is also used in as many varieties as the writer sees fit to make.

Stroke 1 of "U" is just the reverse of stroke 2 of "H".

Note how stokes 1 of "V" and 1 and 2 of "W" are all at the same angle and the beginning of each stroke is at right angles with the

stroke itself instead, as in Roman lettering, of following the guide line.

Both of these letters will require much time spent on them in order to perfect their formations.

"X" shows the extreme in stroke 2.

"Y" is a letter that will require a lot of practice. Stroke 1 appears in other letters. Strokes 2 and 3 have appeared before in the letter "J". You will notice this letter made in different formations on the completed cards.

"Z" This is only one variety of many that can be formed.

Numerals

The top of the 1 is cut at an angle slanting to the left.

Now you have a chance to show your skill at long curved strokes. Stroke one of "2" will require a lot of practice. This is the feature stroke and should be made the same as shown.

Stroke one of "3" is the same as that of "2" but not so long. This numeral requires much practice. Note how stroke one joins stroke two.

Stroke three gives the variety to the figure "4."

Strokes three and four give the "5" a very graceful appearance. Note how stroke two projects out to the right beyond stroke three.

Practise stroke two of "7" often.

The "8" is somewhat similar to the Roman formation.

The "9" is just the reverse of the "6." Much practice is needed here.

"0" is of Roman formation.

Upper Case

You will notice the prevalence of curved strokes in the upper case alphabet. This means more practice is necessary in order to reproduce them.

The feature of "A" is the curved stroke 1. This i just one long sweep of the brush from the top of stroke 2 to beneath the lower guide line.

Strokes 2, 3, 4, and 5, of "B." Practise these often. Note the graceful appearance of the letter "C."

A new feature in "D" is the relation stroke 4 has to stroke 1. This is a somewhat different way of joining up the bottom.

Note the long top stroke 2 of "E." The many curved lines of this letter need a lot of practice work in order to make a graceful letter. "F" shows new style top strokes. Stroke 4 carries out the same feature as shown in other letters. Practise often.

"G" also shows the long top right-hand stroke. Note how it projects beyond stroke 3. Much practice is needed here.

Strokes 3 and 4 of "H" are the only differences in this letter. Strokes 1 and 2 should be parallel. The 1 is just a perpendicular stroke.

"J." The chief feature is shown in strokes 2 and 3. Note that they are half the height of stroke 1. Practise often.

In "K" we have much the same combination of stroke as shown in the lower case letter "K." The long curved stroke 2 needs much practice.

Note the slant at which stroke 2 and 1 of "L" are joined. This is a good formation and should be practised often.

The one feature of the "M" is the long sweeping strokes 4 and 5. This is only one of the many varieties of letter formations that can be made.

To make stroke 3 of "N" it is advisable to turn the card more to the left so a good clean stroke can be made.

The centre dot of the "O" is not necessary, but can be added for variety's sake. Note how strokes 3 and 4 are brought down lower than usual.

"Q" shows a variety in the strokes 3,

4 and 5. Many different styles of tails are used on this letter. Practise the long curved stroke often.

"R" shows a very graceful letter and will need a lot of work to reproduce its formation. Note the relation of strokes 3 and 4 to stroke 5.

The "S" is just a larger copy of the lower case letter with stroke 4 added. Practise stroke 1 often.

"T" is the same as the F without stroke 5.

Stroke 2 of "U" is one you should feature in practice work.

Stroke 2 of "V" is a little different to that of the "U" but requires just as much practice.

The long graceful stroke 4 of "W" also needs much practice. Note that strokes 1 and 3 are parallel.

"X" is just a reproduction of that used in the lower case.

In the lower part of the letter "Y" is shown a variety. The combination strokes 2, 3 and 4 require much practice. Note the strokes 3 and 4 of "Z." These are the strokes in this letter that need the most practice.

The sign "&" shows the long stroke extended to the right as featured in many of the letters in the foregoing alphabets.

We are featuring in this lesson, the use of letter hand-painted floral designs on show cards for spring. Note the collection of four small panel cards. These are good illustrations of this work.

The fruit card is on grey mat board and the floral design on both sides of the circle at the top of the card is a combination of green and different shades of violet. To get the best effect, first put on a shade of mauve mixed from purple and white; then put the darker color on after the other is dry, as is shown on the card. The green is put on last to give a green leaf effect.

The card "New Spring Imports," shows a dainty little floral piece at the bottom.

The green stocks in this case are put on first then the two shades of mauve. This makes a striking combination on a black card background.

The white card "New Arrivals," also shows the same colors used on it as was used on the black card. This makes a very pretty effect for spring.

The "House Cleaning" card shows something new for a hardware store.

Note the floral effect at the lower part of the "S" and the two small floral designs at the top and bottom of the card.

All these floral designs are painted very quickly. No attempt is made to reproduce a flower, but just the general effect is all that is required.

The large card "Spring Goods," shows a very striking effect on a mottled brown mat board card. The lettering is white and the large lettering is shaded with black. The floral design over the "S" brightens up the card wonderfully and is quite in keeping with Easter time showings.

The "Easter Favorite" card is written on white card with black show card color shaded in a pale green. The purple and green floral designs at the top and bottom make a very effective card.

The "Canned Soup" card is an excellent design for grocery store display.

The dark band across the card is of pale green and the mottling on it is of a paler shade of the same color.

The "Garden Tools" card shows a quite elaborate design and a combination of two-tone green shading and scrolling with a black letter on a white cardboard

The entire set of cards have the alphabet lesson of this month put into use. You can easily see our reason for saying that this alphabet is practical for all kinds of cards, and also the various forms that can be made of the same letters.

Handling Ruffled Customers

Can the Business of Average Size Every Time Live Up, Literally, to That Famous Declaration: "the Customer is Always Right."

AN article which recently appeared in *"System,"* the Magazine of Business, entitled "Handling Ruffled Customers," contains so many truths regarding the subject that it is here reprinted for the benefit of salesmen. It will interest all clerks who are called upon to serve customers in the paint department. The article does not specifically deal with hardware, but many of the types of customers referred to are not by any means unknown to the clerks in hardware stores. The article, written by Russell Wilmot, follows:—

No matter what kind or size a man's business may be, he will doubtless have his quota of dissatisfied customers. The best he can hope to do is to hold it down to a minimum. Only a business which is in a position to create new customers more rapidly than it loses old ones can usually afford to have any at all.

Many merchants believe that an appeased customer isn't so valuable an asset to their stores as one who has never been provoked. It doesn't take much of a disappointment, they hold, to drive a customer to a competitor. The customer, to begin with, expects fair treatment and courtesy. He has, they believe, a right to expect them.

It is the occasional unreasonable customer, whose demands on the merchant are unfair to him and to his business, who really calls for the most careful consideration and who is likely to do the greatest amount of harm.

The point at which the unfair customer and the fair merchant can get together is often narrow and calls for great tact from those in charge of complaints. Perhaps, as a matter of fact, the stores suffer losses too often, rather than permit customers to leave in anger.

This brings up the question: Can a business man with an average sized store live up, literally, to that famous declaration of a merchant with a very big store: "The customer is always right"? Many think that there is such a thing as going too far in yielding to customers' requests regardless of their demands. Merchants' associations in several cities are restricting the privileges extended to customers by their members.

Yet it is of course true that often the customer may have just cause for complaint. And then it surely becomes the duty of the store to give every possible adjustment, for otherwise it is likely to suffer to a far greater degree than the customer. So it is important to locate the causes for justified complaints and to stamp them out.

One of these causes, and often an important one, may arise from the danger that advertising departments sometimes unintentionally misrepresent goods. Especially is this true where many of the customers involved are women.

Here is a case where misjudgment lost trade. A large and expensive Sunday advertisement in a Boston paper told of wonderful values in feathers and tips. For a year a certain woman had been looking forward to buying three short, graceful, heavy-headed feathers. Here was her chance.

Early Monday morning, therefore, she hurried into the shopping district and secured the feathers. She paid rather more than she had expected, but got exactly what she wanted. She carried the feathers to her milliner and had them placed upon a hat for an afternoon at a long anticipated symphony concert. When she left the concert, she found rain falling in torrents.

The graceful, curling feathers were soon draggled and straightened. Knowing, however, that they could be curled again at slight expense within a day or so, this woman took them to be re-curled to the very store at which she had purchased them. Two days later she called for them and was handed three over-curled, partly worn, wooly-fibred feathers.

"These are not mine," the woman declared. "You have made a mistake."

"We never make a mistake," the saleswoman replied, a bit haughtily.

"But they are not mine!" the woman protested. "Mine were just new—last Monday. They were much heavier and glossier fibred."

In vain she appealed to the floor manager and at the complaint office. The saleswoman declared that there had been no other black feathers in the repair room, the floor man was tolerantly incredulous, and the girl who had made the sale in Monday's rush could not be located.

The floor man pointed out to the complaint man—sotto voice—that any one with half an eye could see that the feathers were half worn out and had been cheap ones in the first place. The woman heard him, agreed with him, and explained afresh that hers were handsome new ones. She was told coldly that nothing could be done about it, and—with tears dangerously near the surface—she departed. She had been subjected to injustice and branded as guilty of attempting a flagrant piece of dishonesty by the employees of one of the largest firms in the country. She was helpless, and yet she was right.

Then there is a source of complaints originating with a carelessly trained sales force. There are means available at small expense for the average sized store which wants to instruct its sales force about what it sells. The large store can afford to use more elaborate means of its own creation to reach the same end. Therefore, there is apparently little excuse for a sales force with a soggy knowledge of what it is selling.

HOW FURNACES ARE MADE

(Continued from page 43.)

together, and in so doing knocked the sand off. This method, however, was hardly suitable for cleaning these huge castings, and a more modern method has been developed, this is known as the shot blast method. There is a large room lined with heavy iron plates, and at one end of this a large reservoir with a hose resembling a small fire hose. The heavy castings are trucked into this room direct from the moulds. The compressed air is turned on and the shot about the size of small bird shot is forced at great pressure against the casting cleaning it almost instantly. This method has proved to be the most rapid and generally effective of any method yet devised.

As previously stated the bulk of the furnace parts are made of cast iron. There is, however, around it a jacket of plate steel. The top, too, is made of steel plate. These parts are stamped out in the machine room and there, all the tool work is done on the different parts. The connections are made and borings are provided and every needed change is made prior to their going to the room where they are assembled. Here the actual furnace is put together ready for shipment. Prior to shipment, however, they are not entirely set up. For instance over the whole furnace there is a sheet zinc body whose duty it is to properly distribute the heat to the pipes. This and other smaller parts are shipped in a knock-down condition, to be set up only when actually installed.

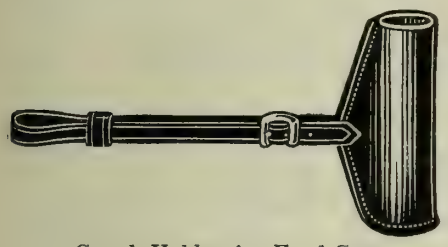
Like many another great factory this foundry has enormously increased its capacity since the war began, but all this new activity is not devoted to the peaceful task of making furnaces. Out in the immense machine shop a multitude of lathes are busily turning out shell forms. In a far corner a great hammer is ceaselessly rising and falling, pounding the rounded end on the glowing shell; everywhere the means for the works of peace have been turned to the ends of war. It has added a new scene of energy to a great business and a new complication that the heads of this business have successfully met and managed.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

CRANK HOLDER FOR FORD

G. L. Griffiths & Sons, Ltd., Stratford. Ont., have started to manufacture a leather crank holder for Ford cars. The accompanying illus tration shows the style of the holder, which the makers claim, that the holder will hold the



Crank Holder for Ford Car.

crank to one side, out of the way. The holder, it is said, is substantially made and can be sold at a reasonably low price.

STANLEY GARAGE HARDWARE

In connection with their advertising of Stanley garage hardware, The Stanley Works will offer to the retail hardware trade this year, a handsomely lithographed window display cut-out which is here illustrated.

This display pictures the use of The Stanley Garage Door Holder No. 1774, garage door hinges 1457, ten and twenty-four inches, chain and foot bolts, 1055 ten inches and 1056 ten inches, the Stanley Garage door duplex latch 1254, and garage door pull 1266, all of which make up Stanley garage door set "D."

This display is lithographed in nine colors on heavy cardboard. It stands forty inches long by twenty-five inches high and is supported by a strong easel. It comes folded up in only one piece and is very simply set up.

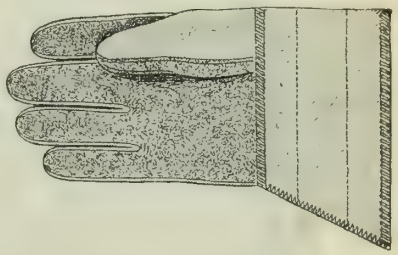
The top of the back inside wall of the garage, shown through the open doors, is cut out so that at night an electric light bulb may be set in it. From the front it will look as though your garage is lighted.

Although distribution of this display will not be made until March, the company states that requests for these displays should be sent in at once, addressed to the Service Department of The Stanley Works, New Britain, Conn.

Stanley Garage Hardware.

LEATHERETTE FACED GLOVE

The American Pad & Textile Company, Chatham, Ont., are manufacturing a line of leatherette faced gloves. The makers state that this imitation leather will give as long service in facing cotton gloves as the usual grades of leather ordinarily used for this purpose. The price of these gloves, it is said, is not more than the price of the leather trimmed gloves before the high prices came into effect. It is a source of great satisfaction when a substitute material can be found that will not only take the place of something that has reached abnormal cost, but will equal it in service



Leatherette Faced Gloves.

and appearance. The illustration accompanying this article gives a very good idea of how the glove is made, and of its general appearance.

ALUMINUM IN WAR

Just why aluminum should have proven so valuable becomes evident upon the consideration of the metal's characteristics. In volume, one pound of aluminum is equivalent to 2.8 pounds of iron, 4.6 pounds of lead, 4 pounds of silver, or 3.3 pounds of copper. In proportion to its weight no metal is so strong. It is the best conductor of heat known, and is nearly as good a conductor of electricity as is copper.

Owing to these qualities it has lent itself to a vast variety of war uses. The French army have employed it for horseshoes and lances, as well as buttons, belt buckles, and insignia of rank.

There is still another war use which is not so commonly known. A mixture of nitrate of ammonia with powdered aluminum forms the extremely high explosive "ammonal," which can be exploded only by a detonator. It is said to be safer than picric acid, nitroglycerine or nitrocellulose compounds, but deteriorates quickly in dampness. Immense quantities of aluminum have been exported from this country to make this high explosive.—*Brass World.*

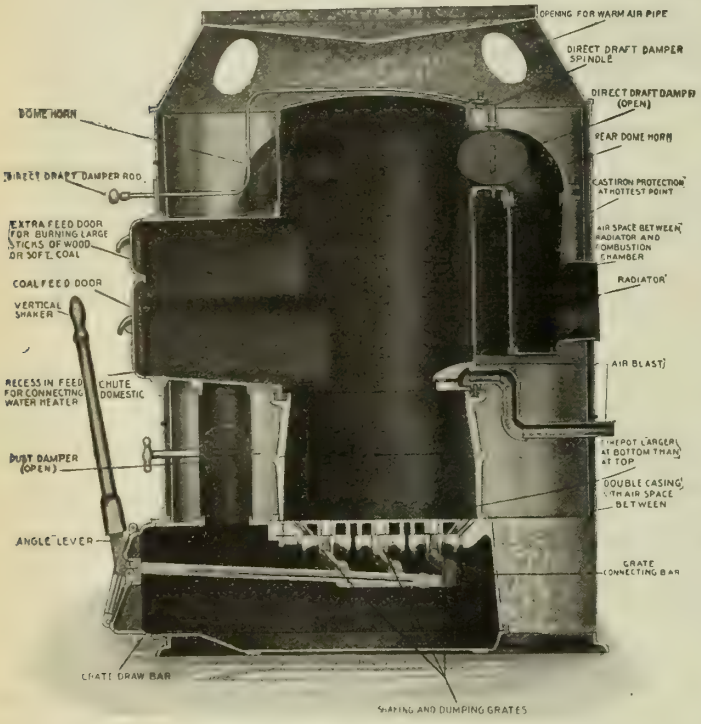
Hardware Dealers



The "Economy," a Furnace without a Peer.

THROUGHOUT the Dominion, there are to-day a number of localities in which we have no authorized agency.

The best man in these localities has an opportunity of adding to his reputation and profits by associating himself with the famous PEASE FURNACES.

To him, we say. "You can have exclusive selling rights, and we will co-operate with you to such an extent that Pease Furnaces will practically be sold by us for you. Your part will be the installing of the Furnaces and the collection of the payment only."

General Sales Office—118 King Street East, Toronto

WHAT OTHER PAPERS SAY

HIGH CRUDE PRICES FAIL TO BRING ABOUT LARGER PRODUCTION

From *National Petroleum News.*

The fight for crude oil in all fields of the country is forcing some of the highest prices in the history of petroleum. These high prices are not bringing in any more oil, however. Tank-wagon markets have advanced generally over the country, but not in proportion to the crude oil advance. This, with the fact that the tremendous gallonage of the summer is practically continuing throughout the winter, is causing considerable uneasiness as to what the warm weather of next summer will bring. Automobile manufacturers are continuing to increase their output and it seems to be impossible to saturate this country with motor cars in its present prosperous condition.

The situation is truly serious. Prospects are now for a continuing advancing market until another big pool of oil is developed similar to Cushing, or a present unknown refining method is discovered which will greatly increase the production of gasoline beyond the yield of present processes.

Eastern Field Dropping.

None of the present producing fields have increased their production materially. Pennsylvania continues its decline, although the Standard is making desperate efforts to hold production there at least steady by putting the price to $3.05 a barrel January 9th.

No new fields of any consequence are being developed. Wild catters are at work everywhere. Undoubtedly by summer there will be a greater production of crude oil, but oil men do not believe that it will do much more than steady the markets, if that.

Tank-wagon markets advanced a cent a gallon over the country the first of the year. Refinery prices on gasoline have been following very closely the tank-wagon markets. Pennsylvania refinery gasoline prices are prohibitive except for the sea board market. Tank-wagon prices of January 10 in cents a gallon are:

AN OBJECT LESSON

From *The Hardware Trade.*

From the stories of bankrupt retail business enterprises may often be drawn lessons and morals which point out certain pitfalls which are to be avoided.

A case in point is contained in the final figures of a certain defunct retail business, the data on which has recently come to the attention of the writer.

An investigation of the affairs of this particular debtor revealed the fact that the liabilities totaled approximately $24,000, while the assets were $11,000.

Of these total assets, over $23,000 were represented by accounts and notes receivable.

In other words, the evidences of credit which had been extended customers showed a sum practically sufficient to have taken care of the entire outstanding obligations of the merchant.

Again, total stock, furniture and fixtures amounted to less than $16,000.

Assuming 40 per cent. of the total capital to be the limit which can be safely carried in the form of book accounts, it is patent that credit was given many times in excess of the limits of safety and conservatism.

No further comment is needed. These few figures tell their own story. They should stand out before every reader as a warning of the danger which goes hand in hand with the promiscuous granting of credit and laxity in handling collections.

Better merchandise on the shelves than represented by slow and oftentimes worthless accounts.

MAN WHO READS TRADE PAPERS

From *The Improvement Bulletin.*

What effective use do you make of your trade journals? That is a question that might be asked of every man who is interested in any branch of the construction field. And its dollars to doughnuts that the progressive, growing concerns, be they contractors, or producers of building material, or sellers, are the ones who make prompt and intelligent use of their trade journals.

The writer dropped into the office of a successful and up-to-date firm that installs heating plants, the other day. The manager was pouring over *The Improvement Bulletin,* checking off the items that attracted his attention, with a pencil.

"I see you make good use of *The Bulletin,*" said the writer.

"We'd find it hard to 'keep house' without it. It's of great assistance to us, and there isn't much in it that escapes our attention."

Go into the office of the man who complains bitterly that business isn't what it used to be; that there's "very little doing" in his line; that this year's business was bad enough, but next year's will probably be worse, and the chances are that you will find his trade journals, if he takes any, piled in a heap in some out-of-the-way nook, with the wrappers still intact, gathering dust, and of no use to anyone.

Go into the office of the man who says he did a mighty fine business at a reasonable profit, notwithstanding keen competition this year, and he's got several thousand dollars worth of business waiting for him just ahead, and he knows where a lot more business is coming from after January 1, and one hundred times out of one hundred, such a man is a keen observer of trade conditions, a man who is "right on the job" when it comes to getting after trade prospects, a man who familiarizes himself with the latest developments in the trade field—in short, a man who makes prompt and profitable use of his trade papers.

WIDE-AWAKE BUSINESS

From *Paint, Oil and Drug Review.*

This is a time of astonishing changes in the business world, and never before was eternal vigilance so absolutely the price of commercial liberty. New sources of supply are appearing on every hand. New methods of manufacture out of new materials at new prices are a commonplace in every line of business.

In the brush market Leipzig was the world market for bristle till the summer of 1914. Now nearly all the American bristle comes direct from China and Siberia, but the business goes on as merrily as before.

In the color market so much has been said of the changes that it is useless to repeat, except that hardly an item in the old list of imported colors but is made in America or a substitute for it has been found. Price seemed an important thing for awhile and indeed it is now important, but after all, price is only a comparative proposition; we can soon adjust ourselves to any price as long as we base our selling price on selling cost and allow a proper percentage of profit. The main thing is alertness, full knowledge of the conditions surrounding the business and nerve enough to act promptly as conditions seem to indicate.

The chemical manufacturers have seen their opportunities and seized them, with the result that chemical stocks are paying the best dividends in the market to-day.

Change is the order of the day, and the wise one is the man who can adapt himself to the situations which confront us. There is nothing discreditable in a change of policy provided no moral principle is involved. A change of business habits is a mighty good thing for the average man, because it takes him out of the ruts and keeps him young and alive to what is going on around him. A good many of you know a certain manufacturer who made an excellent high-grade varnish and sold it by salesmen through regular trade channels, but business conditions had changed and his particular quality was not very profitable at the price he could afford to sell it.

He discovered the valuable properties of a certain oil in cleaning a bicycle one day and decided to advertise it.

The first cent that was not needed to buy bottles, cans and materials bought publicity. Advertising matter was sent out every day. It was soon discovered that this oil was good for clocks, locks, sewing machines, rods and reels—good, in fact, for every oiling necessity about the home or office. One man said it would make hunting boots waterproof and keep them soft and pliable. A woman wrote in that it would polish furniture; another that it would prevent rust on metal surfaces.

Soon an advertising campaign was started that has made the name of this oil a household term in every section of the United States. It is also sold in large quantities in England, China, New Zealand, South America, and elsewhere. In a few short years a prosperous business has been built from almost nothing, and the firm is now spending thousands of dollars yearly for advertising. In fact the business was founded entirely on advertising—not on salesmen.

Here was a total change of business and business policy promptly executed and carried out with force and good judgment. The result was success and the same methods properly applied will always insure success.

This is the time of year for sales meetings, talking things over and giving advice. Is there any better advice for the sales manager to give his force or the proprietor to give his clerks, be the business large or small, than this: "Be wide-awake, watch your opportunities, adapt yourself to meet conditions and serve the interests of your trade and you will be sure to satisfy your employer."

EVENTS IN THE TRADE

Fire Losses

Fire which started in some straw in a large shed in the rear of the premises of the St. Marys Hardware Company did $200 damage, on January 23.

Personal

F. W. Walkers of Walker & Merriani Tara, Ont., was a visitor at the Toronto office of HARDWARE AND METAL this week. Mr. Walker stated that business has been excellent and the outlook for spring is very promising.

Obituary

Ottawa, Ont.—The death occurred here of Thos. Edward Hickman, of the Ottawa Paint Works. The late Mr. Hickman, who was 67 years of age, had only been ill for about 10 days, and his death will be sincerely regretted by a wide circle of friends. He is survived by five sons, three of whom, Chas., R. H., and W. E., are actually connected with the Ottawa Paint Works.

Acme Steel Forms Canadian Co.

The Acme Steel Goods Co., of Chicago, have formed a Canadian company, under the name of the Acme Steel Goods Co. of Canada, under the control of J. E. Beauchamp, of J. E. Beauchamp & Co., Montreal, who have acted as their Eastern Canadian agents for some years. Under the new arrangement all Canadian business will be under the direct supervision of J. E. Beauchamp.

Ottawa Paint Works, Ltd., Elects Officers

The following officers were recently appointed to the Ottawa Paint Works management. Chas. Hickman, President and General Manager; James M. Young, Sec.-Treas.; R. H. Hickman, sales manager; A. A. Cronk, accountant; J. D. Robinson, manager, Toronto branch. Chas. Hickman, president and general manager of the company, visited the Toronto branch this week. In conversation with HARDWARE AND METAL, Mr. Hickman stated that the company's plant is running to full capacity, and that the outlook for spring is excellent. When asked if difficulty is being experienced in securing raw materials, etc., Mr. Hickman stated that deliveries on containers are very slow, but other raw materials are being received in good volume, although deliveries are frequently from 4 to 6 weeks behind schedule.

New Manager, the Canada Paint Co.

Royal Cluxton newly appointed manager of the Canada Paint Co., Ltd., was born in Ontario, spending the greater part of his early life and receiving his education in Peterboro.

When still a young man, Mr. Cluxton left Canada to take up his business career in the United States, and although spending a number of years on the other side, Mr. Cluxton never gave up his citizenship and is still a good, loyal Canadian.

ROYAL CLUXTON,
Appointed Manager Canada Paint Co., Ltd., Montreal.

Mr. Cluxton spent seven years as a traveller, representing one of the largest paint and varnish manufacturers, and his exceptional ability won him promotions from time to time. He was promoted to take charge of and develop the Sales Promotion department of this large concern, and after spending two years in this department was promoted to Sales Manager. This latter he relinquished to take up his duties in Canada and become manager of The Canada Paint Co., Montreal. Mr. Cluxton's experience coupled with his ability makes him well fitted to take over the management of so important a concern as The Canada Paint Co.

Maytag Co. Extends East

E. E. Lyday, Canadian manager of the Maytag Co., Winnipeg, makers of numerous types of washing machines, including the Multi-motor machine, is making a business trip to Ontario and Quebec to arrange for the distribution of these machines to the trade in the above two provinces.

Award of $3,000 Prize Delayed

The Canadian Ever Ready Works, and the American Ever Ready Works have announced that they have been obliged to delay the award of their $3,000 prize for a better name than flash-light. The award was originally advertised for Dec. 25. It was expected that the contest would produce about 250,000 entries. Over 530,000 were received. The work of sorting and filing these in shape for the judges to examine them has made it impossible to complete the judging to date. An announcement will therefore be made on April 5.

Montreal Personals

John O. White, of the Wallworth Co., Boston, U.S.A., was in Montreal this week.

L. E. Griffith, of the Surpless Dunn Co., New York, was in Montreal this week visiting business friends.

There was real, genuine rejoicing in the meeting of the hardware association in Montreal on January 31 at the re-appearance there of William Starke, who has returned to business and his old wide circle of business friends after a long indisposition from which he has very well recovered. He has been away from business for about nine weeks in all, and is heartily welcomed back.

The notice of the death of Wm. B. Stewart, of the Hamilton Cotton Co., in Toronto, which appeared in HARDWARE AND METAL last week caused many comments of regret in Montreal hardware circles, for amongst Montreal business men the late Mr. Stewart was a most valued friend.

Evinrude Agency

An unusually attractive booklet entitled "What the Evinrude Agency Means to You", has been issued by the Evinrude Motor Co., Milwaukee, Wis. The book, which is handsomely illustrated describes in detail the Evinrude plan of co-operation. Copies will be mailed on request.

Business Changes

Yellow Grass, Sask.—McLaren & Son, hardware are moving to Tugaske.

Montreal, Quebec.—Adolphe Brouillet, hardware merchant, has sold his stock.

Stoughton, Sask.—Fawcett & Bowes, hardware have been succeeded by E. C. Fawcett.

Yellow Grass, Sask.—McLaren & Son, hardware and furniture, are moving to Tugaske.

Ravenscrag, Sask.—The Ravenscrag Hardware Co. have been succeeded by R. Whitefoot.

Balmoral, Manitoba—J. L. Barbour, hardware merchant, has sold his stock to C. S. Jones.

Bentley, Alberta—Herman Burgar, hardware merchant, has sold to Morris and Taylor, Millet.

Stoughton, Sask.—Fawcett & Bowes, hardware merchants, have been succeeded by E. C. Fawcett.

Irwins Salesmen's Convention

T. Mortimer has just returned from Wilmington, Ohio, the home of the original solid centre stem auger bit, manufactured by the Irwin Auger Bit Co., where a two days salesman's convention was held to confer upon topics of interest, specially in connection with the selling end.

Last December the factory advised the jobbing trade that on account of the increased cost of raw material, etc., it would be necessary to advance prices particularly as only one advance had been made in many years. Therefore the trade will not be surprised to learn that an advance in price has now been put into effect.

However, to avoid the inconvenience to the trade that a new list would entail, they have decided to continue selling upon the old list as adopted some years ago.

No doubt the trade will appreciate this consideration on the part of the company, especially at this time when much confusion is being caused by changes in lists, discounts, etc.

Cushman Motor Works in New Quarters

Winnipeg, Man.—The Cushman Motor Works of Canada have secured the property situated at the junction of Whyte Avenue and Vine Street, Winnipeg, just off Logan Avenue West. This property is some 2½ acres in extent, with an office and warehouse building containing three stories, giving the company some 15,000 square feet of floor space. To this the company intend to add in the near future. Alongside the building there are excellent trackage facilities, it being possible to handle eight freight cars at once. The offices are located upon the second floors, also the showrooms, where engines and other lines handled by the company are nicely exhibited. The rest of the building will be devoted to machine assembly, stock rooms, shipping, etc.

It will now be possible for the Cushman Motor Works to carry in stock a greatly increased number of their engines with which to supply the Canadian demand.

In connection with the transference of the company to its new premises, an interesting event took place the other day, when the annual meeting, banquet and salesmen's rally was held. After a banquet, President E. B. Sawyer outlined the growth of the organization and told the salesmen of the efforts being made by the company to take care of the trade. Among those present were: E. B. Sawyer, president; A.E. Donovan, Canadian manager of the organization, and the following salesmen and firm representatives: A. E. Storey, John Herron, J. D. Hutchinson, A. Leader, A. C. Leader, Vincent Donovan, G. Conolly, J. Halverson and J. S. McLellan.

St. John, N.B., Notes

St. John, N.B.—Hardware wholesalers throughout New Brunswick report trade conditions to be very satisfactory. The demand for all lines is good and payments are prompt. The market has been steady lately, with few changes in staples. In some lines manufacturers still are working on materials purchased before last advances, and as soon as this material is used up increases in selling prices are anticipated. On the other hand, a general decline is expected as soon as there is any prospect of peace, and recent peace rumors showed a tendency to curtail buying—a tendency which has disappeared to a large extent since peace has appeared more remote. With this in view, however, dealers are not stocking over-heavily in any lines

The Municipal Council of St. John County has decided on an expenditure of $23,000 for the installation of a new heating system for the general public hospital. This will represent only half of the fund appropriated by the council for a new plant and a new power house to contain it, plans for the building not having been approved so far. The installation will be made according to the plans of Fred M. Hoadley, of Montreal, heating engineer, and will be supervised by F. Neil Brodie, architect, of St. John. The new installation, in addition to heating the buildings, will provide for the generation of electricty for lighting and for power for the elevator, laundry, etc. It is estimated that the new system, which will permit of the use of a lower grade of coal, will by this means and greater general efficiency, effect a saving of $2,000 annually in the fuel bills.

The Retail Merchants' Association of St. John has decided to observe another "Dollar Day" on February 22. Committees have been appointed to arrange the details, and an effort will be made to draw outside trade to the city on that day, as well as to induce heavy buying by the citizens.

William E. Dickson, an employee of W. H. Thorne & Co., died this week. He had been in ill-health for some time, but his death was unexpected. He is survived by his wife and one child.

HARDWARE LETTER BOX

Repairs for Sterling Machine

Peter Lutz, Lemberg, Sask.—Please advise where I can secure repairs for the Sterling sewing machine.

Can any of our readers kindly supply the desired information.—Ed.

Peerless Cooker

John Watson & Son, Montreal; Montreal Architectural Iron Works; Mount Royal Foundry Co., Montreal; Canadian Ornamental Iron Co., Montreal; Geo. B. Meadows, Toronto.—Ed.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

New high records for cordage were reached this week when Manila rope advanced 2½c per lb. and sisal rope advanced 3½c lb. Rope is now far above the high records of pre-war periods. Binder twine will in all probability be quoted at exceedingly high prices during the coming season.

All baseball supplies, including mitts, gloves, balls, etc., have advanced all the way from 10 to 100%. The heaviest advances are on the cheaper lines of mitts and gloves.

Lumbering tools have all taken a sudden jump upwards, and advances in price have been recorded all the way from 60 to 100%. Prices on washing machines have been withdrawn, and higher prices will probably be issued in the near future.

Among many other important price changes this week are advances in the prices of scales, wringers, glue, emery and emery paper, latches, razor strops, blind and bed staples, tinned spoons and forks, gimlets, linseed oil, grindstones, oil stoves, silver-plated ware. There has been a general advance in the prices being made in old metals. All wire products are very firm and further advances would not come as a surprise.

Ingot metals have shown additional strength this week. The demand for iron and steel is as insistent as ever and steel companies are well booked up for 1917. Prices on domestic pig-iron are still withdrawn.

The freight situation is still very serious. Embargoes are becoming more numerous. Business has been good during the week. Collections are satisfactory.

MONTREAL MARKETS

MONTREAL, Feb. 1.—The market for all lines of hardware keeps exceedingly firm, and there will be noticed several price changes of importance. Lumbering tools have advanced. Norway iron is up, Chaudrons are advanced, and in shelf goods several important changes have taken place, notably the changes in Sargeant's builders' hardware. Scales and wringers have also advanced in price, and smaller lines, such as glue, emery paper, sand paper, horse clippers, etc., are up in price. Rope makes another big advance, and the metal markets lend great firmness to plates, and articles dependent on lead and antimony, which are in the "upper" classes of the metals this week. Demand opens now for wire screen cloth, and inquiries for lawn mowers have begun to come in.

Shelf Goods Show Important Changes

SHELF GOODS.—Not quite so many changes are being made now in shelf goods as had been usual in the beginning of last year, but still a number of lines are receiving attention as markets for raw materials used in their manufacture advance. One very important and extensive series of builders' hardware lines has this week made an average advance over all of 5 per cent., and given work to the recorders of price changes that has meant much midnight oil.

Sargeant's Goods Up

Sargeant's goods, the line referred to above, have advanced, as noted, by at least 5 per cent. To enumerate the many articles involved in this long list of goods would take pages. Door springs, shutter bars, window catches, and all kinds of similar appliances are only part of the list.

Cutlery Lines Firm

Cutlery is in exceedingly difficult situation at present owing to the impossibility of getting anything like adequate supplies from Great Britain, or even from the United States. Leading hardware men say they could fill many orders that wait for supplies if only they could get enough cutlery, and the prices are accordingly inclined to stiffen up.

Sand Paper Goes Up

Sand paper has advanced, as was noted in a prediction of HARDWARE AND METAL'S last week as regards Montreal, where the new advance had not been recorded in detail. B. & A. Flint sand paper in reams is quoted now at 15 per cent. advance on list. In rolls the same line is quoted at 33 1/3rd advance on list.

Emery Paper Also Up

B. & A. emery paper is also up in price, and with it the same line of emery cloth, the new quotation being 5 per cent. advance on list.

Emery Powder Adavnces

Emery powder (Turkish, as it is called) has advanced to 12c per pound, thus accounting to some extent for the emery paper and cloth advance, though glue and paper contribute also to this.

Glue Has Gone Up

Glues have gone up in price this week, quotations being now for white fish glue 28c a pound; for French glue 28½c a pound, and for broken glue 18c a pound. The French glue referred to is the line numbered 3047, and is very scarce at present.

Horse Clippers Up

New net re-sale prices for horse clippers of three well known makes are quoted this week in Montreal as follows: Newmarket, each $2; Goodwood, each $1.70; Grand Ballbearing, each $2.

Watch Stillson Wrenches

It is announced very definitely in the talk of the men best built to judge of price tendencies in the hardware trade at present that Stillson wrenches are in for another advance, which may come pretty shortly.

Wire and Nails In Firm Market

WIRE NAILS, ETC.—There are no changes to record this week as regards wire and nails, though the market continues very firm in these lines. Standard steel wire nails are quoted at present in Montreal at $4.75 base, with every chance of going higher owing to conditions affecting wire rods, and cut nails are quoting at $4.50 base per hundred pounds, which is as last week's price.

Market for Plates Affected by Shortage

SHEETS, PLATES, ETC.—Still there persists the marked shortage in most important lines of sheets and plates, particularly galvanized sheets from Great Britain. These are, in fact, so scarce as to be practically unobtainable, and the sources of supply in Canada and the United States are undoubtedly strained to the limit of production. Prices for many lines, though quoted in current quotations, and accurate as regards recent transactions, may be found merely nominal as stocks vanish, and for any large orders a premium might have to be paid at any time, even if the goods were obtainable in the quantity desired at the time. In fact, there is a premium in force now of 25c a box on spot stock cokes, stocks of which are low to the verge of barrenness. Tin and terne plates are scarce also. Black sheets are as quoted in current quotations.

Norway Iron Has Advanced This Week

IRON AND STEEL.—There is no change in the situation as regards iron and steel this week. Price of pig iron in Canada is simply nominal at present—that is to say, those who want to buy quantities have to make their bargain with those who are willing to sell, and quotations are not more than a guide to about the price that may be expected. The price per ton, as quoted last week, viz., $40, holds good. Common bar iron is quoted in Montreal this week at $3.40 per 100 pounds, and the whole market for iron and iron products is exceedingly firm.

Norway Iron Up in Price

Norway iron, which has for long maintained a fairly steady price in the market, is advanced to 10c a pound by one large firm and quoted at $10.25 per hundred pounds by other firms. Formerly Norway iron was quoted at $9.50 to $9.75.

Chaudrons Advanced

In line with iron and steel market conditions is the advance in chaudrons noted by one large firm in Montreal. The quotation given on these by this firm is $5.25 per hundred pounds.

Ingot Metals All In Firmer Market

INGOT METALS.—The metal market generally has been displaying a condition of renewed firmness in almost all lines during the present week, and prices for certain metals have advanced rather sharply. Lead and antimony have been in the limelight with strong advances on record. Shortages of supply of many lines of metal in Montreal have been noted, and railway transportation trouble has been mentioned in connection with this aspect of the metal markets.

Antimony Awakens

ANTIMONY.—After a "sleeping beauty" spell of almost entire inactivity on this continent, antimony has suddenly sprung to life again, and rushed up in price to nearly double the quotations given last week. Quoted at $18 per 100 lbs. last week, this metal is now touching $30 in Montreal, the New York price being $25 per 100 lbs. This tremendous advance came almost absolutely unexpectedly, and is said to be due to the fact that the markets had in a sense "forgotten" antimony in disgust, following the collapse that followed the falling off in shrapnel orders, a collapse in which not a few metal operators were uncomfortably caught across the border. Now transportation trouble—the shortage of trans-Pacific ships (for most antimony supplies come from the Orient)—has produced its inevitable effect—shortage of supply, and a sudden realization of the scantiness of antimony stocks on the markets of America has been followed by the present advance in price. It is said also that many small antimony mines, which came into producing life when demand was at its highest, are not now in the field as producers, thus further shortening supplies. The outlook is for firmness for the immediate future, and the market is very bare.

Lead Also Firms Up Further

LEAD.—The market for lead has been consistently firm for a considerable time, but not many metal merchants have anticipated the state of market for lead this week. From $7.75 f.o.b. Montreal in bond pig lead has gone to $8.50 this week, and the outlook is still for firmness likely to be continued. Demand is brisk; supplies are scanty; deliveries of the metal from American sources are very much retarded owing to railway embargoes upon consignments for over the frontier. Quotations are for fairly large orders, and for smaller quantities advances in proportion will be found operative.

Copper Extremely Scarce

COPPER.—There is a marked scarcity of copper on the markets at present, and correspondingly firm conditions prevail. Prices are in fact almost nominal as regards any large quantities of this metal, and it is declared in authoritative quarters that it would be hard to get 200 tons of copper anywhere in Montreal. Prices are quoted at $35 to $36 per 100 lbs., and casting copper would be about $36 to $37 per 100 lbs., with higher prices for small quantities.

Tin Shows an Advance

TIN.—Tin has this week come into rather firmer market, and shows an advance of about ¾ of a cent. The prices quoted in Montreal range from about $45.75 to $50, and supplies are found to be very small. It would be difficult to fill any very considerable orders, and the embargoes on railway transportation add to the difficulty.

Spelter Up One Cent

SPELTER.—Not in as excited a market as lead or antimony, spelter still sympathizes with the general tone, and is up about a cent in Montreal, as compared with last week's prices. This brings the price of spelter per 100 lbs. to $16-$16.25, and stocks are declared to be very low in Montreal at present.

Aluminum Unchanged

ALUMINUM.—There is no change in the price or market condition of aluminum so far, but the tendency to firmness noted as regards other metals is not absent from this field of the market, and aluminum at $18 per 100 pounds this week might be found firmer later on.

Lead and Zinc Products Firmer

LEAD AND ZINC PRODUCTS.—Although the market is firm and going to firmer for lead, there have been no changes as yet for the principal lines of lead pipe, sheet lead, traps and bends, etc. Sheet zinc is unchanged from last week, being quoted at $25 to $25.50 per hundred pounds. The solders are in unchanged market meantime, but with a firmness due to the state of the market for lead and tin. Babbitt metals are also in firmest of markets at present.

Lead pipe, lb.	$0 13	....
Lead waste pipe, lb.	0 14	....

Another Advance is Recorded in Rope

ROPE TWINE, ETC.—Once again there is a big advance in rope of all kinds. Quotations, according to the newly-issued lists of January 30, are for best Manila 29½c basis, and for British Manila 25c basis. Sisal rope is at 24c basis now, and lathyarn at 24c basis. African hemp marline is quoted at 29c for standard, and 30c for fine. Sisal bed cord, a familiar old-fashioned name for a very useful line of rope in the hardware business, is now quoted at 10 per cent. off list, which records an advance for this line. The market for rope and twines, and indeed all similar textile

and spun materials, is desperately firm these days, and prices need attention of every retailer to avoid miscalculation and loss.

Stoves Are Steady: A Kitchenware Event

STOVES, KITCHENWARE, ETC.—There is little to record of new market condition regarding stoves. These goods are subject to the serious firming factors affecting the iron and steel market, and are not likely to be any lower-priced. But no material change is likely to take place in their price immediately, as far as go the opinions of men well qualified to judge the market for this line of goods. About the end of February will possibly see some movement again in stove prices, and it may mean advances, though as to that no one is ready to predict. Regarding kitchenware of the enameled goods department, the event of the season is the opening of the usual sale of "seconds" in this line of goods in Montreal trade circles. This sale affords unique opportunities for good judges of enameled kitchen and household goods, since many big bargains in the way of hardly impaired goods, which make bargain sale attractions, are placed on sale at the usual "seconds" discount of straight 60 per cent. off list. As the regular stock goes on sale at prices which vary in discount allowed from 17½ per cent. to 50 and 60 per cent. in special lines. Such goods as soup bowls, sugar bowls, wash basins, water buckets, cups, mugs, kettles, teapots, coffee pots, pitchers, pudding pans, pie and dinner plates in white ware, grey ware, and Canada ware, are represented in the sale by hundreds and thousands. The "seconds" sales of these lines in Montreal opened on February 1.

Scales and Also Wringers Advanced

SCALES AND WRINGERS.—Advances in price are noted this week in the principal lines of scales on the market. All lines of B. S. & W. scales are now quoted at 20 per cent. off list, representing an advance over previous prices. Wringer lines are also advanced by change of discount to 45 and 5 instead of 50 off as formerly.

Big Advance Made In Lumbering Gear

LUMBERING TOOLS.—An advance is recorded this week in all lines of Pink's lumbering tools, peevies, cant hooks, handles, and all classes of heavy hardware for the lumber trades supplied by this firm. The advance is a huge one, nearly 100 per cent., and is due to the market conditions in iron and steel, also in the manufacture of handles for these tools, for the handles are advanced also. Some lines, which were 30 per cent. off list, are now 22½ off; some are 12½ off, but in general the change is to 15 per cent. off, an advance of 100 per cent.

TORONTO MARKETS

TORONTO, Feb. 2.—One of the most serious problems facing both wholesaler and retailer at the present time is the question of being able to get their goods. The serious phase of the situation is not so much from the inability of the manufacturers to deliver, although that is also a very big consideration. It, however, lies in the fact that there can be no dependability on the deliveries of the railways. Embargoes on certain districts are becoming more frequent. Literally no man knows the time nor the hour nor yet the district when these vexatious occurrences are likely to become operative. Those who are well advised and are desirous of getting their goods for spring and summer trade and which goods are already on order, in many instances, will give their wholesalers free hand to ship their goods as soon as they have them to ship. In this way goods that are sent forward well beforehand will stand some chance of being delivered near the time they are wanted. Some important price changes have taken place during the week and there is a firmness in a number of committees which seems to indicate higher prices in the near future. There have been big advances of 2½c and 3½c respectively. Prices on washing machines have been withdrawn with the intimation that new lists providing for increased prices will become effective in the near future. Grindstones have advanced and certain makes of silverware have made considerable advances. Wringers have been marked up. One of the Canadian makes of oil stoves have increased in price. Woodenware pickle and paint pails have been marked higher. Business continued fairly satisfactory during the week.

Another Make of Coal Oil Stove Goes Up

STOVES.—An increase of 15 per cent. has become effective in the price of Florence coal oil cooking stoves. This advance follows an upward movement in price for another make of Canadian oil heater which was chronicled in these columns recently. The price of oil heaters, however, has not shared in the advance. The demand for gas ranges continues good. There is a shortage of the black sheets from which they are made and there is furthermore a shortage of skilled workmen at the foundries to carry forward the process of manufacture. Manufacturers are unable to fill the orders which have been sent to them for these reasons.

Grindstones Have Advanced 45c Hundred

GRINDSTONES.—An advance of 45c per hundred pounds on the price of grindstones has become effective. For those of 40 pounds and less in weight the new price is $2.45 per hundred pounds as compared with the former price of $2. For those from 40 pounds to 200 pounds the price is $2.15 per hundred pounds as compared with $1.60 formerly. The higher cost of labor and materials that enter into their manufacture is given as the reason for the advance. On the mounted No. 115 the new price is $7, the former price being $3.75. This represents very nearly a one hundred per cent. increase. On the bi-treadle the new price is $6.75 as compared with the former price of $4.25, or an increase of $2.25. This is a little better than a 50 per cent. increase.

New Discounts on Wringers Increase Prices

WRINGERS. — Manufacturers have announced an increase in the price of wringers and the discount has accordingly been changed. The former discount was 50 per cent. while the new discount is 45 and 5 per cent. off list prices. A recent advance was recorded in these lines. But the increasing difficulty of getting raw materials and the labor problem have combined to cause a still greater firmness in the market which has worked out in the form of higher prices.

Washing Machines Due to go Higher

WASHING MACHINES.—Manufacturers of washing machines have during the past week withdrawn their prices and it is expected new lists and discount will be issued in a few days. This action presages higher prices for these articles. An advance was recorded in washing machines within recent date and the new prices follow as a result of the increased firmness in the markets for the raw materials, together with increasing difficulties in the manufacturing and through scarcity of skilled workmen.

Silverware Prices Are Up 10 Per Cent.

SILVERWARE. — Wholesalers have been advised of an increase in price of

approximately 10 per cent. in the "1847 Rogers" line of goods. While silver in the primary market in New York has been holding fairly steady in price for several months past advances in other metals and in labor costs have been big factors in the present increase. Bar silver on December 14 was quoted at 75⅞c per ounce. On January 16 it had declined to 74¼c but since that time there has been a gradual working toward higher levels and it was quoted at 76¾c per ounce on January 31. The normal price of bar silver is around 53c per ounce. It will therefore be seen that present prices of silver are high.

All Cordage Lines Make Big Advances

ROPE, TWINE.—New records for high prices in cordage of all kinds have been established by putting into effect an increase of 2½c per pound on all Manila ropes and a like amount on New Zealand hemp ropes. In sisal rope the increase has been even greater, amounting to 3½c per pound. The new base price on best Manila rope is 29½c per pound while the base price on sisal is 24c. Hemp ropes used on board boats have also recorded big advances, as well as jute ropes and packings. New prices will be found in current quotations. Reference is also made in panel elsewhere to the rope situation. It is expected that prices on binder twine will be issued by the manufacturers in the near future. It is anticipated these prices will create new high levels also.

Wire Products Seem Destined to go Higher

WIRE NAILS.—The price of wire nails held steady during the week and are still quoted at $4.70 base per hundred pound kegs. There is a firmness in the market for these products, however, as there is in all wire products. In speaking of the situation in wire products "The American Metal Market," one of the authorities in this line in the United States, under date of January 30 says: "Demand for wire products has increased somewhat in the past few days and is described by the mills as very satisfactory. Sales are being limited as usual as to time of delivery, the regular rule being to make sales to jobbers for 60 days ahead only. On account of being behind-hand in deliveries the mills have had to make some concessions in this matter, but they are trying to follow the rule rather closely now. For several weeks past a general advance in wire prices has been expected. None are announced to-day and while the expectations continue there is nothing like a definite prediction being made in any quarter." Cut nails are being quoted at the advance recorded last week of $4.50 base.

Galvanized Sheets And Shingles Firm

SHEETS, PLATES.—There is a continued firmness in the market for all sheets and plates. Corrugated sheets in the smaller gauges are very firm in price and it is stated to be reaching such a point with the manufacturers that they will either have to advance the price for gauges Nos. 28 and 26 or stop manufacturing them. High prices at the present time is shutting off consumption and the situation is becoming more acute. Black sheets are in firm market, also galvanized sheets. Prices for these are unchanged and are shown in the current quotations.

Lower Quotations on Bar Iron Moved Upward

IRON AND STEEL.—The lower quotations given on bar iron last week have disappeared and the market now quite generally is quoted at $3.90 base. Some quotations are given as high as $4.10 but it is stated that this is in reality a quality of bar steel although it is being used more extensively where common bar iron was formerly used. Following are the quotations:

	Per 100 Lbs.	
Common bar iron	$ 3 90	$ 4 10
Refined iron	4 15	4 40
Angles, base	4 25	4 35
Horseshoe iron	4 00	4 25
Norway iron	7 50	....
Mild steel	4 00	4 25
Band steel	4 40	....
Mining tool steel	14 00	22 00
Sheet cast steel	23 00	29 00
Spring steel	5 50	....

Old Metals Quoted At Higher Prices

OLD METALS.—There has been quite a general movement upward in the prices being paid for old materials. Tea lead has advanced ¼c per pound, heavy lead pipe is also up ¼c, yellow brass is up ¼c, red brass up ½c and yellow brass ½c up. Heavy zinc is quoted ½c higher and heavy copper ¼c higher. Stove plate has advanced 25c per ton. Rubbers, overshoes, auto tires and bicycle tires hold at last week's prices.

	Per lb.	
Tea lead	$ 0 06	......
Heavy lead pipe	0 08	......
Yellow brass	0 15¾	......
Red brass	0 19½	......
Light brass	0 10½	......
Heavy zinc	0 08	......
Heavy copper	0 23¾	......
Old cast iron, per ton	15 50	$16 00
Stove plate, per ton	11 75	......
Old rubbers, boots and shoes	0 08¾	......
Overshoes, lumbermen's rubber boots	0 06½	......
Auto tires	0 05½	......
Bicycle tires	0 02½	......

Metal Markets Are All Firmer

The elimination of peace talk has had a firming effect on the metal market. There is a firmer undertone throughout, and advances have been registered in tin, lead, antimony and solders. Business locally continues good.

COPPER.—There has been very little copper offered for sale lately, and second-hand metal is off the market. The position of copper continues to be a very strong one, and higher prices appear to be likely. Quotations are nominal, and locally are 36½-37c per pound.

TIN.—The advance in London has been reflected in higher prices here, although New York is unchanged. Tin is now quoted locally at 47½-48½c per pound.

SPELTER.—Spelter supplies are still very scarce. There is a wide range of prices quoted from 13½ to 15c pound.

LEAD.—The market is strong and quotations nominal. The "Trust" is holding the price at 7.50c New York, but the "Independents" are quoting 8c to 8¼c New York. Quotations locally have advanced ½c, and lead is now 10-10½c per pound.

ANTIMONY.—Quotations are higher, but nominal with a strong market, due to improved demand and transportation difficulties. Antimony is now quoted at 20-21c per pound.

ALUMINUM.—The market is dull and easy, with quotations unchanged at 68c per pound.

Acute Pig Iron Situation

The pig iron situation is getting more acute owing to the shortage of coke, which is affecting furnaces both in Canada and the United States. One large Canadian company has let one furnace down, while the other is only operating at about two-thirds capacity. As the furnace which is not in operation was producing foundry iron, there is pravtically no domestic pig iron of this grade to be obtained. The furnace which is in operation is producing basic pig iron for steel-making. Grey iron foundries are also suffering from the shortage of coke, and some plants have been obliged to shut down. It is reported that over twenty furnaces in the Pittsburgh district have shut down owing to the coke situation. Canadian consumers are buying considerable tonnages of pig iron from United States' furnaces. No quotations are obtainable on Canadian pig iron. It is said that only pig iron obtainable at present would bring around $44 or $45 per ton.

Lead and Zinc Products Hold Steady in Market

LEAD AND ZINC PRODUCTS.—The market for lead and zinc products held steady during the week in the face of higher prices in the primary markets for some of the commodities. Pig lead during the week advanced 50c. per hundred

and in the New York market was quoted at $8.25 per hundred pounds. In the face of this condition in the primary markets the prices of lead sheets and all lead products are very firm.

LONDON MARKETS

LONDON, Ont., Feb. 1.—Prices continue to advance on many lines and a number of important price changes have been recorded during the past week. Further advances are expected in the near future. Many manufacturers of hardware lines are unable to keep up to the demands made upon them. This and the slow railway deliveries is having a tendency to cause a serious shortage of many lines which will be required during the next few months.

All Cordage Lines Make Big Advance

ROPE, TWINE.—New records for high prices in cordage of all kinds have been established by putting into effect this week of an increase of 2½c. per pound on all manila ropes and a like amount on New Zealand hemp rope. In sisal rope the increase has been even greater, amounting to 3½c. per pound. The new base price on best manila rope is now 29½c. per pound, while the base price on sisal is 24c. Hemp ropes used on board boats have also recorded big advances, as well as jute ropes and packings. New prices will be found in current quotations. Reference is also made elsewhere in this issue to the rope situation. It is expected that prices on binder twine will be issued by the manufacturers in the near future. It is anticipated these prices will create new high levels also.

Note.—In last week's issue the wrong table of rope prices was inserted in the London report. This was an error which would be quite obvious to our readers, as the advanced and correct price had appeared in a previous issue.

Scales Advance To 20% Off List

A new discount of 20% is now in effect on Champion scales, instead of 25% as formerly. Net extras for stamping are unchanged.

Sand and Emery Paper, etc., Goes Higher.

New and higher prices have become effective on sand and emery paper and cloth. The advance amounts to about 30%. The new prices are: B & A sand paper, add 20% to list; B & A emery cloth, add 20% to list; Diamond sand paper, add 10% to list.

Blind and Bed Staples Advanced

New and higher prices have been issued on blind and bed staples in 10-lb. boxes as follows, per lb.: Blind staples, ⅜", 15c.; ½", 14¼c.; ⅝", 13¼c.; ¾", 13c.; ⅞", 12½c. Bed staples, ½", 12¼c.; ⅝", 12¼c.; ¾", 11¼c.; ⅞", 11c.; 1", 10½c.

Tinned Spoons and Forks Advance Again.

New and higher prices have been issued on the 900 line of tinned spoons, forks, etc., as follows: —

Per gross: No. 900 tinned teaspoons, $2.75; No. 900 tinned dessert spoons, $5.25; No. 900 tinned tablespoons, $5.50; No. 900 tinned dessert forks, $5.75; No. 900 tinned table forks, $6.

Gimlet Bits, etc., Go Higher.

New and higher prices have been issued on gimlet bits and wood handle gimlets as follows:—

Gimlet Bits, per doz.: 3-32 to 8-32, 70c.; 9-32, 75c.; 10-32, 80c.; 11-32, 80c.; 12-32, 85c.

Wood handle gimlets, assorted, 85c. doz.

Baseball Goods Are All Higher

Practically all lines of baseball supplies have advanced from 10 to 100%. The heaviest advances are on the cheaper lines of mitts and gloves.

Clothes Wringers Up.

Clothes wringers have advanced about 5% and the discount is now 45-5%.

Barn Door Latches Advance.

New and higher prices have been issued on barn door latches as follows: Canadian Whitcomb, $3.50 doz.; American Whitcomb, $4.25 doz.; No. 9 malleable, $2.75 doz.

Moore's Push Pins Up.

Moore's push pins and hangers have been advanced in price. The new wholesale price is $1.05 per dozen packages. The new retail price is 13c. each or 2 for 25c., instead of 10c. as formerly.

Linseed Oil Advances 5c Gal.

The linseed oil market is decidedly firm as outlined in the paint market reports elsewhere in this issue. Locally an advance of 5c. per gallon has gone into effect on linseed oil and present prices are firm as follows:—

	Raw.	Boiled.
	Per Gal.	
1 to 2 barrels	$1.20	$1.23
3 to 5 barrels	1.19	1.22
6 to 9 barrels	1.17	1.20

Turpentine is unchanged at the following prices:—

	Per Imp. Gal.
1 barrel lots	$0.81
2 to 4 barrel lots	0.80
5 gal. lots	0.88

Lead in Oil Firm.

White lead in oil remains firm at $14.50 per 100 lbs. in ton lots, and $14.80 per 100 lbs. in less than ton lots for pure quality. Putty is firm and unchanged at the following prices:—

Per 100 lbs.; Standard 100-lb. drums, $3.55; 25-lb. drums, $3.65; Pure, 100-lb. drums, $4.35; 25-lb. drums, $4.45.

Glass Prices Firm.

There is no change locally in glass prices, but the market is firm. Prices generally quoted are as follows:—

Single diamond, 20%; double diamond, 20%; cut lights, 50-5%.

Wire, Nails, Etc., Unchanged in Price

Wire nails are unchanged but firm at $4.70 base. Cut nails remain at last week's advanced price of $4.50. Prices on fence wire are as follows:—

Per 100 lbs.: Barb, $4.50; No. 9 galvd., $4.25; No. 12 galvd., $4.40; No. 13 galvd., $4.50; No. 9 coil spring, $4.30; No. 10 O. & A., $5.16; No. 11, $5.22; No. 12, $5.30.

WINNIPEG MARKETS

WINNIPEG, Feb. 1.—With the first month of the year drawn to a close, jobbers are able to see just what amount the increased turnover has been against last year's figures, and the results, from all accounts, are very gratifying. During the entire month, business has been extremely brisk and everyone is preparing for an exceptionally heavy month during February. Past years the two heavy months for spring business have been February and March, but whether the result of January will have a modified effect on the next two months is somewhat uncertain as yet, although the general opinion is that the big month's business in January is just the forerunner of even bigger returns than usual for February and March.

Orders now in hand are going to tax the ability of jobbers to handle as promptly as in former years, when good help was always available, and there was little difficulty in securing merchandise when wanted. Stocks at the present juncture are fairly complete, and it would seem that the man whose order is in

hand for shipment at once stands the best chance of having goods for his customers when they want them. Jobbers advise that they are experiencing greater difficulty than ever in securing stocks, and another few months of war will see conditions rather acute..

This dearth of merchandise which threatens is being brought out more with regard to stoves, ranges and heaters than many other lines. Manufacturing conditions in the East are in an unusual state of uncertainty, and manufacturers in many cases are refusing to consider orders for heating stoves for next fall and winter unless specifications are in hand not later than March 1st. Prices, of course, will be higher, but in view of the scarcity of labor, with the resulting curtailed output, this is not such an important feature, as anticipating one's requirements for next fall and winter now.

Many Price Changes Take Place

The price changes for the week are again numerous, and include various lines of sporting goods. A further revision is noticeable in metallic ammunition, rifles, baseball and tennis sundries, etc.—the advances on the last two lines ranging from 25 per cent. to 50 per cent. In view of the situation in regard to leather, one can almost see that these advances were to be expected for baseball gloves and mitts. Most certainly those participating in this sport this coming year will pay higher prices than they ever expected. The days when boys could obtain a glove or mitt for 25c are past, and even 50c will not buy any kind of a glove or mitt this coming year.

Other lines affected during the week are Canada and tinplate, galvanized iron, putty, white lead, wood alcohol, shellac, horse shoes, cut nails, etc., as per memos attached below. The tendency in all these lines is ever upward, and new high water levels are being established each day for certain lines of goods.

The trade will note that many of the changes are practically repetitions of what has occurred in the East during the past few weeks, and which were recorded in the Eastern Canada market report of HARDWARE AND METAL.

Advances on Canada, Galvd. and Tin Plate

Canada plate and tinplate have advanced one dollar per box, and are now quoted at the advanced prices shown in the current market quotations. Galvanized iron has advanced 35c per 100 lbs., and new prices are shown in the current market quotations.

Many Paint Products Go To Higher Levels

Putty Prices Advanced

New prices just issued on putty, representing advances in each style of packing, are as follows:—Putty (per 100 lbs.)—100-lb. drums, $4; 50-lb. drums, $4.15; 25-lb. drums, $4.30; 12½-lb. tins, $4.50; 5-lb. tins, $4.60; 1½-lb. tins, 7½c each.

White Lead up

The latest change in white lead does not represent much of an increase over former quotations, but will exhibit the general trend toward higher prices. The new quotations are as follows:—Decorators' pure (per 100 lbs.)—Ton lots, $15.40; less, $16.05. Decorators' special—Ton lots, $14.40; less, $15.05.

Wood Alcohol Higher

Further revisions in the price of wood alcohol reveal these quotations as best available to-day:—5 gals., $1.62 gal.; 1 gallon, $1.85; cans included.

Shellac Goes Higher

Along with the many specialties and staples of the paint trade, shellac has come in for another revision, and changes going into effect to-day represent new levels for this line. Quotations to-day are on this basis:

Orange Shellac—		Gal.
1 gal.		$3 25
½ gal.		3 45
¼ gal.		3 85
⅛ gal.		4 05
1-16 gal.		4 45
Midgets	doz.	1 50
White Shellac—		Gal.
1 gal.		$3 50
½ gal.		3 70
¼ gal.		4 10
⅛ gal.		4 30
1-16 gal.		4 70
Midgets	doz.	1 65

Linseed Oil High in Price

During the past two or three weeks no further action is noticeable in the prices obtaining on linseed oil and turpentine. The grain markets vary considerably in a week's trading, but the basis at the end of the week shows no appreciable difference, with the result that prices of the manufactured article remain about the same.

Quotations now prevailing are as follows:—Linseed Oil—Raw, $1.35 per gal. bbl. lots; boiled, $1.38 per gal. bbl. lots. Turpentine, 85c per gal. bbl. lots; 88c per gal. half-bbl. lots; 90c 5-gal. and 1 gal. lots.

Cut and Horse Nails Go Higher

The advance in cut nails this week does not come as a great surprise. It has been predicted in these reports on several occasions. In sympathy with the recent advance on wire nails to over $5. it was expected that cut nails would follow suit, and to-day's price is the same as for wire nails—namely, $5.10 per keg base, Winnipeg.

Horse Shoes Go Up

Horse shoes have also followed the procession upwards, and quotations to-day are 50c per keg higher than those formerly ruling. This brings to-day's prices to the following figures:—Common Iron (per 100 lbs.)—0 and 1, $5.90; 2 and larger, $5.65. Steel—2 and larger, $6.10.

Revision of Prices On Rubber Hose

A revision in the price of garden, tank and injector hose shows the following quotations now being made:—Garden hose, ½ in., $7.50 per 100 ft.; ¾ in., $10; trade, 1 x 3-ply, $12; corrugater, ½ in., $13; ¾ in., $17. Tank pump hose wire, lined and canvas covered, 45c per foot; hard rubber injector hose, 1 x 3-ply, 24c per foot; wire lined injector hose 1 x 3-ply, 15c per foot; gasoline hose, 1 x 4-ply, 49½c per foot.

Bicycle Tires Advance In Price

Another item of rubber goods, classed under the sporting goods line, to come in for revision is bicycle tires. New prices have been issued as follows:—Bicycle Tires—Dunlop Special, $2.50 each; New Imperial, $1.90 each. Inner tubes—Dunlop Special, $1.15; New Imperial, 90c. Bicycle Tires—Blue Streak, $2.30 each. Inner Tubes—Blue Streak, 95c.

Glass, Ammunition and Hooks Advance

Grab and Slide Hooks Up

Other lines to change during the week are grab hooks and slide hooks. New prices are:—Grab hooks—5/16, $1.20 doz.; ⅜, $1.45 doz.; 7/16 and ½, $2.90 doz. Slide hooks—5/16, $1.35 doz.; ⅜, $1.55 doz.; 7/16 and ½, $3.

Glass Goes Higher

Latest advices just received indicate an advance in the price of window glass. The quotations now being made are as follows, and were predicted in HARDWARE AND METAL a short time ago:

0-25, $8 single, $11.75 double; 26-40, $9 single, $13.75 double; 41-50, $11.50 single, $15.25 double; 51-60, $12 single, $16 double; 61-70, $13 single, $17.25 double; 71-80, $18.50 double; 81-85, $21.50 double; 86-90, $22.50 double; 91-95, $23.75 double; 96-100, $27 double.

Ammunition Prices Revised

The revisions mentioned in ammunition will be shown by quotations mentioned below on 22 metallics. This line is familiar to the trade, and the general tendency may be gathered from prices shown:

RIM FIRE—"Smokeless."	—Per M—		
	Dominion	U.M.C.	Winch
BB. Caps, round	$2 80	$3 06	$3 06
22 Short, greaseless	4 00	4 00	4 69
22 Long, greaseless	5 60	5 60	6 55
22 Long rifle, greaseless	6 30	6 30	7 65
22 Short, hollow point	4 30	4 30	5 03
22 Long, hollow point	6 00	6 00	7 00
RIM FIRE—"Black" or "Lesmok."			
22 Short	$3 60	$3 60	$4 35

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Feb. 1.—Linseed oil is still the excited element on the markets, and its influence is felt by other materials to some extent. Some of the oils used in varnish making are firmer than they have been in previous times; shellac is scarce, and the general tone of paint markets is towards greater firmness on account of the combination of circumstances affecting raw materials. Glass and putty are in steadily firm market, the situation as regards the manufacture of glass being very difficult owing to cost of fuel both oil and coal. Wholesale merchants claim they are at present selling glass rather below cost, while putty owing to cost of raw materials especially oil is in very strong market though at unchanged prices.

Linseed Oil in Very Troublous Market

LINSEED OIL.—Intensification of the situation recorded last week as regards linseed oil is the story of the market this week. There is tremendous difficulty still as regards transportation. Flax seed has not gone very much higher during the week than $2.63 which is high enough in most opinions, but it is not the price of flaxseed which is affecting the situation this week. The question is how to get flax seed in sufficient quantities into Montreal for crushing. Railway embargoes operating most relentlessly form a barrier which is only lifted for long enough to let small consignments through, and the principal crushers in Montreal have come to the stage of conserving their supplies of the oil carefully. No orders are being booked for future delivery, and no very large orders are accepted for immediate delivery out of stocks, for the stocks are to some extent held against earlier orders taken at the time for future delivery and which are now falling about due. Crushers are in the main optimistic, feeling that there is enough flax seed available in the North West to meet Canadian requirements, and that the worst trouble is transportation trouble. For the present though a world shortage of flax seed does exist, and the outlook is for firmness right on into the fall. For the month of February (usually the worst month as regards transportation, little material improvement is anticipated in railway difficulties, but after that matters should be more smooth running in opinion of experienced men. Paint manufacturers are not quoting linseed oil to the retail trade at all this week, preferring to conserve their own supplies, and buy in more if possible. Some firms have succeeded in securing fairly large supplies due to fortunate or well-advised action earlier, some are less comfortably situated and prices are still as last week nominal with the accent on quotations even higher than those given. As one merchant remarked "The retailer able to get linseed oil at $1.20 per gallon to-day is getting a snap."

Linseed oil.	Raw	Boiled.
1 to 4 barrels	$1.22	$1.25
5 to 9 barrels	1.21	1.24
10 to 25 barrels	1.20	1.23

In the hardware business small orders of linseed oil are being quoted for at the one barrel price as above. It is doubtful if any firms are willing to entertain orders for the larger quantities except to valued customers and as special business.

Turpentine Firmer But Not Disturbed

TURPENTINE.—Turpentine was a shade firmer in primary market for the present week, quotations from wholesale to retail show some advance. The market was rather uneventful, however, all the excitement being concentrated on linseed oil. Turpentine has nevertheless been showing some tendencies allied to those of linseed oil at least as regards Montreal conditions. News from Savanah was rather towards steadying the market, though from there also came some hints inclining towards firmness for the future. Transactions however, have not been numerous, and prices show no startling fluctuations.

Turpentine	Per Imp.Gal.
1 barrel lots	79-82c
2 to 4 barels	78-81c
5 to 10 barrels	77-80c

White Lead in Oil Firm and to Firmer

WHITE LEAD IN OIL.—With pig lead at $8.50 Montreal (in bond) per hundred pounds, and linseed oil so exceedingly seriously placed as regards supplies, there is some reason for anxiety in the minds of paint manufacturers as to white lead in oil. Recently orders were being booked for supplies up to April first at prices as then quoted which have not so far been altered, but there has been a marked difference in regard to the cost of the metal and of the oil since those prices were announced. Yet the paint manufacturers are restraining the tendency to advance prices in spite of growing feeling that the cost of metal and oil justify an advance. There is also the trouble of transportation in securing supplies of raw material, the metal from America, as well as the oil locally, and the fact that prices are still quoted as last week $14.30 per 100 lbs. for lots of 1 ton or over, and 30 cents per hundred more for lots of less than a ton, is interesting at this time.

Mixed Paints Keeping on the Firm Trend

MIXED PAINTS.—Raw materials keep on climbing in the markets, transportation affected badly by embargoes is delayed, and metal consignments (lead, zinc, etc.) from the United States come forward very slowly, or are held up altogether. There is a firmness of tone regarding mixed paints generally. Manufacturers are maintaining production, and prices so far are unchanged but some manufacturers are beginning again to figure that their business is earning in small proportion as compared to normal times. The question of the point of view of the merchant and consumer has of course considerable weight in moulding opinion as regards paint prices at this time, and there does not seem to be any likelihood of any stampede towards an advance even should the metals and the oils go on getting more costly. Hopes are still entertained that there may be easier conditions ahead, but the difficulty of maintaining the standards of quality without vastly increasing expense of production is undoubtedly felt with growing concern.

Varnishes Finding Materials Costlier

VARNISHES.—With the shortage in shellac keeping the market still very firm, and the price of spirit steadily advancing, and the oils used in varnish making also greatly advanced in price as compared with previous times, the varn-

Is Yours the Busy Store in Painting Time?

Some one merchant gets the bulk of the paint business in every town. Are ***you*** the up-to-date dealer in ***your*** vicinity who is reaping steady profits that go up with a bound whenever there is increased painting activity?

If you are one of our agents, whose enthusiastic co-operation enables us to say, truthfully, that

More B-H Paint is Sold Each Year

there is no doubt about your store being the Mecca of Paint buyers all the year round.

B-H English Paint as sold and used to-day is the result of nearly two hundred years consistent endeavour to make the best paint that science and human skill could manufacture. Is it any wonder that it is so widely known, so universally used as to be the leading paint in each community?

If we are not represented in your town, you may secure our agency if a progressive dealer. Write us for our proposition.

BRANDRAM-HENDERSON LIMITED

Montreal Halifax St. John Toronto Winnipeg

If interested, tear out this page and keep with letters to be answered.

ishes are finding an increasingly firm market. Fish oil used in the composition of varnish to stand heat is at $1.18 a gallon. China wood oil another important ingredient of varnish is costing $1.80 per gallon now to the manufacturer, and the problem of varnish prices is right in line with all present day price problems, the question of how can legitimately advanced prices to the consumer be reconciled with demand. So far varnish prices are unchanged, but there is some unrest in this direction due to advances in raw materials.

Glass and Putty Situation Strong

GLASS AND PUTTY.—There is continued firmness in the market for glass, and in fact increases in price may well be expected. The latest reports from manufacturing centres announce great difficulties due to cost of fuel of various kinds but principally oil, and coal. Where natural gas is used, the trouble is a little less pronounced. Putty keeps in the same market condition as prevailed last week with the addition of extra firmness due to linseed oil prices. Whiting is also still scarcer, and importation more difficult. Putty in five ton lots in bulk in barrels is at $2.90 per 100 pounds; in iron drums $3.35 per 100 pounds, and in bladders in barrels $3.60 per 100 pounds.

TORONTO

TORONTO, Feb. 2.—The linseed oil situation continues to be the engrossing one in paint circles. Crushers are unable to get their seed forward from the North-West as the railways have placed an embargo on moving this commodity. Turpentine is in slightly easier market due to a decline of approximately 1c. per gallon in the primary market during the week. White lead in oil is in very firm market due to the pig lead situation, where a considerable advance has taken place during the week. Shellac is in very firm market, some concerns quoting up to $3 for pure white and $2.75 for pure orange. Indications point to still higher levels for this commodity. Glass is in a somewhat inactive market. There has been no general movement as yet to increase the prices. There are rumors of another advance likely to take place in the United States. In the meantime stocks in local dealers' hands are operating to keep prices steady. Wooden containers for paint and shellac have advanced approximately 15 per cent. Some jobbers report forward booking somewhat disappointing, while others again state that bookings for future deliveries have been good.

Linseed Oil Inclines To Still Higher Prices

LINSEED OIL.—The situation in linseed oil continues to be an increasingly interesting one. With crushers unable to get supplies of seed from the Canadian North-West because of the embargoes placed on this commodity by the railways a shortage of oil is developing in some quarters. The usual amount of crushing to take care of the needs of the trade is not being done. Most concerns are looking after the interests of their customers only. Prices during the week held fairly steady, although in certain quarters there was a disposition to quote higher by 5c. per gallon over the prices quoted last week. The range of prices quite generally is now from $1.20 to $1.25 per gallon in one to two barrel lots. The price of flaxseed held quite steady during the week. On Thursday of last week the closing price for the cash article was $2.63¾ per bushel, and at the close of the market on Wednesday of this week was quoted at $2.62¼. In the May option for seed the prices were higher, ranging from $2.71¾ on Thursday of last week to $2.70 on Wednesday of this week. The forward option has been ranging uniformly high for several weeks past. From all reports there will be a shortage in the world's flaxseed and this is putting a firmness in the market. Following are the quotations:—

	Raw, gallon	Boiled, gallon
1 to 2 barrels	$1.20—$1.25	$1.23—$1.28
3 to 5 barrels	1.19— 1.24	1.22— 1.27
6 to 9 barrels	1.18— 1.23	1.21— 1.26

Gasoline Very Firm: Fuel Oil Has Advanced

GASOLINE, OILS.—The price of gasoline is holding in very firm market. Crude oil in the Mid-Continent field is still quoted at $1.70 per barrel. The demand for gasoline during the past winter has been so heavy locally that refiners have been unable to accumulate their usual stocks as a reserve against the heavy demand in spring and summer. Persent indications point to higher gasoline than has yet been known during the coming summer. Locally it is quoted at 28½c and 29c. Fuel oil has advanced ¾c. per gallon and in barrels is now quoted at 12c. and in tank cars at 11c. With the congested freight shipments refiners are finding that they are unable to get their deliveries to their customers. This is seriously affecting the munition plants, who are depending on this source of fuel for power. The coal situation is a serious one and deliveries are being made no better on fuel oil than on coal. Refiners who have large monthly contracts are in some instances unable to get any more than half their deliveries made. This is hampering the business of these concerns as well as being a serious problem for the munition factories who are depending on this source for their fuel.

Turpentine Easier In Primary Market

TURPENTINE.—Throughout the week under review turpentine has been from 1c. to 1¼c. per gallon lower in the primary market than it was quoted at last week. Locally, however, prices have remained unchanged as the difference is not sufficient as yet to warrant a change. Production of new stocks is expected to start in the Southern United States about the first of next month and this should have a tendency to make prices easier. For the most part the demand is reported light, except from manufacturers who are using considerable quantities. The lower quotations of last week have been moved up nearer the higher quotations.

1-barrel lots	$0 77—$0 81
2 to 5 barrels	0 76— 0 80
6 to 9 barrels	0 75— 0 79
5-gallon	0 82— 0 88

White Lead in Oil In Very Firm Market

WHITE LEAD IN OIL.—With an advance of 50c. per hundred in the price of pig lead in the primary market a firmness has been instilled into the price of white lead in oil. Furthermore linseed oil is in increasing firm market with higher prices quoted owing to the difficulty of getting seed forward from the Canadian North-West. Pig lead in the New York market is now quoted at $8.25 per hundred as compared with $7.75 a little over a week ago. As yet the price of white lead has not advanced, but it is anticipated that it will go higher if the present condition continues in the primary markets. Locally it is quoted at $14.80 per hundred in small lots and $14.50 per hundred pounds in ton lots.

Putty and Glue Are Inclining Higher

PUTTY, GLUE.—With the firmness in the linseed oil market and the difficulty in getting supplies of whiting there are indications that the price of putty may go higher. There are those who confidently believe that the situation points in that direction. Glue is also in firm market with quotations for available stock in English common sheet glue ranging up to 29c. per pound. Bone cake glue has also been moved up to 29c. per pound in certain quarters. Supplies are becoming still scarcer and the situation is growing more acute each week.

Wooden Paint and Shellac Containers Up

CONTAINERS. — Manufacturers of wooden shellac and paint pails have advanced the price of these containers approximately 15 per cent. during the past week. The 5-gallon size that formerly sold for 47c. each is now quoted at 55c. There has been an increased demand for these containers owing to the high prices asked for metal containers. Woodenware manufacturers have instructed their representatives to accept no forward contracts on woodenware. The cost of the raw material and the higher labor cost have made the market firm.

WANTED — RELIABLE, ENERGETIC hardware clerk, 8 to 12 years' experience. Capable of taking charge. Apply, stating salary and giving full particulars, to Box 170, Hardware and Metal, Toronto.

The firm who inserted the above advertisement in HARDWARE AND METAL showed good judgment.

Naturally, replies would only come from clerks who were in the habit of reading HARDWARE AND METAL—and every hardware merchant realizes that a clerk who reads HARDWARE AND METAL is the kind of clerk he wants, because he will be thoroughly informed on market conditions, new selling plans and the best methods of window display and advertising. The above advertisement brought in 23 replies. It cost only 67 cents.

USE THE WANT AD. PAGE.

The Berry Wagon
is as popular as ever.

You should always have one in your show window, it is a never failing source of attraction. No more striking advertisement was ever devised for the dealer, and you can use it in many profitable ways to influence business. The wagons cost you nothing when ordering our Architectural Finishes.

All Berry Brothers' products are staple of the varnish supply trade and our label is accepted without question as a mark of quality.

Berry Brothers' line is a sure basis for a growing varnish trade.

You May Become a Practical Window Dresser for $2.60

This is the first book ever written devoted exclusively to Hardware Window Display, and is a really new and good book. It is a practical, up-to-date collection of ideas of the most expert window dressers in the world. There are hundreds of displays in the book that can be put in at practically no expense — any one of them will bring enough extra trade to the store to pay for the book many times.

256 Pages 8x11 Inches 300 Illustrations

Price $2.60, Postage Paid, Payable in Advance

How we Direct Customers to Sherwin-Williams Agents

When we ship an order to one of our agents our interest does not end there—it really has only begun

Re-orders will not come in as long as stock remains on the agent's shelves, therefore, our interest demands that we put forth every effort to direct customers to the stores of S-W Agents.

Agents' Co-operation Necessary

Our promotion to increase your profits is aimed direct at your customers through personal letters, and is bound to create sales, but we must have the names and addresses of the customers whom you desire to have this sales boosting promotion.

If you haven't sent us your list of names for these personal letters, please do so at once that you may not lose an opportunity to sell a good bill of paints and finishes to those customers who are going to paint this spring.

The additional business will more than pay for your time and trouble. Do it to-day,

If your are not an S-W Agent, ask us for full particulars of the proposition that is backed up by the world's best known paint trade-mark.

THE SHERWIN-WILLIAMS CO.

Re Gauges and Prices of Sheets.

Prices which follow on black and galvanized sheets are purely nominal. The market has reached a state where prices are quoted only on application and for immediate acceptance.

On account of it being practically impossible to secure galvanized sheets from England, owing to the war, American mills have decided that they will no longer roll the English gauges to meet this competition. However, they will continue to roll at 10¾ oz., which will be known as such or a 30 gauge, and will take the place of the former English 28 gauge.

SHEETS (BLACK)

	Montreal 100 lbs.	Toronto 100 lbs.

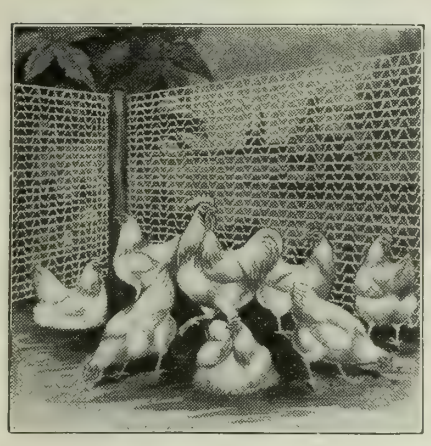
We Again Draw Your Attention to the Merits of U.S. Poultry Netting

Base Board and Top Rail Unnecessary

Our U.S. Poultry Fence is so stiff and strong and stretches so straight and true that the use of top rail, base board and so many posts are unnecessary. Furthermore, where top rail is used chickens can see something to fly to, therefore, the fence must necessarily be higher. If no top rail is used it is not necessary to have the fence so high.



General Appearance

U.S. Poultry Fence costs about the same in the roll as the old style netting, but considering the cost erected and the extra life by reason of its superior quality, there is no comparison.

If you would have a poultry yard of which you can be justly proud, you should build it of U.S. Fence, which is strong and satisfactory in every way, which stretches up straight, even and nice without buckling, bagging or sagging.

If your orders are not placed for

Black Screen Cloth
Galvanized Screen Cloth
Screen Door and Windows
Lawn Mowers and Grass Shears
Garden and Harvest Tools
Rope, etc., etc., etc.

It would be wise to order now while stocks are complete.

Exclusive Selling Agents for "U.S." Poultry Netting in Ontario, Quebec, Nova Scotia and New Brunswick.

LET US TELL YOU HOW TO SELL MORE PAINT

ANDREW CARNEGIE said: "Put all your eggs in one basket and watch that basket." Carnegie was master of just one business—steel making. He didn't dabble in anything else. He made steel right and steel made millions for Carnegie.

The hardware man who clutters up his paint department with a dozen different lines of paints, varnishes, stains, enamels, etc., is using too many baskets. He can't watch 'em all.

Some of the most progressive dealers in Canada are mighty glad to-day they decided to handle the Lowe Brothers' complete line. There is "High Standard" quality in every article. Each one helps the other. Our whole reputation is just as much behind one as the other.

You carry smaller stock, you get more simple accounting, you get bigger, cumulative advertising, you get easier work on the selling end. You get more satisfied customers and increased business.

Ask us to tell you more about it, now.

Condensed or "Want" Advertisements

There is always someone, somewhere, who is looking for just such a proposition as you have to offer—and it is more than likely that he is a hardwareman and a subscriber to HARDWARE AND METAL. Let an advertisement on this page bring you together.

RATES (payable in advance): 2 cents per word first insertion, 1c per word subsequent insertion. An additional charge of 5 cents for each insertion is made when Box Number is required. Each figure counts as one word.

BUSINESS CHANCES

LET JOHN NEW, 154 BAY STREET, TORONTO. sell your business. (4)

FOR SALE—SPLENDID HARDWARE IN best Western Ontario city. Exceptional opportunity for one or two live men. Business can be doubled in short time. Advanced years only reason for selling. Stock about fourteen thousand. Address Box No. 6, Hardware and Metal.

AGENCIES WANTED

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

STORE EQUIPMENT FOR SALE

HARDWARE STOCK AND FIXTURES FOR sale in Sudbury. For particulars write Box 88, Sudbury, Ont.

YOU MUST HAVE A LOT OF OLD FIXtures around the store which are no longer of any value to you, but would prove very useful to someone else in the hardware business. Find a purchaser for this equipment through an advertisement on Hardware and Metal's Condensed Ad. Page.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

PAPER BALERS

THERE IS MONEY IN USING AND SELLing the Jewell Paper Baler. It is the only low-priced, efficient baler on the market. Every hardware store should use one. Splendid side line for one line traveller in each territory. General Sales Co., Stair Bldg., Toronto.

SITUATIONS WANTED

EXPERIENCED SALES MANAGER wishes similar position or assistant. Eighteen years' experience in paints, oils, glass, varnishes and hardware. Have special training in mercantile credits. Excellent connection in Western Canada, and can get results. Reply Box 421, Hardware and Metal.

HARDWARE SPECIALTY SALESMAN with excellent connection in Ontario desires road position. Has "done his bit" in France, and while now medically unfit for service is perfectly fit for certain duties. Box 420, Hardware and Metal.

THE "CHANGING TIME" IS GETTING near. There are many firms who have vacancies on their sales or office staffs to fill during the next few months. If you want to qualify for some of these vacancies, tell your story briefly in a Condensed Advertisement, and try it out in Hardware and Metal. A twenty-five word advertisement may land you a permanent position with splendid prospects.

ARTICLES FOR SALE

FOR SALE—1 NEW SHORE SCHLEROscope, complete with all regular equipment. Pease Foundry Company, Limited, Brampton, Ont. Jct. 4341.

SALESMAN WANTED

MANUFACTURER OF STAPLE SPECIalty, stocked by all hardware jobbers and many grocery jobbers, east of Sudbury, Ont., wishes to connect with capable salesman covering territory from the above point west to the coast, to handle goods as side line. Address L.M. Co., Lennoxville, Que.

MISCELLANEOUS

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited. Room 314, Stair Building, Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada. (tf)

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fenson hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fenson Elevator Co., Toronto.

PARTICULARS OF PROFITABLE SIDEline for anyone calling on hardware or butcher trade in certain parts of Canada. No samples. Eureka Refrigerator Co., 27-21 Brock Ave., Toronto.

NOTICE TO MERCHANTS:—We will adjust your bad accounts satisfactorily for you. Our system is "Direct from Debtor to Creditor." We handle none of your money. Through our system, you can put your business on a cash basis. We will underwrite any debtor's account for you.

SIGNS AND SHOW CARDS

WE ARE THE MOST UP-TO-DATE SIGN and show card firm in Canada. W. H. Stevenson, Stevenson Building, Toronto.

DON'T STOP ADVERTISING.

Keep your name to the front, so that you are in the market for the business that is going and for the new business that is coming. Do not let the world think that you have "gone under."

SEPARATE SEALED TENDERS, addressed to the undersigned, will be received at this office until 4.00 P.M., on Monday, February 12, 1917, for the supply of: "Brooms and Brushes," "Chain," "Coal," "Hardware," "Hose," "Oils and Greases," "Packing," "Paint and Paint Oils," "Manilla Rope," "Wire Rope" and "Steam Pipe, Valves and Fittings," for the requirements of the Departmental Dredging plant in Ontario and Quebec during the fiscal year 1917-18.

Each tender must be sent in a separate envelope and endorsed: "Tender for Hardware, Ontario and Quebec," "Tender for Chain, Ontario and Quebec," etc., etc., as the case may be.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures. These forms can be obtained at the Department of Public Works, Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, for amount stated in form of tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the contract. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, January 17, 1917.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Who is Your Customer?

THE finding, holding and multiplying of customers is your great business—probably your great problem. There's no royal road—no priceless route—to them. The plain way to find, interest and persuade them is the well-traveled way, the way of Public Advertising.

But the ideal medium—what is it?

If you are seeking a single medium of potency, of prestige, of sufficient circulation, you will find it in

MACLEAN'S MAGAZINE

You know of this magazine, but do you know it through use?

It can't do everything, but it can do much. It can make your product, commodity or service known nationally—and this at small cost per annum.

N.B.—Objectionable advertising not accepted. Both editorial and advertising columns are closely censored to keep them clean and decent.

You Want More Money

WE NEED YOUR SPARE TIME —LET'S GET TOGETHER

Let us show you the way to increase your income to any extent you desire. If your present salary isn't quite sufficient to take care of "extra summer needs," our plan will provide the money for them. It will also furnish the funds for vacation expenses.

The best part of our money-making plan is, no time is neded, only what you can spare from your regular employment. It interferes in no way with business or pleasure, but fits in as a "money maker" into spare-time moments. Work it an hour now and then and the cash results will surprise you.

Now is just the time to start—the days are long—and are getting longer. Turn your evenings and spare time into cash by becoming our district representative.

Full particulars, without obligation, free on request.

Collar Pads For Horses

Description—Furnished in Brown and White Drill, or in Old Gold with Red Felt Edge—Filled with our specially prepared Composite Stuffing Material — Hooks for keeping Pad in position under Collar are attached to Pad by our new patented device, which is the very latest and strongest method known. The Pad is neatly quilted, giving it a finished and handsome appearance.

THINGS TO REMEMBER

Nothing will disable a horse more than sore shoulders. TAPATCO Pads will prevent sore shoulders. Therefore, the horse owner is always the loser, when by neglect the horse is not in good condition. The small amount that a TAPATCO Pad will cost will be repaid many times over in the good service the horse will be able to give.

We shall be more than pleased to furnish you full information upon request.

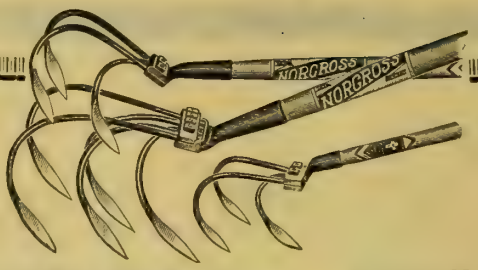
and 3202 Erie Street, Buffalo, N.Y.

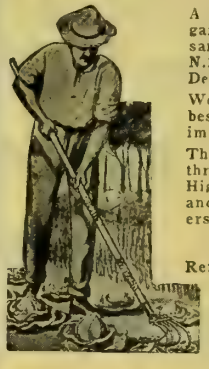


NORCROSS GARDEN CULTIVATOR-HOES

Have Revolutionized Gardening

They fill practically every need in cultivating and weeding, will work closer to plants without injuring the roots than any other tool, are suited to both men and women, and cost but a trifle more than the old style hoe.

The sharp tapering shovels enter the soil easily, tearing up every bit of earth from 1 to 5 inches deep as required, leaving the ground level, loose and untrampled.



A "Norcross" tool will prove profitable in any garden, large or small, at home or abroad. Thousands are being exported to Canada, Australia, N.Z., S. America, S. Africa, Great Britain and Denmark.

We solicit export trade and give same our very best attention. Agency connection desired with important Importers, "who carry stocks."

The "Norcross" is a Quality Line through and through. Detachable Steel Prongs, Malleable Head, Highest Grade Handles: made in 3 sizes, 5-prong and 3-prong with 4-foot handles. Midget (for flowers) with 9-inch handle.

English or Spanish literature on request.

References: Any Bank in America. Manufactured by

C.S. Norcross & Sons
Bushnell, Ill., U.S.A.

Make Horsemen your better Customers

A good horseman loves his horse, and seeks to save it all he can—save it from discomfort, over-fatigue, gall sores and other things that reduce the horse's efficiency. So when you talk

Ventiplex Sweat Pads Housing, Saddle Blankets

to a horseman, you have an interested man, and you'll have an easy time of it to sell him Ventiplex goods.

Ventiplex Sweat Pads and Saddle Blankets positively cure and prevent gall sores.

Ventiplex goods can be easily washed when soiled, and will retain their shape, because they are well-made and of first-class material.

Get well acquainted with the Ventiplex line. Send for our catalogue of horses' specialties.

N.B.—We make weather strip for which there will spring up a demand very shortly. Sell all you can. Get the money that will be spent some place or other—whenever the goods wanted can be obtained.

Ventiplex goods are sold by hardware jobbers. Ask their travellers about them.

Nails and Wire

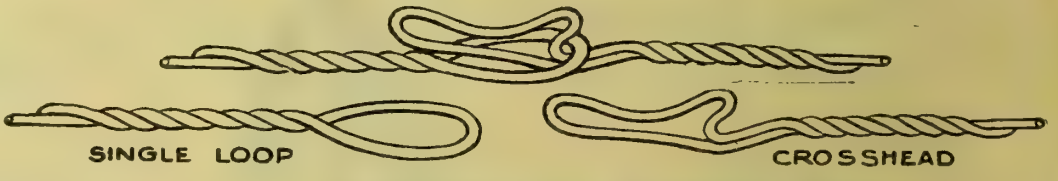
We have actually shipped to all the principal countries in the world. From experience we know how to pack and ship for export, and importers abroad are assured of satisfactory service.

We solicit inquiries from merchants in the British Empire and foreign countries. Quotations are made f.o.b. Atlantic or Pacific Ports, or c.i.f.

We are manufacturers of:

WIRE NAILS — All sizes and patterns, as used in European, Asiatic and Australasian markets. Packed in bags, or in steel-bound, paper-lined kegs.

WIRE—Bright, Annealed, Varnished, Coppered Weaving, Mattress and other fine tinned wires.



Special Hay Baling Wire

WIRE BALE TIES—Made in the usual gauges and cut to any length desired. For baling hay, straw and other compressible materials.

Packed in 56 lb. bundles, oiled with linseed oil. Single loop tie has loop at one end; cross head tie has loop at one end and hook at other, as illustrated above.

FENCE STAPLES—Bright and Galvanized.

"Whip broken, Bill?"

"Yes, Jack, I can't keep the blamed thing any length of time. I am as careful as any man could possibly be with them, too. Why don't they make whips that last?"

"They do, Bill. Go to Smith's Hardware Store and ask for a Flexo-Spring Whip—that's the kind I have—and it has lasted for months and months."

"Thanks, Bill, I'll go there."

This is the way business comes to agents for the

Flexo-Spring Whip

FEELS LIKE WHALEBONE

WEARS LIKE RAWHIDE

GUARANTEED TO STAY UP AND KEEP PLIABLE UNTIL WORN OUT

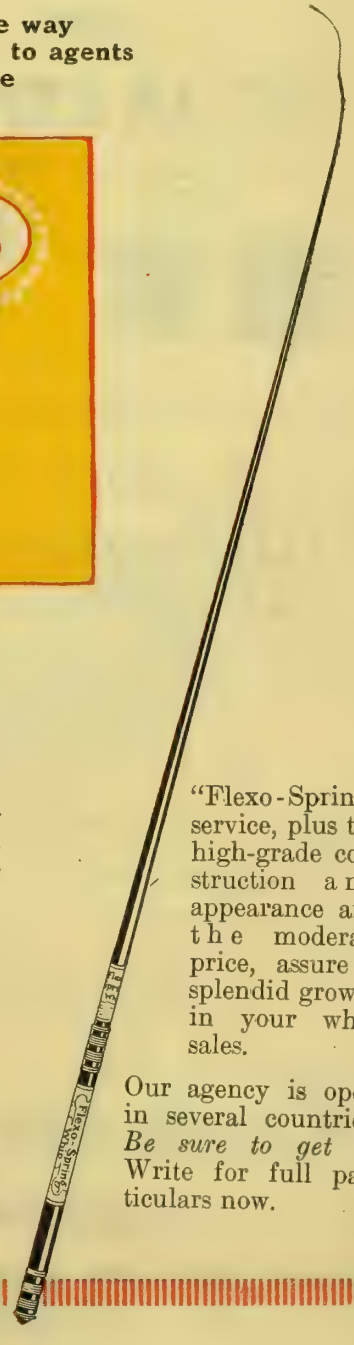
HAMILTON WHIP COMPANY
HAMILTON, CANADA

Three Concrete Reasons for the Superiority of Flexo-Spring Whips

1. After the rattan has been turned to shape, and before the sap has a chance to dry, *O'Brien's Rubberized Coating* is brushed on in such a way as to form an artificial bark. This coating keeps the sap in the rattan indefinitely. It cannot dry out and become brittle as is the case with many ordinary whips. That is why Flexo-Spring Whips permanently retain their flexibility and toughness.

2. Over the rubberized coating, there is an *English cushion outer cover*, double plaited, which forms a durable protection from wear and weather.

3. A Hand-Made Philadelphia Snap is used on Flexo-Spring Whips.



"Flexo-Spring" service, plus the high-grade construction and appearance and the moderate price, assure a splendid growth in your whip sales.

Our agency is open in several countries. *Be sure to get it.* Write for full particulars now.

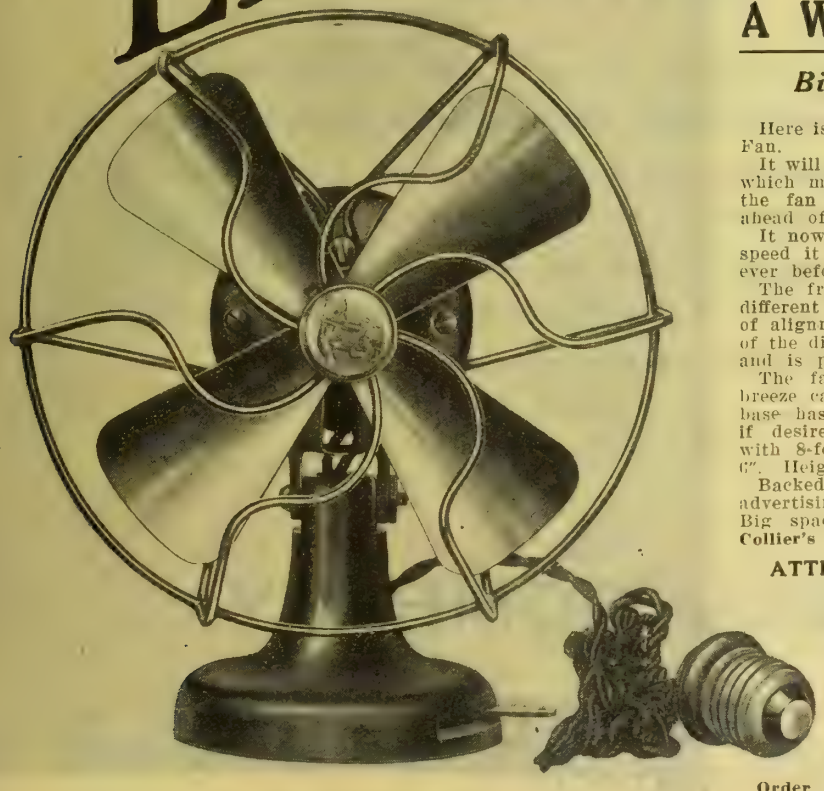
Polar Cub

REG. U.S. PAT. OFF.

Electric Fan $7.50



A Whirlwind Seller!

Bigger Value Than Ever

Here is the new Model C Polar Cub Electric Fan.

It will still retail for the low price of $7.50 which made the Polar Cub the sensation of the fan industry. But in value it is far ahead of previous years.

It now has two speeds and stop. At high speed it gives a much stronger breeze than ever before.

The frame is die-cast, thus eliminating 51 different parts. It cannot possibly get out of alignment. Bearings are an integral part of the die-casting. The guard is spot-welded and is positively unbreakable.

The fan is adjustable to any angle—the breeze can be thrown in any direction. The base has a hook for attaching to the wall if desired. Porcelain insulated. Equipped with 8-foot cord and plug. Blade diameter 6". Height of fan 8". Net weight 3 lb. 5 oz.

Backed by a powerful campaign of national advertising throughout the selling season. Big space in **The Saturday Evening Post, Collier's** and other magazines.

ATTRACTIVE PROFIT ON EVERY FAN

Trade discounts as follows:
Less than 6 Fans .....$5.00 each
Six Fans and Over ..... 3.75 "
Terms: 2/10/30, f.o.b. New Haven.
Full freight allowed.

Fans packed 6 and 12 to the package. Upon request we furnish free striking, sales-making store display material.

Order Early.—We have largely increased our production facilities, but, despite this, the demand will probably exceed the supply.

So place your order now. If further information is wanted, write us.

Quality

THE leader in every industry, to maintain his lead, must safeguard the quality of his products.—Rigid inspection and careful supervision are important factors.—To products of iron and steel this principle applies with tremendous force.—It means safety, security and stability.—We safeguard the quality of our products, believing quality will be recognized long after the price is forgotten.

Service

OUR customers must be served. One of the dominating factors in any successful business is Service.—We succeed only through the good will and good wish of the people we serve.—This thought premeates our entire Organization, from the President down.—Our employees feel the sense of responsibility this principle implies; and each one directs his efforts to maintain the high standard of service we aim to render.

In Answering Advertisements

It will greatly oblige our advertisers and facilitate matters generally if you will give the following information:

(1) Are you a manufacturer, wholesale merchant, agent or consumer?

(2) What are the actual working conditions under which the goods are to be used?

(3) What is the most desirable shipping point—St. John, N.B., Montreal, or New York in bond.

(4) Is special packing desired?

(5) Can you give Canadian or United States references, as to your financial standing?

"VOL-PEEK"

MENDS

All kinds of kitchenware, such as Pots, Pans, Kettles, Buckets, etc., mends Graniteware, Aluminum, Copper, Brass, Iron, Tinware, Enamelled Ware, and all metal articles in two minutes without the use of any tools.

"Vol-Peek" makes a sanitary mend which will last a long time; it becomes part of the article being mended, is easily kept clean, as no food can hide under the mend.

"Vol-Peek" is in the form of a stiff putty, which is easily applied with the fingers; it hardens in two minutes and will stand a temperature of 500 degrees higher than the melting point of solder.

Your customers will want "Vol-Peek" in preference to all other menders when they know how easily it is applied.

"Vol-Peek" has given satisfaction for the last ten years and has a large sale in many parts of the World.

"Vol-Peek" is put up in packages holding enough to mend from 30 to 50 fair-sized holes.

"Special Foreign Offer."—We will send to any part of the World, by parcels post, one doz. packages of "Vol-Peek" mounted on an attractive Display Stand, with a supply of advertising matter, for Six Shillings ($1.50).

Special prices for large quantities delivered C.I.F. and War Risk, your nearest Seaport, or by Parcels Post.

"Exclusive Agencies."—In countries in which we are not at present represented we are open to arrange Exclusive Agencies, and will be pleased to hear from interested parties.

The Demand Came Before the Product

This unique tableware has met with a remarkable response. And, naturally, too—the demand for ware that has the life and looks of sterling silver and yet stands comparison with ordinary plated ware on a price basis, has been long-felt. Enquiries from the trade were insistent. Here, now, is our answer—a line that is winning favorable success everywhere.

The

"PATRICIA"

—With the Silver Mound —

What could be more attractive than this pleasingly simple design? Note particularly that just at the point where ordinary plated ware shows signs of usage, the Patricia line has a mound of Sterling Silver hard-soldered on the back of the bowl of all spoons and forks.

Good wear is assured from this splendid production. Its pre-eminence comes not merely from the silver mound, but also from the durability of the plate—a heavy deposit of silver on an 18 per cent. nickel base.

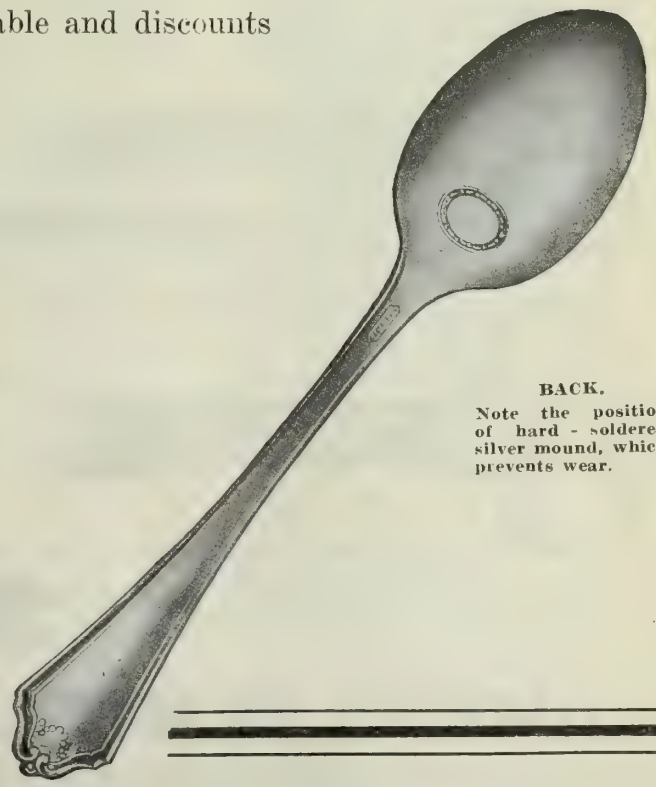
Retail prices, too, are reasonable and discounts are worth while to you.

FRONT.
Note sterling character imparted by combination of Colonial and Bead design.

Write for discounts on:—

1 doz. Tea Spoons	$4.75	1 only Butter Knife	$ .90
1 " Dessert Spoons	8.50	1 " Berry Spoon	2.00
1 " Table Spoons	9.50	1 " Meat Fork	1.25
1 " Dessert Forks	8.50	1 doz. Dessert Knives	8.00
1 " Medium Forks	9.50	1 " Medium Knives	9.00
1 only Sugar Shell	.75		

Oak Cabinets to contain 88 pieces can also be supplied.



BACK.
Note the position of hard-soldered silver mound, which prevents wear.

PRIEST'S HORSE and TOILET CLIPPERS

Made by American Shearer Mfg. Co.

present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.
Some styles of Toilet Clippers are illustrated below. All are heavily copper plated and polished before nickeling, thus giving a higher finish, which lasts much longer than ordinary plating. The utmost care is used in grinding and tempering the cutting plates, giving cutting qualities whose superiority may be readily demonstrated by comparison. No. 00 and No. 000 Shaver for beard and neck trimming, are clippers of the utmost lightness and refinement, not paralleled by any other American manufacturer.

STANDARD No. 0, No. 1 and No. 2.
Retailing at about $2.50. High-class barber's clipper.

How We Help You Sell Plymouth Rope

"We appreciate the many things you are doing to co-operate with the merchants in furthering the sale of Plymouth rope."

Thus runs a recent letter from a typical Plymouth dealer. And here are two of the forms of co-operation referred to.

A free advertising service which enables you to show more people why they should buy Plymouth Rope and where they can buy it.

A plan for retailing Plymouth Rope by the foot, which enables you to sell more people—and to do this with less effort and greater profit per sale.

These two factors are helping thousands of Plymouth dealers to build larger and more profitable rope businesses. The same factors will do as much for you.

The White Mop Wringers

Because of their wonderfully quick turnover the White Mop Wringers are one of the most profitable commodities any dealer can sell. Their ease of operation and general desirability make a quick and strong appeal to the consumer.

They are virtually self-sellers. They are made of hard Maple or Birch wood and the best malleable iron. They fit on any pail and wring the Mop perfectly.

They are often used as Fruit and Vegetable presses with good results.

Quality

THE leader in every industry, to maintain his lead, must safeguard the quality of his products.—Rigid inspection and careful supervision are important factors.—To products of iron and steel this principle applies with tremendous force.—It means safety, security and stability.—We safeguard the quality of our products, believing quality will be recognized long after the price is forgotten.

Service

OUR customers must be served. One of the dominating factors in any successful business is Service.—We succeed only through the good will and good wish of the people we serve.—This thought premeates our entire Organization, from the President down.—Our employees feel the sense of responsibility this principle implies; and each one directs his efforts to maintain the high standard of service we aim to render.

"ZIG-ZAG" RULES

The term "ZIG ZAG" as applied to folding rules made of flexible wood is a trade-mark belonging to this Company. This trade-mark is stamped on the rules either at full length or in its abbreviated form "ZZ."

The Joints used in "ZIG ZAG" rules are made in two distinct styles, the Concealed Joint, in which there is no hole through the wood, and the Rivet Joint, in which the rivet is carried through both wood and joint. Both styles contain a stiff spring which holds the rule rigid when open, even in the longest lengths.

Several other patented features add special value to the Stanley and Victor rules.

Made in all standard lengths and finishes.

Be sure your stock of Folding Rules all bear the name "ZIG ZAG" or "ZZ."

—this deep-cleaning machine

not only picks up all dirt, litter and threads, but also all fine dust, moth eggs, and disease germs right out of rugs, wall coverings, upholsteries and tapestries.

OHIO ELECTRIC

is a proven efficient vacuum cleaner.

We have standardized the OHIO ELECTRIC by eliminating all the non-essentials and incorporating all the essentials. Everything has been adopted that has been found practical by experience in the hands of our customers.

It is your desire to offer the best vacuum cleaner that can be manufactured. Fulfill that desire by selling the

OHIO ELECTRIC

We stand squarely behind every OHIO ELECTRIC *machine* we sell. Common-sense tells us that it is more economical to utilize the best materials obtainable than to be continually called upon to replace defective parts.

You'll like our dealer's proposition.

Write us for it.

A principle that has made good.

The United Electric Company

Canton, Ohio, U.S.A.

TORONTO, 159 Richmond St. West

We also manufacture and sell the famous Tuec Stationary Cleaners, more of which are installed than all other types combined.

If interested, tear out this page and keep with letters to be answered.

A Big Pleasure-Giver to 50,000 Homes

If you investigate you will no doubt find some of your customers have been enjoying "Home Comfort" service for over 20 years.

"Home Comfort" Steel Ranges

are built for long, heavy duty and their cooking qualities and fuel economy are remarkable.

Home Comfort Ranges are built upon the ideals of practically every housewife. Fifteen years of doing business direct with the consumer have given us a thorough knowledge of what is most desirable in a range and have modelled our product accordingly.

Now sold through the hardware trade.

A sure, satisfactory and big profit proposition for you, Mr. Hardware Merchant.

Write for specifications and full particulars.

TO INVESTORS

THOSE WHO, FROM TIME TO TIME, HAVE FUNDS REQUIRING INVESTMENT MAY PURCHASE AT PAR

DOMINION OF CANADA DEBENTURE STOCK

IN SUMS OF **$500** OR ANY MULTIPLE THEREOF.

Principal repayable 1st October, 1919.

Interest payable half-yearly, 1st April and 1st October by cheque (free of exchange at any chartered Bank in Canada) at the rate of five per cent per annum from the date of purchase.

Holders of this stock will have the privilege of surrendering at par and accrued interest, as the equivalent of cash, in payment of any allotment made under any future war loan issue in Canada other than an issue of Treasury Bills or other like short date security.

Proceeds of this stock are for war purposes only.

A commission of one-quarter of one per cent will be allowed to recognized bond and stock brokers on allotments made in respect of applications for this stock which bear their stamp.

For application forms apply to the Deputy Minister of Finance, Ottawa.

DEPARTMENT OF FINANCE, OTTAWA,
OCTOBER 7th, 1916.

WHO AND WHAT
ARE THE COMMERCIAL UNDERWRITERS?

THEY are adjusters of bad accounts, NOT a collecting agency. The Commercial Underwriters' system is "Direct from Debtor to Creditor." They refuse to handle any of the merchant's money. Mr. Merchant, if you have any bad accounts, write us. Our system will make them pay. Our system is known as the THIRD DEGREE.

Through the Commercial Underwriter's System you can put your business on a cash basis. John Jones comes into your store and says: "Mr. Merchant, I am working down at the Trunk Factory. I get paid every two weeks. I want to do my trading in your store." "All right, Mr. Jones, how much credit do you want every two weeks?" "I want ten dollars' worth, Mr. Merchant, and as soon as I get my pay I will pay you." Now, Mr. Merchant, you do not know whether John Jones is sincere in what he says or not. Your past experience will tell you that all men do not live up to their word. You say, "Yes, sign this charter of the Commercial Underwriters, and I will trust you." You send the charter into the Commercial Underwriter's office, and anytime that Jones runs away or fails to pay you, we will, and in three days after the notification reaches our office, your money that Jones owes you is on its way to you —putting your business on a cash basis.

This morning's mail brings us letters from merchants reporting to us, who have paid. In a letter from Oshawa the merchant says: "Some of the money you have adjusted for us is like finding it, and we thank you." Another letter from a merchant in Hanover says, "Come on to Hanover, and I will take you out and introduce your representative to the other merchants, and tell them what the Commercial Underwriters have done for me." Another merchant from Mount Forest says: "Your system of adjusting debts is a Wonder." Another merchant from Palmerston writes: "Note that Mr. So and So has paid his account, which is outlawed." A Doctor from Drayton writes, thanking us for adjusting over twenty-five accounts. What we have done for others, we can do for YOU.

Write us and we will send you full particulars. The best piece of advertisement we have is "SATISFIED MERCHANTS," and we have them all over the country.

What Every Hardware Dealer Should Know

First : That the hardware business is changing.

Second: That it is swinging over from the handling of tools, nails, wire, wheelbarrows, etc., to the stocking and pushing of automobile accessories.

Third : That automobile accessories—particularly automobile lubricants, are yielding hardware men quick sales and good profits.

Fourth: That **POLARINE** and **GARGOYLE MOBILOILS** are among the leaders in popularity with the hardware man.

WHY?

BECAUSE they yield 33 1-3% profit or more according to the quantity you handle.

BECAUSE they are widely and continuously advertised to your customers.

BECAUSE hundreds of hardware dealers have learned from actual experience that all the foregoing is true.

POLARINE, which is now supplied in two grades, called Polarine and Polarine Heavy, will be advertised more extensively this year than ever before in newspapers, motoring magazines, and farm papers from coast to coast.

GARGOYLE MOBILOILS, supplied in four grades for engine lubrication, and sold by a Chart of Recommendations to insure the use of the correct grade, have been sold by us in Canada for some years. These oils will be advertised in the Hardware Trade Press, and the Motoring Magazines during 1917.

The Imperial Oil Company offers you the co-operation of extensive dealer helps in marketing both POLARINE and GARGOYLE MOBILOILS. Signs, booklets, circulars, window trims, counter cards, etc., are available to you in pushing these excellent products.

This is your opportunity to join with hundreds of other Hardware dealers in the profits, and permanent patrons which will result from your co-operation in the handling of these products.

Please address us at 56 Church St., Toronto, for full information. We will answer by return mail.

Why You Should Sell Ferry's Seeds

SEEDS and garden hardware are closely related. You can sell Ferry's Seeds to regular buyers of hoes, rakes, spades, cultivators, etc. Your customers for any articles of hardware will be attracted by your display of Ferry's Seeds. Seeds help hardware sales and hardware helps seed sales. You make the profit on both and you make new customers for every line in your store.

FERRY'S SEEDS

are the Royal Family of the seed kingdom, descendants of a pedigreed lineage that have been tested for sure germination, growth and productiveness. When you put one of our attractive display cases on your counter you are offering your customers the result of sixty years of experience in scientific, practical seed culture. This Ferry Seed quality is known to thousands. You can cash in on this prestige. Write for our interesting dealer proposition.

D. M. FERRY & CO., Windsor, Ontario

CLASCO

OPPORTUNITY

(Hardware and Metal, Jan. 13, 1917)

"The most significant factor for the Hardwareman to consider, at the present time, is the increase in the use of motor cars. . . . .

"It is no exaggeration to say that the time is now in sight when every man will own his car. . . . .

"From the standpoint of the Hardwareman this means an ever-increasing sale of motor accessories . . . in which foresighted Hardwaremen are sharing.

"Truly this is the greatest opportunity that has ever presented itself to the Hardwareman."

Motor Car Lamps form the most important item of the various accessories, and CLASCO Motor Lamps doubtless the most attractive.

Strictly a high-grade, quality lamp, up-to-the-minute in all refinements, in every sense Canadian-Made, CLASCO Motor Car Lamps suit the situation and command first consideration when considering the accessory business.

New Auto Accessory That Means Much To You!

Here is a splendid opportunity for you, the hardware dealer—good friend of Liquid Veneer—to *double* and *triple* your business on this article by stocking the remarkable new auto cleaner and polish,

AUTO LIQUID VENEER

(MADE IN CANADA)

It saves washing, with all its trouble, delay and harm to the finish. It is simply sprayed on in a fine mist with the L-V Sprayer, over dust, mud, road tar and grease, and then polished with a clean Dust Cloth. Instantly the car is as bright and clean as new, with the famous Liquid Veneer Polish.

Think what it means for a man—or a woman—to clean a dusty, dirty car in ten minutes for 5 cents, instead of $1.50, the cost of washing. Think what it means for the car owner to have his car always bright and clean—to save the expensive cost of refinishing.

Thousands of motorists are buying these Outfits at $1.50 each, consisting of a handsome 50c brass finished sprayer and a $1.00 quart bottle of Liquid Veneer. This Liquid Veneer Outfit will be the one big seller because of its reputation and long standing. Get in on this. Send the coupon to-day. **There is a liberal profit that will surely interest you.**

A big advertising campaign is now under way which includes leading magazines, bill-boards and demonstrations.

The Doctor's Story

"That Colt is my friend. It **proved** its worth—late one night when I was on a call at the old Biggs place, ten miles out — and I don't think I am overstating it when I say that the COLT saved two lives—my own and my chauffeur's."

One of Our Customers

Took special note of our "DOCTOR'S STORY" advertisement running in the national magazines; figured that he could get the doctors in his section interested with direct sales benefit to him by mailing to each a special circular; we prepared the circular.

Why not try the scheme yourself? We will supply the circulars—any quantity—with your name and address thereon.

Or, if there is any other class you wish to cover—AUTOMOBILISTS, PAYMASTERS, JEWELERS, BANKS, SCHOOL TEACHERS, WATCHMEN—let us know.

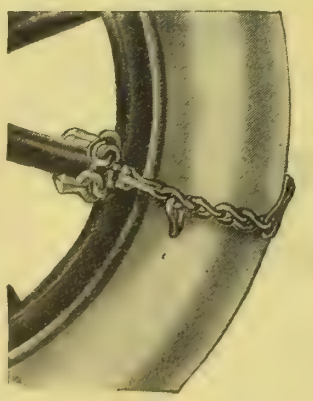
BRING MOTORISTS TO YOUR STORE

THEY ALL WANT EASYON CHAINS



Every motorist who has ever been stuck in mud or snow realizes at a glance that he needs a set of EASYON'S. EASYON CHAINS can be put on or taken off in a moment. They grip like a mud hook, but ride like a bare tire. They can be easily put on when up to the hubs in mud. As long as the motorist carries them in his car he can feel sure that he will not get stuck for want of traction.

With a stock of only three sizes you can fit all sizes of pneumatic tires:

Small size fits 3 or 3½" tires. Retail price ..... $3.00 per set
Medium size fits 4 or 4½" tires. Retail price ..... 4.00 per set
Large size fits 5 or 5½" tires. Retail price ..... 5.00 per set

Liberal discounts allowed to dealers, and display matter and circulars will be furnished free. Order through your jobber, or write to us for dealer's proposition.

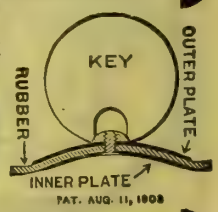
TRADE MARBLE'S MARK

Ezy-Quick Repairers

With this handy little device any one can fix up a puncture in rubber or leather shoes, waders, canvas boats, auto tires or rubber bags. Takes but a minute to do it, and makes an absolutely water-tight, air-tight patch. Cross-section cut at right represents patch applied to a piece of rubber. Key is for turning up nut only.

No cement used. Cannot come off. Does not hurt foot. Upper plate is concaved—lower plate has a threaded pivot, which projects through a hole in upper plate, and the two are held tightly together by a flush nut.

Three sizes—sell at 10c, 15c, 20c. Put up one to three dozen, or assorted sizes on display card.



MARBLE'S HANDY COMPASS

A handy, waterproof compass that is absolutely reliable—never goes wrong. Attaches to outside of coat—always in sight. Balances so readily direction can be taken while walking. Cannot demagnetize like a pocket compass. List prices, $1.00 to $1.50.

MARBLES' WATERPROOF MATCH BOX

Particularly needed by hunters, trappers, guides and timbermen. This matchbox is really waterproof and still easily opened. Made of seamless brass about the size of a 10-gauge shell, fitted with rubber-lined cover. Holds enough matches to last several days. A convenience and a life-saver for the man far from shelter. List price 50c.

TRADE SUPPLIED BY JOBBERS

A Straight Talk from the Manager

No. 56

Study the Business

A few years ago, a man with very little capital but a large ambition, opened a hardware store in the east end of Toronto. To-day he is rated ten to twenty thousand, first grade of credit, and he owns the fine block in which his store is located.

The other day a customer asked him why he was always able to answer all questions about the different lines he has in stock.

"Because," he replied, "I pump the travelers who call upon me for all the information they can give me, and I read every advertisement in HARDWARE AND METAL in my search for facts and selling points on hardware."

If you are not studying the advertising pages of HARDWARE AND METAL, you are missing probably the most valuable feature in the paper. You will find in this very issue, many advertisements which will make money for you if you set at work the information you can derive from them.

NO "tug of war" or tug of wind can budge a garage door that's locked open by the Stanley Garage Door Holder 1774.

The car can enter or leave the garage with no danger of the doors slamming against it. Yet a pull on the chain of the Holder leaves them free to close.

Stanley Garage Hardware equips garage doors so that they swing easily, close snugly, and form the best looking and most satisfactory feature of a garage. Every set you sell will do credit to your store.

If you do not carry Stanley Garage Hardware, write for the Catalog R-22 and information about the selling helps we furnish you.

Vol. 29 TORONTO, FEBRUARY 10, 1917 No. 6

Programme Announced for Convention

All Arrangements Completed for Twelfth Annual Convention Ontario Retail Hardware and Stove Dealers' Association—To be Held at Hamilton, February 20-21-22.

JUDGING by the programme, which appears on this page, the coming convention of the Ontario Retail Hardware & Stove Dealers' Association should be one of the most interesting ever held by the association. As announced in HARDWARE AND METAL three weeks ago, the convention will be held at the Royal Connaught Hotel, Hamilton, Ont., on Feb. 20, 21, 22. Officers of the association met in Toronto on Wednesday of this week, arranged the programme, and made final arrangements for the convention. Secretary Macpherson announced that a large number of manufacturers have arranged to hold exhibits in Hamilton during the convention. Arrangements have been made for special rates at the hotel and on the railways.

Three days will be devoted to the twelfth annual convention of the association. Tuesday morning will be devoted largely to the registration of visitors. The opening meeting of the convention takes place at 2 o'clock Tuesday afternoon in the banquet hall of the Royal Connaught. This meeting will be open to members, exhibitors and associate members, and will be devoted to a reception of visitors, addresses of welcome, addresses by trade representatives, address of the president, secretary's report, etc. The evening session will be open to members only, when reports will be received from the treasurer and auditors, executive, and advisory committee.

At this meeting, Second Vice-President D. A. MacNab, of Orillia, will introduce a discussion on, "The better way to price the Inventory."

The first "Question Box" discussion, always one of the most important features of a convention, will take place at this meeting.

On Wednesday morning the visitors will be taken in charge by a committee of local hardware merchants, and a visit paid to the plants of a number of hardware manufacturers.

The afternoon session on Wednesday promises to be an interesting one. The question of unfair competition in kitchenware is to be taken up. The retailers state they have many complaints to make regarding the action of certain manufacturers in selling kitchenware. A discussion will also take place re making a kitchenware department pay. "How to make a tinshop pay under war conditions," is another important subject which is to be taken up on Wednesday afternoon. Other important subjects to be taken up at this meeting are "Co-operative deliveries," "Cutting down overhead expenses," "Question Box discussion."

On Wednesday evening there will be a smoker and entertainment at the Royal Connaught. The committee at Hamilton states that an excellent programme will be provided, and visitors will be treated to a sample of Hamilton's Hearty Hospitality.

On Thursday morning, Secretary Macpherson will lead a discussion on "How to Move Unsaleable Stock." Another important subject for discussion at this meeting is, "How to secure profits on present high values of merchandise."

On Thursday afternoon the election of officers will take place, and unfinished business wound up.

The "Question Box Discussions" will

PROGRAMME

TUESDAY, FEB. 20.

MORNING SESSION.

9 a.m.—Reception and registration of members.

10.30 a.m.—Meeting of Executive Committee and appointment of Convention Committees.

AFTERNOON SESSION.

2 p.m.—Opening meeting of convention in Banquet Hall Royal Connaught. Open to members, exhibitors and associated members.

Reception of visitors to convention.
Address of welcome by Mayor Booker.
Addresses from trade representatives.
Address of President, and Secretary's report.
Address by Col. J. B. McLean, publisher Hardware and Metal.
Consideration of President's address and Secretary's report.
Visit to exhibits.

EVENING SESSION.

Members only.
Report of Treasurer and Auditors.
Report of Executive and Advisory Committees.
Discussion, "The better way to price 1917 inventory." introduced by 2nd Vice-president D. A. Macnab.
Discussion by members.
Opening of Question Box.

Wednesday, Feb. 21—8.30 a.m.—Visit to manufacturing plants, including Canada Steel Goods Co., Atkins Saw Co., Frost Wire Fence Co., Street car ride around city. In charge of local committee of retail hardware men.

AFTERNOON SESSION.

2 p.m.—Discussion re making kitchen ware department more profitable—unfair competition in graniteware, etc. Introduced by Vice-President J. N. Mcgregor.

Tinshop problems under present war conditions. How to make work shop pay. Open discussion introduced by Past President H. Occomore, Guelph.

Co-operative deliveries, cutting down overhead expenses. Introduced by President W. J. Carter.
Question Box discussion.
Visit Exhibitors' display.

WEDNESDAY EVENING.

Smoker and entertainment in Royal Connaught. A first-class program for which special talent has been provided.

MORNING SESSION.

Thursday, Feb. 22—9.30—Receiving reports of committees.

How to move unsaleable stock, by Secretary Macpherson.

The retailers' problem. How to get profits on present high values of merchandise.
Open discussion.
Question Box.
Visit to exhibits.

AFTERNOON SESSION.

2 p.m.—Election of officers.
Unfinished business.
New business.
Visit to exhibits.

be one of the best features of the convention. During the past year a great many new problems have confronted the retailers and there is no better way to solve them than by taking the matters up at the meetings and securing an interchange of ideas. The visits to the manufacturing plants where hardware goods are made, should prove interesting and instructive to every hardware merchant. Hamilton is a splendid convention city and is easily reached from any part of the province.

Instructions to obtain reduced fares have been issued for persons attending the convention. The instructions are as follows:—

Purchase a one-way ordinary first-class adult fare ticket (fare not to be less than 50c) to Toronto, and obtain from ticket agent a Standard Convention Certificate (Form 24).

At first meeting you attend hand your certificate to the secretary of the association for endorsement, and for validation by the special agent of the railway lines.

After validation, the certificate will be returned to you on payment of fee of 25c, and must be presented to ticket agent to obtain return ticket at least thirty minutes before the train leaves.

After paying 25c validation fee, the return fares will be as follows:

If certified attendance is 99 or less—Two-thirds one way ordinary first-class adult fare.

100 to 299.—One-third one way ordinary first-class adult fare.

300 or more—Return trip ticket without further charge.

Going.—Tickets may be purchased Feb. 16 to 22.

Returning.—Tickets may be purchased up to Feb. 26.

Secure Control of Galt Brass Co.

Robert J. and William J. Cluff, of Toronto, Buy a Controlling Interest in Galt Company—No Changes to be Made in Operation of the Concern — New Link Added in Extensive Manufacturing Chain.

A controlling interest in the Galt Brass Co., Galt, Ontario, has been secured by two prominent Toronto manufacturers, R. J. Cluff and W. J. Cluff. The change constitutes the most interesting development in the industrial field for some time.

The widening of scope in the operations and activities of the two Cluff brothers has been so rapid of late as to make a story that reads almost like a romance. They have carried on their business as plumbing jobbers under the title of Cluff Bros., and as manufacturers of "Vitro" tanks under the firm name of Cluff Mfg. Co., most successfully for years. Since the start of the war they have organized Cluff Munitions Limited and, it is understood, have been most successful in this line. Their most spectacular effort was the organization of a company this summer to take over the plant and business of the standard Ideal Co. The Port Hope Sanitary Manufacturing Co. was formed with R. J. Cluff as vice-president and W. J. Cluff as one of the directors. It is safe to assert now that the new company is meeting with an unusual degree of success and that the extensive business at one time controlled by the Standard Ideal Co., is being won back.

ROBERT J. CLUFF.

The latest step of the ambitious brothers is, in every sense, a logical one. They have needed control of a brass manufacturing plant to round out their interests in the plumbing line. Their manufacturing activities now cover enamelware, tanks and, through the Galt plant, brass goods.

No Change Contemplated

HARDWARE AND METAL learns that no change is contemplated in regard to the Galt Brass Co. It will continue running under that name and no changes will be made in the personnel of the management. John McLaren will continue at the head of the concern.

It is understood, however, that the lines manufactured will in time be added to. It is planned to turn out new specialties and to increase the plant as circumstances warrant. It is definitely stated that, when the war is over, steps will be taken to double the plant in size. There is no intention of moving the plant from Galt.

History of the Company

The Galt Brass Co., was organized eight years ago. John McLaren, who had formerly been connected with the Canadian Brass Co., became president and general manager of the concern. Despite the fact that the last five years have been marked first by business depression and then by the uncertainty of war conditions, the Galt Brass Co.

WILLIAM J. CLUFF.

have been successful in building up a wide connection and in establishing an enviable reputation.

To revert back to the story of the business careers of Robert G. and Wm. J. Cluff, it is interesting to note that their rise to prominence in manufacturing circles has been a matter of recent years only. They are still young men. The developments of the past year, however, have put them in the forefront. Few manufacturers have more extensive and diversified interests. The last step, by which they have gained a controlling interest in the Galt Brass Co., is a personal venture on their part. None of the other companies with which they are connected is concerned in any way in the deal.

McClary's Encourage Employees to Save

Big Increase in Savings as a Result of a Simple Appeal to Employees—Five Per Cent. Interest on Savings

EMPLOYEES of the McClary Mfg. Co., London, Ont., have, since the first of 1917, greatly increased their savings in the "Savings Department" conducted by the company in connection with the "Welfare Department."

The "Savings Department" allows 5 per cent. saving account interest. Deposits are repayable to employees on Dec. 15. Many employees, however, leave their accounts standing from year to year. Although accounts are ordinarily repayable on Dec. 15, only provision is made for exceptional cases, where necessity makes it necessary for the employee to withdraw his savings in whole or in part.

In view of the unusual conditions governing at this time, the management made the recent end-of-the-year season the occasion for a simple campaign among employees, advertising the savings department operated for their benefit, and urging a more general and more generous use of it in their own interests.

From the results realized, it is quite apparent that the members of the staff grasped very keenly the signs of the times in this connection, and appreciate the soundness of the arguments for thrift.

What those results have been will be understood more clearly than by any other means, by a comparison of the figures for last year, and those which will govern for this year.

	No. of accounts	Aggregate weekly saving	Amounting in the year to
1916	280	412.05	$21,426.89
1917	400	680.30	35,375.60

It will be noticed that the above figures show not only a most satisfactory increase in the number of accounts opened, but also an increase in the average weekly saving, per account, from $1.47 to $1.70; and these weekly savings, together with large amounts deposited since the first of the year ($1,805) make an increase in the prospective total savings for the year, over those of last, of some 73.5 per cent.

Thrift Circulars for Employees

Two notices sent out to employees were to a large extent responsible for the splendid increases shown during the first month of the new year, and indicated in the foregoing figures. The first circular was sent out on Dec. 12, and read as follows:—

For Her National Well-being, England is Scrimping!

War conditions in England have made it imperative that everyone deny himself all but the barest necessities.

There, new clothes are now bad form; everybody travels third-class, or walks; people are urged—not to spare necessities, of course—but to simplify in their foods; to cut out luxuries, absolutely. They are even asked to economize on coal, gas and electricity.

Everywhere, their people are confronted by the question: Will you sacrifice your personal convenience for your country's need?

In Canada we have not—at least, not yet—felt the strain of war in this way. And, perhaps, we never shall be called upon to sacrifice as much as they, for Country; yet for our own future, individual need, we should be sacrificing, now!

Now, before the lean days that are coming, do come—this is the time to entrench ourselves. Now, while trade is good and work plentiful, should we not be fortifying our resources?

For Our Individual Well-being, We Need to Save!

Let us urge, for your own personal safety, that you save something against that time. Lay by as much as you can; but, however small, lay by something! And do it systematically, each week.

Our Savings Department affords you the utmost convenience in saving, and the highest rate of savings account interest—5 per cent.

Think it over seriously. The time is one for serious thought and effort.

The second notice was sent out on Dec. 19, as follows:—

An Anchor to Windward

How often it has happened, even in normal times, that a family could have been saved embarrassment, extra extra expense, or even distress, by having a few dollars to fall back upon—the saving "anchor to windward."

No one knows what conditions may be next month—next summer—next fall. But we know this: They won't be better than they are now, or than they have been this fall. And this fall, those who had some reserve in our savings department with which to do it, were glad to buy—and buy more cheaply than could be done elsewhere—coal and provisions for the hard winter months, or the warm clothing that safeguards one's health.

Did you do that? If you didn't, don't you wish you could have?

Are you willing to save now, in order to be able to do it next year?

Perhaps you have been patronizing the barber shop for shaves and bootblacking; with just a little effort you could do these things even better for yourself, and save that! Walking, whenever possible, will give you better health—and street car fares count up, you know! Save on your tobacco; if you must smoke, use a pipe; it is much cheaper, and very much less harmful than cigars or cigarettes. Amusements—dancing and the picture shows—will have twice the zest if you go to them only occasionally, or even rarely. Save that! Perhaps you have been in the habit of taking an occasional glass of liquor; save that, surely!

Doing this, you will have a little "happiness fund" laid by for that warm suit; for those clothes for the kiddies; for that Christmas treat. For someone it may mean the fund for the happy day, if it hasn't already come; for the expected arrival of the little stranger coming to your home; if you are one of our girl-employees, for the coveted bit of finery for that bottom drawer. For everyone it may mean the "anchor" in sickness or the rainy day.

From whatever saved, for whatever saved, it will bring peace to your mind to know you have it at your back.

Our savings department is at your service; it is for your convenience alone that it has always been there.

Won't you make use of it the coming year, and so, to whatever extent you can manage to do so, be ready for the unknown.

The McClary Manufacturing Company.

WAR SAVINGS CERTIFICATES

The new War Savings Certificates which have been created by the Government to encourage thrift and economy and to give everyone an opportunity to assist in financing our war expenditure, are now on sale at every bank and money order post office in Canada. The $25 certificate sells for $21.50, the $50 for $43, and the $100 for $86.

As an investment these certificates offer many attractive features, chief of which are the absolute security and the excellent interest return. For every $21.50 lent to the Government now, $25 will be returned at the end of three years.

There are two other features which are especially interesting to small investors. First, the certificates may be surrendered at any time, if the buyer should need his money; and second, each certificate is registered at Ottawa in the buyer's name and, if lost or stolen, is therefore valueless to anyone else.

But while they are excellent from an investment standpoint, the certificates should appeal strongly to Canadians because they offer to those who must serve at home a splendid opportunity for a most important patriotic service.

EDITORIAL COMMENT

READY for the Ontario Hardware Convention? Do your bit to make it a success by deciding to attend now.

* * *

IT WOULD be a good idea for the hardwaremen in other centres to follow the example of the London men.

* * *

A GOOD buyer must, first of all, be able to say NO. He must be able to say it distinctly; and be able to stick to it.

* * *

IF UNCLE SAM peels off his coat and gets into it, business may feel a momentary effect. Business will not suffer, however.

* * *

HARRY THAW is struggling back into the limelight. The only kind of thaw we want to hear about nowadays is an atmospheric one.

* * *

CONFISCATED whiskey was used in a sprinkling cart on the streets of Phoenix, Arizona. There was probably a scramble to get on the water wagon down there.

* * *

LEGISLATION to control living costs has been promised from many sources. It's coming—with all the headlong speed of an anaemic snail with ball and chain attached to its tail!

* * *

THE DEPARTMENT of Labor, in their latest bulletin, states that the cost of living in 1916 has increased 25 per cent. over the previous year. We knew it. But we thought it was more.

* * *

THERE is only one line of work in which the horse maintains his margin on the motor truck—the milk wagon. Engineers have not yet been able to evolve a motor truck capable of starting itself when the milkman tramples through the shrubs and berry bushes from one backyard to another and ejaculates, "Gee-up!"

THE MOTOR TRUCK

THE motor truck is performing miracles in the distribution of goods since a practical degree of mechanical perfection has been attained. Goods are hauled to and from the railways, coal is distributed, heavy materials are rapidly moved, goods are carried from stores to outlying points of wide radii in time that seems impossible judged from speed standards of the horse age. The motor truck is, driving the horse, as a commercial factor, into the discard.

This obvious fact is not cited here as proof that the retail hardwareman should at once send Dobbin to the bone factory and invest in a motor truck. It is introduced rather to add another link in the well-forged chain of reasons why the hardwareman should handle motor accessories. If eventually every business, in which carting figures, is going to operate motor trucks, it means a tremendous stimulus to the demand for supplies and accessories.

Get in line, Mr. Hardwareman!

THE DEBTS OF SOLDIERS

EVERY now and then HARDWARE AND METAL receives a letter noting the fact that some soldier has gone overseas and neglected to liquidate some at least of his debts before departure. We have been urged repeatedly to take some cognizance of this matter. No doubt there are some who are suffering from the fact that no action can be taken against a soldier's pay, but the instances where anything of the kind would be necessary are few and far between. You can't change a man into a saint by simply putting him in a suit of khaki, neither does that suit make him any the less of a saint. There are black sheep in every fold. There are soldiers who will take a dishonorable course as there are civilians, but the proportion is certainly no greater in one class than the other. Merchants generally are aware that they have no legal redress for debt against a soldier so it devolves on them to take what precautions they deem necessary to protect themselves against possible loss.

BUSINESS MEN GO TO SCHOOL

A RATHER remarkable, at least unusual, event is the decision of a party of Western business men numbering about 500 to attend an extension short course at the University of Minnesota from Feb. 5 to 10. The course will be mainly lecture work designed to increase the retailer's efficiency.

The course is in all certainty a valuable one but the outstanding fact in this connection is the willingness of so large a body of business men *to go to school.* That is what it amounts to. They recognize that the retail business is an intricate one, that success can be bought only at the price of concentration, study and self improvement; and they are taking this means of fitting themselves for better business.

The tendency among retailers has, in the past, been in the opposite direction. Too often they have

been inclined to sit back and let new ideas go by on the other side. They have looked askance at innovations. They have not always been open to advice, have laughed at associations and, even, affirmed that trade papers could be of no use to them. In no more striking way has the liberal tendency of the present been demonstrated, than in this wholesale determination of Western merchants to extend their knowledge.

It is highly gratifying to learn also that a similar course is to be instituted later in Winnipeg. May the day come when every province in Canada will provide the same facility for business betterment.

BEWARE OF THE FAKERS

THE Saskatchewan branch of the Retail Merchants' Association have issued a warning to members against taking up with any of a variety of schemes that are being offered to merchants and which, despite their plausibility, are all more or less of doubtful value. It is pointed out, in the first place that "certain sales and collection agencies are not all they should be." Then there are concerns offering apparently valuable gifts with the initial offer—articles which supposedly exceed in value the first order. Again there are solicitors for insurance and investment companies which are reputed to pay enormous dividends but which prove to be far from gilt-edged when investigated. Merchants are advised, in short, not to consider any propositions of this nature without first getting a report from the Provincial office of the Association.

A merchant cannot be too cautious. There are probably more fake schemes laid to entrap retailers than all the rest of humanity combined. Some of the ideas are diabolically ingenious; nearly all are, at the least, plausible. To escape them all a merchant has to possess some of the qualities of Sherlock Holmes. He must be impervious to the wiles of plausible salesmen.

It is sound advice not to take up with schemes about which any trace of doubt or suspicion hangs. The man who resolutely turns down everything outside of the lines of regular business may miss a good thing once in a while but he will be money ahead in the long run.

SEIZE THE PLOWHANDLES

ADDRESSING the Canadian Credit Men at Fort Garry recently, H. P. Grundy made the suggestion that the business men of the country should organize themselves into a harvest brigade and even go to the length of seizing the plowhandles themselves should necessity arise. "There must be many thousands of retired farmers living in Winnipeg," he added, "and others living throughout the west who would be willing to throw off their coats again and go into the fields to help put in the crop this spring. One way we can help to win the war is to help the farmers of Western Canada to put in the biggest crop that Western Canada has ever harvested. I contend, however, that there is no use putting in a big crop if it cannot be harvested, but I believe that the business men can be mobilized to take care of the harvesting of it; the class of help that they could give might not be ideal, but it certainly would be sufficient."

There is good common sense in this; and sound patriotism. The continuance of prosperity in Canada will depend to no small degree on the success of the crops. Increased Production is one of the best national slogans Canada could adopt. If only for selfish considerations, business men should see this and be prepared to do their level best *personally* to forward the Cause of Increased Crops. There are plenty of men whose work does not make exacting demands on their time or energies. Let them put in some of their leisure at a lathe; or, better still, if circumstances permit it, let them seize the plowhandles!

TRADE PREFERENCES AFTER THE WAR

INTERNATIONAL trade relations following the war will show interesting new alignments. It seems assured that preferential arrangements will be concluded between all parts of the Empire. Troops from every corner of our far-flung Empire have fought together and mingled their blood on the battlefields of Europe. Imperial policies and sympathies have been fused as never before. It is certain that the close relations established during these times of stress will be maintained during the peace days to follow in the form of closer trade co-operation.

There is every reason to suppose also that preferential arrangements on some scale will be put into effect between the allied countries. It will at the very least take the form of sympathetic relations. The people of Britain will much prefer to do business with French, Russian and Italian firms than with Germans. Even if no actual preferences are put into effect, there will be bonds, stronger than customs regulations.

The efforts that are being made to actually set in motion governmental machinery toward this end, testify to the sincerity and determination of the allied people. The conference at Paris, farcical though it was in some aspects, was a striking evidence of purpose. It was, from the standpoint of results a failure but this was due to the fact that the right men were not sent to it. The bright business brains of all the allied countries should have been gathered together for a conference of that nature. Instead, most of those who attended were professional politicians or industrial *dilettantes*. The fact that such a conference was held, however, points to a determination to handle trade matters after the war along preferential lines.

Business men will unanimously approve and support all measures looking toward preparedness for Peace.

Using Motor Trucks as a Lever

The Modern Tendency to Supplant Horse Power Delivery by Gas Power Gives the Hardwareman an Unexampled Opportunity — Some Facts and Figures With Reference to the Growth of the Motor Truck Industry

IN figuring the possibilities of big business for the retail hardwareman in handling automobile accessories, it has been customary to speak of the increase in passenger cars. A very important factor has, to some extent, at least, been overlooked — the motor truck.

It is a very important consideration, indeed, that the number of motor trucks has increased to a remarkable degree. More important still, however, the usefulness of the motor truck has been so increased, it has been perfected to such a degree that the business world can safely be said to be on the verge of a motor truck age. It is not visionary to assert that the day is not far off when all moving of goods will be managed by power-propelled trucks. The day of the horse is passing fast.

This is a fact that the hardwareman must grasp. On every hand he finds business houses and factories changing over to the modern way. The number of motor trucks in use now, great though it may be, is but a meagre forerunner of what will come.

It should also be taken into account that motor trucks are owned by business men and it is, therefore, doubly important that the retail hardware dealer should be in a position to command their trade in accessories. It does not take much figuring to see that a connection thus established with a factory, for instance, would be highly valuable as a lever for securing business in other lines paint, tools, belting, just to mention a few of the most important.

Some Striking Figures

Can the ultimate dominance of the motor truck be longer doubted when we know that a 5-ton gasoline motor truck has carried 578 tons of coal in 7 hours, making 114 trips over a distance of one-eighth of a mile? Efficiency, economy, speed, and convenience have accelerated the motor truck during 1916, 125 per cent. over the biggest record of the previous years; or, taking the 1915 production of motor trucks (100,000), the 1916 production (including the conversion of passenger motor cars through "make-a-truck" attachments into freighting service) was approximately 150,000 business machines, making by January, 1917, close to 350,000 commercial cars in the United States.

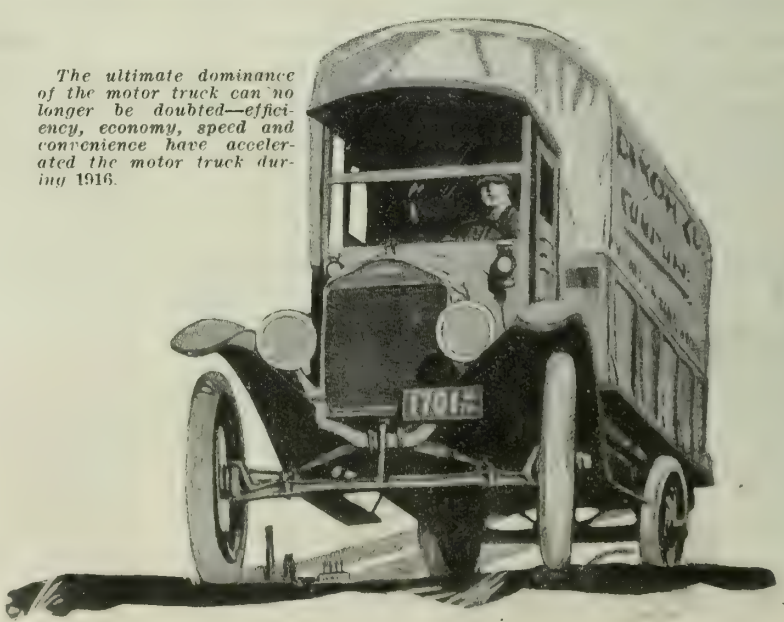
Consider These Uses

Can one, considering the newest fields of application of the commercial car, conceive of a more ingenious utilization than that to which the cattle raisers of far-off Argentina are putting it in transporting in refrigerated trucks meats to steamers two hundred miles distant?

Instead of driving their herds over the hot, dusty roads with consequent loss by death, lameness, and loss of weight on arriving at the shipping point, they dress their cattle at home when they are in the best of condition. After packing the meat, it is frozen in refrigerators and loaded on motor trucks, the temperature being maintained below the freezing point by liquids circulated by pumps and driven by the same engine that propels the truck. Nor can one imagine a solution to the high-cost-of-living problem better than that of the itinerant evangelist who, taking a used motor-truck van, made it over into a combination moving home and church and saved souls from his pulpit on the top while his frugal wife saved money by using the exhaust gases from the engine in an ingenious stove to cook the pastoral food. The motor truck has actually become an amphibious animal. The water-land motor truck, a creation of a Canadian officer, Captain Oliver Light, is truly a phenomenally versatile machine, showing the stimulus of the Great War to inventive genius. This combination land and aquatic machine looks very much like the conventional motor truck, but has the mechanism completely housed in a water-tight compartment, which, however, may be opened for ventilation of the engine when the machine is operated on land. The front wheels are disk-shaped, acting as rudders to steer the vehicle in water. By means of pontoon attachments, which when the machine is entering the water are inflated with air, sufficient buoyancy is provided to cause the machine to float. The rotation of the wheels propels the machine through the water in somewhat analogous fashion to the hydroaeroplane. This versatile motor-truck amphibian is largely intended for military use, crossing, for instance, streams not bridged where delays would put a scouting expedition into the hands of the enemy.

The car is propelled backward by a 24-inch propeller that is attached by a shaft from the front of the engine through the underside of the radiator, which is placed high. The live-load capacity is 4,000 pounds, the dead weight 5,000 pounds, and the power plant is an eight cylinder engine.

In a demonstration the car loaded with eighteen soldiers has been driven at the rate of 25 miles per hour. In the Detroit River it was manoeuvred around in midstream, then steered to Belle Isle, where a landing was made, then again into the river and down to Sandwich on the Canadian side and returned to Walkerville, making 9 miles per hour against the current and 12 miles with it. Adopted by the engineering corps of the army for pontoon purposes, it can carry long planking and equipment so that a bridge can be constructed in a few minutes.



The ultimate dominance of the motor truck can no longer be doubted—efficiency, economy, speed and convenience have accelerated the motor truck during 1916.

Another strong point is that the bottom of the body can be opened and the amphibian used as a dump wagon in construction work.

Last Year's Progress

The existing fields of motor application were greatly broadened in 1916. The single-motor-truck used under growing pressure of the horse cost of living has become the two- or three-unit user. The two- or three-unit user has moved up into the six- or ten-unit-user class. As for the corporations which started eight years back with an experimental fleet of one, it is no uncommon thing to find the great department store, the national contractor, the giant oil industry, now with motor-truck fleets numbering 100 to 700 machines—individual highway transportation systems comparable in business management, regularity of schedules, routeing, etc., to the trunk-line rail carriers. Big corporations, as in all big ideas of modern business, have been the biggest promulgators of the business power of the motor truck. For Little Business knows that Big Business never uses a new tool by the wholesale unless the new tool is the essence of efficiency.

A catalogue of the business fields which the motor truck has invaded is practically the classified trades list of a telephone directory in a metropolitan city—space forbids. Only an approximation can be given because a new trade is added too frequently, but it can be conservatively stated that some 325 distinct lines of business have proved that the steel steed beats the sinewed steed in the race of modern business.

The inroads of the "gas horse" in the light-delivery field mark one of the great advances of the past year. The butcher, the baker, the tailor, and the candlestick maker—the one vehicle and the two-vehicle businesses—are rapidly bidding adieu to their sentimental attachment to the "corn motor," and installing the popular-priced motor wagon which in small capacity now costs little more than the price of a fair horse and wagon, and will do the work of two with a trifle more expense than one. In 1916 one builder alone of 1,000-pound motor wagons produced 30,000, selling, complete with body, under $700, while the low-priced passenger-car manufacturers combined put in commercial service over 50,000 of their chassis with freight-handling bodies. Even with gas at 30 cents per gallon, which in some sections of the country was the prevailing price, the small tradesmen proved that they could put more goods into the hands of customers than the "grass motor" with "fuel" at a cent a pound. The influence of chain-store competition is becoming a potent factor in the small tradesman's determination to fight the enemy with his own weapons, and one of the 75-calibre weapons of the chain-store druggist, grocer, butcher, and tailor having been the motor wagon, the independent is finding that in putting his trust in the gas motor he is holding his own against the trust.

The New Motor Truck

The motor truck of 1917 has actually discarded the habiliments of homeliness for the earmarks of handsomeness. Mighty indeed has been the educational force of the passenger car in setting the fashion for its bigger brother. A few years back Mr. Business Man would accept a motor truck of such utter ugliness that if its lines had been hewn out with a broadaxe just as much symmetry, grace and contour could have been obtained. To-day the business man is fussy over the appearance of the motor truck — often fussier than he was in the old days of the passenger car when the buyer took what the builder gave him. Put your straight-line yacht bodies on the motor truck of 1917 and the effect, relatively speaking, approaches the accepted fashions in passenger-car lines. The business man no longer has to apologize for the appearance of his business motor vehicle any more than he does for the family society car.

But smoothing off the angles which smote the esthetic sensibilities so sharply, thereby making the motor truck at least a near-beauty machine, is only one of the external refinements of 1917. The internal refinements which, after all, the sensible buyer looks for, are deep and wide. Taking as their text, "If we err, let us err on the side of simplicity rather than complexity," Motor-truck engineers have raised simplicity to the nth power in making the motor truck of 1917 almost fulfill that bold manufacturer's slogan of "the Truck That Thinks." Indeed, there has been reason enough to simplify in the mounting cost of even the commonest steels—and common steels cannot be used in motor trucks to-day. Get-at-ableness plus has been put in every part from the front springs to the tail lamps. Builders who put in two speed gear boxes have gone to three, and the three-speed truck builder has gone to four, answering the demand of the public for flexibility, the growing congestion of traffic in cities demanding the truck to crawl for hours at a time behind the time-wasting team. The truck of 1917 model with exposed running gear will be as scarce as the dodo in Mauritius; 99 per cent. of all 1917 trucks have shaft-driven live axles and everything that moves working smoothly and silently in oil baths. The self-starter is coming into its own as a standard part of the equipment of the light delivery truck; eventually it will also be a standard part of the heavier units. With springing superior to even fine limousines of a few years back and absence of the jerks of the old chain-driven truck, the modern truck driver is better protected by some builders in his enclosed cab than the driver of the Twentieth Century Limited. Motor trucks must work on a 20-hour-per-day schedule, or better, at times—the same truck with only two shifts of drivers—and the driver's strain and responsibility demand his protection from the elements and from the irresponsible element of the highway-using public to a greater degree than ever before.

Montreal Motor Show

And Some of the Hardware Firms Making Accessory Displays There This Season.

INTEREST of the hardware trade in Montreal was directed during the week of January 20 to 27, to the National Motor Show of Eastern Canada, held in the Almy Building, Montreal. Many Montreal firms conducting automobile accessory departments, and firms specializing altogether in supplies for the automobile trade, occupied floor space in the building, and the show was attended by numerous hardware dealers from city and district points, who have an up-to-date interest in matters pertaining to the accessory business.

A considerable space was taken and well used by A. E. Bregent, of St. Catherine street east, this exhibit featuring motor cycles and a motor-wheel, also accessories for the motorcycle trade. The Canadian Fairbanks-Morse Co., of St. Antoine street, showed a splendid accessory display, embracing all their lines of batteries, spark plugs, emergency equipment, and engine appliances, etc.

Amongst many notable displays of tires, that of the Canadian Consolidated Rubber Co. was noted, the nobby tread, chain, plain and Dominion tread variations being fully represented, and fully explained by representatives.

An excellent accessory display by the Dominion Chain Co., of Niagara Falls, was seen to attract considerable atten-

tion, and the Champion Spark Plug Co., of Toledo, Ohio, set forth their latest improved ideas, as well as their devices of earlier invention in manner to keep observers' attention closely engaged.

Hyslop Bros., 9 Park avenue, Montreal, had a most comprehensive display of accessories. Ford specialties were shown in remarkable variety. Exclusively constructed Chevrolet lines of accessories were also specially displayed, while the tires particularly recommended by this firm were given full prominence in their show space.

Lariviere, Inc., of 909 St. Lawrence Boulevard, Montreal, showing truck equipment, and special adaptations from touring car to truck, had a good exhibit which drew the attention of interested crowds.

In accessories, John Millen & Sons, 325 St. James street, Montreal, made an extensive showing with remarkable variety in their exhibits, and all the firm's well-known lines well displayed.

Represented by W. T. Evans, of 1684 St. Urbain street, Montreal, the Sphinx spark plugs presented a display which was no Sphinx-puzzle.

Last, but not least in the list of displays was the full car-space occupied by the James Walker Hardware Co., 252 St. James street. This firm, besides showing a splendidly varied and comprehensive display of all useful accessories, distributed a new road map of the district, which formed an appreciated souvenir and one likely to be seen in the hands of automobilists many a time and often this summer in the eastern districts.

A Word of Advice to Buyers

New Conditions are Being Established in the Retail Business—What Constitutes a Successful Buyer—Meeting the Scientific Salesman.

IN the course of an article in a recent issue of Saturday Evening Post, some very pertinent remarks were made on the matter of buying. They are quoted herewith because they point a moral for the retail buyer—the need for care and discrimination in buying:—

A shift in buying and selling practices seems to be taking place slowly. Understand, I do not mean that there has been a complete change—a revolution or anything like that. But there is a difference. There is one class of buyers, however, who still expect to be carried about and fussed over with considerable eclat; and these are the buyers from the smaller towns, who are usually also the owners of the establishments for which they buy. They are a little behind the professional buyers from the big cities in finding out the advantage of entertaining the other fellow instead of letting the other fellow entertain them.

There is another vast advantage the professional buyer has over the small town merchant who does his own buying: He is so much more concerned with various other details of his business that he gives little thought to whether or not he shall buy a certain lot of stuff until a smart salesman drops in on him.

Then what chance has he? He must match his wits against the salesman, who is a specialist at talking people into buying things, whether needed or not. The salesman has been practising on his line of argument for weeks. There is scarcely a loophole of possible escape that he hasn't thought about scores of times in advance. The merchant, on the other hand, has to combat these selling arguments with such a line of defence as he can rig up on the spur of the moment. And this is not so easy as one might think. The chances are that the merchant will fall a victim to the salesman's cleverly worked-out conversation—and will overbuy.

I asked an old, experienced salesman once why so many retail enterprises sooner or later fail. Without a second of hesitation, he declared:

"It's because they do not buy with sufficient care."

He went on to say that the smaller the town and the smaller the business, the more likely the storekeeper is to overbuy. Go into almost any small country store and you will find a large percentage of goods which are practically worthless—stuff that the proprietor couldn't sell in a hundred years, except at a loss. If you were to investigate, the chances are that you would find this percentage of useless stock growing smaller and smaller as you looked into bigger establishments, until in the case of a great department store there is practically no dead stuff on the shelves at all.

The trouble is that most of the business education has been along the line of selling. There are schools of salesmanship and talks on salesmanship and magazine articles about salesmanship, but right offhand I cannot think of ever having read a treatise on how to resist expert salesmanship.

A high-grade salesman was endeavoring one day to obtain an order from the head of one of the leading department stores in Pittsburg. The two were warm personal friends, yet the salesman could not get his order. He finally gave up, somewhat in disgust, and the two got to talking of other matters.

"What," asked the salesman, "do you regard as the chief secret of your success?"

"Undoubtedly," replied Mr. Boggs, "it is being able to resist a man like you. Here we are, old friends; you're a gifted salesman and your goods are always the very best of their kind. It is always a strong temptation to buy from you. But I don't need anything from you at the present time. So I must say 'No.' Except for my ability to say 'No,' I should have been on the rocks long ago."

A big improvement has crept into the selling end of most retail businesses in the past few years. Men who sell goods from behind the counter are vastly more clever salesmen than one used to find. There are a good many obscure-looking men working behind counters who are so efficient in their quiet way that they can earn four thousand or five thousand dollars a year. They do it by selling rapidly.

STILL SOME HOPE FOR STEVENS-ASHURST BILL.

From *Sporting Goods Dealer*

Some day the persistency of the American Fair Trade League is going to win, and the long deluded, patient and unsuspecting public will see the Stephens-Ashurst bill become a law. This bill bobs up at every Congress, and is regularly referred to a committee and promptly pigeon-holed, where it remains until it is too late for action. But you know about the constant dropping of the water wearing away granite—that is what is going to happen to Congress. Some day Congress is going to pass this Stephens-Ashurst bill. Of course, Congress doesn't believe it is, but it will—sooner or later.

There doesn't seem to be any very good reason for not passing such a bill. About the only way one can account for the failure of the bill to pass before this time is the general inclination of the office holders to look with too much favor upon the "big" men of the retail trade as their guiding star. If the men who are opposed to the bill will go back home for their information, instead of listening to some department stores, they may find cause for changing their minds.

Naturally the department stores and the mail order houses of the country oppose this measure. And let it be said right now that whatever these institutions oppose is good legislation for the small dealer and nine times out of ten it is good legislation for the consumers. If the manufacturer were permitted to name the retail price of his product the mail order houses and many department stores would be robbed of their favorite implement for fooling the people. One of two things must eventually happen— the manufacturer must have the legal right to name the retail price of his product and enforce it, or national advertising and trade-marked goods must eventually cease to exist. In time the American magazines depending entirely upon national advertising, must see the light.

London Retailers Hold Big Banquet

First Annual Banquet a Huge Success—Address by Representatives of Various Trades —Splendid Toast List and Program.

ONE hundred hardware merchants, salesmen and guests attended the first annual banquet of the "Retail Hardware Merchants' Association" of London, Ont., held on Thursday night of last week. The gathering was probably one of the largest ever held by the retail hardware merchants of any one city in Canada. Slightly over a year ago the retail hardware merchants of London decided that they should know each other better. Get-together meetings were held and the result was the formation of the Retail Hardware Merchants' Association of London. One of the chief objects of the association was the promotion of a better feeling among the merchants of the city, and among their sales staff. It was felt that social gatherings could be held frequently and ideas exchanged between employers and employees of the city.

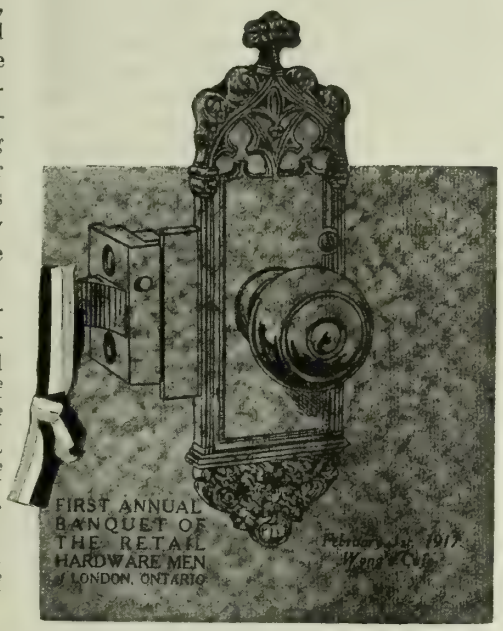
The first event was a huge picnic at Port Stanley last summer. The merchants arranged for a band, special train etc., and journeyed to the Lakeside resort. A full account of the picnic appeared in HARDWARE AND METAL at that time.

The first annual banquet was no less a success than the big picnic. A delightful program of speeches, music and recitations was presented. The menu was excellent, and the menu card was very appropriate for the occasion, showing the outline of a lock set as reproduced on this page.

Thos. A. Jones of Cowan's Hardware, President of the Association, presided as toastmaster, and in introducing a lengthy and brilliant toast list, explained the object of the banquet as a means of bringing together the hardware men of London for the mutual benefit of each and all, and the furthering of efficient service to their fellow-citizens.

Addresses were given by John Stevely, replying to the toast to "The British Empire;" W. R. Yendall "Canada," Mayor H. A. Stevenson and ex-Ald. C. W. Summers, "The City of London," Lieut-Col. W. M. Gartshore and J. J. Foote, "Made-in-London Goods;" C. A. Whitwam and S. Rae, "Wholesale Interests;" Adam Taylor, "Manufacturers' Interests;" Messrs. C. W. McGuire. George E. Perry and N. Curtis, "Oil Interests;" Geo. D. Davis, "The Press."

The toast to "The British Emprie" was responded to by John Stevely. The glory of Great Britain would never die,



he declared, and when this great war was over the Empire would emerge stronger, better, more united, and more wonderful than ever before. On the shoulders of the Empire had fallen a great portion of the burden of the struggle, and it was borne as only Britons could bear it.

W. R. Yendall, Canadian Richards Wilcox Co., said he appreciated greatly the international courtesy in asking him, a native of the United States, to reply to the toast to "Canada." His parents were English and he was proud of his British ancestry, especially in these days when the Union Jack was holding the civilization of the world together. He was hopeful that ere long he would also have reason to be proud of his American birth and that Old Glory would soon be flying alongside of the Union Jack.

"Canada is emerging from the provincialism and narrowness of the past. Canada has found herself, and from being a small nation, has come to the consciousness of her place in world affairs. Germany supposed that she was the only efficient nation, but is now discovering that efficiency does not depend on the blind obedience to a military autocracy, but on the energy and zeal of the people Canadians showed them at the battle of Ypres, when they stopped the rush to Calais, what efficiency really was. We have shown them in manufacturing, and we will continue to show them. We in Canada can organize as well as anybody, we can manufacture as well as anybody, and we can fight as well as anybody, when we want to. Canada will never desert the old land, but will remain true to her ideals of liberty and righteousness."

The toast to the City of London was responded to by Mayor Stevenson and ex-Ald. C. W. Summers, the latter a hardware merchant.

Mayor Stevenson spoke of the importance of the city from an industrial standpoint. He also referred to the excellence of the retail establishments of the city. He felt sure that the advertising campaign which the city intended to carry on throughout Western Ontario would bring excellent results to the retail merchants of the city.

Mr. Summers, expressed surprise at the size of the large hardware family of London. It was only by getting together at a gathering of this kind, that the merchants realized the size and scope of the business in which they are engaged. Mr. Summers referred to London as a splendid city in which to live and do business. All should be proud, he declared, to live in such a city as London one of the finest on the North American continent.

Lieut. J. J. Foote spoke on "Made in London" goods. Civic patriotism should be the motto of every Londoner. The people could buy in London to as good advantage as anywhere in Canada. London manufacturers stood very high, and it would be a great incentive to manufacturers if Londoners would purchase London-made goods wherever possible.

Lieut.-Col. Gartshore made a plea for greater patronage for Canadian-made goods, pointing out that one might completely clothe himself in goods made in London and build his home of brick, lumber and accessories all manufactured in the city. He also appealed strongly for generous support for the patriotic fund, that the families of London men now fighting for their country may be adequately cared for.

Col. Gartshore and Mr. Foote caused considerable merriment by two or three stories which they related.

In responding to the toast, "Wholesale Interests," C. A. Whitwam, of the Hobbs Hardware Co., referred to the wholesaler as the link between the manufacturer and retailer—the link that bears the brunt of the strain from both sides. He referred to the difficulties which confront the wholesaler at the present time. He pointed out that

the wholesalers were endeavoring to give the best possible service to the retailers and thus helping the latter to properly take care of his customers.

S. Rae, of the D. H. Howden Co., Ltd., gave an interesting talk on prices, and stated that although there were rumors of lower prices, the retailers could rest assured that the end of the high prices is not yet in sight, and that prices on many lines would go still higher. Taking iron pipes as one line, he referred to the present high cost of skelp, and said that although pipe is now high priced, the price of the manufactured product is low when compared with present costs of raw materials. Mr. Rae also referred to a number of other lines on which higher prices were inevitable.

Adam Taylor, of the Taylor, Forbes Co., Guelph, responded to the toast to the "Manufacturers." Mr. Taylor told in detail some of the difficulties confronting manufacturers to-day, both as regards the securing of raw materials and labor. Costs of production have increased tremendously and in many instances manufacturers have not advanced their prices to levels justified by present costs of material and labor. Mr. Taylor referred to the presence of the manufacturers, wholesalers and retailers, and stated that all were interdependent. They were working toward one common end, and the good feeling and loyalty that prevailed at the banquet was, he declared, an evidence of the good faith each had in each other.

Referring briefly to the jobber, Mr. Taylor stated that the jobber would or could not be eliminated as some people have suggested. The jobber is a necessity, and costs of distribution on most lines were lessened by passing through the jobber's hands. He cited the expense which would be incurred if the retailer wanting half a dozen small lots of goods had to secure them from six different sources instead of through the jobber. Mr. Taylor made a plea for support of "Canadian-made" goods, when, of course, all conditions are equal. He referred to the fact that Canadian manufacturers have made wonderful progress in manufacturing during recent years. On many lines they are the equals, if not the superiors, of many foreign manufacturers of hardware goods.

C. W. McGuire, Geo. E. Perry and N. Curtis responded to the toast to the "Oil Interests." It is significant that three names were attached to this toast. Those responsible for the programme asserted that by attaching so many names to this toast, they did not wish to infer that the "Oil Interetss" needed protection. However, those present took advantage of the occasion, and made many humorous references to oil trusts, robbers, wealth, high price of gasoline, etc. The oil men handled their subjects in a splendid manner. One speaker pointed out that oil producers are faced with a serious problem in the demand for gasoline increasing so rapidly, without a corresponding increase in the demand for coal oil.

G. D. Davis, editor HARDWARE AND METAL, responded to the toast to the press. He referred to the large part the press is playing in world events of to-day. He explained briefly the functions of the daily newspapers and trade papers, both of which are doing good work and are necessities in their respective fields.

Geo. E. Stanley, hardware merchant, of Lucan, Ont., one of the guests, was invited to address the gathering. Mr. Stanley stated that he had been in business for upwards of thirty years. He had always been more or less opposed to hardware associations, conventions, etc., but after having been present at this splendid banquet, and observing the splendid feeling of harmony which prevailed among the retailers, he arrived at the conclusion that he had missed a whole lot. Mr. Stanley had often read in the newspapers the advertisements of London hardwaremen, and thought they were a bunch of cutthroats. All his fears had been dispelled at the banquet. Mr. Stanley gave an excellent address on our duty to the Empire in this trying time and concluded with a recitation which was heartily applauded.

An abundance of good music was provided by the Forest City Male Quartette, who, during the evening, favored with many popular and favorite song offerings. Geo. A. Steer, a member of the London hardware fraternity, made a hit with songs and recitations. One solo, "The King of the Sea," was rendered with such excellent effect that it brought forth tremendous rounds of applause.

The Guests

The guests at the banquet were: Mayor Stevenson, Col. Gartshore, J. J. Foote, McClary Mfg. Co., London; W. C. Allen, Western Wire & Nail Works; C. W. McGuire, Imperial Oil Co.; Adam Taylor, Taylor, Forbes Co.; Jno. Stevely, Columbia Handle & Lumber Co.; W. W. Nobbs, Geo. C. Gunn, McClary Mfg. Co.; Geo. D. Davis, editor HARDWARE AND METAL; C. A. Whitwam, Hobbs Hardware Co.; S. Rae, D. H. Howden & Co.; W. B. Gillespie, Brandram Henderson, Ltd.; W. R. Yendall, Canadian Richards Wilcox Co.; Fred Crooks, Ohio Varnish Co.; H. Fowler, E. Carty, London Advertiser; J. A. Rose, Hobbs Hard-

A photograph of the Hardwaremen's Banquet held at London, Ont.

ware Co.; W. S. Radforth, Canadian H. W. Johns-Manville Co.; Messrs. R. F. Fox, G. G. Forsythe; W. J. McLeod, Campbell, Curtis, Kendall, Perry, Geo. and Roy Stanley, Lucan, Ont.; M. McKenzie, Clandeboye, Ont.; Thomas Shaddock and Thos. Shaddock, Jr., Ilderton.

London Hardwaremen

London Hardware merchants and salesmen present were: T. H. Purdom, Jr., Wm. Odell, J. G. Steele, C. W. Summers, C. T. Summers, A. C. Mitchell, Harry Able, J. Cox, Thos. A. Jones, A. H. Purdon, Wm. Kilpatrick, Rob. Kilpatrick, Chas. Craig, A. Westman, A. E. Westman, A. D. Westman, Jack Kingsborough, Mark Brown, Fred Foster, D. J. Cowan, R. G. Edgecombe, J. Gainier, H. Crummer, C. McKerlie, W. Haid, H. Gatecliffe, B. Scott, B. Jones, L. Kingsborough, Jim Cowan, H. Hawkey, A. Wier, E. Brady, Geo. Steer, Fray Hammett, Chas. Black, Wm. Heatherby, W. W. Chown, H. Nichol, A. Portsmouth, F. E. Jones, Geo. Brett, Sam Essery, H. Walden, W. J. Grey, Messrs, Agnew, McDonald, Portsmouth, Ryckman, Hassie, Mitchell.

FENCING THE HIGHWAYS

In a journey to-day across the Dominion, one is impressed by the miles of farm fencing, particularly in the far West. It seems but a day when the vast stretches of our Western territories from Manitoba to the Coast were one wide field. To-day, for hundreds of miles, in any direction you travel, railroad and other property is substantially fenced; it shows to what extent the vast areas have come under cultivation either for crops or stock. No better evidence of substantial growth could be had.

CUTLERY PLANT IN CANADA

For some months there have been rumors that a cutlery plant was shortly to start operations in Canada, but no definite announcement has been made. It is known that an American firm is desirous of selling its cutlery manufacturing plant to any Canadians who may be interested in starting a plant in Canada.

STORES ARE DESTROYED

Quebec. — Fire entirely destroyed three buildings in the commercial section of St. Roch's Ward. The establishments gutted are the piano sales rooms and stores of Cyrille Robitaille, registered, the sales rooms and stores of the furniture department of the P. T. Legare, Limited, and the hardware store of Giguere and Company. All three stores were on St. Joseph street.

LETTERS TO THE EDITOR

Winnipeg, Man., Jan. 17th, 1917.

To the Editor,

HARDWARE AND METAL, *Toronto.*

Dear Sir,—Would you be good enough to give us your experience, your opinion, or open your columns for a discussion of the necessity or not of rendering full and complete itemized invoices for each and every account at the end of each and every month. I take it for granted that the great majority of retail stores use the counter book, where each book and page are consecutively numbered, and on which a complete itemized record is made of every purchase, and which of necessity goes to the customer.

Now the point is why should so much office time be necessary in a duplication of work, when all that should be necessary is a statement of date (book and page number in case reference is necessary) and amount with the total, which should agree with slips already delivered with goods. Has this style not always been the recognized and only system with the grocer, butcher etc.? and while it may be that the grocer has many more items to ennumerate, still if the principle is successful with him why should it not be with the hardware merchant?

Thanking you in anticipation, we remain,

Respectfully yours,
C. C. FALCONER & CO.,
Per C. C. Falconer.

This is a question that has been taken up with a good many merchants by HARDWARE AND METAL at different times. There are arguments from the point of view of the merchants and that of the customer, but, as usual, the customer wins.

It is perfectly true that Mr. Falconer complains that the method of rendering a full and complete itemized invoice for each and every account at the end of each and every month involves a considerable amount of labor, and is in a sense a duplication inasmuch as the items on each sales slip were made out at the time of the original purchase by the clerk and a copy given to the customer.

We would like to make one point clear and that is that, while a good many stores continue the Day Book system of entering sales in a book, and then copying them out again into a ledger, the way that is coming into favor in many stores of late is to use the duplicate of the sales slip and copy the item into the ledger, using a carbon so that when the account is sent to the customer the store will retain a copy for itself. This is called the "loose leaf ledger" system.

This work of copying in the items should be done by the bookkeeper every morning, so that at the end of the day all the items of the sales on credit of the previous day should have been entered up in the monthly account sheet of each customer. This means that at the end of the month nothing further need be done except enter up the last day's sales and total the bill.

As Mr. Falconer suggests, many merchants are content to enter up, opposite January 5, for instance, "To goods, $7.62;" January 10, "To goods, $8.43;" January 18, "To goods, $4.65," and so on, and marking opposite each one of these the number or numbers to show the reference to the original sales slip, so that this could be referred to, to get particulars of any one day's sales. The ordinary purchaser, however, frequently, does not keep his individual sales slip. The business man does, but the private individual does not as a rule. This is true in the case of grocers as well as hardware men, and true also in the case of butcher bills. The account when it comes in, if each item is marked "To goods," or "To mdse.," is very indefinite, and if the customer has not kept his separate slip for each day, he has no idea as to whether it is correct or not. He usually looks to the merchant to tell him what separate items were contained under the general heading "Mdse." and the bill that contains these items is much more satisfactory to the customer.

After all, the practice generally recommended would be to suit the wishes and convenience of the customer and if you render an account which he can O.K. at once, it is far more satisfactory for him and therefore for the merchant. Where a monthly bill has been sent in, in detail, and not paid, we would not, of course, advise rendering it in detail again, the next month. It should be sufficient to refer to it as "To account rendered, $76.85."—Ed.

Wholesale Business Changes Hands

Word has been received that Martin, Finlayson and Mather, hardware wholesalers of Vancouver, B.C., have sold their wholesale business to Wood, Wallance and Leggatt.

It is impossible to get details of the transaction at time of going to press but it is understood that the business will be conducted under the name of Wood, Vallance and Leggatt in future.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

Hardware prices continue to advance, and the trade generally looks for continued high prices for another year. The demand for iron and steel is as insistent as ever. Ingot metals have scored big advances in price during the past two weeks. Antimony, for instance, has doubled in price, while lead, tin and copper have gone to higher levels. Freight embargoes placed by the railways on shipments east of Toronto have seriously affected the trade, both wholesalers and retailers being greatly inconvenienced. Business continues good. One large hardware jobber reports an increase of 25% in January business over the corresponding month of last year. All paint materials are firm in price, and linseed oil has advanced 15c per gallon during the week. Among the many lines on which advances in price have occurred during the week are: washing machines, jack chain, auger and car bits, padlocks, Stillson wrenches, steel game traps, coal oil, corn brooms, bolts and nuts. Hardware manufacturers are badly handicapped owing to the scarcity of raw materials and efficient labor.

MONTREAL MARKETS

MONTREAL, Feb. 7.—The upward trend in prices in the hardware lines of business continues merrily. This week sees many more changes, and some very important ones. Notable are the new discounts on bolts and nuts, which means a 10 p.c. advance at least. Stillson's wrenches are up considerably also under a new price list and new discount also. There are several further changes in shelf goods, including new prices on a number of lines of steel traps. Iron and steel markets keep very firm, adding to the rising tendency of goods manufactured therefrom, and the market for the metals is very firm in most lines, especially tin, antimony, and the solders made from these metals. More and more is it imperative for retailers in hardware to attend closely to market movements now that the United States shows warlike deportment in the world conflict, as this will probably mean disturbed metal manufactures in the sources of supply for many Canadian commodities.

Shelf Goods Show Many New Changes

SHELF GOODS.—There are still continued advancing tendencies in all manner of shelf goods, and the hardware merchant has every reason to watch prices with care, and keep close tab on changes which are occurring, and bound to go on occurring apparently from week to week in the upward direction. From conversations with many men in close touch with conditions throughout Canada and the U. S. A., one leading hardware wholesaler of Montreal has gained the impression that the end is still distant in the upward movement of prices in shelf goods, and that supplies are very, very scanty.

Jack Chain Up This Week

Steel jack chain is now priced net list, and brass jack chain is plus 20 per cent., again an upward movement.

Auger Bits and Car Bits Up

Irwin's auger bits are now 33 1/3 per cent. off list, and Irwin's car bits 37½ off list, an advance of at least 10 per cent. Snell car bits are priced at 30 off list now.

Padlocks Net List

The latest advance in padlocks of all kinds makes them net list in practically every case. There has been a steady upward trend in these.

Steel Squares Uncertain

It looks as if there might be an advance before very long in steel squares. There are hints given of this possibility.

Screws Might Advance

Bolts and nuts have advanced, and there is a saying in the hardware trade that when these go up, wood screws are likely to follow suit. The market is worth watching in connection with screws.

Stillson's Wrenches Up

Last week in this column a prediction was made definitely that Stillson's wrenches were climbing in price. Here are the new prices which have just been issued, also the new discount by one large firm in Montreal; other firms not perhaps bound to the same discount:—Stillson's wrenches, new price list—6-in., $2; 8-in., $2.25; 10-in., $2.50; 14-in., $3.50; 18-in., $5; 24-in., $7.25; 36-in., $13.50; 48-in., $20; discount 60 per cent. off list.

Stillson's wrench jaws, frames and nuts list prices:

	Jaws.	Frames.	Nuts.

Discount 60% off.

New Prices on Various Steel Traps

New prices are issued on various lines of steel traps as follows (per doz.):

Number	Victor	Uneida	Newhouse	H&N
0	$1.40	$1.80	$2.90	.....
1	1.63	2.10	3.40	$2.50
1½	2.45	3.20	5.15	3.75
2	2.45	4.65	7.60	5.25
3	4.55	6.20	10.00	7.00
4	5.35	7.25	....	....

Number 5 Newhouse traps are quoted at $87 per dozen, and No. 50 at $61.80 per dozen.

Gasoline and Coal Oil

While gasoline remains unchanged in price at 29½c per gallon for large quantities ex car, coal oil is advanced this week to 14c per gallon for supplies in barrels of 45 gallons.

Glue Very Scarce

Glue is very scarce, and some large wholesalers are now quoting only subject to market without prices, and are doing business at that.

Pocket Cutlery Firm

The market for all forms of pocket cutlery is reported very firm and supplies scarce. Dealers are glad to get the various staple lines of boys' and men's knives without going in for fancy goods now.

Corn Brooms and Washing Machines Up

WASHING MACHINES.—New lists have been issued by manufacturers of washing machines. The discounts remain unchanged at 45 per cent., but the net advances range from 25c to about $5 per machine.

Corn Brooms Up, Also Whisks

A 15 per cent. advance in corn brooms

and rice root whisks was noted by another large firm of wholesalers in Montreal this week, and this is in accordance with predictions made recently in HARDWARE AND METAL.

Wire and Nails Maintain Prices

WIRE NAILS, ETC.—With steel and iron in their firm condition of market, which is in some views likely to be intensified rather than reduced as the year goes on, there is little surprise expressed at the hints always heard here and there in connection with wire and nails that these lines have not seen anything like their last advances. But for the present week there are still no changes in prices to report in Montreal in either nails or wire. Barbed galvanized wire is quoted at $5.50 base; plain galvanized No. 9 at $5.50 also; No. 12 at $5.65; and No. 13 at $5.75 per hundred pounds. No. 9 coil spring wire is at $5.55, and No. 12 quotes at $5.70 in Montreal. Steel wire nails are still at $4.75 base, and cut nails at $4.50 base. Demand is quite brisk, and supplies none too plentiful.

Several Lines of Plates Are Advanced

SHEETS, PLATES, ETC. — Some large dealers are absolutely sold out of many lines of plates in Montreal, notably all the familiar importations in the way of galvanized sheets from England, tinplate, and such metal plates as are demanded by the British munitions industries. Quotations are almost entirely nominal in Montreal at present, and those who are able to secure supplies are fortunate under present conditions. The question of price enters less into the transactions now than does the question of supplies and possible deliveries for future needs. There has been no advance in prices of black sheets this week, and current quotation figures are steady. Bright cokes have, however, advanced in price by a dollar a box this week, and they are in very scanty supply. Canada plates are also up in price by 25c per case, but the prices are practically nominal at that, for there are so few of these available. The market is tremendously firm for all heavier classes of iron and steel plates.

Iron and Steel in Steadily Firm Market

IRON AND STEEL.—There is no change in the general condition of the market for iron and steel this week. Unprecedented firmness persists, and further advances in many lines of good manufactured from iron and steel are anticipated. Some, as will be noted, have already taken place this week. There are still only nominal prices available in Montreal for domestic pig iron from $40 per ton upwards to perhaps $45 being considered around the range of the market. U. S. war rumors keep agitating the market, and make predictions impossible. Prices for the principal iron and steel items on the market lists in Montreal are as under:

	Basis.
Common bar iron, per 100 lbs.	$ 3.40
Refined iron, per 100 lbs.	3.65
Horseshoe iron, per 100 lbs.	3.65
Norway iron	10.25
Mild steel	4.30
Band steel	4.30
Sleigh shoe steel	4.30
Tire Steel	4.50
Toe calk steel	5.20
Mining tool steel, per lb.	0.13½
Black Diamond tool steel, per lb.	0.13½
Spring steel	6.00

Bolts and Nuts Have Advanced

BOLTS AND NUTS.—New discounts on bolts and nuts effective Feb. 1 have been placed on the records of the Montreal wholesale hardware houses. The new discounts show an advance, which technically is styled a "five-point" advance all over, or rather less than 10 per cent. Following are the lines affected and the new discounts:

Carriage bolts ($1 list) ⅜ in. dia. and smaller	20%
Carriage bolts ($1 list) 7-16 in. dia. and larger	05%
Machine bolts ⅜ in. dia. and smaller	20%
Machine bolts, 7-16 in. dia. and larger	10%
Sleigh shoe bolts, ⅜ in. dia. and smaller	10%
Sleigh shoe bolts, 7-16 in. dia. and larger	05%
Coach and lag screws	30%
Skein bolts	25%
Square head blank bolts	10%
Bolt ends	10%
Plow bolts	10%
Elevator bolts	15%
Fancy head bolts	10%
Shaft bolts ($3 list)	10%
Step bolts, large head ($3 list)	10%
Whiffletree bolts	10%
Nuts, square	Net list
Nuts, hexagon	Net list

Terms: 2% off 30 days from date of shipment.

Tin Takes the Front Place in Metal Market

INGOT METALS.—The market for the principal ingot metals this week shows to some extent the effects of the world complications connected with the war, and the new attitude of the United States accentuates this effect. Antimony and tin are the metals which seem most immediately disturbed in market by the developments; tin in particular is found in very much firmer market.

Tin Advances in Price

TIN.—Early last week tin evinced symptoms of coming firmness; indeed, an actual increase of about ¾ of a cent was recorded, prices quoted in Montreal then being from $45.75 to $50, and stocks reported small. This week tin has experienced a much sharper advance, having risen rapidly in the New York market to $56 per hundred pounds for five-ton lots, which would mean fully $60 per hundred pounds in Montreal for small supplies. Some tin is still marketed at $52 to $54 per hundred Montreal, ex store. Stocks of tin in Montreal are extremely light, and there is the greatest possible uncertainty in securing further supplies to order from outside owing to railway difficulties. One reason for the advance is said to be the serious effect on sea transportation of recent submarine marauders, most of the supplies of tin for this continent coming from the Straits Settlements via England, or from England direct in some instances, and ship space is limited to extremely small dimensions, while marine risks are affected in the opposite manner.

Antimony Keeps Firm

ANTIMONY.—Following its spectacular advance from $18 per hundred pounds of the previous week to $30 per hundred in Montreal last week, antimony keeps in decidedly firm market, with New York quoting $25 per hundred, which sets the Montreal price at the higher figure of $30 still. There is very little antimony available on the market, and the insistence of a brisk jobbing demand seems likely to keep the price of this metal high for the immediate future. More production by Oriental mines would be in turn affected by the difficulties of marine transportation.

Lead Maintains Firm Market

LEAD.—Still there is the firmest possible tone in the market for lead in Montreal. Prices which last week advanced a dollar per hundred over the quotations of the previous week, and were at $8.50, are shaded up again this week, and not much lead is available in Montreal at the $8.50 price. One large firm was almost absolutely cleaned out of lead during the week, and though supplies had been on order for months, deliveries of the metal are so slow that no guarantees can be given for delivery of future orders. Quite a considerable premium is easily leviable on prompt shipment orders and demand is strong.

Copper Firm as Ever

COPPER.—The market for copper was strong, but not excited during the week, and prices remained as quoted last week, but with an intensely firm tone. Owing to the great shortage of copper in Montreal quotations are almost merely nominal, but for small orders from $35 to $36 per 100 pounds would be asked or even higher, with casting copper at about $36 to $37 per hundred.

Spelter in Quieter Market

SPELTER.—A quiet mood has come over the market for spelter as compared with previous experiences in the past few months, and though demand for domestic purposes keeps fairly good, there is not any marked activity in the condition of market at present. Prices, which moved up about a cent last week as compared to the previous week, are now at $16 to $16.25 in Montreal per hundred pounds, and stocks are quite low, with replenishment retarded by railway congestion.

Aluminum Steady Still

ALUMINUM.—Steadiness is the characteristic of the market for aluminum

this week, with no price changes as compared with conditions of last week. The quotation $18 per hundred pounds holds for the present in Montreal, and, while demand is fairly steady, and supplies affected by the same conditions as pertain to the other metals, there is no spectacular feature either in tone or tendency in this market just now.

Scarcity of Scrap Metals is Evident

OLD METALS.—One of the principal features noted in the market conditions affecting old metals in Montreal at present is the shortage of supply. A very brisk demand exists for all kinds of old metals, and to unearth a long-forgotten store of almost any kind of metallic "junk" would be akin to the discovery of a gold mine. The price of old cast iron and stove plate, for instance, is quite considerably advanced now in Montreal, being put at $18 to $19 per gross ton (of 2,240 pounds), this being the usual standard of weight for old iron in Montreal. For the other old metals in demand at present prices are as quoted below, and it may be noted that copper, tea lead, heavy lead pipe, and heavy zinc are all in firmer market this week as compared with previously ruling prices:

	Per lb.	
Tea lead	0.06½	....
Heavy lead pipe	0.08¼	....
Yellow brass	0.15¾	....
Red brass	0.19½	....
Light brass	0.10½	....
Heavy zinc	0.08½	....
Heavy copper	0 25½	....
Old cast iron, per gross ton	18.00	19.00
Stove plate, per ton	11.75	....
Old rubbers, boots and shoes	0.08¾	....
Overshoes, lumbermen's rubber boots	0 06½	......
Auto tires	0 05½	......
Bicycle tires	0 02½	......

Lead and Zinc Goods In Firmer Market

LEAD AND ZINC, ETC.—The market for lead products, zinc sheets and similar lines, also the solders, is very firm at present, with supplies very scarce. Especially is the firmness noted in the solders and articles into which tin and antimony enters, such as babbitt metals. These are all firm, and will probably be firmer. Following prices are quoted this week in Montreal:

Lead pipe, lb.	$0.15	....
Lead waste pipe, lb.	0.16	....
Lead traps and bends	Net list	....
Lead wool, lb.	0.15	....
Lead sheets, 3 lbs. sq. ft.	0.14	....
Lead sheets, 3½ lbs. sq. ft.	0.14	....
Lead sheets, 4 to 6 lbs. sq. ft.	0.14	....

Cut sheets, ¾c lb. extra and cut sheets to size 1c lb. extra.

Solder, guaranteed, lb.	0.37	....
Solder, strictly, lb.	0.35	....
Solder, commercial, lb.	0.33	....
Solder, wiping, lb.	0.33	....
Solder, wire, lb.	0.31	0.52
Zinc sheets, per lb.	0.33	....

TORONTO MARKETS

TORONTO, Feb. 9.—With embargoes on the Grand Trunk and Canadian Pacific Railways on all points east of this city, the prospect of getting deliveries of goods has reached a more acute stage. How long the embargo will remain on is not yet known. It is stated by the companies that the condition has been necessitated by the storms and severe weather. There is also in all probability a dearth of shipping to take the freight from the ocean ports, and this is causing the freight to back up. The Canadian Northern Railway at the time of writing was still accepting goods for shipment east. The most notable price change during the week was the advance in linseed oil of 15c per gallon. The new price of $1.35 per gallon for raw linseed oil establishes a new high record for that commodity. Advances have been recorded in the price of glue. An unprecedented demand has arisen for this article on the realization that there is a shortage of supplies. Users are willing to pay almost any price asked in order to get it. Barb wire has advanced 50c per hundred. Sisal clothes lines have also advanced in conformity with the higher prices for all sisal products. Changed discounts on wrenches provide for an increased price. New discounts on bolts and nuts provide for an increase in these commodities. Lace leather has advanced. Lead pipe and waste pipe have gone up 1c per pound. Brooms have made a further advance. Coal oil has gone up 1c per gallon. Discounts on glass have been changed to provide for an increased price. White lead in oil is firm and higher prices are a probability. Business has been good during the week in spite of the difficulties attendant upon shipping.

Stillson and Trimo Wrenches Up 10%

WRENCHES.—An advance of approximately 10 per cent. has been made in the price of Stillson and Trimo wrenches. Coes wrenches remain unchanged. Agricultural wrenches also remain unchanged. This advance follows an intimation in these columns last week that there was strong probability of such a movement in the market.

Bolts and Nuts Have Been Increased in Price

BOLTS AND NUTS.—An advance of approximately 6½ per cent. has been made effective in the price of bolts and nuts. Carriage bolts are now quoted at 20 per cent. off list for the ⅜-inch and smaller, as compared with the former discount of 25 per cent. Carriage bolts of 7-16-inch diameter and larger are now quoted at 5 per cent. off list, where formerly the discount was 10 per cent. Similar advances have been made in machine bolts, sleigh shoe bolts, coach and lag screws, square head blank bolts, bolt ends, plow bolts, elevator bolts, fancy head bolts, step and shaft bolts, whiffletree bolts, tire bolts, square nuts and hexagon nuts. Discounts are as follows:

	% off list
Carriage Bolts ($1.00 list)—	
⅜ in. and smaller	20
7-16 in. and larger	5
Machine Bolts—	
⅜ in. and smaller	20
7-16 in. and larger	10
Sleigh Shoe Bolts—	
⅜ in. and smaller	10
7-16 in. and larger	5
Coach and Lag Screws	30
Skein Bolts	25
Square Head Blank Bolts	10
Bolt Ends	10
Plow Bolts	10
Elevator Bolts	15
Fancy Head Bolts	10
Step and Shaft Bolts ($3 list)	10
Whiffletree Bolts	10
Nuts, Square	Net list
Nuts, Hexagon	Net list
Stove Bolts	55
Tin Bolts	40

Sisal Clothes Lines Have Advanced 20%

CLOTHES LINES.—Following the advance recorded last week in sisal products, some wholesale hardware houses have made effective an advance in the price of sisal clothes lines, which approximate 20 per cent. For instance, on the three-ply 48-foot lines the selling price has been advanced from $1.20 to $1.45 per dozen, and on the six-ply 48-foot lines there has been an advance of 40c per dozen, the selling price now being $2.32, as compared with $1.92 formerly. There have been corresponding advances on the 30-foot, 40-foot, 60-foot, 72-foot and 100-foot lengths for both the three-ply and six-ply.

Lace Leather Has Increased in Price

LACE LEATHER, BELTING.—There has been a firm tendency in the market for side lace leather and cut lace leather, which has worked toward higher prices in certain quarters during the week. There was a movement toward higher levels last week when the lower quotations were moved upward 5c per pound. The range of prices for side lace leather is now from $1.35 to $1.45 per pound, and for cut lace leather from $1.50 to $1.65 per pound. Belting has held steady in price for some weeks, although there is a firmness in the market owing to the scarcity of leather suitable for this purpose, and also because there has been such a tremendous demand for belting of all kinds. Extra quality belting is quoted at 30 and 5 per cent. off list, and standard quality at 40 per cent. off list. Demand for belting is greater than the supply.

Barb Wire Moved Upward 50 Cents

WIRE, NAILS.—An advance of 50c per hundred pounds has been made effective in the price of barb wire. The selling quotation is now $5 per hundred, as compared with $4.50 formerly. There is a continued firmness in the market for all wire products in conformity with a similar situation in the United States. Wire nails are also in firm market, but the prices quoted are still at $4.70 base.

Corrugated Sheets and Galvanized Shingles Firm

SHEETS, PLATES.—There is a firmness in the market for corrugated sheets and galvanized shingles. To some dealers the condition seems to point to higher prices. Galvanized sheets are also in very firm market. Some of the dealers are cleaned out of sheets, but expect to get supplies in the near future. High prices for the galvanized sheets are operating to curtail consumption; in many instances black sheets are being used with a coat of paint to take their place.

Advances Are Again Made in Iron and Steel

IRON AND STEEL.—Advances have been recorded again in a number of lines of iron and steel. Angles which last week were quoted at $4.25 base are now quoted from $4.50 to $4.75. Horseshoe iron is also quoted up 25c at $4.25. Mild steel has advanced 25c per hundred and band steel from 10c to 35c. Following are the quotations:

	Per 100 Lbs.	
Common bar iron	$ 3 90	$ 4 00
Common bar steel	....	4 25
Refined iron	4 15	4 25
Angles, base	4 50	4 75
Horseshoe iron	4 00	4 25
Norway iron	7 50	....
Mild steel	....	4 25
Band steel	4 50	4 75
Mining tool steel	14 00	22 00
Sheet cast steel	23 00	29 00
Spring steel	....	6 00

PIG IRON.—There is really no change in the pig iron situation. Canadian foundry iron is still off the market, and there is no prospect of supplies being obtainable until there is sufficient coke available for the furnace to operate. Coke is still a very scarce commodity, notwithstanding efforts made by the railway companies to relieve the situation. A considerable tonnage of pig iron is being imported from the States.

Quotations on Old, Heavy Copper Higher

OLD MATERIALS.—Old heavy copper is quoted ¼c to ¾c per pound higher during the week, at 24c to 24½c. There is uncertainty in the old materials market awaiting the developments with respect to the entry of the United States into the war. Demand for these materials has been fairly active during the week. With the one exception, noted prices are the same as those quoted last week:

	Per lb.	
Tea lead	$ 0 06	......
Heavy lead pipe	0 08	......
Yellow brass	0 15¾	......
Red brass	0 19½	......
Light brass	0 10½	......
Heavy zinc	0 08	......
Heavy copper	0 24	0 24½
Old cast iron, per ton	15 50	$16 00
Stove plate, per ton	11 75	......
Old rubbers, boots & shoes	0 08¾	......
Overshoes, lumbermen's rubber boots	0 06½	......
Auto tires	0 05½	......
Bicycle tires	0 02½	......

Ingot Metals Firm And Advancing

Ingot metals are all firmer this week, with advances recorded in several instances. The future is very uncertain. Stocks of all metals are very light.

LEAD.—The lead market is very firm and lead prices are now at the highest levels that have prevailed since the outbreak of the war. Quotations at New York are purely nominal. Local prices range from 10¾c in large shipments to 11c for small lots.

BOLTS AND NUTS.
Discounts off Standard List. Effective Feb. 1, 1917.

	%
Carriage Bolt ($1.00 list)—	
⅜ in. dia. and smaller	20
7-16 in. dia. and larger	5
Machine Bolts—	
⅜ in. dia. and smaller	20
7-16 in. dia. and larger	10

Step and Shaft Bolts ($3.00 list)	10
Whiffletree Bolts	10
Tire Bolts	40
Square Nuts	Net list per 100 lbs.
Hexagon Nuts	Net list per 100 lbs.

COPPER.—For the first time in 34 years the American metal market on Monday of this week did not quote a price on copper. U.S. producers claim they have no copper. Efforts are being made to have a Government census taken. Locally the price is 37c lb.

ANTIMONY.—The antimony situation is attracting considerable attention, and very little spot antimony is offered. Prices are double those asked a month ago, and locally the price ranges from 35c in large lots to 38c for small lots.

TIN.—Tin like all other metals is higher and the market is very uncertain. Price locally is 57½c lb. with concessions to large buyers.

SPELTER.—Quotations on spelter are unchanged from last week. Stocks are very light and prices range from 13½ to 15c lb.

ALUMINUM.—Prices on aluminum are unchanged, at 68c lb.

Big Advances in Lead Sheets, Pipe and Solder

LEAD AND ZINC PRODUCTS.—Lead pipe and lead waste pipe advanced 1c per pound during the week, lead wool increased 1c, lead sheets have gone up 1¼c to 1½c per pound and solders of all brands have advanced 4c to 5c per pound. There is a firm market in the lead and tin markets with higher prices and this has sent the prices of their products skyrocketing also. Quotations are as follows:

Montreal—		
Lead pipe, lb.	$0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	....
Lead wool, lb.	0 13	....
Lead sheets, 3 lbs. sq. ft.	0 13¾	....
Lead sheets, 3½ lbs. sq. ft.	0 13¾	....
Lead sheets, 4 to 6 lbs. sq. ft.	0 13¼	....

Solder, strictly, lb.	0 32¼	....
Solder, commercial, lb.	0 31¾	....
Solder, wiping, lb.	0 31½	0 32
Solder, wire, lb.	0 35	....
Zinc sheets, per lb.	0 25	....

United States Government After Sisal Commission

ROPE, TWINE.—The recent advance in sisal rope lends interest to the fact that the United States Government has started proceedings under the Sherman anti-trust law seeking to end the alleged monopoly in Mexican sisal. The Federal Department of Justice of the United States has brought action and a petition has been filed which states some facts connected with the sisal industry as follows: "As a result of the unlawful combination, conspiracy and agreement, the defendants have obtained a complete monopoly of trade and commerce in sisal among the States of the United States and between the United States and Mexico. The Comision Reguladora has become the sole purchaser of sisal from the producers in Mexico, and the sole importer of sisal into and the sole seller of sisal in, the United States. The defendants have been and are able to fix arbitrarily the price of sisal in the United States. The price which at the time of the formation of the unlawful combination, conspiracy or agreement was 5¼c. per pound at New York, and for more than five years prior had averaged about 5½ cents has been rapidly advanced. By May 22, 1916, it had reached 7⅝ cents at New York, notwithstanding the quantity imported into the United States for the year ending June 30, 1916, was greatly in excess of any previous year. By July 11, 1916, the price had been further increased to 10⅜ cents, by December 23, 1916, to 14½c., and by January 25, 1917, to 16½c. At the present price of sisal, the cost of the binder twine necessary to harvest the annual cereal crop of the United States will be increased by more than $25,000,000 over the cost in 1915."

Locally all cordage lines have held firm

during the week at the advances recorded last week. It remains to be seen what will come of the action now being brought by the United States against the Comision. In the meantime prices on binder twine for the present year have not yet been named, but it is expected they will be issued in the near future.

Demand for Enamelware and Tinware is Good

STOVES, ENAMELWARE.—There is a good demand for enamelware and tinware of all kinds, better in fact than at this time last year. This same condition prevails with respect to gas ranges, for which there is an excellent demand at the present time. The season for stoves and heaters is somewhat quiet at present following an extra heavy demand for the present season's business. Difficulty in obtaining many lines of raw materials is still a big factor in the manufacture of a sufficient supply of gas ranges. Prices in these various lines have held steady during the week.

Brooms Again Make Advance of 10%

BROOMS.—There has been a general advance on the price of brooms approximating 10 per cent. One line that formerly sold for $7.80 per dozen is now quoted at $8 for the four-string brooms. On the five-string broom the advance has been from $9 to $9.25 per dozen. For the six-string the selling price was formerly $10.50 while the new price is $11. All grades and classes of brooms by the same maker has advanced in a similar proportion. There have been further advances in broom corn in the United States. Where formerly it was sold at $250 to $260 per ton it is now changing hands at $300 per ton.

Discounts on Pumps Have Been Changed

PUMPS.—By a change in discounts on brass lined cylinders and brass body cylinders for pumps an increased price has been made effective in these lines. Brass lined cylinders are now quoted at 25 per cent. discount off list, as compared with 30 per cent. formerly. Brass body cylinders are now quoted at a discount of 20 per cent., the former discount being 25 per cent. The discount on pumps remains at 35 per cent. On cistern pumps the discount is 30 per cent. on some and 35 per cent. on others, according to the style.

Coal Oil Up 1c Gallon; Gasoline Market Firm

COAL OIL, GASOLINE.—An advance of 1c per gallon has been recorded in the price of all coal oil, which now makes the selling price of Canadian prime white and Royalite 13c per gallon, Palacine 16c per gallon, Lampoline 14c per gallon and Electroline 17c. Fuel oil has also advanced in barrel lots ¼c per gallon to 12¼c. Gasoline is in firm market but quotations during the week were at 28½c and 29c per gallon with benzine one cent per gallon less than gasoline. Crude oil in the Mid-Continent field is still quoted at $1.70 per barrel but there was a falling off in production of crude during the month of January. Consumption of gasoline continues heavy for this time of the year. Higher prices on gasoline are anticipated.

New Washing Machine Lists Have Been Issued

WASHING MACHINES.—New lists on washing machines have been sent out to the trade during the week which make effective higher prices on many lines of machines. The increase in some machines amounts to 25c net while in some of the higher-priced machines the advance amounts to as much as $8. With some machines there has been no increases. Discount on the new list remains the same as on previous lists at 50 per cent. off. List prices on some of the lines will be found in current quotations.

Firmness in Wood Screws

SCREWS.—There is a firm market for wood screws of all kinds with a strong probability that advances will be recorded in these lines in the near future.

LONDON MARKETS

LONDON, Feb. 8.—Prices continue to advance rapidly and prospects are for much higher prices in the near future. In addition to higher prices many lines are almost impossible to procure now and the situation is sure to become worse when the spring trade opens. Most merchants are busy just now taking in spring goods and marking them in preparation for spring trade. Business continues seasonably good. Colder weather lines are going good. Collections are quite satisfactory.

PRICES FOR WASTE PAPER

Letters have been received from a number of Western Canada readers, who claim to have considerable difficulty in disposing of waste paper. HARDWARE AND METAL has been advised by a large Toronto firm that they will purchase ordinary scrap paper at the following prices for car lots:

F.o.b.	**Winnipeg**	**$9.00 ton**
„	**Brandon**	**8.00 „**
„	**Regina**	**6.00 „**
„	**Saskatoon**	**5.50 „**
„	**Prince Albert**	**5.00 „**
„	**Calgary**	**3.00 „**
„	**Edmonton**	**3.00 „**

Bolts and Nuts Have Been Increased in Price

BOLTS AND NUTS.—An advance of approximately six and one-half per cent. has been made effective in the price of bolts and nuts. Carriage bolts are now quoted at 20 per cent. discount off list for the ⅜-inch diameter and smaller as compared with the former discount of 25 per cent. Carriage bolts of 7-16 inch diameter and larger are now quoted at 5 per cent. off list where formerly the discount was 10 per cent. Similar advances have been made in machine bolts, sleigh shoe bolts, coach and lag screws, square head blank bolts, bolt ends, whiffletree bolts, tire bolts, square nuts and hexagon nuts. Discounts are as follows:—

Carriage Bolts ($1.00 list)—	% off list
⅜ in. and smaller	20
7-16 in. and larger	5
Machine Bolts—	
⅜ in. and smaller	20
7-16 in. and larger	10

New List Prices on Wringers Made Out

WRINGERS. — New list prices on wringers have been worked out. Figured at 45 and 5 per cent. off the new list the net prices on some of the lines are as follows: Royal Canadian, one year, plain bearing, 11-inch roll, $44.31 per dozen; Eze, one year, ball bearing, 11-inch roll, $47.97 per dozen; Bicycle, three-year, ball bearing, 11-inch roll, $53.98 per dozen; Warranty, five years, ball bearing, 11-inch roll, $59.98.

Wooden Wash Tubs Advance 10 Per Cent.

WASH TUBS.—An advance of 10 per cent. has been made in wooden wash tubs during the week. There has been a firmness in the market for these goods for some time past and the result has been higher prices. No. 0 size are now quoted at $12.25 per dozen; No. 1 size at $10.75 per dozen, and No. 2 size at $9 per dozen.

Axes Make Advances Approximating $1.50 Doz.

AXES. — New prices that have been made effective on axes provide for an increase of approximately $1.50 per dozen. Wellandvale Special are now quoted at $9.75 per dozen, Cherokee at $10.50 per dozen; Hand-made at $10 per dozen; Eagle handled at $10 per dozen and Cherokee handled at $13 per dozen. There is a firmness in the market for axes owing to the situation in steel.

Socket Chisels Have Advanced 25 Per Cent.

CHISELS.—An advance of 25 per cent. by the changing of the discounts on these lines. Socket firmer chisels, socket framing chisels, socket corner chisels and socket slicks are now quoted at a discount of 50 and 10 per cent. off list. Usual extras are still charged for beveling.

Garden and Lawn Shears Marked Up

SHEARS.—New prices have been put into effect on garden and lawn shears which provides for a substantial increase. The price for the 8-inch plain garden shear is now 95c. each, for the 8-inch notched garden shear, $1.25 each, 9-inch plain is quoted at $1.25, and 9-inch notches at $1.50. Two-inch ladies' garden shears at $1 each.

Wire Nails Firm.

There is a firmness in the market for wire nails and cut nails. Wire nails are quoted on a basis of $4.70 per hundred pounds, and cut nails on a basis of $4.50 per hundred pounds. Wire products of all kinds are in firm market.

Linseed Oil Up 15c.

An advance of 15c. per gallon was recorded in the price of linseed oil during the week. On one to two barrel lots raw linseed oil is now quoted at $1.35 and boiled at $1.38 per gallon. In three to five barrel lots the price is $1.34 for raw and $1.37 for boiled. In six to nine barrel lots the quotation on raw is $1.32 and $1.35 for boiled. Prices are firm at the advance.

Turpentine Holds Steady.

Turpentine held steady during the week. There is a light demand for this commodity at the present time. One barrel lots are quoted at 81c. per gallon and two to four barrel lots at 80c. per gallon. In 5-gallon lots the price is 88c.

Expect Rope to be Scarce.

It is expected in hardware circles here that rope will be scarce later in the present season. Prices for both sisal and manila rope have held firm at recent advances. Pure manila is quoted at 29½c. lb. base. British manila at 25c., New Zealand hemp at 25c.

New Prices on Sweat Pads.

New prices have been issued on sweat pads which provide for an advance. Yellow are now quoted at $5.50 per dozen and Ventiplex at $5.75 per dozen.

Blasting Powder Higher.

An advance has been made in the price of blasting powder during the week. In kegs f.o.b. factory the price is now $2.25.

Barn Door Track Up.

New prices have been named for barn door track which provide for an increase. One and one-quarter inch track is now selling at 7c. per foot.

Charcoal Advances.

Higher prices are now prevailing for charcoal. Following advances that have been put into effect in other centres the paper sacks are now quoted here at $1.35 per dozen, while the bulk charcoal is sold at 25c. per bushel.

Jellstone Prices Advance.

New prices have been issued on Jellstone. White is quoted at a list price of 9c. per pound and tints at 10c. per pound, the discount from the list being 40 per cent. This commodity is put up in three and one-half pound packages with twelve packages to a case.

Wiss Shears Up 20 Per Cent.

By the changing of the discount on Wiss shears an advance of approximately 20 per cent. has been made. The new selling price is now 33 1-3 per cent. off list.

Many Sundry Lines Go Higher

Miller's Latches Up 20 Per cent.

Millers night latches and padlocks have all advanced in price. The advance in jobbers' prices here will run about 20%.

Sap Spouts Higher.

Eureka sap spouts have advanced to $8 per thousand, or 85c. per 100.

New List Prices on Stillson Wrenches

New list prices have been issued on Stillson wrenches and parts and are subject to a discount of 50-5%. The new list prices on wrenches are as follows: 6 in., $2; 8 in., $2.25; 10 in., $2.50; 14 in., $3.50; 18 in., $5; 24 in., $7.25; 36 in., $13.50; 48 in., $20.

Fencing Firm and Unchanged.

Fence wire is firm and unchanged at the following prices: —

Per 100 lbs.—Barb, $4.50; No. 9, plain galvanized, $4.25; No. 12, $4.40; No. 13, $4.50; No. 9, coil spring, $4.30; No. 10, O and A., $5.16; No. 11, $5.22; No. 12, $5.30.

Prices on Spring Lines.

The following prices are quoted on spring goods:—

Poultry netting, 1" & 2" mesh	30-10%
Painted screen, 100 ft. rolls	$2.75 per 100 sq. ft.
Painted screen, 50 ft. rolls	$2.80 per 100 sq. ft.
Bronze screen cloth	14c per sq. ft.
Harvest tools	40%
No. 20 S.D. hinges	$11.00 gross

New Prices on Packing.

Packing has advanced in price and jute is now quoted at 12c. per pound, hemp at 28c. per pound; No. 2 Italian, 28c., and No. 1 Italian, 36c:

Silverware Up.

Rogers 1847 flatware has registered an advance of 10 per cent. and is now quoted at a discount of 45 per cent. off list.

WINNIPEG MARKETS

WINNIPEG, Feb. 7.—Business for February is away to a very good start and throughout the various warehouses in the city every department is keeping busy. The amount of orders to be put through is very gratifying and the question which concerns most of the obbers just now is whether they will have the stock to supply the heavy demand. There is no doubt but that shortages will occur, but retailers must understand the difficulties of manufacturers getting through the immense quantity of orders they have with inefficient help and shortage of much raw material. However, the more serious question of the day which concerns Canadians everywhere is being faced with due regard to its importance and the mere shortage of a package of tacks, a tin pan or a 22 rifle need cause no eruption of feeling.

Many Important Price Changes Effective

During the week the markets have been fairly quiet, but nevertheless some very important changes have gone into effect. A late wire last week conveyed the news of an advance of $1 per box in tin plate and Canada plate and an advance of 35c. per 100 lbs. on galvanized sheets. Two other important lines which carry revised prices are rope and game traps, the revisions in each case representing advances over former figures.

The new prices ruling on Canada plate and tin plate as represented by the advance of $1 per box are as follows:—

			Box.
Canada Plate, ½ pol'd		6	$ 7.25
		7	7.25
		8	7.50
	Full pol'd	6	8.25
		7	8.25
		8	8.50
Tin Plate I.C.	20x28		19.00
	20x33		21.50
I.X.	20x28		20.50
	20x33		23.50
Terne Plate I.C.	20x28		19.00

The revised quotations now applying to galvanized sheets are reproduced herewith:—

Per 100 lbs.—10¾, $8.75; 28, $8.45; 26, $8.15; 24, $8.00; 22, $8.00; 20, $7.85; 18, $7.85.

A revision in four gauges of black iron was also put into effect as below: 16 and 14 ga., $6.25 per 100 lbs.; 12 and 10 ga., $6.50 per 100 lbs.

Manila and Sisal Rope Goes Higher

The advance recorded on rope for the

Continued on page 56.

Toy Fair Shows Many New Lines

Advances Made in Metal Toys, Boats, Dolls, Furniture and Other Lines — Good Attendance of Buyers From West as Well as East— Two Weeks' Exhibit.

OVER a score of toy makers of Canada were present with exhibits at the Second Annual Toy Fair, which opened at 8 Colborne Street, Toronto, this week, and will continue to the end of next week, and a very gratifying number of buyers have been on hand from toy departments, not only in Ontario, but from Western Canada and Quebec. The toy makers, as a rule, expressed themselves as gratified with the orders or promises of orders that they had received from the buyers.

In some respects the exhibit was not as large as the first one held under the auspices of the Department of Trade and Commerce one year ago, where importers showed as well as makers. Some of the toy makers who were there at that time have fallen by the wayside, but others who were absent have built up a good steady business in their lines, but were unable to be present at this time. Some very creditable exhibits were seen, with the main interest of course centering in the new lines that had been brought out since last Christmas.

New Lines in Metal Toys

Among those that attracted much favorable attention was an extension of the line of the Newmarket Toy Company, now the Beaverton Metal Toy Co., who make up iron goods of a finished design, including trains, engines, horses, various kinds of vehicles, or what we might call the regular line of metal toys. While the prices of these goods have advanced considerably, from 25 to 50 per cent. over last year, owing to the increase in cost of the metal and labor, it is believed by most of the toy buyers that these goods have found a permanent place in Canada, and the prices that are charged, particularly those that will be arranged for in normal times, will enable them to maintain their hold against imported goods. All the toys that are turned out are strong and serviceable. So great has been the demand for these lines that the firm reports themselves as sold out for the whole of this year. There should be further factories along this line in Canada.

New Firms Making Boats

Several new firms are going into the making of toy boats, both in metal and in wood. Among these are a Vancouver firm and a former sailor, Geo. Hanratty, of Toronto, who designs the models, including cruisers, torpedo boats, ordinary sail boats, and so on, which operate by winding up. These are neat, and low-priced.

A new steel constructer toy is being shown by the Castle Mfg. Company, after the Erector or Meccano toys, in some ingenious designs. They also show a sand toy.

Other new lines are a rapid fire machine gun, which has a novel method of loading the ammunition in the form of marbles; the use of animals' heads, including the hen, in wooden toys, such as rocking chairs, rocking horses, sulkies, etc., made by the Royalet Mfg. Co. of London, Ont., and a variety of children's tin ware, such as sand pails, tea sets, etc., by the Davidson Mfg. Co.

The Dominion Toy have added to their line of dolls an odd form of horse. "Canada Dolls" include nearly 75 varieties of unbreakable dolls. The Brophey Doll Co. have a number of new designs in the Madame Hendren dolls, including St. Patrick's Day and Hallowe'en specialties, and the famous "Black Cat."

The Victoria Toy Co. of Victoriaville, Que., are to the fore with an increased range of papier mache rocking horses, dolls furniture, etc., and the Copp, Clark Co. have a large variety of flags and games.

The manager is Mr. E. V. Henderson, of Toronto, and the secretary-treasurer, Mr. L. G. Beebe.

A Group of New Canadian Toy Lines

Dolls on left—Two of some seventy lines of "Canada Dolls"; dolls on middle right, "Madame Hendren's," by Brophey Doll Co., with the "cat" by same; horse toy next out, Dominion Toy Co.; tin lines, plates, pails, washboard, watering can, etc., Thos. Davidson Mfg. Co.; iron toys, fire engine, hook and ladder, gipsy wagon, plough, etc., Beaverton Metal Toy Co.; model of battleship, Castle Mfg. Co.; "Hen," sulky and goose, rocking horse, Royalet Mfg. Co.

EVENTS IN THE TRADE

Hardware Store Burned

Fire on February 4 destroyed the hardware store of Gigueue & Co., Quebec.

Addition to Stove Plant

Montreal, Que.—The Canada Stove and Foundry Co. plans to build a concrete, brick and mill construction pipe foundry at St. Laurent, at an estimated cost of $36,000.

Burglars Rob Store

Burglars broke into F. J. Bishop's hardware store, Brantford, Ont., and stole a quantity of money, revolvers, knives and ammunition. It is thought that the thieves were in hiding in the store when it was locked up.

Industrial Notes

Oakville, Ont.—The Acme Rubber Co. by-law was carried by a substantial majority.

Hamilton, Ont.—The Tallman Brass Co. will shortly call tenders for an addition to their plant.

Ford, Ont.—Plans are being prepared for a factory for the Canadian Lamp & Stamping Co., to cost $27,000.

New Incorporations

The Gladstone Brush Mfg. Co., with capital of $50,000, has been incorporated. The head office of the company is at Toronto.

The Spencer Heater Company of Canada, with head office of the company in the city of Toronto, and capital of $500,000, has been incorporated. The company will make, manufacture, buy, sell, trade, and deal in all kinds of boilers, heaters, furnaces, heating apparatus, and plants.

Serious Fire Damage

About $5,000 damage was done to the plant of the Allith Manufacturing Company, 49 Bay street, Toronto, by fire on February 7. The origin of the blaze is unknown.

A Brass Band

Beatty Bros., Fergus, Ont., have organized a brass band. Most of the musicians will be men in the factories. Mr. White, of Newmarket, has been engaged as leader.

To Heat Factory With Gas

The Board of Control have decided to give the McClary Company, London, Ont., the right to tap the mains of the Southern Ontario Gas Company for a supply of natural gas. The possibility of war between the United States and Germany has greatly increased the danger of a continued coal shortage, thus making gas a necessity.

Personals

A. J. Clymer of the Enterprise Mfg. Co., Philadelphia was in Montreal this week.

H. A. Thibault of the Utica Drop Forge & Tool Co., was a business visitor this week in Montreal.

CHARLES HICKMAN, President,

Ottawa Paint Works, Ltd., Ottawa, Ont. An announcement regarding the appointment of officers of the Company appeared on page 65 of last week's issue of Hardware and Metal.

Arthur Hatch of the Canada Steel Goods Co., Hamilton, Ont., was a visitor in Montreal this week.

F. J. C. Cox, manufacturers' agent, Winnipeg, has been nominated aldermanic candidate in that city.

W. W. Near, president of the Page-Hersey Iron, Tube & Lead Co., Limited, has been appointed a director of the Dominion Bank.

J. E. Brown, manager of Revillon Freres, Edmonton, Alta., wholesale department, has been elected president of the Edmonton Board of Trade for 1917.

The E. Cecil Short Co., Metal Merchants, Montreal, have increased their staff lately by the addition of Walter Lee who was formerly associated with the L. E. Moulton Co., of Montreal, and who will now assist Mr. Short in departments of the business.

J. M. Thompson, manager Winnipeg branch of Beatty Bros., Ltd., Fergus, Ont., is visiting the head office of the company. He speaks enthusiastically of the hardware dealers in the West, and also of the prospect for business in the Western Provinces.

W. J. Keyes, who covers Eastern Ontario for Lowe Bros., Ltd., Toronto, has been off the road for the past six weeks on account of illness. Mr. Keyes is now out of the hospital, but the doctor has ordered him to remain at his home for at least two weeks longer. His many friends will wish him a speedy recovery.

Business Changes

Lomond, Alta.—L. A. Ostrum has sold his hardware business.

Tugaske, Sask.—German Bros., hardware merchants, are selling out.

Sidewood, Sask.—E. W. Salmon, hardware and grocer, has sold to Walter S. Pearce.

Cartwright, Man.—L. H. Phillips, hardware merchant, is removing to Lamond, Alta.

Ravenscrag, Sask.—The Ravenscrag Hardware Co. have been succeeded by R. Whitefoot.

Balmoral, Man.—The estate of J. L. Barbour has sold the hardware stock to C. S. Jones.

Millett, Alta.—Morris and Taylor, hardware merchants, have sold to Millet Hardware Co.

Camrose, Alta. — Herman Burger, hardware merchant, has sold out to Morris and Taylor, Millet.

Kingsville, Ont.—Nelson Bros. have sold their line of hardware, and are now carrying on a plumbing business.

Bridgeford, Sask.—The Saskatchewan Hardware and Harness Co. have sold their Bridgeford business to O. J. Cooley.

Victor De Granpre has bought out the store of A. Lippe & Co., hardware dealers, Wolfe and Lagauchetiere streets, Montreal.

B. C. Metal Output

Official figures of last year's output of British Columbia's mines shows a tremendous increase over all previous years. The returns from all sources are valued at $42.970,555. This is 45 per cent. better than the showing of the

year 1915, and 32.50 per cent. greater than for 1912, which was the banner year previously. Following is a summary of the output of chief metals and coal products: Gold, $5,389,229; silver, $2,099,838; lead, $3,186,773; copper, $18,429,934; zinc, $3,648,599; coal, $7,093,352; coke, $1,622,850; building materials, $1,500,000.

Appointed Edmonton Sales Manager

H. S. Blackstock has been appointed sales manager of the Edmonton branch of Beatty Bros., Limited. Mr. Blackstock commenced to work for this firm in 1907; previous to that he acted as local agent in the town of Barrie, Ont. The first five years he was engaged with the firm he covered Central and Eastern Ontario and the Maritime Provinces, and on this territory he is well known. Some two years ago he was compelled through ill health to relinquish business, and went West, residing in Calgary for a while, then later removed to Edmonton. His many friends will be glad to know that he has been appointed to this position of sales manager, covering such an important field.

New Hardware Store

Messrs. Bourasseau and Primeau have opened a new hardware business on St. Catherine Street, East Montreal, and have made a good start with experience to their credit.

HARDWARE LETTER BOX

1900 Washer

Hillhouse & MacLead, Clifford, Ont.—Kindly advise through HARDWARE AND METAL, the name and address of the firm making the 1900 Washer.

The 1900 Washer Co., Yonge street, Toronto.—Ed.

* * *

Makes of Windmills

C. P. Moore, Sydney, C.B.—Can you give us the address of Messrs. Gould, Shapley & Muir Co., manufacturers of windmills?

Brantford, Ont.—Ed.

* * *

Repairs for Supreme Range

Fraser Bros., Bradford, Ont.—Can you tell us where we can get repairs for the Supreme range?

Supreme Heating Co., Welland, Ont.—Ed.

* * *

Cadmium

The Wm. Paterson & Son Co., Brantford, Ont.—We understand there is a metal cast in Canada called Canadium, a by product of nickel. Can you give us some information regarding it?

There is a metal called Cadmium, a by-product of nickel. It is procurable from Canada Metal Co., Toronto.—Ed.

* * *

Manufacturers of Glue

J. S. Demers, Thetford, Mines, Que.—Kindly give me the addresses of the different Canadian and American manufacturers of glue.

Canada Glue Co., Brantford, Ont.; W. Harris & Co., Toronto, Ont.; Russia Cement Co., St. John, N.B.; Maritime Fish Corporation, Montreal, Que.; McArthur Irwin Co., Montreal, Que.; American Agricultural Chemical Co., 2 Rector street, New York City; Consolidated Rendering Co., 40 N. Market street, Boston, Mass.; American Glue Co., 121 Beverly street, Boston, Mass.; J. Dold Packing Co., 745 William street, Buffalo, N.Y.—Ed.

Brace McKay & Co. Want Catalogues and Invoices

The office of Brace McKay & Co., Ltd., Summerside, P.E.I., was badly gutted by fire. All 1916 invoices and catalogues were destroyed. The company would be glad to receive copies of all 1916 invoices, and also catalogues from hardware manufacturers and jobbers. All account books were saved, and the stock was undamaged.

Beaver Board Convention

The most successful convention in the history of the concern was recently held by the Beaver Board Companies at the administration offices, Buffalo, N.Y. In attendance at the convention this year were a number of guests representing some of the Canadian distributors. Among the guests were:—S. P. Bissett, James Bissett & Co., Quebec, Que.; C. H. Walters, McAuliffe-Davis Lbr. Co., Ottawa, Ont.; Guy Long, Long Lumber Co., Hamilton, Ont.; I. W. Halliday, Wm. Rutherford & Co., Montreal, Que.; Herbert Seybold, Starke-Seybold & Co., Montreal, Que.; Guy Simpson, Mechanics' Supply Co., Quebec, Que.; Mr. Pratt, R. Laidlaw Co., Toronto, Ont.

Group of salesmen and guests at the Convention of the Beaver Board Companies.

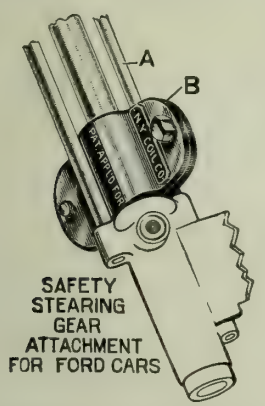
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

STEERING GEAR ATTACHMENT

The New York Coil Company, 338 Pearl street, New York city, have just placed upon the market a safety device for the steering gear on Ford cars. Its object is to prevent the possibility of the steering wheel going over centre when wheel is turned too far. It also prevents a like occurrence when traversing deep sand or muddy roads.

It consists of a clamp formed in two sections, which is installed on the steering gear shaft, directly above the steering gear bracket, and turns with the steering shaft. It is adjusted and clamped into position when the steering wheel is turned full to the left in which position it forms a stop on the bracket, and insures the wheel not being turned too far.

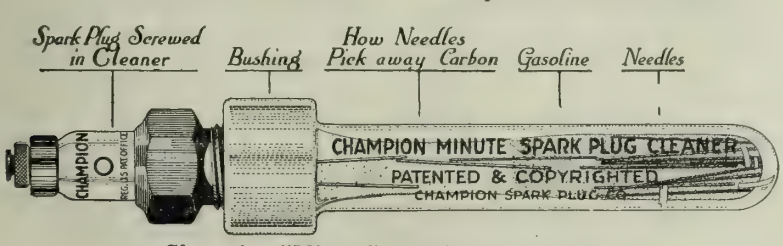


Steering Gear Attachment.

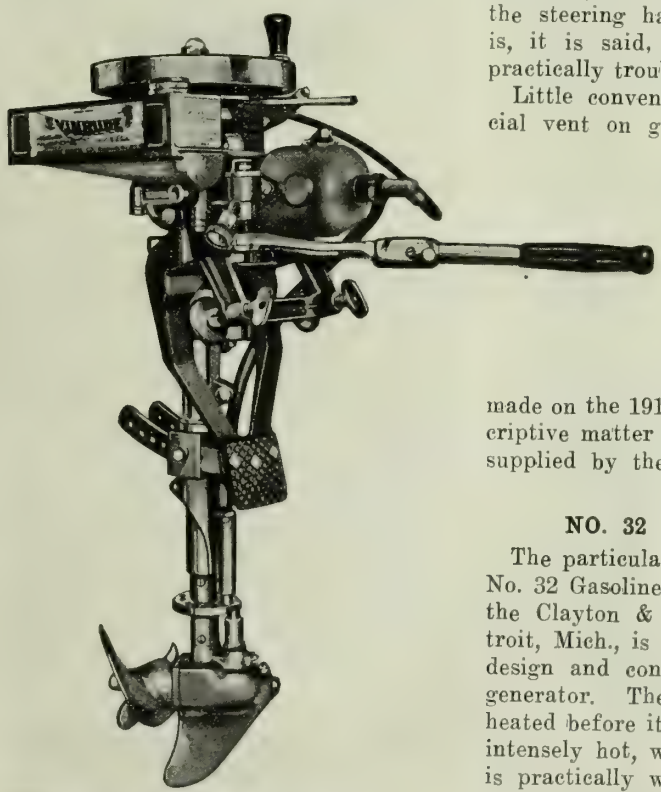
CHAMPION MINUTE SPARK PLUG CLEANER

A new product called the Champion "minute" spark plug cleaner has been perfected and placed on the market by the Champion Spark Plug Co., Toledo, Ohio. The makers claim that the Champion "Minute" spark plug cleaner enables any one as well as the expert mechanic to thoroughly clean a spark plug without the necessity of taking it apart, or using tools of any kind. Heretofore, it is claimed, the cleaning of spark plugs was a difficult proposition and even when done by those familiar with the operation required considerable time and care.

To eliminate the above time-consuming operations, the Champion "Minute" spark plug cleaner was perfected. This device consists of a special glass tube about 5 inches in length with a bushing in the open end into which the spark plug is screwed, the tube containing about 50 specially adapted steel needles. To clean a plug, fill the tube about half full of gasoline, screw the spark plug into the bushing and shake vigorously for a minute or so. The specially adapted steel needles quickly pick the carbon from the porcelain, the gasoline dissolves the oil deposit, leaving in a few minutes a clean set of plugs.



Champion "Minute" Spark Plug Cleaner.



Improved Evenrude Motor.

IMPROVED EVINRUDE MOTOR

The Evinrude Motor Company, Milwaukee, Wis., have simplified the selling problem by concentrating on one model—the 2 h.p. rowboat motor with built-in-the-flywheel magneto, automamatic reverse and Evinrude silencer. The motor has a number of new and improved features for 1917. The magneto is now entirely enclosed. The ignition, built right in the flywheel, is positive at all times. Dampness, spray, etc., cannot effect the built-in-the-flywheel in any way.

The automatic reverse is standard equipment. To reverse the direction of the boat, it is only necessary to turn the steering handle. This attachment is, it is said, simple, well made and practically trouble-proof.

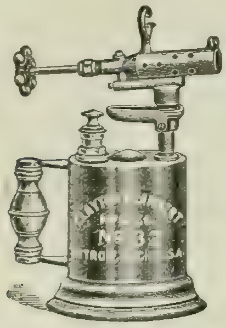
Little conveniences, such as the special vent on gasoline tank to prevent gasoline from spilling, grease plug on gear housing to facilitate the greasing of gears, special silencer designed to reduce the noise to a minimum, are some of the worth while improvements made on the 1917 models. Complete descriptive matter with prices, etc., will be supplied by the manufacturers.

NO. 32 C. & L. TORCH

The particular feature of the C. & L. No. 32 Gasoline Torch manufactured by the Clayton & Lambert Mfg. Co., Detroit, Mich., is said to be the improved design and construction of the burner generator. The gasoline gas is superheated before it is burned, producing an intensely hot, well regulated flame, and is practically wind and weather proof. Below zero temperatures, it is claimed, have very little effect on the amount and intensity of heat produced. The makers state that they have aimed to make this torch a most substantial and efficient tool in every respect for mechanics' use.

The tank is made of heavy gauge polished brass with funnel shaped bottom fitted with large filler plug. The top of the tank is strongly braced on the

inside, making the burner rigid, and will withstand severe strains. The patented automatic brass pump with double spring automatic check valve placed in the tank insures ample air pressure and



No. 32 C. & L. Torch.

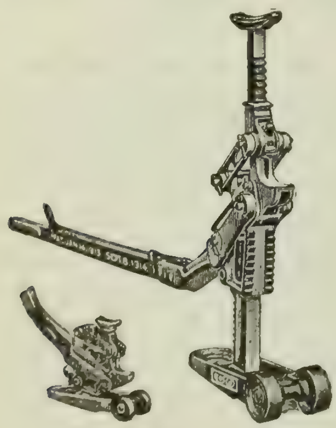
adds greatly to the efficiency and service of the user. A hook and support on the burner is used for holding soldering copper.

EXCEL AUTO JACK

The Excel Auto Jack here illustrated is being offered to the trade by the Randall Faichney Co., Inc., Boston, Mass. The makers state that the Excel jack is a heavy tool made to stand up under the continuous hard knocks of the garage and service station and to meet the demand for a powerful, substantially built, quick-acting device capable of doing heavy work efficiently and well.

It is made of high grade, semi-steel castings—drop forgings where necessary —with all wearing parts case hardened. The makers claim it will last for years under the most severe conditions.

Its capacity is for cars up to 8,000 pounds; weight, 48 pounds; length of lifting handle, 50 inches; wide, heavy base fitted with rollers for easy handling; action, one downward motion of



Excel Auto Jack.

the 50-inch lever raises the car instantly.

The jack can be adjusted to any part of the frame or chassis. It is equipped with a toe extension 4½ inches from the ground, which permits getting under a broken axle to lift the car high enough to place truck or skids under it for towing.

The jack, it is claimed, will lift on any car up to 24½ inches, without blocking, thus permitting the removal of the shackle bolts, springs and front suspensions, and the adjustment of steering rods.

NEW IVER JONHSON TOOLS

Two new tools have been placed on the market by the Iver Johnson's Arms & Cycle Works, Fitchburg, Mass. One is a drop-forged screw driver, and the other a high grade bicycle wrench.

The Iver Johnson screw driver is drop forged from a solid piece of steel, and is heavy enough to have strength. It is made of a special grade of steel secured for this particular purpose—it is very strong and, it is claimed, the edge will not turn with hard usage to which a screw driver of this style is put. It is satin finish and made in two sizes—the 6-inch weighing five ounces and 8-inch ten ounces.

The new bicycle wrench is said to be very moderately priced| The shank of the wrench is drop forged and it can-

Iver Johnson Bicycle Wrench.

Iver Johnson Screw Driver.

not be bent or broken, being used as a wrench. The jaw is strong and the wrench, it is claimed, will not slip. It is, the makers claim, a strictly high grade wrench at a low price. They are made in two styles, the regular wrench being 5½ inches long, spread of jaw 1½ inches. The second wrench, like the other except on the end of the handle is a screw driver. The length of this wrench over all, is 5⅛ inches, and the spread of jaw 1½ inches. Both wrenches are furnished in two finishes—case hardened and nickel plated, case hardened being a trifle cheaper than the nickel.

WEEKLY HARDWARE MARKET REPORTS

Continued from page 51.

week is a general one of ½c. per lb. base on all grades. This creates new marks throughout and the outlook is that further advances may be expected. Quotations based on the latest advance are:

Pure Manila	29½c per lb. base
British Manila	24½c per lb. base
Sisal	23½c per lb. base
Lath yarn	23½c per lb. base

Game Traps Up

It is indeed a long time since any revision has been made in the price of game traps, and considering the situation prevailing in the steel markets, this is almost to be wondered at. However, a change has been made, and though not a radical one, the tendency was, of course, upward. The new quotations are:

Victor, doz.—0, $1.45; 1, $1.70; 1½, $2.55.
Hawley & Norton, doz.—1, $2.60; 1½, $3.90; 2, $5.45.
Jump, doz.—1, $2.20; 1½, $3.30; 2, $4.80.
Newhouse, doz.—2½, $12.40; 3½, $13.90; 4, $12.40; 4½, $30.05; 50, $64.20; 5, $90.60.

Pipe Prices Are Very Firm

It is some time now since a change has been recorded in the price of wrought iron pipe. The market seems fairly firm with the usual demand at this time of year. Conditions are such that further advances may be expected at any time, and the possibility of any decline seems remote. The ruling quotations are as noted herewith:

	Black	Galvanized
¼ inch, per 100 ft.	$4.28	$6.75
⅜ inch	4.37	6.84
½ inch	5.67	7.47
¾ inch	6.98	9.41
1 inch	10.35	13.91
1¼ inch	13.95	18.81
1½ inch	16.70	22.50
2 inch	22.50	30.24

Many Further Advances Expected

The numerous changes in the wire markets which were evidenced by price revisions every week or two before the end of last year seem to have reached a basis of steadiness at last, for with the steady demand now being experienced no further notice of advances has been given out. From reliable sources, however, it is learned that nails are likely to advance to at least $5.50 before summer, and corresponding advances in other products may be looked for.

Quotations on these lines are firm on the following basis:

	Wpg.	Ft. Wm.
	Per keg base	
Wire nails	$5.10	$4.70
Wire staples	5.10	4.70
	Per spool	
Barb wire, Lyman	4.10	3.80
Glidden	3.95	3.65
Baker	3.90	3.60
	Per 100 lbs.	
Wire, plain galv'd, No. 9..	4.75	4.35
No. 12..	5.00	4.60

Rumors of peace and late advices of the possibility of the United States being drawn into the war created unprecedented excitement and revisions in quotations on the various grain markets during the week, but the market on flax has not resulted in either lower or higher prices being made on linseed oil. Quotations remain as last week, which were:

Linseed oil, raw........	$1.35 per gal. bbl. lots
Boiled.......	1.38 per gal. bbl. lots
Turpentine	.85 per gal. bbl. lots
	88c per gal. ½ bbl. lots
	90c per gal. 5 gal & 1 gal lots

FOR SALE

HARDWARE BUSINESS IN HAMILTON for sale, including stock, fixtures and dwelling. Cash deposit required, security for balance. Best reason for selling. Box 426, Hardware and Metal, Toronto.

Why Merchants Should Keep Their Stock Up For Spring and Summer

LATEST advices from the various quarters, from whence comes the raw material and finished products, indicates that present prices will be well maintained for a period of several months, with a tendency to higher levels. This, however, is not the disturbing element that has entered into business. Conditions have arisen whereby it is becoming more and more apparent that even if goods are ready to ship, railroads are not in a position to accept the freight. Munitions, coal, perishable goods, and the necessaries of life, are being given the preference, and the freight shipments on these lines are considerably heavier than in normal times.

Added to this, shortage of motive power—which in itself is assuming serious proportions—car shortage, and last, but not least, labor shortage. These, together, have made conditions on the railways such that embargoes are being placed on nearly all points from time to time. It has now become necessary to obtain permits from the headquarters of the different railroads in order to have them accept car shipments, a condition vastly different from normal times when their agents scoured the country for business. A visit from one of these gentlemen to a shipper's office is as rare as the proverbial hen's tooth.

Because of the foregoing reasons, and many more, merchants should not hesitate to take in spring and summer lines at once when offered, particularly if such lines carry a forward dating. It is safe to predict that when the season arrives, both manufacturers' and jobbers' stock will be slim.

Such lines as harvest tools, lawn mowers, spades and shovels, screen doors and windows, spring hinges, ready roofing, black wire screen cloth, galvanized poultry netting, garden hose, hammocks, baseball and other sporting lines, corn planters, scythe stones, Paris green, etc., which are given a dating should be taken in at once or as soon as your jobbers can make shipment. There is nothing to loose, and much to gain by carrying out this advice. Unless war should suddenly cease present prices will be not only maintained but all signs points to higher prices for some time to come.

WARNING TO SUBSCRIBERS

Some months ago we decided to have returned soldiers look after the securing of new and renewal subscriptions, as far as possible, on our publications. These men have been very successful at the work, and with few exceptions have proven honest and reliable.

We are sorry, however, that it has become necessary to warn subscribers and others not to place business with a returned soldier named A. F. Clarke. He is tall, broad-shouldered, has protruding eyes, and is about 25 years of age. We believe he has with him another returned man by the name of Lewis, who is short and dark.

Subscribers are warned against giving renewals to these men, as they have not been turning in their orders for the past three or four weeks. You will confer a favor on us by calling us over the long distance immediately and letting us know where these men are working.

Financial Paper is Dropped

The Provincial Association in Their Meeting at Stratford Decide to Sever Their Connection With This Organ and Will Use Bulletins to Disseminate Information

IT has been definitely decided that the *Journal of Commerce* shall no longer be part of the working machinery of the Ontario Provincial Board of the Retail Merchants' Association. As intimated in HARDWARE AND METAL a few weeks ago, there has been a growing feeling that this journal did not meet the requirements for which it had been adopted, as the official organ of the association, and as a result the Provincial Executive meeting at Stratford, Ont., on Thursday evening, Feb. 1, acting on the recommendation of the Provincial Secretary, decided to sever the connection that had existed between the association and this journal. This action was taken after a very brief discussion, practically the only criticism voiced being that the *Journal* had not proved a satisfactory medium, through which to reach the different members of the Provincial Association.

As the matter now stands, the *Journal* will be continued for the time being, to such members of the association as demand it. It is understood, however, that there are very few subscriptions to be so continued. For the rest, the association washes its hands of the matter. D. W. Clark, when spoken to by a HARDWARE AND METAL representative as to the basis of settlement for subscriptions already taken, stated that this was not a matter over which the association had any control, it being entirely a private matter between Mr. Beaudry and the *Journal of Commerce*.

Association to Issue Bulletins

In place of this organ, the Provincial Association will from time to time issue bulletins dealing with the matters of more vital interest to the members of the Provincial Association, and will also depend upon the trade press to co-operate with them in the work of disseminating information of value to the individual members.

New Bulk Sales Act Amendment Endorsed

The proposed new Bulk Sales Act was also taken up, and the draft of the new bill was heartily endorsed by the association.

Other matters of routine business were also discussed.

The members present evinced a very enthusiastic interest in all the work of the association and very optimistic reports were given. The names of 55 new members were received at this session alone.

THE BORROWER'S RIGHT TO SPPEND

The Financial Post

In laying plans to extend foreign trade after the war manufacturers of Great Britain have made one suggestion which will not meet with approval in the dominions. It is that when loans are made to the members of the Empire family there be a restriction that the funds, or a certain portion of them, be expended for British goods. Such a course may be the idea of the British manufacturer for cementing the relations between the dominions and the Mother Country but the borrower will have an entirely different opinion. When capital is secured from Great Britain or any other country the conditions of the future promise to be the same as in the past. Capital will go where is offered the maximum of security in relation to return. British sentiment for Canada is no more a factor in sending capital to this country than is the hope that Canadian sentiment for Britain would see its safe return—plus dividends. Inter-Empire relations have in the past been encouraged by favorable tariff arrangements and the same will undoubtedly be true—probably to a much greater extent—in the future. This is as it should be if artificial means are to be taken to strengthen trade within the Empire. Discriminating against the borrower in London as to how he shall spend the money for which he is paying in interest is an entirely different matter. It is contrary to recognized business principles and would be almost certain to result in higher prices being charged where competition had been eliminated. If the consumption of British goods in the colonies is to be encouraged let it be by tariff regulation applicable to the whole community rather than by discrimination against the borrower. Inter-Empire trade will never be established on a healthy basis if surrounded by restrictions of the character proposed.

To the Man between the Retailer and Livingston Oil

Your business is to sell, and to sell at a price which spells profit; that's only human and very necessary.

In the case of oil (boiled or raw linseed), it may be just as easy to sell one oil as another to the uninitiated retailer, but to the man who knows it's much easier to sell Livingston Brand, for he knows that the name **Livingston** stands for unsurpassed, in fact, unequalled quality.

The Livingston trade-mark represents the boiled-down and refined result of over half a century of oil making. It ensures you the continued trade of your patrons, and after all the repeat business is the only business that pays in the long run.

Jot these points down in your notebook:—

1—Livingston Oil has been made in Canada for over half a century.

2—It is crushed only from matured, well-seasoned flax seed.

3—The seed is seasoned in specially prepared wooden bins, not in concrete or metal, which are susceptible to temperature changes.

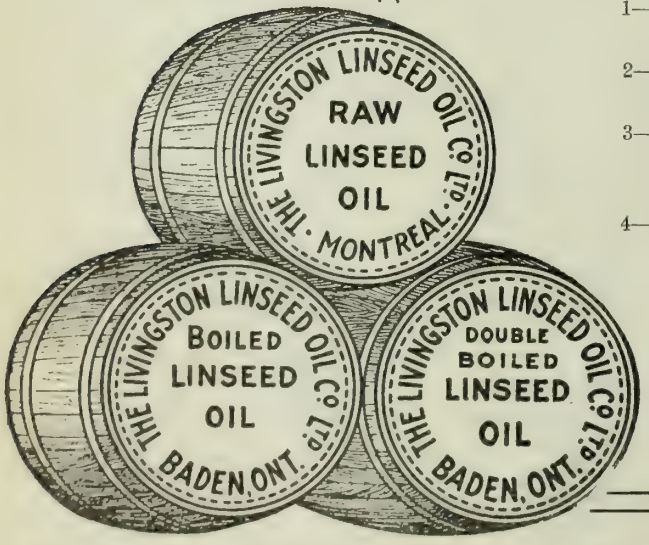
4—Every gallon of Livingston Oil is well aged before being barrelled.

For your own protection and in the interest of your retailer patrons, supply them with

LIVINGSTON BRAND LINSEED OIL.

The Dominion Linseed Oil Co., Limited

BADEN TORONTO MONTREAL



If interested, tear out this page and keep with letters to be answered.

To the Manufacturer of Paints and Varnishes:

Of the various ingredients which enter into a gallon of oil paint, perhaps the most important is the linseed oil. Upon it depends the lasting quality of the paint and the smoothness with which it flows from the brush.

The use of Livingston brand Linseed Oil is a guarantee to the retailer that your paint will give the utmost satisfaction to his customers.

Livingston oil is the standard—the result of long experience in making, unlimited buying, crushing and storing facilities which ensure perfect ageing before it is shipped to the manufacturer or jobber.

You won't hesitate to specify Livingston Brand oil in the preparation of your paints and varnishes after you have learned the real value of this oil.

Don't overlook one of the greatest selling arguments you can have—"Livingston oil used in your paints and varnishes."

Look into the merits of this brand of oil to-day.

WEEKLY PAINT DEPARTMENT

J. H. McNulty, New President of Pratt & Lambert

Succeeds W. H. Andrews, Who Becomes Chairman of Board — Other Important Changes Made—All the Executives Have Advanced from Subordinate Positions.

J. H. McNulty, general manager of Pratt & Lambert, Inc., has just been elected to the presidency of that company, succeeding W. H. Andrews, who has been the chief executive since 1907. Mr. Andrews becomes chairman of the Board of Directors. He has been associated with the firm for over twenty-five years.

Mr. Andrews traces his business career from the day he came from his home in Maine, looking for work in the city of Boston, with but eight dollars in his pocket. His first connection was with a paint concern at the princely salary of $5 a week. From such a humble start, Mr. Andrews joined Pratt & Lambert, Inc., September 1, 1891, later assuming the management of the Chicago office and factory, the building of which was done under his direction. Mr. Andrews' rise in the company was rapid, as he was next made treasurer and general manager, and finally president. Mr. Andrews was treasurer and general manager when the Buffalo plant was first opened in 1902, and his tireless efforts have been largely responsible for the development of the chain of four big factories in the United States and Canada. He is still a comparatively young man, and does not expect to lessen his activities in the company's affairs.

W. H. ANDREWS.
Chairman Board of Directors, Pratt & Lambert, Inc.

J. H. McNulty takes up the office of president, for which his long and active service with the company and his recent remarkable work in the office of general manager make him eminently fitted. Mr. McNulty's accession to the presidency will occur within a day or two of his twenty-fifth anniversary with the concern, as he first entered the employ of the company on Feb. 2, 1892, assuming at that time the duties of general office man and bookkeeper. In time, Mr. McNulty was made manager of the Chicago office and factory, later coming to Buffalo, and being made secretary, then, in addition, treasurer and general manager, and now president.

The office of vice-president will be filled by J. N. Welter, who is resident manager of the Chicago office. Mr. Welter came with the company in 1895, and was in turn bookkeeper, salesman, assistant resident manager and resident manager before receiving his present office.

J. B. Bouck, Jr., resident manager at New York, succeeds J. H. McNulty as secretary and treasurer. Mr. Bouck, too, is an old Pratt & Lambert man, having started in 1893 as office boy and he also was on the road for some time and later held the offices of assistant resident manager and resident manager. One more member of the Board of Directors has been added in the person of J. P. Gowing. Mr. Gowing has been with the company for nearly 25 years, and is at present head of the railway sales department.

F. W. F. Clark, of London, who has held the office of vice-president, has resigned this position, but still remains a member of the Board of Directors. Mr. Clark recently made the trip from London to attend the company's convention held at Buffalo.

The rise of these executives, all of whom are young men, to their present prominent positions, is a telling argument for continued employment in one organization. All of these men started in subordinate positions and have attained their present high offices through the experience gained from thorough familiarity with every detail and department of their business.

J. H. McNULTY.
President and General Manager, Pratt & Lambert Inc.

The Hall-Mark of Paint Quality—

The Crown and Anchor Brand

TRADE MARK. POLIO

Jamieson's Pure Prepared Paints and Varnishes

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, February 7.—Linseed oil is still the factor of excitement in the paint trade. Lead is also exceptionally interesting, and the combined result is an outlook that contains distinctly the hint of advancing prices for white lead in oil. No one is willing to predict this advance as something definitely coming but beyond doubt the conditions would seem to justify the advance in the minds of most men concerned. Mixed paints are said to be likely to maintain steady prices for the spring trade at any rate. Shellacs are higher again. Glass and putty are not changed in price but are in exceptionally firm market. Hopes are held out for a better linseed oil situation before long. Spring paint orders are coming is very well at present.

White Lead in Oil Seems Due for Rise

WHITE LEAD IN OIL.—Probably the battle of the markets rages hottest this week in the minds of manufacturers and merchants around white lead in oil. They claim there is justification for, and every prospect of an increase in the price of white lead in oil at the present time. White lead in oil reached its first record high price for the Canadian market in the month of March 1916. At that time pig lead was quoted at $6.75 per 100 lbs. and linseed oil was quoted at 95 to 98 cents per gallon. The price then considered a record high for white lead in oil was $13.80 per 100 lbs. on the ton basis. In December 1916 pig lead went nearly a dollar per hundred higher, and was quoted at $7.65 per hundred, and linseed oil went to $1.15 and $1.20 per gallon. This caused white lead in oil to reach its present price scale of $14.30 per 100 lbs. on the ton lot basis. To-day pig-lead is quoted at fully another dollar up, and linseed oil is not even buyable at $1.22 to $1.25. The situation is causing undoubted concern to the manufacturers, and there is every possible prospect of a further advance in prices of white lead in oil before very long if conditions maintain as at present. Dry white lead has already registered an advance of fifty cents per 100 lbs. due to the metal market conditions, but in the opinion of those in closest touch with the lead situation the whole market for the metal is so very stringently placed at present that predictions while apparently well justified by conditions might be upset by some totally unprecedented factor. "What is behind the advance in lead?" ask men in daily touch with the markets, and they look rather anxiously into the future for the metal market in this line.

Linseed Oil Still In Vexed Situation

LINSEED OIL.—With the situation as regards linseed oil even more stringent than it was last week, there is little wonder that no one is doing anything to find a market for any linseed oil stocks that may be discoverable. Those who have linseed oil in stock are carefully conserving it against the needs of the moment and of the future. This applies as much to the crushers as to the large paint manufacturers. It is almost impossible to book orders for future deliveries of linseed oil just at present; even the retailer who requires a small quantity is not sought for as a buyer, and though the firms having a little more than enough linseed oil for their own immediate requirements might be willing to oblige a man in real need of a small quantity, they would probably prefer not to have to part with any of the precious liquid. The situation is due for the most part to the operation of railway embargoes in the West. Out there the elevators are steadily filling up with flax-seed. The harvest while not abundant to the point of any glutting of the very eager market that exists for this product owing to Argentine crop shortage, was still quite a good one, and the farmers are moving the flax seed along now. The result is a gradually growing congestion of the elevators in the North West because the railways cannot carry out the seed in any considerable quantities. This week a couple of car-loads of flax seed reached Montreal, a mere drop in the bucket as compared with requirements here, and crushers are simply not quoting prices at all. Partly as a result of the congestion in the North West flax seed prices are quoted easier in Winnipeg, and $2.53¾ was recorded early this week a drop of several cents as compared with last week's quotations. Crushers were in the middle of the week able to express hopes that there would be some relief in sight towards the end of the present week or the beginning of next week. This relief would not probably take the form of any reduction in prices, but might remove the anxiety of the market as regards securing supplies at all in reasonable time, and would therefore enable the merely nominal quotations of the present time to become more practical:

Linseed oil	Raw.	Boiled.
1 to 4 barrels	$1.22	$1.25
5 to 9 barrels	1.21	1.24
10 to 25 barrels	1.20	1.23

Turpentine Not in Eventful Market

TURPENTINE.—Market conditions as regards turpentine are this week still rather uneventful. It would seem as if the more impressive nature of the behaviour of linseed oil had rather reduced immediate interest in turpentine, but the market for turpentine is still reported steady. There is a good general demand for turpentine considering the fact that linseed oil is so scarce, and prices remain as quoted last week. It was not anticipated that there would be any further firmness in the immediate future, but with war-clouds gathering over the United States the outlook was regarded as rather uncertain, and unsafe for any attempt at definite prediction. Following are the quotations:

Turpentine	Per Imp. Gal.
1 barrel lots	79-82c
2 to 4 barrels	78-81c
5 to 10 barrels	77-80c

Mixed Paints Not Likely to Rise

MIXED PAINTS.—With raw materials taking rather a mean advantage of the manufacturer, and growing for the most part firmer in price all the time during the present season when to alter mixed paint prices would be most unusual, and most disturbing, the situation as to mixed paints is from the retailers point of view fairly satisfactory, and from the manufacturers' point of view rather less pleasant. There is in the opinion of many manufacturers quite enough justification for an increase in paint prices, but the chances are that short of something like an earthquake under the steadily firming

Follow the Line of Least Resistance

Paint widely advertised and favourably known is half-sold.

If you stock it, your turnover is more frequent. You do not have to try so hard to sell it, and can devote more time to promoting the sale of other merchandise.

Follow the line of least resistance and sell

B-H "English" Paint

because it is advertised so much, and known so well that it moves frequently and profitably.

Its reputation, based on satisfactory performance, is being brought home to your customers daily in the newspapers, magazines and bill-boards.

You can cash in on this advertising every day if you are one of our agents.

If we are not represented in your town, we will be glad to hear from you.

BRANDRAM-HENDERSON LIMITED

Montreal Halifax St. John Toronto Winnipeg

If interested, tear out this page and keep with letters to be answered.

raw material prices mixed paint prices will not alter in any hurry just at present. Spring orders are coming in fast and there will not be two prices for paints ordered for spring. The situation throws the burden of enhanced raw material costs upon the shoulders of the manufacturers of paint for the season at all events, and the retailer and consumer have the benefit in the meantime.

Varnishes Show Advancing Trend

VARNISHES.—With shellac very scarce and in firmer market trending constantly towards still firmer on account of ship shortage and the uncertainty of marine transportation, varnishes are certainly not likely to come down in price. Shellac has in fact shown further advances during the week, being about fifteen cents per gallon more costly now. Both the spirit and the shellac are dearer. It is said to be most difficult to get any supplies of spirit at all as the market for this is so much better in the direction of munitions. But the makers are keeping their faith with the steady paint trade knowing that there is a war-free future sometime, and a little ordinary business in spirit is available. Shellac prices quoted in Montreal this week were $3.00 per gallon for orange, and $3.25 a gallon for white in one gallon jars. For larger quantities $2.65 was asked for orange, and $2.90 for white by another firm.

Glass and Putty Firm, But Unchanged

GLASS AND PUTTY.—No changes are reported this week in the markets for either glass or putty, but both markets are extremely firm, and it would not surprise the trade to hear that glass had gone higher in price, and putty also. The raw materials for putty are in steadily firm market, whiting being scarce and importation hampered heavily by marine troubles, while linseed oil is in the clouds as regards price. Glass trade conditions are also towards extreme firmness if not an increase in price before long. Putty prices remain as last week for five ton lots in bulk in barrels $2.90 per 100 lbs.; in iron drums $3.35 per hundred pounds, and in bladders in barrels $3.60 per 100 lbs.

TORONTO

TORONTO, Feb. 9.—The outstanding feature in paint and oil circles during the week was the advance in linseed oil of 15c per gal. There has been no improvement in getting flaxseed from the Northwest and crushers have accordingly met the situation by limiting sales to their customers. There has been considerable inquiry for linseed oil during the week

Linseed Oil Makes Advance of 15c Gallon

LINSEED OIL.—Following the firmness in the market for linseed oil that was noted in the course of a special article in HARDWARE AND METAL last week an advance of 15c. per gallon has taken place. Raw linseed oil in one to two barrel lots is now quoted at $1.35 per gallon. The situation with the crushers continues to be a serious one in the matter of getting seed forwarded from the Canadian Northwest, due to embargoes on the movement of that commodity by the railways. Crushers still refuse to quote on any new business and for the most part are confining their attention to looking after the needs of their customers. There has been considerable activity in the linseed oil market during the week, inquiry being keen when a realization of the situation became more general. Some dealers were out of the market altogether during the week, not caring to quote prices to the end that they might conserve their stocks. The freight situation is the dominating factor in this market at the present time. There have been lower prices paid during the week for the cash flaxseed at Winnipeg than at any time since the beginning of the new year. On Tuesday of the present week the seed sold at $2.50¾ per bushel, which represents a decline of 11½ cents over the closing price on Tuesday of last week, when the price was $2.62¼. During the week there was a persistent inclination toward lower levels for the seed. But in spite of this weakening in the flaxseed there has been a firm tendency in the oil situation as is evidenced by the higher prices. Until relief comes to the Eastern crushers in the way of supplies of seed there will in all probability be a firm tendency in this market. Following are the quotations:

	Raw, Per gallon	Boiled, Per gallon
1 to 2 barrels	$1 35	$1 38
3 to 5 barrels	1 34	1 37
6 to 9 barrels	1 32	1 35

Turpentine Affected in Primary by Submarines

TURPENTINE.—In the primary markets in the Southern United States there has been an easier feeling in turpentine owing to the submarine policy that has been inaugurated by Germany. The effect there was almost a total cessation of buying orders at Savannah, exporters preferring to await developments before coming into the market again. War risk insurance from the port of Savannah jumped fifty per cent. and this also had a tendency to shut off the export trade. On February 3 there were 21,000 barrels of turpentine on the high seas on their way to London in the Norwegian S.S. "Liff" and the British S.S. "Arachne." In the face of this situation the market in the south was dull during the week with declines noted. In accordance with this primary condition the local situation developed weakness, although there were no actual declines.

	Per Imp. Gallon
1 barrel lots	$0 77—$0 81
2 to 4 barrels	0 76— 0 80
5 gallon lots	0 82— 0 88

White Lead in Oil Market is Very Firm

WHITE LEAD IN OIL.—There is an increased firmness in the market for white lead in oil owing to the advances that have taken place recently in pig lead and linseed oil. In the New York market pig lead is quoted at $8.50 per hundred pounds, which represents an advance of 75c. per hundred in a period of three weeks. Linseed oil, on the other hand, is now at record levels with small prospect of being able to get supplies of seed forward from the Canadian Northwest owing to the embargoes that are on the carrying of the seed by the railways.

Forward Bookings on Mixed Paints Satisfactory

MIXED PAINTS.—Some of the large paint concerns report that bookings for future delivery of mixed paints have been very satisfactory. There was doubt during the first part of the season as to the effect that high prices would have on the sale of paints. Paint dealers in some instances are of the opinion that dealers and consumers have now become accustomed to higher prices for these commodities and that higher prices no longer frighten them. In the face of the firmness in the market for linseed oil and the scarcity of other raw materials there is a continued firmness in all mixed paints. Varnishes are also in firm market due to the linseed oil situation.

Glass Prices Have Been Moved Upward

GLASS AND PUTTY.—Some dealers have followed the lead set by one concern three or four weeks ago and have changed their discount on glass from 20 per cent. off list to 15 per cent. off list. Reports from the producing centres in the United States are none too encouraging. Representatives in this city have been advised that all plants in West Virginia have been idle for several days through the shortage of gas. As a result the working efficiency of the factories has been greatly retarded and they will have to run at a disadvantage for several weeks. Demand for glass locally is fair. Putty is in firm market, but high prices now prevailing make the manufacturers slow to advance still further.

Two Good Ladders

The Hercules
The Faultless

HERCULES

The HERCULES is absolutely the strongest and safest stepladder made. Will carry a weight of 3,000 lbs. Steps and top wide and strongly trussed.

FAULTLESS

The FAULTLESS is a great favourite with electricians, plumbers, painters and paper hangers, because it is so reliable. Has wide steps and is very strongly and carefully made.

Our catalogue describes these ladders at great length and illustrates other ladders and woodenware specialties. Send for it. It is useful and can be made profitable.

CP
TRADE MARK

Making it Easier for You to Sell Paint

Quick turning of your paint stock means more profits and less investment. Therefore it is to your advantage to handle a brand of paint products that your customers have been educated to demand because of its quality and the satisfaction in using it.
The shortest route to bigger sales and profits is through the

Canada Paint Agency

Practically every paint user in Canada is being taught the economy of using Canada Paint and to know how and when to use it for the greatest satisfaction.

Canada Paint "Full Line Agents" are profiting by this intensive sales promotion and are fast gaining control of the paint and varnish trade for their districts.

If you want to know the full particulars of the fastest selling and most profitable line of paint products on the market, we shall be pleased to have your request.

Our 1917 promotion will be worth many dollars to you.

The Canada Paint Co., Limited

572 William Street, Montreal
112 Sutherland Ave., Winnipeg

RUB-R-TITE PATCH

RUB-R-TITE Patches come in sheets 4 x 12 inches (in each 50c carton), and are made in four fabrics; special rubber, mohair, black drill, drab drill. Each counter case of 12 50c cartons contains an assortment of 3 of each kind. Remove linen coating from the adhesive side, apply same as plaster to size of tear. Cements itself quickly to any surface; waterproof, permanent, economical.

Mends torn, leaky auto tops easily, quickly, permanently, inexpensively, whatever the size of the tear or hole—whatever the material; leather, rubber, mohair, pantasote, or drill—this RUB-R-TITE PATCH will do it to the owner's entire satisfaction: or money back.

Mr. Jobber---Mr. Dealer---if in 30 days

a counter-case box doesn't sell, send it back and we will cancel our invoice. This is an offer we can make because, after a 12-months' trial, we know this article is a **quick, sure seller** in any kind of an auto supply store. Now then—send us your order to-day—now.

$4.00 for (1 doz. 50c. assorted patches) counter case, retailing for $6.00 or 33⅓% for the dealer. Jobber's discounts on request.

Write for more information if you like, but send in your trial order at once. Address

Re Gauges and Prices of Sheets.

Prices which follow on black and galvanized sheets are purely nominal. The market has reached a state where prices are quoted only on application and for immediate acceptance.

On account of it being practically impossible to secure galvanized sheets from England, owing to the war, American mills have decided that they will no longer roll the English gauges to meet this competition. However, they will continue to roll at 10¾ oz., which will be known as such or a 30 gauge, and will take the place of the former English 28 gauge.

SHEETS (BLACK)

	Montreal 100 lbs.	Toronto 100 lbs.
10 gauge	6 00	6 00
12 gauge	6 00	6 00
14 gauge	5 40	5 40

The CROWN DIAMOND PAINT *Products*

A complete line of Paints and Paint Specialties for practically every purpose.

The New-Old line of purely Canadian household paints used continuously by three generations.

CROWN DIAMOND PAINTS have endured the severest tests of time and wear, since 1842. What better proof could be had of their reliability? They still maintain the confidence and reputation which they gained long ago.

CROWN DIAMOND PAINT is a high-grade paint at a price which allows the dealer a fair and satisfactory margin of profit—a profit more generous than the average. The price advantage is made possible by our position as manufacturers and importers of heavy chemicals, the manufacture of our own dry colors, and particularly to the low-selling cost, due to having the one sales organization for chemicals, aniline dyes and paint. This works to the advantage of the dealer by giving him a little relief from the present abnormal prices.

The CROWN DIAMOND advertising has been built on a different plan from that usually followed. It contains many unique and unusual features which are the result of an investigation of the methods used by a number of successful retail merchants. The features are exceptionally generous, and are planned from the viewpoint of the local retail merchant, and the one object in view is to help the dealer sell more paint.

Let us show you how our agency plan will enable you to make a larger profit.

The National Advertising of PRATT & LAMBERT VARNISH PRODUCTS is Making a Pathway to YOUR Door

PEOPLE want Pratt & Lambert Varnishes. And they order them from the dealers who stock them. They do this because the super-quality of these goods and the great national advertising makes them want them. The effectiveness of this advertising is shown by the remarkable and consistent gains in the yearly sales of Pratt & Lambert Dealers everywhere.

Your business instinct will tell you that it is good merchandising to stock a line which has *proved its right to be famous* by sixty-eight years of constantly growing popularity — yet whose makers have never for a moment rested in their efforts to make its name even better known and its quality even more worthy. This is the established Pratt & Lambert policy; and it is a policy which can *make money* for you.

THE people who read the magazines are the successful people — the home-owners — the spenders. Pratt & Lambert advertising has been going continuously for many years into more than six million homes of this character. Every day huge purchases of varnish and enamels are made by this vast multitude of buyers — and what is more natural than for them to seek out the paint and hardware stores which sell *the goods best known to them?*

Get Your Share

of the great and growing sales from which P&L Dealers everywhere are getting Big Profits. Write for the Pratt & Lambert Dealer Proposition — and do it today — NOW!

Dougall Varnishes Are Standard

and the Quality Never Changes

Every grade of Dougall Varnish is made under a separate and distinct formula, for a certain purpose.

We keep every grade in stock at all times, fully aged and ready for immediate shipment.

No matter for what purpose your customer needs varnish, there is a Dougall product to fill the bill, and you cannot do better than give it your whole-hearted recommendation.

MACLEAN'S MAGAZINE *for* February

Just suppose you were made Editor of MACLEAN'S MAGAZINE for one issue!

WHAT would you provide for your readers? You would probably want some good short stories, and you would like to offer chapters of a good serial. You would want something in lighter vein. Perhaps some verse. Certainly some serious articles of an informative and critical nature. Probably you would want everything—contributions and illustrations—to be by Canadians. Good! But who are they? And could you get their work?

Look at what the regular editor, T. B. Costain, has provided for the February issue of MACLEAN'S:

A serial story by **Sir Gilbert Parker**—"Jordan is a Hard Road."

A short story by **H. G. Wells**—"Into the Abyss."

A complete novelette by **A. C. Allenson**—"Danton of the Fleet."

A gripping sketch of "The Greatest Hotelman in the World"—a Canadian, by name John McE. Bowman, of the Hotel Biltmore, New York; and the man behind the Manhattan Hotel, New York, and the hotel now building in the same city, The Commodore, and the new Canadian hotel, The Devonshire, to be built this year in Toronto. **W. A. Craick** gives the story of this remarkably successful and interesting man—a veritable romance of achievement.

Stephen Leacock is in the February MACLEAN'S with one of his inimitable sketches—this one entitled—"In Merry Mexico." What a fancy, what a humor this man has! He roams the earth, and always is visiting some land or country in the spotlight of the world's history.

Then Editor Costain has **Miss Agnes C. Laut** in the February issue with a timely and thought-provoking article, "The Elections and Canada." She is writing of the American elections of last November, and in her virile style and with her amazing inside knowledge of things political, she gives all Canadians much to think about, and a wider vision of the place Canada holds in world affairs—dwelling especially on the new Anglo-Saxon relations which will be the result of the war now being waged, and which gives promise of involving the United States. Miss Laut's contribution is well worth reading.

H. F. Gadsby, free lance, ever a-tilting at politicians and politics, and never failing to get under the guard of parties and partisans, writes sparklingly on "How Premiers Control Their Cabinets" — of piquant interest in view of Sir Sam Hughes's recent encounters with Premier Borden. Gadsby studies other Canadian Cabinets than those of Premier Borden's. Good reading, this.

Then Editor Costain starts in this February issue of MACLEAN'S a new department—snappy biographical sketches and zestful stories of notable and interesting Canadians. You will enjoy this yourself and so will all others to whom you may introduce MACLEAN'S MAGAZINE.

The usual departments—Review of Reviews and "Information for Investors"—are present as usual; and illustrations by these Canadian artists, C. W. Jefferys, Harry C. Edwards, Lou Skuce, E. J. Dinsmore, assist to give the February MACLEAN'S *distinction and appeal.*

Now if you have been keeping in mind yourself—as a possible editor of MACLEAN'S MAGAZINE for a single issue—do you think you could excel or equal what the regular editor has provided for MACLEAN'S readers?

At All News-Agents, Fifteen Cents

MARTIN-SENOUR
PAINTS AND VARNISHES

MADE IN CANADA

SOLD ON MERIT

Preparation for the Big Spring Drive

Just now Martin-Senour Dealer-Agents are taking delivery of their annual spring specification orders, which will provide them with ammunition to clean up the greater share of the paint and varnish trade of their district.

The Martin-Senour Company is bending every effort which splendid facilities provide for in hurrying forward these orders. In view of congested freight conditions and uncertainty of delivery on raw materials, the anxiety of the dealer is being relieved and satisfaction expressed in the splendid service we are rendering. A good full stock of every necessary line of our products in hand now may be the means of avoiding disappointment and loss of sales later on.

We are about to swing into action with the most aggressive sales promotion campaign on behalf of our dealer-agents' interests we have ever planned.

Quality, the best weapon, will be reinforced with a wide publicity campaign through the most largely circulated mediums, such as newspapers, magazines, farm and religious journals, etc. Our consumer mailing campaigns — right plumb — and follow-up systems will be sure trade-getters.

Display material for both interior and exterior use will be attractive and trade-winning.

We positively know and records prove that Martin-Senour quality and sales helps are unequalled. Dealers whose interests are linked with ours are the ones to whom success is assured.

It is not too late to join the winning class for 1917. Just drop us a line for our attractive proposition.
